MII,

Actually most of the good old fashion "International Communist"
[Socialist One Worlders] are what is now being called NEO-DEMS
and they form the backbone (Hard-Core) of the Political Cadre of
the Democrat Party of the USA.
{These are a "Stalinist" Faction of the Neo-Dem 'The Movement'.}

For the most part these NEO-DEMS are ELILIST who believe that
their "Special Knowledge" places them above the 'common people'
as Leaders {Overseers} of Thought and Deed [.]

One "Cause" that the NEO-DEMS 'champion' is "Environmentalism"
as a means of using an Issue to Gain Power and Control over
the Masses; and Dictating "How People Act and Live" according
to the 'Environmental Dogma' of the Leadership of 'The Movement'.
{These are a "Maoist" Faction of the Neo-Dem 'The Movement'.}

so say i, my opinions stated as facts ~ RHF

Well, on "The National Interest" this week on Radio Australia, Terry Lane interviewed Barbara Ehrenreich (sp?), author of "Nickeled and Dimed" (and a ton of other books).

She pointed out the the large modern fundy church* closely parallels Hamas in structure, as they provide schools, day care, health clubs, and even living quarters for their members, in addition to forming a tight business network in the local community. She also speculated that the opposition to government funding of things like daycare is to stop any competition to their own operations.

*(What I call a Plastic Church, the kind out in the burbs with five thousand members or so).

Mike--what do you listen to on shortwave? I listen to Int. Broadcasters mainly. What do they broadcast? News correct? What is news. Lot a politics in News you know what I mean? If wasn't for the Politics and related stuff I wouldn't even listen. Why isn't politcial stuff (opinions granted) appropriate for this group?
I like hearing opinions from other people and countries. Quite frankly the technology of shortwave is only so big and only so interesting. What Shortwave brings to people is even more interesting. Different points of view. Quit trying to discourage this. Let it happen brother. There are some excellent major contributors to this group--give them respect my brother. Get off of their backs.

- - - - - S N I P - - - - -

LM,

One 'dynamic' of "9/11" was for many Americans to do a Self
Assessment of 'Who-They-Are' ? ? ?

Most self-identified themselves by their life experiences and
family histories as 'basically' be Christians in their Beliefs.
[As 'contrasted' to Islam and Atheism.]

In Doing So: Identifying themselves as 'secular' Christians in
their basic "Beliefs": These Americans "Voted" their 'personal'
deeply held "Fundamental" AMERICAN Values.

LOOK AT IT THIS WAY:

About 1/3 of American Citizens (Voters) would 'identify themselves'
as "Practicing Christians" {Weekly Church Going Christians}.

About 1/3 of American Citizens (Voters) would 'identify themselves'
as 'secular christians' as reflected by "Their" Personal Life
History and the American Culture and Traditions "They" Observe.
{Attend Church at Christmas and Easter; and Get Baptized and
Get Married in a Church.}

About 1/3 of American Citizens (Voters) would 'identify themselves'
as something "Other". Such as: Jewish, Islamic, Buddhist, Hindu,
or may be an Agnostic; or possibly an Atheist.
- Many of whom LOVE Their Country !

This Is WHY I Said: Most (Two-Thirds) would 'self-identified'
themselves by their life experiences and family histories as
'basically' be Christians in their Beliefs.
[As 'contrasted' to Islam and Atheism.]

You may wish to Label them as "Fundamentalism" Christians.
But most whould simply say: "Hey Your Right, I 'am' a Christian !"

well that is my 'theory' - what more can i say ~ RHF
.
.
I can agree with John 'ff' Kerry on one thing:
"God Bless America" amen, Amen. and AMEN !
.
.

The coordinates for the island were given to the surfer (who rode the tsunami into the lagoon and back to Hawaii) by the professor. I don't recall the exact coordinates but it wasn't any where near Hawaii when I plotted them out.

SD,

Good 'old fashion' (Tried-and-True) "Analog" AM International
Broadcasting {Long Distance} may have it's FADE and Weak Signals.
- Remember Analog Celphones ?

DRM "Digital" AM Broadcasting AM International Broadcasting
{Long Distance} has it's Signal Drop-Off.
- Its Here (Can be Heard) "Great Sound" and then Its Gone [.]
- Think of Digital Celphones !

DRM may be good and useful for In-Country 1000 Mile Broadcasting;
but for "Around-the-World" International Broadcasting it offers no
real advantage in Punching the Signal Through and Getting Heard.

NOTE: Single Side Band (SSB) Transmissions do a better
'energy efficent' job and has a real advantage in Punching
the Signal Through and Getting Heard.

The Most Cost-Effective-Method and the Trend for Governments and
'others' who want to get their Message-Out to the Masses of other
Countries will continue to be Internet Broadcasting "On-Demand"
Streaming Audio that is THERE when the Listener Whats to Hear It;
and Host Country Re-Broadcasting via 'local' AM and FM Band Radios;
or via "In-Country" Shortwave Relays.

Yes, still pissy bands, but it did sound like they were picking up
this afternoon. I was listing to 40 meters today while out to lunch
and hearing quite a few signals where it was totally bad yesterday.

Expect the bands to still be broke tonight but probably better than
last night which was better than the night before.

Good luck! CU on the bands

I am looking to buy a good active antenna..
i have looked at a few Antennas on the net.
but you can look all you like there is nothing better than advice of current
users.. the main two antennas i have been looking at are.
dressler Active antennas and also wellbrook Active antennas
the wellbrook is an active loop antenna for HF use.
the dressler is a short active vertical...
what is the better antenna users comments only please.
if i buy the wellbrook active loop would i need to mount this on a rotor.
or can anybody recommend a better Active antenna to buy.
i have about ?250.00 to spend on the antennas and any cabling and connectors
i may need to buy.....
i am living very close to Heathrow airport in the uk .
i am using an AR5000 receiver ....
any advice would be more than welcome...
Thanks: john

Because this isn't a political newsgroup, brainiac.

>I like hearing opinions from other people and countries. Quite frankly the
>technology of shortwave is only so big and only so interesting.

If you're not interested in the newsgroup's real purpose, then you're
not required to participate here.

You need to realize just because you can hear certain types of
programming on a radio that it doesn't make this newsgroup free for
every single topic under the sky. What the hell would be the point to
having 100,000+ newsgroups if everybody could just post their
off-topic crap here? All they have to say is "I heard it on the
radio." Then, let the deluge of off-topic postings flood out the
shortwave radio related matters and render this newsgroup just about
worthless to people interested in the shortwave radio listening hobby.

Hey folks,

The election was over a week ago. Stop wasting bandwidth posting all
this crazy whiny political stuff.

America has spoken. The Adolph Hitlerites have won. George Bush has a
mandate to massacre anyone, at any time, for any psychotic reason, who
he, in his paranoid, mind thinks may be out to get us now. If you are
not German, or English, pale, pasty white with yellow hair, and blue
eyes, then I suggest you put your will in order immediately.

Right wing Caucasian beasts are making a huge push to take over the
world and slaughter all non white people. when they finish with those,
they will turn on themselves like the wild beasts that they are and
start checking to see whose white enough. If you have a tan, or enough
mixed blood that the people with the weapons can see that you have
some African genetic makeup, then you will be helped to assume room
temperature as well. You are either going to be a part of their
problem, or a part of the solution. If you sit back and do nothing but
play with your radio and play with yourself, the death camp trains
will soon be stopping at your double wide.

So just go clean out and stock your bomb shelter, buy some gas masks,
put plenty of can food in it. Then when the "ELE" arrives, go to the
Southwest corner of your underground shelter, kneel down as low as you
can, put your head all the way down between your knees, and kiss your
arse goodbye!

I don't know what the G protocol is, but I have a wireless network in my
shack, with two Macs hardwired to a router, and a Windows 2000 laptop with a
wireless card. I have noticed an increase in interference since its
installation about two months ago. My (simple) solution? Turn off the
router. Interference gone. Problem solved.

Programme guide received awhile back; Winter 2004-2005.

Somethings funny about the group shot! Seems to be plenty of regular RN staff missing! Michele Ernsting still in fine shape (kiss).

Radio Havana Cuba, The Gran Caribe Hotel chain, Cubana Airlines and the Cuban book institute, invite you to participate in a contest: The 14th Havana International Book Fair

Participants should answer the following questions:

Which country will the book fair be dedicated to in 2005? Which Cuban authors will be honoured?

The prize for the correct answers will consist of a one week all expenses paid trip to Cuba and participation to the fair.

There will also be 10 special mentions consisting in Cuban literature and gifts from the sponsors of the fair.

The contest expires January 31st, 2005.

Send your answers to:

Radio Havana Cuba

President Joseph C. Emert sent me this information, by snail mail.

Thank you for your note about Wantok Radio Light in Papua New Guinea. The shortwave radio station is scheduled to go on the air around January 8, 2005. It will broadcast at 7210 khz.

While it is doubtful that it will reach you in Austria, it would be interesting to know if you receive it.

My email adress is jemert@wmvv.com

At the present time we do not have a printed broadcast schedule.

Again, thank you for your interest.

2456. 8993 - Micronesia...

Newsgroup: rec.radio.shortwave
Date: 2004-11-11 23:03:54 UTC
From: Mark <NoSpam@all.thanks>
Message-ID: <1100214216.245696@ftpsrv1>
Source record: 2450

11 Nov 09:10 UTC 8993 kHz USB - "Pohnpei Seventy-Three, this is Micronesia, over". The Pohnpei station replied that reception was difficult. (Both stations were easily audible into Auckland, and the Micronesia station was very loud.) Micronesia recommended a channel change, to "channel 13". A few minutes later, he was back calling "Pohnpei 73" again. But no luck this time, no response from Pohnpei.

Then, at 09:33 UTC, "Micronesia" tries "73" again. No luck. So he tries "72, 72, this is Micronesia for radio check, over". 72 responds, saying its difficult to receive "Micronesia". "Micronesia" says "change to channel seventy-one, over".

Anybody heard this before? One of my radios was parked on 8992, which needs no explanation, when I heard this. These guys were pretty loose with their radio jargon and discipline. Didn't sound like LDOC/AOC.

Mark.

Auckland

New Zealand.

From: dxAce <dxace@eclipsed.net>
Message-ID: <4193F0D1.23BCE94C@eclipsed.net>
Source record: 2452

3-day Solar-Geophysical Forecast issued Nov 11 at 22:00 UTC

Solar Activity Forecast: Solar activity is expected to be low to moderate. Isolated M-class flares are still possible from Region 696 before it rotates around the west limb on 13 November. Low solar activity levels are expected on 14 November.

Geophysical Activity Forecast: The geomagnetic field is expected to range from quiet to severe storm levels. Further transient material from the CME activity on 09 - 10 November may produce active to major storm periods on 12 November, and isolated severe conditions are possible at high latitudes. A return to a more stable geomagnetic field is expected on 13 an 14 November. Occasional active periods are expected on the 13th with predominantly quiet to unsettled levels on the 14th. The greater than 10 MeV proton event that has been in progress since 07 November is expected to end by 13 November.

That is quite correct and not a spin. It basically shows how little
support the 2 party system has and why it should be aboolished

>I also assume that the people that didn't get off their lazy ass to
>vote would have voted for Kerry, very pathetic indeed!

Quite true. The democrats have always had a problem with voters who
don't feel their vote will make any difference, while right wingers
are fundamentalists and fanatics and vote fanatically even after they
are dead. :-)

It does appear so but there is recounting going on in some of the marginal states where "problems" have been discovered like in New Mexico.

>Although consiracy theories
>abound, none of which could hold up to the slightest scrutiny. Face
>it, you lost!

Of course I lost, the whole country lost but since I'm a GREEN, my candidate never had a chance of winning anymore than the Libertarians, Reforms etc etc.

>Perhaps next election the Democrats can pick a leader
>that has a 'real plan', that walks down the middle of the political
>spectrum. Until then, allow this election to serve as a lesson in
>arrogance.

Perhaps the republicans can pick a candidate that when he walks isn't swaggering or staggering. Even if I went with the 2 party system, I would not vote for a man with Bush's drug, booze and criminal history.

2463. VOA - Our World

Newsgroup: rec.radio.shortwave
Date: 2004-11-11 23:29:02 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cn0sjulif1@xuxa.iecc.com>
Source record: 2456
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

Thanks for your note. Sorry you're having trouble with our new
website design.

Over my objections, "voanews.com/ourworld" no longer takes you to the
Our World page. Instead, it takes you to the science and technology
page. The theory is that the visitor will find the latest stories
here, since this page is updated daily. Since Our World is a weekly
program, the Our World page is updated only weekly. (No, it doesn't
make any sense to me either, but I produce a radio program; I don't
have any say over the website.)

There are three ways to get to the Our World page where you can find
audio files. From the voanews.com/ourworld page you can click on the
link to Our World (It's the left-most graphic at the bottom of the
page). Or you can look in the left column for the "Programs A to Z"
section, click on "Find VOA Radio or TV Programs," then click on
"O" and then "Our World." Or, easiest of all and special for you,
just click on the link below:

http://www.voanews.com/english/science/ourworld.cfm

You can download an MP3 or listen to a streaming RealAudio version
of the show.

We're still having many technical problems with the software behind
our website, so please be patient if you find a problem. (And feel
free to use the "contact us" mail form to let us know of any
problems you find.)

Thanks again for writing.

Best regards,
Art Chimes, producer-host
Our World

Idiot.

You aren't listed on my web page either.

That's because it's MY web page, not yours, just like it's QRZ's web page (not yours). You are still on the FCC's web page, for now. I checked today (212-479-7990) and those callsigns are still active.

Mr. Emert probably doesn't know that the CRN station in Vanimo (PNG) has
been logged all around the world with their 1 kw. power, even with their
"cloud warmer" antenna designed to limit reception to the local area. They
continue to be a regular resident of 4960 kHz and heard frequently here.

So you think it's a coincidence that this started right after Bush was selected for the second time? Do you think Bush wants you to hear what's going on? It will take time but eventually we'll learn that Diebold, Halliburton and Sinclair Broadcasting are behind these conditions.

OK,

Little or no education children. You need to know the dictionary definitions of words before you begin throwing them around and accusing people of being thus or so.

You can't just take words and then call someone that word because you don't like what they have to say.

If we are going to play like than, then I can tell the world that Julie and DXAce are sexual perverts queers! I know they are, because they sound that way when they post.

Now that makes just as much sense as you all calling me an A..hole and a rac..t" doesn't it?

I don't have to have any fact. It is so because I say it.

Now my handle is "knowledge" I have plenty of that to share with people. you would be wise to call me that, and I will call you by your handle.

Now here is the correct definition of a "Racist" It fits many people on this forum, but I am not one of them in the negative sense that I seek to harm, or avoid people because of their skin color.

Hey Dx!

Here are some definitions that most people who work a lot in the field of studying white supremacy have agreed to use when discussing race. Take the entire quiz also, I'd like to know how you do.

SOME KEY DEFINITIONS FOLLOW:

BIGOT: A person who is utterly intolerant of any creed, belief, or racial opinion that differs from his/her own.

EQUITY: The quality of being fair and just in dealing with all human beings.

PLURALISM: A situation in which different groups live in mutual respect while maintaining their own identities.

RACISM: AS DEFINED BY Webster's Encyclopedic Unabridged Dictionary of the English Language. "(1)a belief that human races have distinctive characteristics that determine their respective cultures, usually involving the idea that one's own race is superior and has the right to rule all other races different from their own.

Number one is identical to what you said.

(2) The group that thinks itself to be superior must have the power to make and enforce policies that hold down the group judged to be inferior.

Julie most black people don't have the power to hold white people down. That's the main reason why they shouldn't be called racist

.(3) a system of government or society based upon these premises.
Who controls the American Government Julie? White people right?

RACIAL PREJUDICE: Someone who prejudges, or holds an incorrect, or at the very least an inaccurate portrayal of an individual who holds membership in the group under question.

RACIAL DISCRIMINATION: actions taken based on incorrect, or inaccurate attitudes toward a member of a racial, ethnic, or minority group that results from the individuals membership in that group.
Remember! Prejudice is an incorrect attitude, discrimination is action towards those people based on those incorrect thoughts.

Many learned African Americans stopped using the term "Racist" a long while ago because clever, but misinformed white people grabbed onto the word and started branding every outspoken African American a racist.

That's why most of us are moving towards using "White supremacist"
There can be no black supremacists because even Stevie Wonder can see that black people in America have very little power, and aren't supreme at all in the business, or educational worlds when compared to white folk.

Now DXAce,do you promise to use that word appropriately? It applies a lot more to people who think as you do than it does to me?. :-)

2485. Re: Radio Mexico International in English

Newsgroup: rec.radio.shortwave
Date: 2004-11-12 00:54:31 UTC
From: Knowledge <knowledge@charter.net>
Message-ID: <4a28p09d92i8ng7nlels1trsni73gb945a@4ax.com>
Source record: 2477

Heck! There is nobody left in Mexico. They have all sneaked, ran,
walked, flew, drove, across the border to the USA. :-)

No one is there to operate the stations.

If you're like my brother who has rheumatoid arthritis and works for
himself, it's $1100 per month. Try affording that.

Commercial stations in HC land have the Province indicator at the end of the calls, such as HCTM1 in Quito (Pichincha) or HCGA2 in Guayaquil (Guayas) and not in the middle. Hams and utes have the designator after the "C", such as my old ham call, HC2DG.

No he's not. There will never be a right wing majority in the U.S. He's doing the only thing the right wing is good at, creating a massive economic mess that the liberals will have to get the country out of.

The right wing has never been able to win a war, they've never been able to manage the economy without driving the country into debt, and they've never been able to unite the nation. The only thing they can do is create enormous economic depressions.

Live with it.

The BayGen wind-up radio is a good choice. www.ccrane.com usually has them in stock. There is an AM/FM/SW model, with a built-in LED light for around $120, though sometimes it is on sale for $100.

You may also want to keep a cheap little black and white TV that can be battery powered. They can usually be found for around $15, I got one for free by ordering from Office Depot online a while back. Crappy quality, but serves in a pinch.

2493. FS: Sony ICF SW100 LW/SW/SSB/MW/LW/FM

Newsgroup: rec.radio.shortwave
Date: 2004-11-12 01:51:11 UTC
From: Neil Tesher <neiltt@optonline.net>
Message-ID: <jGUkd.66599$fF6.30532028@news4.srv.hcvlny.cv.net>
Source record: 2495

Lightly used Sony ICF SW100

$225.00 SHIPPED!

e-mail: neiltt@optonline.net

Listed QRZ: WW2NT

Manual included

Payment: Paypal, Money Order or personal check held until cleared

The Sony ICF-SW100 has all the features of a full-sized portable, but is small enough to fit into your shirt pocket. This radio is an incredible 4.375x1x2.875 inches (111x25x73 mm) 8 oz. Frequency coverage includes 76-108 MHz FM and complete coverage of long wave, medium wave and shortwave from from 150 - 29.999 MHz continuously. The PLL quartz frequency digital synthesized tuning is the world's most accurate drift-free tuning method and makes tuning-in desired stations simple and precise. The dual-conversion superheterodyne circuitry provides high sensitivity and interference rejection. A synchronous detector with selectable sideband is included to help reduce the effects of adjacent channel interference and fading. The ICF-SW100S even receives SSB single sideband and morse code signals.

The world time clock feature provides local and 24-city name/time display. 50 memory station presets allow storage and recall of frequency and station name at a touch of a button. The auto scan feature allows scanning of available stations one at a time with a few seconds pause before resuming or can hold on a specific frequency. Other features include 1 kHz tuning, dual clock/alarm, LED tuning indicator, tone control and FM stereo via headphone jack. The right side of the radio also includes a Line Output Jack for tape recording plus a slide switch for FM Mono/Stereo or Tone. The side of the radio has a power lock switch plus a DX/Local Switch. This radio can be played in the "closed" position. There are small rear speaker ports on the top of the radio, or you may use the supplied stereo ear buds. The bottom of the radio features an international time chart and reset button. Requires two AA cells (not supplied).

The ICF-SW100S comes with AC adaptor, active antenna, and carrying case.

No, you aren't. Real conservatives support fiscal responsibility,
smaller government, and protection of the environment. You,
in stark contrast, support squandering US treasure and lives,
massive government, and pollution.

>...getting
>off on watching ...

Your fuhrer is slaughtering helpless innocent civilians in Iraq.

He made sure helpless innocent civilians died on 9/11.

You need to find a healthier way to get your jollies.

On 09 Nov 2004 01:36:02 GMT, "-=just dim=-" <jd770@postmark.net> wrote:

>... howls of pain...

You get off on even imagining you'd be harming Americans and others.

Thanks for admitting it.

When you support Bush, you support impoverishment, pollution, illness, ignorance, defamation, maimings and killings imposed upon Americans.

There are several. But first, you need to decide if you want shortwave coverage in addition to normal AM/FM, and how much you're willing to spend.

This link shows some "emergency" radios, some of them can run on solar cells and/or hand-cranked generators. You can ignore the "clock" radios.

http://universal-radio.com/catalog/spcialty.html

This link shows many shortwave radios. As a general rule, the more expensive ones provide better long range AM and FM reception, but the GE Superadio has excellent AM reception for a decent price.
The Sangean CC radio also pulls in the stations, but it is more expensive. A few of these run on solar cells or hand cranks.

http://universal-radio.com/catalog/portable.html

The Sony ICF-SW7600GR is an excellent all-around radio with decent AM reception for under $200, assuming you've stocked up on batteries.

Forgot about the Grundig units... no experience with that particular wind-up
but I'm sure they're good.

Probably BB&B is selling them for the "security moms" we hear so much about.

Digital radio is a bad idea for DXing. You are basically at the mercy of the computer inside the radio to give you audio. And only one stream of audio - the one the computer decides to lock on to - the strongest signal only. You, your ears and brain, have thus lost the ability to listen for weak signal DXl.

Do what stereo AM radio manufacturers did - DON'T BUY A DRM RADIO! Manufacturers will stop producing them and radio stations will pull the plug on digital. DRM will go the way of stereo AM.

DRM is a marketers dream come true. There is little incentive for the consumer to invest. IT IS ALL CREATED FOR THE MARKETING FOLKS!

You are correct Lars. I seem to recall this in some early tube sets. I was
able to make the VFO in a hi end homebrew RX I am building quite linear by
making certain the variable cap comprises a relatively small portion of the
total tank C- and this using the typical 1/2 round plates. All sorts of
games can be played by using combinations of series and parallel capacities
along with the variable. An Excel spreadsheet gives quick insight.
Also nice to see a bit of differential calculus on the group!

Also don't forget variable coaxial style capacitors- although large values
can be a pain, this can be an easy to build approach.

Well, this would have been the week to really listen to Radio Cairo,
BUT NO! 7115, 11855 and 12050 all are down, thank you very much Mr.
Sun.
I really do like Radio Cairo, btw, the music is fantastic, you almost
can feel the desert.

8992 is part of the US Air Force Global HF System.
I had one radio sitting on that frequency when I got some major QRM. Once tuned, it was 8993, with the Micronesia traffic mentioned.

Mark.
Auckland, New Zealand.

Ok thanks Honus,

I'm still listening. I wish I could call in. I can give them a lot of information apart from the Bible that shows how perverted homosexuality is.

People who endorse it can only say they want to do it.

They can't support that lifestyle using the Bible, Science, Nature, or sociology.

What I mean is that the bible specifically condemns it in the harshest terms.

If I'm speaking to someone who doesn't believe in the Bible, then I ask them if they believe in science. If they say yes, then I ask them if they have formally studied electricity as I have.

When you put two positive charges together they repel violently!

The same happens with two negative charges. If you force them together you create a nuclear bomb.

In nature, it doesn't occur any more often than it does amongst humans. I have had over 200 cats come and go here in the last fifteen years. None of the makes have stood still and allowed another male to mount it. When kittens get to close sniffing, the male turns bares it's teeth and growls it away. The kitten learns early that that dog won't hunt here.

On the farm you won't see two bulls, or two stallions trying to pork each other. In the jungle you don't see two male lions, or water buffalo trying to get it on.

In sociological terms, MOST countries do not give that lifestyle the same respect, and approval that they give to heterosexual couples. The usually tolerate it at best.

Furthermore I think make female prostitution makes a lot more sense than does homosexuality. Now if people think prostitution is so terrible and they won't legalize that, then they would have to be out of their rabid arse minds to want to legalize the perverted, unnatural behaviors of queers.

I don't think they should be hunted down and harmed, but their filthy behavior should never be given legitimacy.

"In the land of the blind, the one eyed man is king!"

Knowledge!

2533. For Sale: FM Stereo Broadcast Transmitter 88-108 MHz Digital PLL LCD Display - 2 Watt

Newsgroup: rec.radio.shortwave
Date: 2004-11-12 07:07:01 UTC
From: righteous-jude <nospam@noreply.com>
Message-ID: <BDB9AF25.49A0%nospam@noreply.com>
Source record: 2525

FM Stereo Broadcast Transmitter
Digital PLL - LCD - 2 Watt RF Output

Ebay item # 5730774971

Auction ends in 2 days:
Ends Nov-14-04 19:13:56 PST

Here is the direct link:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971

Transmitter is an assembled and tested unit -- not a kit.

This FM Stereo transmitter is well-known to many eBayer's as being the best transmitter you can get for the money. You'd have to buy a commercial brand FM exciter (such as a Harris) to exceed the specs of this unit. On virtually all FM receivers you would not hear the difference.

This transmitter is a NEW design and DOES NOT use the "BA" or "Rohm" analog chip - ANYWHERE IN IT AT ALL. Which is a good thing.

The heart of the transmitting circuit is a Cypress Semiconductor Digital Signal Controller. This is a 16 bit DSP microcontroller with on-chip Flash, RAM, A/Ds, PWM, and 200k of EEPROM.

This transmitter can equal the sound of commercial FM stations. It outperforms ANY of the Ramsey transmitters, including the "export" version of the FM-100B which Ramsey sells for $429.99.

You can have this transmitter for much less than that.

Here are the specifications for this transmitter (from the manufacturer):

Transmission Frequency: Adjustable between 87-108 MHz
Tuning Steps: 10 kHz
RF Power Output: Typ 1Watt @ 13V or 2 Watts @ 24V
Spurious RF Emissions: Better than -45 dB ref. to carrier
Frequency Stability: PLL Typ +/-1KHz
SWR Ruggedness: Withstands 30:1 SWR mismatch
RF Output Connector: BNC type
Audio Input Sensitivity: 0.8V rms for +/- 75 KHz deviation
Signal To Noise Ratio: 60 dBu
Frequency Response: Flat from 20 Hz to 15 KHz
Stereo Separation: >40 dB
Pre-emphasis: 75 uS (standard FCC spec for U.S. FM radio)
Audio Distortion: Better than 0.2 % THD

Audio Input Connectors: RCA Phono Jacks
Power Jack: Coaxial type, 5.5mm O.D. 2.1mm I.D. center positive
DC Power Input: 12 to 24 Vdc Regulated 600mA

The transmitter has a built-in user options menu system with two buttons for adjusting operating parameters such as transmitting frequency, modulation level, MPX pilot level, etc.

This transmitter has a clean RF output. The design includes a seven-element Low Pass RF Filter for harmonic suppression.

This transmitter has built-in audio AGC (Automatic Gain Control). The AGC feature can be adjusted using the user options menu or you can turn it off if you like.

Operating instructions will be included with the unit.

And I can give you a lot that shows how ill-chosen your nym is.

> People who endorse it can only say they want to do it.
>
> They can't support that lifestyle using the Bible, Science, Nature, or
> sociology.

Certainly not using the bible. Of course, that's the book that condones slavery, so it's pretty much worth crap IMNSHO. As far as the others go, you need to read something other than that old book of superstitions that you're obviously obsessed with. You know...the one written by the goatherds that thought the world was flat, and that demons caused disease. By the way...handled any venomous serpents lately?

> What I mean is that the bible specifically condemns it in the harshest
> terms.

Which has nothing to do with reality. Not to mention the fact that I can cite scholar after scholar that maintain that the biblical admonitions against homosexuality are in fact aimed at temple prostitution. Big difference, not that it ultimately matters.

> If I'm speaking to someone who doesn't believe in the Bible, then I

What?

And anyway, what's your point? Anti-matter and matter annihilate each other when they come into contact. Whatever your point was, I think I just blunted it.

> In nature, it doesn't occur any more often than it does amongst
> humans.

Oh my friend, you are SO wrong. In nature it occurs more often than in humans. Just to keep this on-topic in an odd sort of way, here's a link to an article at Radio Netherlands.

http://www.rnw.nl/lifestyle/html/gayanimals000808.html

It's obvious that you've never researched the subject on the web, because there are so many pages on it that I can't decide which ones to list for you. And for what it's worth, your statement makes no sense. If it occurs at all amongst animals, especially in the wild, there goes your "God is against it" theory. Unless, of course, you believe that animals sin.

> I have had over 200 cats come and go here in the last fifteen
> years. None of the makes have stood still and allowed another male to
> mount it. When kittens get to close sniffing, the male turns bares

So you haven't observed it. Your point?

> On the farm you won't see two bulls, or two stallions trying to pork
> each other. In the jungle you don't see two male lions, or water
> buffalo trying to get it on.

Guess again. This link http://www.bidstrup.com/sodomy.htm doesn't address bulls specifically, but it does cite some very interesting facts about other ungulates. And for what it's worth, I -have- heard of cows trying to mount each other. I'm guessing that you don't spend a lot of time on farms or in the jungle.

> In sociological terms, MOST countries do not give that lifestyle the
> same respect, and approval that they give to heterosexual couples. The
> usually tolerate it at best.

And a lot of countries still stone people for being witches. Other countries still saw the heads off of infidels. Etc. ad nauseum.

> Furthermore I think make female prostitution makes a lot more sense
> than does homosexuality. Now if people think prostitution is so
> terrible and they won't legalize that, then they would have to be out
> of their rabid arse minds to want to legalize the perverted, unnatural
> behaviors of queers.

You don't get out much, do you? If you're going to cite the social mores of other countries in their stand against homosexuality, then you ought to be really careful when you talk prostitution because that line of reasoning will come back to bite you. It's legal in -lots- of places around the world. Since other countries approve of it, by your argument perhaps we ought to consider approving of it as well.

Oh, wait. Nevada already has.

> I don't think they should be hunted down and harmed,

I'll bet my bottom dollar that's not the tune you'd have been singing if you'd been born a century or two earlier. If we're supposed to stone witches, then why not fags? By the way...do you think we ought to hunt down witches?

> but their filthy
> behavior should never be given legitimacy.

I'm still waiting to hear why not. Because the bible says "No"? Well then, don't engage in it. If you want to follow the bible, then feel free to do so. Don't expect everyone else to follow the same set of rules. As for science, nature and sociology, I haven't seen any evidence to support your argument. But I've seen plenty against it.

I wonder if it is that they are using the
Messenger in other mailings? I've received the
English language Messenger in mailings from the
French Service.
So an English schedule would be confusing to other
language listeners. They put out their own schedule
pamphlets but no magazine, stuffing their envelopes
with New Year cards at this time of year, and copies
of the appropriate language Beijing Review or China
Today.
(How else do you get Esperanto reading materials?)

Still the Spanish and Portguese services of CRI are the best.

CAPTION: Will Congress assume final responsibility for the safety of anti-nerve gas suits and masks?
==========

January 16, 2003

WASHINGTON -- A secret Pentagon audit shows most of the U.S. army's gas masks and a large number of chemical suits are either broken or defective, prompting concerns about the readiness of U.S. troops in the Persian Gulf.

They wouldn't let me in. That rather austere organization accepted members by appointment only and alas, they somehow overlooked me. Hard to believe, I know..but true.

The real, unadvertised goal of that assembly was to show the error in accepting 'facts' blindly merely because they had the 'cloak' of some sort of authority backing them.

Sadly, there seems to be no activity in that group since the founder passed away.

> I did get an A in Motorcycle Mechanics.

Neat. I learned how to set up a Ducati Desmo head in the late seventies...and how the Brit engines had a left hand thread on the oil pump gear. The Super Sport 900 Ducati was probably the funnest bike I've ever owned. I still have a Triumph. It's a 1200 Daytona mind you, so it doesn't leak. Lots of Nortons over the years...no Commandos though.

I'd like a new Triumph Thruxton in the spring. The Daytona is getting to be a pain handling in the parking lot. The 560 lb weight and Old Age, you know. We'll see what the budget looks like next year.

> Thanks in advance.

INVADER 3 K,

Since you have your Grundig Yacht Boy (YB) 400 PE Radio and the
Sony AN-LP1 Active Antenna to start with; try a few test first.

Your problem is two-fold the Building Frame is acting like an
RF Shield and the RFI/EMF of the Building is be Trapped and
Reflected within the Building. The Result is Low Signal Levels
and High Noise Levels.

"IF" (Big If) you can open your Windows and Remove the Screen:
Then 'buy/get' the following:
1 - Roll of Black Electrical Tape
1 - 25 Foot Piece of 1/8" or 3/16" Rope
1 - 10 Foot Piece of 1/2" or 3/4" PVC Pipe
1 - PVC Pipe "T" Joint same size as the Pipe

* Place (Glue) the "T" Joint on one end of the PVC Pipe.

* Tie one Rope end through the "T" Joint.

* Take the Loop Head of the Sony AN-LP1 Active Antenna and Plug it
into the Feed-in-Line Cable and 'tape' the Connection.

* Tape the Loop-Head to the "T" so that the Loop-Head is Hanging
Down and Perpendicular to the Length of the PVC Pipe.

* Tape the Feed-in-Line Cable and the Rope to the PVC Pipe
each Foot (12") to secure it and to act as a Distance Marker.

* Secure the other end of the Rope to a Table Leg or Chair.

* Plug the Sony AN-LP1 Controller into the Radio.

OUT THE WINDOW SIGNAL-TO-NOISE TESTING:

Start with the Sony AN-LP1 Loop-Head next to the Surface of the Building and "Test" for Shortwave Reception on several of the Shortwave Bands 'noting' (Writing Down) what can be Heard.

Move the Loop Head out One Foot from the Surface of the Building and again "Test" for Shortwave Reception on several of the Shortwave Bands 'noting' what can be Heard at this distance from the Building.

Move the Loop Head out Two Feet from the Surface of the Building and again "Test" for Shortwave Reception on several of the Shortwave Bands 'noting' what can be Heard at this distance from the Building.

Repeat this "Test" at: Two Feet from the Surface of the Building; Three Feet from the Surface of the Building; Two Feet from the Surface of the Building; Four Feet from the Surface of the Building; Five Feet from the Surface of the Building; Six Feet from the Surface of the Building; and Seven Feet from the Surface of the Building. Record your Results at each Distance.

Now start pulling the Loop-Head back-in One Foot at a time and again "Testing" your Reception at each Foot.

You should find that between three and five feet away from the Surface of the Building; that your Reception Improves with Higher Signal Levels and Lower Noise Levels. (You're outside the RF 'envelop' of the Building.)

YOUR ANTENNA CHOICES ARE:

* Placing the Loop-Head 'sticking-out' the Window when you are Listening to Shortwave. You are already set-up to do so :o)

* Shooting an Antenna Wire Element from the Window to some object (Tree etc) of another building. Use an small Insulated Wire like Hook-Up Wire. RadioShack Catalog #: 278-1218

* Dropping a 'very thin' 30-50 Foot Antenna Wire Element from the Window with a small Rubber Ball as a weight. Adjust the Length of the Wire so that the Rubber Ball is between Floors and not hitting any Windows. RadioShack Catalog # 278-502

TIP: Often the Metal Frames of Window use in newer Building are Grounded. If for the last Six Feet (6') of your Antenna you use a Piece of Audio Patch Cord with a 1/8" Mono-Plug at one end and Tinned Leads at the other end. RadioShack Catalog # 42-2434
- Tie a Double Overhand Knot with the Antenna Wire and the Patch Cord. http://www.iland.net/~jbritton/doubleoverhandknot.htm
- Then Solder the Antenna Wire Element to the Center Wire of the Patch Cord.

- Next at about One Foot from this Knot 'strip' about Three Inches of the Outer Cover from the Patch Cord to "Expose" the BARE Shield-Wire.
- Run/Route the Antenna Wire Element and 'position' the Patch Cord so that when the Window is Closed-Shut the BARE Shield-Wire is 'pinched' between the Metal Parts of the Window.
- Plug the 1/8" Mono-Plug into the Radio's 1/8" Mono-Jack External Antenna Input.

First Hour: Walter Burian of cafr1.com says we the people are getting scammed even worse than just paying income tax.

Burian states: "My estimate of both federal and local government's investment assets is a conservative 60 trillion dollars . . . . [Of the] $44 trillion in debt, one of the core issues is: How much of that debt is being funded from the $60 Trillion of investment assets government holds? The shift in the last 30 years has been for local and federal governments to take surplus revenue and use it to fund their own debt obligations for themselves."

Second Hour: Holly Swanson, author of "Set Up & Sold Out: Find Out What Green Really Means," discusses the secret side of the Green political agenda and the ways in which its deceptive tactics take advantage of the American people.

Our FM Radio Quality 32K Stream is Dial-Up Modem Friendy.

Recent episodes of "From The Grassy Knoll" can be heard from Midnight to 4PM ET or 5AM to 9PM UTC, Monday through Friday.

Heck, I remember when WRNO was a Z-Rock affiliate back in the 80's and
early 90's. Z-Rock was the all hard rock radio network that operated
during that time. It was kinda' cool to hear heavy metal on SW radio.

2545. Ashcroft not finiished ??

Howdy Dan,

Interesting point... obviously there has been a change at CRI regarding the Messenger. I looked through my piles of mailings and it seems that beginning with issue Vol. 15, No.2 (March-April 2004) they dropped the schedule.

Gee... the first thing I would do when I got the Messenger was to check the frequency listing so it was the first thing I noticed that was missing.

Tucked into the March-April 2004 issue I also found the schedule for the English Service---so I'm OK now.

Hi John,
If you are handy with a soldering iron and hacksaw you might look into this:
http://www.arrl.org/tis/info/pdf/0109031.pdf
It cost about $75US for the parts and will outperform just about
anything on the market. I built one and it was easy to assemble and
works very well compared to a 100ft long wire. I am feeding a Harris
RF-590A.

Oregon is 100% paper ballots and 100% by mail. It seems to work very
well. It is insane to use a system that cannot be recounted.

2555. A Soldier discusses his oath

Newsgroup: rec.radio.shortwave
Date: 2004-11-12 15:59:36 UTC
From: David <rickets@knac.com>
Message-ID: <kbn9p05thsop5jm3oevtvlfj6uf9nb167n@4ax.com>
Source record: 2547

Curiously, the oath of office for President of the United States has a clause in it similar to the first clause of the soldier's oath: "preserve, protect, and defend the Constitution of the United States." So what is one to do when the President violates his oath? The third part of the oath of enlistment specifically mentions obedience to the President, the Commander in Chief. What a predicament this places on the honor-bound soldier -- his oath in conflict with itself!

As a veteran, I must take a closer look at this oath that I have held near my heart for so long. Of the three parts of the soldier's oath, obedience to the President is third, placing it in the lowest priority in my mind. Next, being only one of three parts of the oath, the greater weight is obviously given to the Constitution. Finally, unlike the other two parts of the oath, the section requiring obedience to the President is tucked inside a clause about adherence to military regulations and the Uniform Code of Military Justice, the only part of the oath specifically about the troop's conduct during the period of enlistment. This appears to be a deliberate tie into the military service of the new recruit, thus the one part of the oath that ends with the term of enlistment. From these, I see my marching orders written on the wall.

My first allegiance is to The Constitution of the United States; my first duty is to protect it from all enemies, foreign and domestic; and my vow of obedience to the President of the United States expired in 1993.

Therefore, I stand today opposed to my President, and the anti-American, un-Constitutional, unpatriotic Administration for which he serves as figurehead. I will do my part to voice my opposition, educate the populace, diligently support my political causes, and work with others to restore American freedoms to their former glory.

As a soldier, I made a promise. As a veteran, I will carry that promise with me to the end of my days.

Agree completely. The downside of having a free forum is that it is unmoderated and any fool can rant on for pages. Because I've never heard of a message being deleted or an id revoked, I assume the google groups are wide open. Many of the authors of these pointless messages are looking to provoke a response. By ignoring them we exercise the only control we have. The others who use the shotgun approach and post the same message to many forums rarely read any responses. They are sending this stuff out for their own self-enhancement.

Best to keep with the shortwave related posts and ignore the fools.

An alternative to the Amrad antenna is you can connect a high quality rf preamplifier to a whip.

That's what I do for the antenna on my 7030+ "portable".

The one I chose is an avantek 30db preamp that I picked up at the flea at MIT for $5 or $10. (I expect a new one with similar specs would sell for a few hundred) The whip is connected to the input of the amplifier with a 9:1 impedance matching transformer.

I often dial in some attenuation when I'm listening below about 5mhz. Other makes for milspec RF preamps include Aiken/Norlin/ACL/Applied Communications (same company, different names) and Watkins Johnson. I'm sure there are others too - I'm just not familiar with them.

I'm not knocking the Amrad - if I had the time to build one, I probably would.

As for the Dressler, and the Wellbrook, I think between the two, I'd go for the Wellbrook. IIRC, the Wellbrook has more dynamic range. Loops are less likely to pick up RFI. I've also noticed numerous favorable comments about it, and relatively few comments (positive or negative) about the Dressler.

Want to talk politics ?
Find a political newsgroup !

I remember one popular newsgroup
that was invaded by mouthy children and trolls...

The only solution was to "not answer any posting"

In time, they got tired and went away.
(presumabley to annoy someone else...)

radio.

Especially since the Z-rock affiliate locally had gotten
run out of town by Jaycor (now part of Clear Channel),
RNO was the only way to hear real metal.

The Brainiac? I've been called alot things but --Brainiac----------hmmmm!
You are a real sweetheart aren't you?
oh I know a real shortwave kinda super duper guru type
woman right? Ah baby--I'd love to turn your radio on.

Life is political!--- Shortwave is all about life in other countries for the
most part. Therefore shortwave is quite political actually.

I disagree with you sweetie-- (i'm sorry your highness , QUEEN SHORTWAVE)
you and Mike need to leave this group and go seek your holy grail so to
speak. This group isn't for you --it's about shortwave = (life, opinions,
other countrie etc.) (oh yes some radio stuff too). You know what? this
group is the best. Wouldn't chg a thing. Leave it alone please.

I will never bow to you oh mighty Queen Shortwave.

I bet you believe in the choice to "kill babies don't you" (abortion). I
heard something on shortwave the other day about that. Shortwave helps me
to form my opinions about what is right & wrong in this ole world. I love
shortwave.

Love the group--show respect my not Queen.

Hah!!

Well,

It seems we do have some learned people here. :-)

I'm not willing to tie up this forum discussing homosexuality. However
I have been moderating a forum on Yahoo that had over 3,000 members on
it this time last year. After yahoo became frightened about some of
the things I was pointing out to my list, they deleted it cold turkey.

I stayed away from them for a while, but now I'm slowly building it
back up. I have over 250 members currently. so why don't those of you
all who have an interest in truth, logic, and justice take come on
over and become apart of our family.

We talk about these things 24/7/365. There are still many nationally
known black and white folks who are members of my list. I suspect you
would probably enjoy it a lot. We can always use people who are not
afraid to speak out.

Peace

I had a Royal Enfield Interceptor back then. Speaking of radio, the workshop manual gave instructions to convert the bike's wiring so the alternator would develop full power with the headlight off in order to power a radio transmitter for police work or what not. The alternator could provide all of 60 watts at high RPM, and maybe 20 watts at idle. The damn thing could hardly power the headlight!`

The Interceptor leaked everything. Motor oil. Gear oil from the transmission. ATF from the clutch/primary chain housing. More motor oil from one leg of the fork. I wasn't pouring expensive fork oil through that thing. The other leg of the fork somehow held it's oil. Inconsistent quality control, I guess.

Actually, I still have the Interceptor. It's all in boxes, so I can't rightly call it a motorcycle.

Did you have an Atlas? They are rather Interceptor-like.

I started out owning a Drake R8 and later the R8B and they are a good standard
to use. When I purchased and modified my R75, I spent many hours doing side by
side testing of the R75 using the Drake as my standard.

I focused my testing on a single question: Was there something the Drake
receiver could do that the Icom could not do. I focused on clearly perceptible
differences, not differences that can only be measured by instrumentation.

After all the testing, I found that there was not a single instance of a
difficult signal that I could receive with the Drake that I could not receive
with exactly the same clarity using the R75 with stock filters.

By using techniques described by others in this group and in "Phils Cookbook"
located in the Files section of this group, I was able to do anything the Drake
could do, including sideband selectable S-AM. These are workarounds that give
the same results without buying extra filters.

So, if the proposal is to match the standard, the Drake R8B, no additional
filters are needed IMO.

If the proposal is to make the R75 as good as it could be by additional filter
choices, you could justify additional filters.

I installed an ICOM FL-102 (6KHz wide) filter in the empty 9MHz slot of my R75
to tighten up the selectivity in the front end and reduce noise and adjacent
channel interference. I can tell you that it is not a night and day

difference
but I think it helps some, marginally.

The S-AM mod on the other hand is clearly worth the money and effort,
that is
the one I could not do without.

That's right up there with those that call the old
Hammarlunds and Hallicrafters boatanchors
portables because they had a handle. ;-)

Okay, that brings up the question of the MFJ-1020
used as a preamp. Admittedly, you can't beat
and Avantek for $5-10, but is the MFJ-1020 worth
the price, or can you find schematics for decent
preamps lying around??

Actually, I've read a bit about the Wellbrook from replies
on lists and on the occasional webpage on it, but what
puzzles me is the spread that the Wellbrook claims that
the loop is good for. After all, it's not a tunable loop and

it looks like an aluminum hoop (about 1m diameter) with
a preamp and matching transformer attached. The best
I saw on a homebrewed magnetic loop after an hour
or so of perusing the web was about 5-17 MHz for
usability.

I figure that it looks simple enough of a design that
someone could build one at home (or at least emulate
one) easily enough, but some of the claims don't seem
to mesh with that people who have built these type
of loops have discovered.

Amateur Radio Newsline™ Report 1422 November 12, 2004

Amateur Radio Newsline report number 1422 with a release date of Friday, November 12, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC turns off the ham radio licensing computer and a big Aurora opening hits North America. Find out the details on Amateur Radio Newsline report number 1422 coming your way right now.

(Billboard Cart Here)

**

WITH THE FCC: HAM RADIO LICENSING STOPS AND STARTS DUE TO COMPUTER GLICH

Ham radio licensing came to a screeching halt on November 5th. This after a software glitch caused the computer that issues licenses to do some very strange things. Mark Abramovich, NT3V, has been following the developments from Philadelphia and gas more:

--

The FCC isn't offering any official comment on exactly what happened. But Amateur Radio Newsline has learned that the problems with the Universal Licensing System computer started after an Oct. 28 software upgrade installed by a government contractor.

The problems that followed prompted the FCC to order a five-day shutdown of the system which issues Amateur Radio licenses. The system came back on-line on Nov. 10. However, as of our deadline for this week's program, the FCC still planned a weekend shutdown of the U-L-S for maintenance and expected it to return to operation on Nov. 15.

The American Radio Relay League's Volunteer Examiner Coordinator Bart Jahnke, W9JJ, tells Amateur Radio Newsline he was among the first to detect problems while doing a routine check up on the application of a friend near the end of last month.

Jahnke says he discovered the application was - as he describes it - flagged or marked pending by the
FCC for a review by a live person. He says the automated system and its software are set up for minimal human intervention. Jahnke says such a classification immediately raised concerns that something had gone wrong.

Jahnke tells me once he called his contact at the FCC to report the problem, he was told the computer contractor would be notified to investigate.

A couple days later, Jahnke says he was told the problem was fixed. But, as Jahnke tells me, he checked and found that the computer problem had gotten worse. He says he and other VECs were finding the U-L-S had begun issuing Group D call signs - the 2 X 3 ones - to new licensees out of sequence. He says only the first and third call-district applications somehow escaped getting caught up in the problem.

At that point, Jahnke tells Amateur Radio Newsline he and other VECs called the FCC. He says the commission told the contractor to pull the plug on the system on Nov. 5, run some diagnostics and fix it. A message posted on the FCC's website on Nov. 5 said simply: "The granting of Amateur applications has been temporarily suspended. We apologize for the inconvenience."

Prospective hams who had passed VE exams earlier and were awaiting their call sign were getting nervous. Some who received the out-of-sequence call signs were wondering whether the call signs were OK to use. A few had even received a second call sign, cancelling the first. In all, Jahnke says about 130 licensees were affected and thousands of license applications were backed up in the system.

By Nov. 10, Jahnke says the FCC began issuing letters cancelling the out-of-sequence call signs and awarding the proper call signs to new licensees. For some, he says it was their third call sign in a matter of days.

Jahnke says the FCC deserves credit for responding as fast as it did. He also has praise for the other VECs across the country who were in touch the with FCC, too. Jahnke says he's crossing his fingers and hoping the planned weekend maintenance of the FCC U-L-S computer, won't undo the system fix.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on this situation in future Amateur Radio Newsline reports. (ARNewsline(tm), NT3V with input from FCC and ARRL)

**

UNEXPECTED VHF DX: THE BIG AURORA OPENING OF NOVEMBER 7

--

N6ZE: "The aurora was very bright most of the time and the magnetic bearing from the airplane extended from 300 degress through about 060 or 070. We saw this for about 3 hours and a distance of probably 1900 statute miles."

That's Pete Heins, N6ZE, describing last Sunday night and early Monday's magnificent Aurora from his vantage point in the right seat of a Boeing 757 jetliner. Pete was the co-pilot that night, flying from Los Angeles to New York's J-F-K International airport.

--

N6ZE: "At no time was the visability obscured by clouds, and for about the last 1 hour of the flight we did have about a 1/4 moon in the Eastern sky climbing, and we were still able to see the AU."

--

And while Pete was making his way across country, hams on the ground were sitting on 6 meters, 2 meters and all the bands above. And some like Dave Bernhardt, N7DB, in Boring, Oregon were hearing and working stations all over the place. Dave primarily operated 2 meters where according to the V-H-F reflector he worked W7IUV, K7XC, K7GS, WA6KLK and VE7DXG to name only a few. And Dave was not alone.

On the other side of the country, Jeff Klein, K1TEO, in Trumbull, Connecticut reports making Aurora propagation contacts on 2 Meters as far south as Alabama and Tennessee. To the west Jeff worked stations in Missouri, Iowa and Minnesota.

According to reports from NASA, the Auroral opening was caused by a Coronal Mass Ejection or C-M-E on the Sun. That event happened late on Friday, November 5th with the ionized particles reaching our Earth late on Sunday. Television news programs on Monday night showed pictures of this very bright Aurora as far South as Minnesota and northern Kansas.

On Tuesday the 9th two more solar shocks have arrived. Paul Kelly, N1BUG, in Milo, New Hampshire reported them on the VHF Reflector. The first hit just after 09:00 UTC but did not contain favorable magnetic field vectors or strength to produce Aurora at North American mid-latitudes. The second, arriving near 18:20 U-T-C did produce the classic Aurora buzzing. He later describe this event comig just in time for the natural late afternoon peak for auroral backscatter. He says that the Aurora came up fast and suddenly 2 meters filled with strong buzzing signals. He says over the reflector that he worked as far South as grid square E M 66.

And while hams who only operate the high frequency bands were complaining that 80 through 10 meter propagation had literally disappeared, those like N1BUG, N7DB and K1TEO on 6 meters, 2 meters and above were calling C-Q Aurora and making lots of contacts. All that is except Pete Heins, N6ZE, who landed his big silver bird at New York's J-F-K airport just as the sun was coming up. Then again, you have to admit that sitting at 37,000 feet on the flight deck of a 757, Pete probably had the best view of all. (ARNewsline(tm), N6ZE, VHF Reflector)

**

MORE ON PROPAGATION: WWW.HFRADIO.ORG/PROPAGATION

By the way, Dick Mannheimer, K6LAE, who was one of the first to alert us to the Aurora also passes along information on an excellent propagation website. Its in cyberspace at www.hfradio.org/propagation.html

The site is operated by Thomas Hood, NW7US. If the name and call sign sound familiar its because this is the same Thomas Hood who writes propagation columns for CQ, CQ VHF, Popular Communications and Monitoring Times magazines.

We have looked at the site. It's well worth bookmarking on your web browser. Again the URL is www.hfradio.org/propagation.html (K6LAE)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W3BN repeater serving Reading, Pennsylvania.

(5 sec pause here)

**

HELPING HAMS: UNITED WAY REPORTS HUGE HAM RADIO RESPONSE TO ARRL HOLIDAY TOY DRIVE

The United Way in Martin County, Florida, reports "a huge response" by the Amateur Radio community. This, to the ARRL's call to support a toy drive on behalf of the agency's "White Doves Holiday Project."

According to the ARRL Letter, Carol Hodnett, who directs the United Way of Martin County's Volunteer and Community Resource Center says League members from Maine to California have sent toys or money, and more is arriving every day. The League hopes to provide toys for youngsters left homeless or displaced by a string of hurricanes that hit the region earlier this year.

There is still time for you to take part in this very worthwhile project. All you need do is to purchase an unwrapped toy for a boy or girl aged 1 to 14. Please send it prior to Thanksgiving, Thursday, November 25th. Be sure to include a QSL card or 3x5 card displaying your call sign. Mail it to Ham Radio, The United Way White Dove Project, 50 Kindred St, Suite 207, Stuart, FL 34994.

In our view this is Amateur Radio at its very best. Hams helping kids in a true time of need. (ARRL)

**

ENFORCEMENT: ARE YOU THIS PERSON?

An FCC license holder who is likely a ham is being asked by the agency if he is the same person convicted of a number of criminal acts. And the agency has an important reason for asking. Spokesman Daryl Duckworth, NN0W, explains:

--

Duckworth: "Regarding qualifications to remain a licensee, in inquiry concerning criminal convictions for theft by deception and theft by failure to make required disposition of funds as the result of an investment scam went to a licensee in Johnstown, Pennsylvania."

--

According to the FCC release, the person involved is also under investigation by Pennsylvania Administrative Office of the Courts for a possible indecent assault. This is alleged to have been committed on July 30th, 2002.

The purpose of the probe is to determine if the person contacted is the same one as in the alleged and proven criminal cases. For that reason the FCC has withheld the persons identity or any other factual material to indicate whom he or she might be.

But if its the right person, he or she was given two options by the agency. The person can provide additional information on the convictions and charges for consideration by the Commission. Alternately, he or she can voluntarily submit a license for cancellation in order to avoid a hearing on the issue. (FCC, RAIN)

**

ENFOECEMENT: YOU CAN'T SELL THAT BEACON

Still with enforcement news, word that ACR Electronics, Inc. of Fort Lauderdale, Florida, has been fined $75,000. This, for marketing a personal location beacon to the general public that had not been approved by the Commission.

Now here's the ironic part? The CGC Communicator reports that some of the material submitted to the FCC by ACR helped make the case against the company.

It's all on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-253871A1.doc and http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-04-259A1.doc (CGC)

**

ENFORCEMENT: POWER - LESS POWER CAPTAIN

An unlicensed broadcaster's response to an FCC Notice of Violation has helped to clinch a $10,000 fine issued against him. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details.

--

Well, the details really speak for themselves and we would be hard put to say it better than David Michael Oaks. Oaks is the one who received the $10,000 fine for allegedly operating an FM station at his residence in Beaverton, Oregon. This, without the benefit oof holding a valid license to do so.

Quoting from the FCC report and order affirming the fine, the agency says that in responding, Oaks did not deny the charge. Rather, he stated that he was attempting to correct the violation by lowering the power each time he received a notice that he was operating an unlicensed station.

But that's not all. The FCC goes on to say that Oaks asserted that the investigating agent told him that the effective range for a transmitter operating pursuant to Part 15 of the Rules is about 100 feet. Also, that if Oaks chose to do so, he could purchase a Part 15 certified wireless microphone to compare the range of that signal with that of his station.

Oaks did not choose to do so. Nor did he refrain from operating after receiving several written warnings. Based on all of this evidence, the FCC says that the $10,000 fine will stand.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles

--

More on this case is on line at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-3504A1.doc
(FCC)

**

RESCUE RADIO: PROPOSED RADIO JAMMING SYSTEM DROPPED FOR THE MOMENT

Some good news and some bad about an emergency information system proposed by Alert Devices International Corporation. The company has requested that the FCC to dismiss its Petition for Rule Making to create an Emergency Vehicle Signaling Service. This is the previously described service that would allow emergency vehicles to jam out authorized broadcast stations and replace them with emergency warning messages designed to attract the attention of affected motorists.

The good news is that the FCC has granted A-D-I's dismissal request. The bad news is that ADI - according to its latest filing - proposes to submit an "expanded version" of its Petition in the near future. Its all on the web at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-3521A1.doc
(CGC)

**

MORE POWER CAPTAIN: ELECTRICAL INDUSTRY CHASTISED FOR 2003 BLACKOUT

Those wonderful people that are now bringing you BPL have bigger problems to worry about. This after Federal regulators issue a scathing review of the electricity industry's voluntary efforts to make their power grids more reliable.

The report comes about a year after nation's worst blackout that hit on August 14th of 2003. According to staff at the Federal Energy Regulatory Commission, power industry audits play down shortcomings of the grid system, rely on ambiguous standards that often are ignored and reflect vast differences between the best and the worst performers.

But the agency's chairman Pat Wood did say that there have been improvements since the blackout that was caused by power line problems in Ohio and affected eight states from Michigan to New York as well as parts of Canada. (Published reports)

**

IN PRINT: ALL ABOUT TONE

And with more and more repeaters implementing some form of tone access, it is C-Q Magazine that's taking the lead in explaining how it works to the ham community. In his three page article in the November issue, writer Dave Ingram, K4TWJ, "How It Works" column traces the use of tone access and explains why it can be far more of a friend to hams than a way to keep them off a system they may want to try. You can read what Dave has to say in the November C-Q on newsstands right now. More information is on the web at www.cq-amateur.radio.com (CQ)

**

ON THE WEB: QRZ.COM NEEDS YOU

The giant Q-R-Zed dot com website says it needs some volunteers to help it better serve the needs of the world wide ham radio community. According to its owner Fred Lloyd, AA7BQ, the popularity has resulted in a need to enlist a few more volunteers to help out on the website operations.

Lloyd says that Q-R-Zed currently has openings for two types of volunteers,. These are board Moderators and Callsign Database Administrators. An explanation of the responsibilities of each is on line at the Q-R-Zed site. Its in cyberspace at www.qrz.com. (qrz.com)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to

the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

CHANGING OF THE GUARD: SHIRLEY WILKERSON JR. W4TBU S.K.

Some sad news to report. Word that Elmer Extraordinary, Shirley Wilkerson, Jr., W4TBU, died on Monday, November 8th. As reported last week, Wilkerson was 84 years old and had been hospitalized in declining health.

According to Tom Webb, W4YOK, Wilkerson was licensed in 1950 and was a one-time member of QCWA with his story featured in the winter 2003 edition of the Q-C-W-A Journal. He is survived by a sister. (W4YOK)

**

TELECOMMUNICATIONS SECURETY: PASSCODE FROM AMERICA ONLINE

Turning to the high tech page, America Online says that it will begin offering members a security device and service that has been used to safeguard business computer networks. This after parent company Time Warner Inc. announces that its AOL unit has signed a deal with Internet security company RSA Security Inc., to launch its new AOL PassCode.

Using an ever changing algorithm, the system is designed to add an additional layer of protection to member accounts. PassCode users will be provided with a small handheld six-digit numeric code key which refresh on the device every 60 seconds. To log onto an AOL account equipped with the service, users will have to type in the six-digits in addition to their regular password.

The price of the code-key device will be $9.95. Service costs will range from $1.95 to $4.95 per month. This, in addition to the usual America Online subscription fee. (AOL, published reports)

**

EMERGING TECHNOLOGY: FALSING CALLER ID

The Washington Post reports that a new technology can trick U.S. caller-ID services into displaying someone else's name and telephone number. The Web-based systems make the name and number appear in a call recipient's caller-ID box.

A company called Star38 that launched in September with plans to market to debt collectors has changed its strategy after consumers complained. Star38 admitted the approach was "flawed," and now says it will market their system to law enforcement agencies.

New Jersey-based Camophone says it will perform the service on a call-by-call basis for a fee of $5 and up. The company said it recognizes that the service could be abused but insists its intent is to help customers protect their privacy.

But consumers worry that the technology could be used by stalkers and debt-collection agencies, some consumers worry. The Direct Marketing Association said masking a marketer's identity is illegal under rules enforced by the Federal Trade Commission and the Federal Communications Commission. (Washington Post)

**

HAM RADIO IN SPACE: AO-51 E-MAIL REQUEST BOX

AMSAT North America has announced the establishment of an E-mail address for AO-51 users to submit requests and ideas for Experimenters Wednesday operations. AMSAT says that this is a chance for the ham community that uses AO-51 to request the modes that they are interested in* seeing operated on during the weekly Wednesday times. All input will be noted but do not expect a reply to your E-mail. Send your requests or ideas to ao51-modes@amsat.org (AMSAT-NA)

**

WORLDBEAT: VE3PU NEW TREASURER OF RAC

Back here on mother Earth, word from Radio Amateurs of Canada that Ken Pulfer, VE3PU has been appointed to the position of Treasurer. Pulfer will complete the unexpired term of Eric Ferguson VE3CR who recently resigned.

This is not Pulfer's first time in the job. He has served as R-A-C Treasurer in the past, and brings a wealth of experience to the position. (RAC)

**

WORLDBEAT - UK: FINAL G5RV LOGBOOK RETRIEVED FROM EBAY

Meantime, word from the United Kingdom that the final log book of one of the worlds best-known radio amateurs has been saved for posterity. This, after it was put up for auction on eBay.

The late Louis Varney, G5RV, of G5RV antenna fame was one of the founding members of the Chelmsford Amateur Radio Society in 1936. So when Chelmsford club member Duncan Munro, M0KGK spotted that G5RV's last ever logbook was being auctioned, the club decided to buy it.

Munro did the bidding. Despite fierce competition he managed to secure the logbook in the last eight seconds of auction.

The logbook shows that G5RV's final QSO's took place on the 11th January 2000 and were , appropriately enough recorded on page 73 of the logbook. The stations contacted were Ron Glover, G0WGP, in West

Sussix and club President Harry Heap, G5HF, in Chelmsford. Louis was, of course, using his famed G5RV antenna for all of the contacts. (GB2RS)

**

DX

In D-X, word that W-6-S-J, will be on the air from the Bahamas as C6AWS from November 26th through December 2nd. Activity will include a Single-Op/All-Band/Low-Power entry in the CQ World Wide DX CW Contest. During non-contest periods, he will concentrate on the WARC bands. QSL to his home call. (OPDX)

And Look for 7Q7LA back on the air from Malawi in a few weeks. This, as G0IAS, updates the OPDX that he is hand carrying some ham gear for Ron to be sure that it arrives safe and sound. G0IAS will leave the U-K on the 28th of this month and is expected to arrive at the Lakeshore on the 30th. The confirmation route for 7Q7LA remains direct to G0IAS. There is no QSL bureau in Malawi. (OPDX)

**

THAT FINAL ITEM: UK HAMS ON THE AIR WITH EXPANDED 40 METER PRIVELEGES

And finally this week, hams in the U-K have taken to the airwaves with their recently expanded privileges. RSGB Newsreader Jeramy Boot, G4NJH, is where it all took place:

--

UK radio amateurs gained access to new frequencies between 7.1 and 7.2MHz from 31st October.
After dark, the band between 7.1 and 7.2MHz is still full of powerful broadcast stations, although some clear frequencies can be found.

The band became available on the second day of the CQ World Wide DX Phone Contest. Many UK stations took advantage of the new band by making contest QSOs with stations in the USA on their own frequency, instead of having to work 'split' as had been the case when contacting North America on 40 metres SSB.

During the daytime, numerous UK stations are now able to have virtually interference-free inter-G contacts above 7.1mhz.

The new band is available to radio amateurs on a Secondary, non-interference, basis until 2009. After the end of March 2009, the broadcast stations should move to other frequencies and 7.1 to 7.2MHz will then become an amateur Primary band.

Jeremy Boot, G4NJH, in Nottingham.

--

Amateurs in the Republic of Ireland were also granted access to 7.1 to 7.2 MHz towards the end of October, joining those in Croatia, Norway and San Marino who already had access to these frequencies. Hams in Switzerland will also gain access to 7.1 to 7.2MHz from 1st January 2005. (GB2RS)
**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Norm Seeley, KI7UP, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

London

A wireless message relayed to a ship rescuing survivors from the Titanic -- and sent by Guglielmo Marconi, the creator of wireless radio -- was sold for almost $5,500 yesterday at a British auction house.

The Marconigram, asking for news of the 1912 disaster, was relayed from New York to the SS Carpathia as members of her crew plucked survivors from the Atlantic Ocean. Transcribed in pencil, a Marconigram was transmitted by a wireless designed by the man known as the father of radio.

That's real nice. But taking a cue out of your playbook I must ask if the Globe and Mail are on shortwave?

Is the auction house on shortwave?

Is Marconi still on shortwave?

Is the Titanic stil on shortwave?

Back then, did the Titanic or Marconi actually use shortwave, or was it what we know today as longwave?

Etc.

November 9, 2004

The Daily DX http://www.dailydx.com/ reports that new 60-meter beacons are on the air from England and Scotland. GB3WES in Cumbria, England, and GB3ORK in Scotland's Orkney Islands join GB3RAL in Oxfordshire, which has been on the air since mid-2003. All transmit on 5290 kHz. Each beacon has a stepped transmit power sequence and a 30-second sounder sequence of 0.5 ms pulses at 40 Hz. All three beacons transmit at a nominal power of 10 W.

There's more information, including how to file reception reports, on the RSGB Beacon Reporting website
http://www.rsgb-spectrumforum.org.uk/beacon_reporting.htm

I doubt that would work. If I didn't know anything about him and was bidding on something, I would look at his feedback and figure YOU had an axe to grind and bid anyway. I don't know how many people would do the same. Knowing what I DO know, (which is only what a few of you say) he has many more happy customers than unhappy and it's not out of the question that I MIGHT bid on something of his. It would depend on many things...

Alas My 7030+ "portable" doesn't have a handle as it weighs too much for the handle that the case company (elenco?) makes for it. Too bad, it was a slick handle.

But the radio is mounted in a case with two sets of NIMH battery packs that put out 14.4v, the Avantek preamp, and a rapid charger. A little too interesting at the airport check in lines, and I wouldn't want to take it on a hike, but it fits in an attache case sized toolbox, and it's a heck of a lot more portable than the Racal 6790/gm I used to take on camping trips and vacations.

It also has 3.24 and 6.8khz crystal filters that were originally made for the 6790, so the audio is beautiful too. :)

MFJ stuff seems to be aimed at the penny pinching consumer. Give me something Uncle Sam paid a fortune for and I'll probably be happy. I also bought a preamp a few years ago for about $50 from an outfit in Connecticut - forget the brand. It performed well, but died young.

The magic of the amrad really is in the preamp - and if I was building one, that's where I'd start. You can even buy a PC board for it.

I'm not sure how Wellbrook does what they do, and they stick the electronics in epoxy or something similar so folks can't copy the circuit - but folks who have them all seem to like them and feel they perform as advertised.

>African enslavement and to outlaw interracial marriages.

Yes that is half true Honus. There is nothing wrong with the bible at all, but rather how various groups twist the information therein to fit the hate they are trying to spread.

you have all sorts of white hate groups like the Michigan militia, the KKK, the Order, the skin heads, and thousands of other hate groups who hold the Bible up in the air and try to justify their mad dog white supremacist ideology.

There is absolutely nothing in the bible that supports their ignorant notions that white people are inherently better than darker people.

The truth is that nearly every important person in the Bible is black or dark skinned, from Noah, to Moses to Jesus.

It is also a very nasty thing to do trying to tie in the gay rights movement with racism.

Black people are highly spoken of through out the Bible. God even says that he loves them.

Whereas some of the strongest condemnation in the Bible goes to homosexuals. It is called an ABOMINATION. GOD blew up an entire city because of his disgust with homosexuality. If you claim to be a Christian, you need to understand those things and live by them.

George Bush, Jerry Falwell, and Pat Robinson, calls himself a Christian. He condemns abortion in one breath, and then approves the killing of tens of thousands of innocent Iraqi and Afghani babies, children, and others.

In the tenth commandments, the bible says "Thou shalt not kill"
period!!

I don't see anywhere in the bible where it says a person will be
rewarded with a ticket to heaven for: lying, thieving, massacring
thousands of innocents, deliberately putting America in the path of
destruction , coddling our enemies, worshipping money, and trampling
over our friends.

>
>The Bible isn't the best yardstick to measure all things in human
>life.

What is then? Your opinion? :-) Can you make the sun rise and set? The
seasons change? If, not, then maybe you and those who don't look to
nay higher power need to sit down and rethink things.

When the earth starts trembling violently, which way do you look? Up
towards heaven? Or down towards Satan?
>
>Need I quote from the Book of Leviticus or from some of Paul's
>letters? Talk about some truly scary stuff.

You can if you want, but I would prefer if you would give me the book
chapter and verse so I can read it for myself, and thank you if you
share something with me that is relevant.

What American people really need to read is the book of Proverbs. I
don't know who wrote that book, but it is full of wisdoms, that if
they were followed would result in a much better planet for all of us.

Read the Beatitudes also.

They say things like: Blessed are the peacemakers for they shall
inherit the earth.
>
>>
>>People who endorse it can only say they want to do it.
>
>Non sequitur.]]

What does that mean? What I'm saying is that they have no proof using
science, nature, religion, or culture that gives them grounds to
demand that their lifestyle be given equal treatment to normal
heterosexual people.

If you have information from people that the world loves, Nobel peace
prize folks for example, then show it to me. Don't however, post
anything written by some unknown groups of folks.
>
>
>>They can't support that lifestyle using the Bible, Science, Nature, or
>>sociology.
>

>Homosexuality, certainly, can be found in all of your examples.

Yes, it can be FOUND! We all know that, but only in 2 or 3% of the
population whether it be human, monkeys, chimps, or any other animal.

An intelligent person would not try and turn a society upside down for
something that is so obviously despised worldwide and practiced by so
few people. It is deviant behavior just like people who screw sheep,
jack rabbits, guinea pigs etc.
>
>
>>
>>What I mean is that the bible specifically condemns it in the harshest
>>terms.
>
>True. But the Bible condemns a myriad of things "...in the harshest

>
>Why do you single out homosexuality?

Because homosexuality is given the STRONGEST condemnation of anything
in the Bible. GOD blew up a city because he despised it so much. You
may think you are wise, but I have a lot more trust in what I see in
the KJV, than from what issues from your mouth.
>
>
>>

Very true. I have taken a semester long course on electricity however,
and in every instance likes repel, and opposites attract.
>
>You've chosen to use a not very good analogy. Human sexuality is not
>as simple as you want us to believe.

For most of us it is simple. We all have thoughts of doing things that we know we shouldn't. Most of us have enough self control that we don't do everything that we think about. Or if we do do it, we don't go out and try to legalize it. We just keep quiet about it.

Do you see a movement afoot to legalize adultery? Many of us have done that. It is a lot more natural than being a queer. Yet adulterers are wise enough to keep quiet about what they are doing and not try and make the Nation swallow that this is a moral, and uplifting way to live.

Gays should go back in the closet and be quite. If they don't, they are going to anger WHITE Americans to the point where they may decide to get rid of homosexuals.

We can all see right now just how violent white men can be when they get angry about something. It doesn't matter whether they are right or wrong. They control the weapons, and they decide who lives and who dies. That will probably change much sooner than we think however.

Maybe so, but as you conveniently neglected to mention the two penguins weren't bongholing each other? did the article show pictures of them doing that? I have lots of kittens, and I feed them, keep them warm on my chest when they are cold, and the mother doesn't want to do it, I buried one this morning that died from distemper.

Yet I don't then turn around, bend over, and drop my slacks for some guy to mount me. :-)

November 11, 2004
By Alexa Baracaia
Evening Standard

The BBC is planning to axe as many as 50 per cent of jobs across the board, insiders revealed today.

A raft of cuts is being designed to prove the BBC is giving value for money before a review of its 10-year royal charter in 2006.

High-ranking sources say earlier rumours of 6,000 losses from 28,000 staff may turn out to be a wild underestimate.

> well. It is insane to use a system that cannot be recounted.

Hom many people voted and how long did it take to count the vote?
I am asking because this is an ongoing debate at work, with me taking
the anti-technology position that newer isn't always better.

Kentuky had about 99% of the votes counted within 2 hours of the western
precincts closing. We have the added joy of being in two time zones.
Which is better then 30+ years ago when the state had eastern and central
time zones and an odd mix of DST and non DST counties.

Here in KY, the absentee ballots could not effect the outcome for
President. Even if they were all for Kerry, it would not have been
enough to shift the result. Granting that the count was "fair".

I argue you can have it fast or accurate, you choose.
And they respond that "Terry, you are just nuts!"
This inspite of the fact that our credit union, with about 100,000
members, have at least one case of ID theft a WEEK! The blind sheep
refuse to see that paperless means theft prone.
Terry

You can see the shadow of her left hand and the shadow of the smoke at
the top of the abortuary. That is the shadow caused by the flash camera.

Did you read of all the folks who saw it?

Wonder why it got so little coverage?

I'll bet had she doused herself with gasoline and THEN walked into the
abortuary to light herself up it would have gotten LOTS of attention --
especially had she grabbed a baby killer around the neck before flicking
her Bic! Oh, I can see the headlines and hear the comments now, but
I'll save them for later! ;-)

Yes. I was a professional phographer at one time and I'm still avidly
involved in freelance work. The cut and paste in that middle pic is sub par.

Interesting is that the guy starts off on a bad foot at the start... "Our budget was $600 at most, including tax; we could not go a penny higher."

To me that says it all... he's simply justifying his purchase. (bias).

Nice article though.

Holy shit!!! This is a resurrection of the Nuremberg Files!!

http://www.christiangallery.com/

If you've never heard of this twisted SOB, brace yourself before you go to that link. Their old slogan was "Documenting the desecration" or something along those lines. He took the biblical notion of bringing the evil in the world into the light a little too literally. It was the only Christian site that I know of where you could actually see two men "going at it". So clear the air, Patrick...do you support this guy? I can't wait for Mr. Martin and Mr. Knowledge to chime in.

Message-ID: <4195626D.89A0B8E@eclipsed.net>
Source record: 2612

SB PROP ARL ARLP046
ARLP046 Propagation de K7RA

This was a wild week for propagation, fraught with radio blackouts, 6-meter auroral propagation, wild solar wind and severe geomagnetic storms.

Looking at the numbers summarized at the end of each bulletin, this week's average daily planetary A index (indicating geomagnetic instability) was up by nearly 70 points to 77.6, and the mid-latitude A index increased over 36 points to 41.9. Average daily sunspot numbers and solar flux declined. Our reporting week, for the convenience of putting out this report prior to each weekend, runs from each Thursday through the following Wednesday.

The prediction for the next few days is for continuing aurora displays and geomagnetic storms, but the storms should subside. The predicted planetary A index for today, November 12, is 100, followed by 30 on Saturday and 10 on Sunday. Today's possible geomagnetic storm is predicted because of a coronal mass ejection blown into space on November 10. But this blast is not aimed at earth, so the effect is not as strong as it would be if the event were squarely in the middle of the solar disk.

Predicted solar flux, which averaged under 130 this week, is expected to decline over the next few days and then rise again, with predicted flux values of 90, 85, 85, 90, 100 and 105 for November 12-17. Solar flux and associated sunspot numbers for the short term are expected to peak some time around November 23-24.

A good web site to look at to see the rise of geomagnetic numbers over several latitudes is at, http://www.sec.noaa.gov/ftpdir/indices/DGD.txt. This shows the previous month, so if you're looking at this in the future (perhaps on the archive on the http://www.arrl.org/w1aw/prop/ web site), you'll only see the current conditions, not what we're seeing today.

The numbers are quite dramatic, especially if you have a feel for the A index and K index that you hear on the hourly WWV broadcasts, and how they relate to what you are hearing on the air.

Lots of mail came in concerning geomagnetic storms, which accompanied unstable and often unusable conditions on the HF bands, but produced interesting propagation and excitement on VHF. Jon Jones, N0JK, paraphrasing last week's bulletin, wrote that "The VHF Community *is not* hoping 'it is more moderate than the current

prediction.'"

Chip Margelli, K7JA wrote an interesting note concerning HF conditions at the end of the CW Sweepstakes followed by all the excitement on 6-meters. He said that some signals on 15-meters had a distinct aurora flutter, but others were completely flutter-free and quite loud. About 50 percent of the stations to the east of him (he is in Southern California) had an auroral characteristic.

I'll let Chip tell the rest: "About 0545z November 8th (late Sunday night in California), KH6SX reported on the 50 MHz Propagation Logger that he was hearing the K6FV beacon on 6-meters. I quickly rotated my beam in his direction, and with one call I had him in the log. His signal was full of rapid aurora flutter, which is astounding for a path to Hawaii!"

He goes on to say, "The opening then moved westward, with W6YM, WA6KLK, KG6I, and others in the Northern California working him. It progressed to the Northwest, where N7EPD, KE7V, K7SS, and undoubtedly more logged him. Then further west to KL7FZ in BP51! And then JA2DDN and a host of other JAs were worked by KH6SX!"

Chip adds, "From here in Southern California, the signal characteristics suggest some odd auroral-E to AU link. It's hard to imagine a "normal" E opening with such a wide distribution, and the westward progression suggests an enhancement ahead of the heliopause. But I think the book may need some re-writing on this one, and the exact mechanics are a bit of a mystery to me. I bet an inspection of the solar wind velocity plots after 0500z would make interesting reading."

He continues, "No easterly propagation was observed, to my knowledge, from Southern California prior to the KH6 event. If this really was an aurora event worked from Hawaii, this may be a "first," and KH6SX is to be congratulated for being so on the ball!"

The 50 MHz Propagation Logger web page that Chip mentioned is at, http://www.dxworld.com/50prop.html.

K7SS here in Seattle related moments of sheer joy on 6-meters. It was reported that in Connecticut, Dennis Motschenbacher, K7BV, bagged his fiftieth state on 50 MHz when he worked Kevin Forster, NL7Z in Wasilla, Alaska via aurora.

Junji Saito, JA7SSB wrote that he was on 20 and 30 meters on November 8 around 1430-1500z (late evening in Japan) when the bands are usually closed for him, but he generated a big pileup of European stations. He noticed that the signals had deep fading and echoes.

Carl Zelich, AA4MI sent in a useful link to a glossary of solar-terrestrial terms. It is on the NOAA Space Environment Center web site at http://www.sec.noaa.gov/info/glossary.html.

If you would like to comment or have a tip, email the author at,
k7ra@arrl.net.

For more information concerning propagation and an explanation of
the numbers used in this bulletin see the ARRL Technical Information
Service propagation page at,
http://www.arrl.org/tis/info/propagation.html.

Sunspot numbers for November 4 through 10 were 135, 83, 106, 94, 93,
90 and 50 with a mean of 93. 10.7 cm flux was 136, 141.2, 128.8,
129.6, 124.1, 140.9 and 104.6, with a mean of 129.3. Estimated
planetary A indices were 7, 4, 3, 39, 189, 120 and 181, with a mean
of 77.6. Estimated mid-latitude A indices were 5, 1, 4, 19, 116, 47
and 101, with a mean of 41.9.

The latter is a misleading part of an otherwise interesting report. I'm sure it was *their* experience on the bands they were on, you just can't draw conclusions that they intend the reader to make. Propagation from Pt Reyes (Southern) California to the East coast was consistent for part of every day and almost all night long, all week.

I power everything from solar and a 440 amp-hour battery bank.

Some thoughts:

- EVERY wire to/from the battery (bank) must be fused.
- All of my batteries are gel-cells, obtained at rock-bottom prices
from people who replace life-critical batteries every year. $30 for
an 80 Ah battery and the like.
- I use the West Mountain Radio Rigrunner for distribution to
individual radios. Size the fuses there appropriately -- these are
the ones that should blow from something going wrong "normally" (as
opposed to a catastrophic failure, which is what the battery fuses are
for).
- If you use a charger powered by the mains, make sure that it tops
off properly and handles overload conditions gracefully. The reason
for the latter is obvious. The reason for the former -- ESPECIALLY
with gel-cells or AGM batteries is that overcharging destroys them.
- If you use solar power, chargers are available from a large number
of places. I recommend Morningstar. There are also Maximum Power
Point chargers that will produce the most efficient voltage/current
for the panels, but cost more.
- For solar panels, I recommend Solarex.
- For solar equipment suppliers, I recommend Backwoods Solar
(www.backwoodssolar.com)

I purchased a new Icom R-75 about 3 weeks ago, and noticed that there is no clear plastic window covering the LCD panel. Touching the LCD panel causes the blurring or distortion effect on the digits that you would normally see.

After checking the Yahoo newsgroup one other person responded that his R75 does not have the window either. This surprises me, since even my $5 desk calculator has a protective window for the LCD panel.

So now I'm wondering if it was left off some radios during manufacture, or if this is actually a design flaw.

Could owners of R-75's please reply to this post whether or not their receiver has a clear protective window over the LCD panel?

I am very sure that many of his positive feedback is in fact RadioMart
himself or some dirty cohorts of his.

Message-ID: <cn425m$3gb$1@ctb-nnrp2.saix.net>
Source record: 2635

I have been getting superb performance from my RF Systems DX 1 Pro active antenna for some years now. It is made in Holland and is used by many embassies and government services. My reception on LW, MW and Tropical Bands is outstanding and the antenna is very quiet compared with my longwire antenna's which I have now dismantled.

Get a copy of Passport 2005 where you will find very good reviews of all the available active antenna's. They favour the Wellbrook antenna's.
See http://www.passband.com/ if you want to order one

Don't believe what they say about the DX 1 being noisy, as it's not.
Visiting DXer's to my urban town shack always remark on how quiet it is.

Im Hotep (In peace)

Sorry to trick you all this way, but it really bothers me when I see people burying their heads in the sand and talking about kill filling people who oft times are presenting them with information that could change their lives for the better. Folks who are trying to help you; not harm you.

I'm not an ordained minister, but I want to share this link with you all because I see tons of hatred, ignorance, and hostility on this forum just as I do all over the Internet.

I was telling you earlier about the beauty that lies in the Beatitudes.

The King James Version of the Christian Bible is still the best selling book ever! However, very few people have taken the time to read this amazing history of African People on planet Earth.

Your preachers wax eloquent every day about the Bible, but they only read to you what they want yo to know. they rarely talk about what you will see and hear at these sites below.

I'm not sure who wrote the bible, but I can tell by the way the words are phrased in such a beautiful manner, by the incredible amounts of good life advice that are given to readers, and by the way it flows unlike any other book that has ever been written that it is divinely inspired.

So you can run, but you can't hide. there are certain evils going on in American that you all refuse to discuss. One day the victims of these evil may turn up at your front door very angry. Then it will be to late to say you want to sit down and talk. That will be judgment for you.

So click on this link and click on the link to the "Beatitudes" first. Watch that beautiful short video. Then when you have caught your breath and dried your eyes, click on the "Lords Prayer".

I know this is foreign to those of you who don't grow up in religious home, but it won't hurt you at all to look closely at this. I'm not going to interpret this for you as preachers do. I think you are smart enough to understand for yourself what is being said and the true meaning of it.

Nowhere on this web site will you find any hatred. Only peace, love, and soul.

Enjoy it. I know some of you will thank me for this right away. Others may take a little longer. There will be some lives altered for the better because of this one simple link.

Then try and find anywhere in the Bible where it says anything negative about black people

Just remember, we all are children of the universe. No less than the wind and the stars. We have a right to be here. And whether or not things are clear to you; no doubt the galaxy is unfolding as it should. Be true to yourself. Strive to be happy. Even though life is full of pain and drudgery; everywhere you can find people of truly high morals and ideas. It is still a beautiful world.

http://www.interviewwithgod.com/beatitudes/index.htm

http://www.interviewwithgod.com/index.htm

If you have an inside line to GWB and his band of devils, email them and tell them to look over the information at this site carefully, and then ask themselves is killing everyone who doesn't agree with you the way to true peace among mankind?

Go safely

Knowledge

P.S.

Here are a few more scriptures that show the huge role black folks played in the Bible.

Numbers chapter 12 verse 1

King Solomons mother Bathsheba was a black woman. that means Solomon was at least half black. Yet the LORD,GOD, says below that "the LORD loved him"
Now if GOD loves black people don't you think you should learn to do so as well?

2 Samuel 12:23 But now he is dead, wherefore should I fast? can I bring him back again? I shall go to him, but he shall not return to me.
24 And David comforted Bathsheba his wife, and went in unto her, and lay with her: and she bare a son, and he called his name Solomon: and the LORD loved him.

1Co 5:13 But them that are without God judgeth. Therefore put away from among yourselves that wicked person.

1 Corinthians chapter 6

9 ï¿½ Know ye not that the unrighteous shall not inherit the kingdom of
God? Be not deceived: neither fornicators, nor idolaters, nor
adulterers, nor effeminate, nor abusers of themselves with mankind,
10 Nor thieves, nor covetous, nor drunkards, nor revilers, nor
extortioners, shall inherit the kingdom of God.
11 And such were some of you: but ye are washed, but ye are
sanctified, but ye are justified in the name of the Lord Jesus, and by
the Spirit of our God.
12 ï¿½ All things are lawful unto me, but all things are not expedient:
all things are lawful for me, but I will not be brought under the
power of any.
13 Meats for the belly, and the belly for meats: but God shall
destroy both it and them. Now the body is not for fornication, but for
the Lord; and the Lord for the body.
14 And God hath both raised up the Lord, and will also raise up us by
his own power.

Jesus tells his disciples that "A rich man has as much of a chance of
going to heaven as a Camel does passing through the eye of a needle

Mt 19:18 He saith unto him, Which? Jesus said, Thou shalt do no
murder, Thou shalt not commit adultery, Thou shalt not steal, Thou
shalt not bear false witness,
19 Honour thy father and thy mother: and, Thou shalt love thy
neighbour as thyself.
20 The young man saith unto him, All these things have I kept from my
youth up: what lack I yet?
21 Jesus said unto him, If thou wilt be perfect, go and sell that
thou hast, and give to the poor, and thou shalt have treasure in
heaven: and come and follow me.
22 But when the young man heard that saying, he went away sorrowful:
for he had great possessions.
23 ï¿½ Then said Jesus unto his disciples, Verily I say unto you, That
a rich man shall hardly enter into the kingdom of heaven.

---
24 And again I say unto you, It is easier for a camel to go through
the eye of a needle, than for a rich man to enter into the kingdom of
God.

---
25 When his disciples heard it, they were exceedingly amazed, saying,
Who then can be saved?
26 But Jesus beheld them, and said unto them, With men this is
impossible; but with God all things are possible.
27 Then answered Peter and said unto him, Behold, we have forsaken
all, and followed thee; what shall we have therefore?
28 And Jesus said unto them, Verily I say unto you, That ye which
have followed me, in the regeneration when the Son of man shall sit in
the throne of his glory, ye also shall sit upon twelve thrones,
judging the twelve tribes of Israel.

That means people who worship money and will do anything immoral, or unethical to get it do not find favor in the eyes of GOD.

Here is a parable that most of you probably have never heard that again warns you of being greedy and living for money as our administration does.

Lu 12:13 ï¿½ And one of the company said unto him, Master, speak to my brother, that he divide the inheritance with me.
14 And he said unto him, Man, who made me a judge or a divider over you?
15 And he said unto them, Take heed, and beware of covetousness: for a man's life consisteth not in the abundance of the things which he possesseth.
---
16 And he spake a parable unto them, saying, The ground of a certain rich man brought forth plentifully:
17 And he thought within himself, saying, What shall I do, because I have no room where to bestow my fruits?
18 And he said, This will I do: I will pull down my barns, and build greater; and there will I bestow all my fruits and my goods.
19 And I will say to my soul, Soul, thou hast much goods laid up for many years; take thine ease, eat, drink, and be merry.
20 But God said unto him, Thou fool, this night thy soul shall be required of thee: then whose shall those things be, which thou hast provided?
21 So is he that layeth up treasure for himself, and is not rich toward God.
22 ï¿½ And he said unto his disciples, Therefore I say unto you, Take no thought for your life, what ye shall eat; neither for the body, what ye shall put on.
23 The life is more than meat, and the body is more than raiment.
---
24 Consider the ravens: for they neither sow nor reap; which neither have storehouse nor barn; and God feedeth them: how much more are ye better than the fowls?
25 And which of you with taking thought can add to his stature one cubit?
26 If ye then be not able to do that thing which is least, why take ye thought for the rest?

Here is a description of Jesus having "wooly hair" and feet like "Brass" find some real Brass and look at how dark it is.

The American churches need to stop lying by portraying Jesus as a white man when he most definitely wasn't. That is a sin of the highest order.

Re 1:9 ï¿½ I John, who also am your brother, and companion in tribulation, and in the kingdom and patience of Jesus Christ, was in the isle that is called Patmos, for the word of God, and for the

testimony of Jesus Christ.
10 I was in the Spirit on the Lord's day, and heard behind me a great
voice, as of a trumpet,
11 Saying, I am Alpha and Omega, the first and the last: and, What
thou seest, write in a book, and send it unto the seven churches which
are in Asia; unto Ephesus, and unto Smyrna, and unto Pergamos, and
unto Thyatira, and unto Sardis, and unto Philadelphia, and unto
Laodicea.

---
12 And I turned to see the voice that spake with me. And being
turned, I saw seven golden candlesticks;
13 And in the midst of the seven candlesticks one like unto the Son
of man, clothed with a garment down to the foot, and girt about the
paps with a golden girdle.
14 His head and his hairs were white like wool, as white as snow; and
his eyes were as a flame of fire;
15 And his feet like unto fine brass, as if they burned in a furnace;
and his voice as the sound of many waters.

---
16 And he had in his right hand seven stars: and out of his mouth
went a sharp twoedged sword: and his countenance was as the sun
shineth in his strength.
17 And when I saw him, I fell at his feet as dead. And he laid his
right hand upon me, saying unto me, Fear not; I am the first and the
last:
18 I am he that liveth, and was dead; and, behold, I am alive for
evermore, Amen; and have the keys of hell and of death.
19 Write the things which thou hast seen, and the things which are,
and the things which shall be hereafter;
20 The mystery of the seven stars which thou sawest in my right hand,
and the seven golden candlesticks. The seven stars are the angels of
the seven churches: and the seven candlesticks which thou sawest are

Another admonishment about not getting involved with homosexuality

Romans Chapter 1:verse 25 Who changed the truth of God into a lie,
and worshipped and served the creature more than the Creator, who is
blessed for ever. Amen.

---
26 For this cause God gave them up unto vile affections: for even
their women did change the natural use into that which is against
nature:
27 And likewise also the men, leaving the natural use of the woman,
burned in their lust one toward another; men with men working that
which is unseemly, and receiving in themselves that recompence of
their error which was meet.

---
28 And even as they did not like to retain God in their knowledge,
God gave them over to a reprobate mind, to do those things which are
not convenient;
29 Being filled with all unrighteousness, fornication, wickedness,
covetousness, maliciousness; full of envy, murder, debate, deceit,
malignity; whisperers,
30 Backbiters, haters of God, despiteful, proud, boasters, inventors
of evil things, disobedient to parents,
31 Without understanding, covenantbreakers, without natural
affection, implacable, unmerciful:
32 Who knowing the judgment of God, that they which commit such
things are worthy of death, not only do the same, but have pleasure in
them that do them.

Here is the strongest condemnation of homosexuality in the Bible

Le 18:22 Thou shalt not lie with mankind, as with womankind: it is
abomination.
23 Neither shalt thou lie with any beast to defile thyself therewith:
neither shall any woman stand before a beast to lie down thereto: it
is confusion.

---
24 Defile not ye yourselves in any of these things: for in all these
the nations are defiled which I cast out before you:
25 And the land is defiled: therefore I do visit the iniquity thereof
upon it, and the land itself vomiteth out her inhabitants.
26 Ye shall therefore keep my statutes and my judgments, and shall
not commit any of these abominations; neither any of your own nation,
nor any stranger that sojourneth among you:
27 (For all these abominations have the men of the land done, which
were before you, and the land is defiled;)
28 That the land spue not you out also, when ye defile it, as it
spued out the nations that were before you.
29 For whosoever shall commit any of these abominations, even the
souls that commit them shall be cut off from among their people.
30 Therefore shall ye keep mine ordinance, that ye commit not any one
of these abominable customs, which were committed before you, and that
ye defile not yourselves therein: I am the LORD your God.

God destroying SODOM because of the perverted behavior going on there.

Ge 18:18 Seeing that Abraham shall surely become a great and mighty
nation, and all the nations of the earth shall be blessed in him?
19 For I know him, that he will command his children and his
household after him, and they shall keep the way of the LORD, to do
justice and judgment; that the LORD may bring upon Abraham that which
he hath spoken of him.
20 And the LORD said, Because the cry of Sodom and Gomorrah is great,
and because their sin is very grievous;
21 I will go down now, and see whether they have done altogether

according to the cry of it, which is come unto me; and if not, I will know.
22 And the men turned their faces from thence, and went toward Sodom: but Abraham stood yet before the LORD.
23 ï¿½ And Abraham drew near, and said, Wilt thou also destroy the righteous with the wicked?
24 Peradventure there be fifty righteous within the city: wilt thou also destroy and not spare the place for the fifty righteous that are therein?
25 That be far from thee to do after this manner, to slay the righteous with the wicked: and that the righteous should be as the wicked, that be far from thee: Shall not the Judge of all the earth do right?
26 And the LORD said, If I find in Sodom fifty righteous within the city, then I will spare all the place for their sakes.
27 And Abraham answered and said, Behold now, I have taken upon me to speak unto the Lord, which am but dust and ashes:
28 Peradventure there shall lack five of the fifty righteous: wilt thou destroy all the city for lack of five? And he said, If I find there forty and five, I will not destroy it.
29 And he spake unto him yet again, and said, Peradventure there shall be forty found there. And he said, I will not do it for forty's sake.
30 And he said unto him, Oh let not the Lord be angry, and I will speak: Peradventure there shall thirty be found there. And he said, I will not do it, if I find thirty there.
31 And he said, Behold now, I have taken upon me to speak unto the Lord: Peradventure there shall be twenty found there. And he said, I will not destroy it for twenty's sake.
32 And he said, Oh let not the Lord be angry, and I will speak yet but this once: Peradventure ten shall be found there. And he said, I will not destroy it for ten's sake.
33 And the LORD went his way, as soon as he had left communing with Abraham: and Abraham returned unto his place.

Genesis chapter 19

1 ï¿½ And there came two angels to Sodom at even; and Lot sat in the gate of Sodom: and Lot seeing them rose up to meet them; and he bowed himself with his face toward the ground;
2 And he said, Behold now, my lords, turn in, I pray you, into your servant's house, and tarry all night, and wash your feet, and ye shall rise up early, and go on your ways. And they said, Nay; but we will abide in the street all night.
3 And he pressed upon them greatly; and they turned in unto him, and entered into his house; and he made them a feast, and did bake unleavened bread, and they did eat.
4 ï¿½ But before they lay down, the men of the city, even the men of Sodom, compassed the house round, both old and young, all the people from every quarter:
5 And they called unto Lot, and said unto him, Where are the men

which came in to thee this night? bring them out unto us, that we may know them.
6 And Lot went out at the door unto them, and shut the door after him,
7 And said, I pray you, brethren, do not so wickedly.
8 Behold now, I have two daughters which have not known man; let me, I pray you, bring them out unto you, and do ye to them as is good in your eyes: only unto these men do nothing; for therefore came they under the shadow of my roof.
9 And they said, Stand back. And they said again, This one fellow came in to sojourn, and he will needs be a judge: now will we deal worse with thee, than with them. And they pressed sore upon the man, even Lot, and came near to break the door.
10 But the men put forth their hand, and pulled Lot into the house to them, and shut to the door.
11 And they smote the men that were at the door of the house with blindness, both small and great: so that they wearied themselves to find the door.
12 ï¿½ And the men said unto Lot, Hast thou here any besides? son in law, and thy sons, and thy daughters, and whatsoever thou hast in the city, bring them out of this place:
13 For we will destroy this place, because the cry of them is waxen great before the face of the LORD; and the LORD hath sent us to destroy it.
14 And Lot went out, and spake unto his sons in law, which married his daughters, and said, Up, get you out of this place; for the LORD will destroy this city. But he seemed as one that mocked unto his sons in law.
15 ï¿½ And when the morning arose, then the angels hastened Lot, saying, Arise, take thy wife, and thy two daughters, which are here; lest thou be consumed in the iniquity of the city.
16 And while he lingered, the men laid hold upon his hand, and upon the hand of his wife, and upon the hand of his two daughters; the LORD being merciful unto him: and they brought him forth, and set him without the city.
17 And it came to pass, when they had brought them forth abroad, that he said, Escape for thy life; look not behind thee, neither stay thou in all the plain; escape to the mountain, lest thou be consumed.
18 And Lot said unto them, Oh, not so, my Lord:
19 Behold now, thy servant hath found grace in thy sight, and thou hast magnified thy mercy, which thou hast shewed unto me in saving my life; and I cannot escape to the mountain, lest some evil take me, and I die:
20 Behold now, this city is near to flee unto, and it is a little one: Oh, let me escape thither, (is it not a little one?) and my soul shall live.
21 And he said unto him, See, I have accepted thee concerning this thing also, that I will not overthrow this city, for the which thou hast spoken.
22 Haste thee, escape thither; for I cannot do any thing till thou be

come thither. Therefore the name of the city was called Zoar.
23 The sun was risen upon the earth when Lot entered into Zoar.
24 ï¿½ Then the LORD rained upon Sodom and upon Gomorrah brimstone and fire from the LORD out of heaven;
25 And he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground.
26 ï¿½ But his wife looked back from behind him, and she became a pillar of salt.
27 ï¿½ And Abraham gat up early in the morning to the place where he stood before the LORD:
28 And he looked toward Sodom and Gomorrah, and toward all the land of the plain, and beheld, and, lo, the smoke of the country went up as the smoke of a furnace.
29 And it came to pass, when God destroyed the cities of the plain, that God remembered Abraham, and sent Lot out of the midst of the overthrow, when he overthrew the cities in the which Lot dwelt.
30 ï¿½ And Lot went up out of Zoar, and dwelt in the mountain, and his two daughters with him; for he feared to dwell in Zoar: and he dwelt in a cave, he and his two daughters.
31 And the firstborn said unto the younger, Our father is old, and there is not a man in the earth to come in unto us after the manner of all the earth:
32 Come, let us make our father drink wine, and we will lie with him, that we may preserve seed of our father.
33 And they made their father drink wine that night: and the firstborn went in, and lay with her father; and he perceived not when she lay down, nor when she arose.
34 And it came to pass on the morrow, that the firstborn said unto the younger, Behold, I lay yesternight with my father: let us make him drink wine this night also; and go thou in, and lie with him, that we may preserve seed of our father.
35 And they made their father drink wine that night also: and the younger arose, and lay with him; and he perceived not when she lay down, nor when she arose.
36 Thus were both the daughters of Lot with child by their father.
37 And the firstborn bare a son, and called his name Moab: the same is the father of the Moabites unto this day.
38 And the younger, she also bare a son, and called his name Benammi: the same is the father of the children of Ammon unto this day.

Genesis chapter 20

Here GODS right hand man Moses is supported by GOD for marrying an Ehtiopian, black African woman; not a white woman like the lie told in the movie 10 Commandments, or in Mel Gibsons piece of trash movie.

Nu 12:1 ï¿½ And Miriam and Aaron spake against Moses because of the Ethiopian woman whom he had married: for he had married an Ethiopian woman.
2 And they said, Hath the LORD indeed spoken only by Moses? hath he not spoken also by us? And the LORD heard it.

3 (Now the man Moses was very meek, above all the men which were upon
the face of the earth.)
4 ï¿½ And the LORD spake suddenly unto Moses, and unto Aaron, and unto
Miriam, Come out ye three unto the tabernacle of the congregation. And
they three came out.
5 And the LORD came down in the pillar of the cloud, and stood in the
door of the tabernacle, and called Aaron and Miriam: and they both
came forth.
6 And he said, Hear now my words: If there be a prophet among you, I
the LORD will make myself known unto him in a vision, and will speak
unto him in a dream.

---
7 My servant Moses is not so, who is faithful in all mine house.
8 With him will I speak mouth to mouth, even apparently, and not in
dark speeches; and the similitude of the LORD shall he behold:
wherefore then were ye not afraid to speak against my servant Moses?
9 And the anger of the LORD was kindled against them; and he
departed.
10 ï¿½ And the cloud departed from off the tabernacle; and, behold,
Miriam became leprous, white as snow: and Aaron looked upon Miriam,
and, behold, she was leprous.

---
11 And Aaron said unto Moses, Alas, my lord, I beseech thee, lay not
the sin upon us, wherein we have done foolishly, and wherein we have
sinned.
12 Let her not be as one dead, of whom the flesh is half consumed
when he cometh out of his mother's womb.
13 And Moses cried unto the LORD, saying, Heal her now, O God, I
beseech thee.
14 And the LORD said unto Moses, If her father had but spit in her
face, should she not be ashamed seven days? let her be shut out from
the camp seven days, and after that let her be received in again.
15 And Miriam was shut out from the camp seven days: and the people
journeyed not till Miriam was brought in again.
16 And afterward the people removed from Hazeroth, and pitched in the
wilderness of Paran.

So obviously interracial marriage must be OK in GODS eyes if his top
general had a black woman for his wife, and GOD punished those who
criticized the relationship.

Here is the story of another of GODS great men "Abraham" He had a
child by his wifes handmaiden "Hagar the Egyptian" Egypt is and always
has been in North Africa; not europe.

That mulatto child became the ancestory of both the Israelis and the
Palestinians. Both races have massive amounts of African genetic
makeup.

Ge 16:1 ï¿½ Now Sarai Abram's wife bare him no children: and she had an
handmaid, an Egyptian, whose name was Hagar.
2 And Sarai said unto Abram, Behold now, the LORD hath restrained me
from bearing: I pray thee, go in unto my maid; it may be that I may
obtain children by her. And Abram hearkened to the voice of Sarai.

---
3 And Sarai Abram's wife took Hagar her maid the Egyptian, after
Abram had dwelt ten years in the land of Canaan, and gave her to her
husband Abram to be his wife.
4 ï¿½ And he went in unto Hagar, and she conceived: and when she saw
that she had conceived, her mistress was despised in her eyes.

---
5 And Sarai said unto Abram, My wrong be upon thee: I have given my
maid into thy bosom; and when she saw that she had conceived, I was
despised in her eyes: the LORD judge between me and thee.
6 But Abram said unto Sarai, Behold, thy maid is in thy hand; do to
her as it pleaseth thee. And when Sarai dealt hardly with her, she
fled from her face.
7 ï¿½ And the angel of the LORD found her by a fountain of water in the
wilderness, by the fountain in the way to Shur.
8 And he said, Hagar, Sarai's maid, whence camest thou? and whither
wilt thou go? And she said, I flee from the face of my mistress Sarai.
9 And the angel of the LORD said unto her, Return to thy mistress,
and submit thyself under her hands.
10 ï¿½ And the angel of the LORD said unto her, I will multiply thy
seed exceedingly, that it shall not be numbered for multitude.
11 And the angel of the LORD said unto her, Behold, thou art with
child, and shalt bear a son, and shalt call his name Ishmael; because
the LORD hath heard thy affliction.
12 And he will be a wild man; his hand will be against every man, and
every man's hand against him; and he shall dwell in the presence of
all his brethren.
13 And she called the name of the LORD that spake unto her, Thou God
seest me: for she said, Have I also here looked after him that seeth
me?
14 Wherefore the well was called Beerlahairoi; behold, it is between
Kadesh and Bered.
15 ï¿½ And Hagar bare Abram a son: and Abram called his son's name,
which Hagar bare, Ishmael.
16 And Abram was fourscore and six years old, when Hagar bare Ishmael
to Abram.

Remember, wherever you go in life,
there you are!

Al,

Do you *EVER* post anything about shortwave radio? I feel like all you do is try to incite people to anger. Get a fucking life.

LOL !!!

The Bible is a history of blacks? How absurd and demonstrably false.

>
>
>Then try and find anywhere in the Bible where it says anything

It doesn't say anything positive about blacks either. In fact, it hardly
mentions them at all.

So why aren't you condemning the muslims? If anyone is killing everyone that
doesn't agree with them, it is the MUSLIMS. Oh, I see, since you are a BLACK
RACIST, you don't want black muslims to be portrayed negatively. You just be
hatin dem blue-eyed devils.

Where does it state that she was black? Why didn't you quote any scripture that says she was black? The answer is obvious, there is no such scripture and you're a liar, a con-man, and a black racist.

You're full of crap.

I just got mine like a month ago and it has no cover I can detect. Hmm,
perhaps like one poster said the lens might distort the LCD but someone I
just can't see how. This is good question to ask Icom support about.

Usually these things are resource based decisions. I guess they felt it was
unneccessary and not worth adding. I would have never noticed it till you
pointed it. Now I have to think of this and you every time I look at the
display :)

Hey wait, look at large LCD TV screens and some monitors. They have no
protective plate at all. I guess for visual quality. Might apply here too.

Another way is to contact Ebay and complain to them. Ask them why they allowed a known
cheat to operate after they banned him.
Well, we know *why they allowed him back on, but let's throw it in their face.

And yes I got burned by him to some degree. Not totally, but he tricked me into believing it was "just like new" with the 2 original boxes also. It had scratches on top when the pictures showed none. A switch was also bad. But it said "it has been fully tested and checked out" and "like brand new"

He's a liar, a pump artist, a scammer. I actually believed at one time {and still do to some degree} that most people in this hobby are pretty mild mannered guys with above average responsibility and would do no wrong to one another.

GG,

GG - You seem to be 'trapped' in a "Fascist-State-of-Mind"
all of your own making and imagination.
[Here a Fascist! There a Fascist! Everywhere a Fascist!]
{ I See Fascist! I See Fascist! Lot and Lots of Fascists!]

President George "W" Bush's MANDATE is Clear and
WE the American People (Citizen Voters) have Spoken [.]

Strike One.
A 'mandate' is when you get 50%+ of the Vote;
- Which Bill Clinton NEVER Did [.]

Strike Two.
A 'mandate' is when you carry new members of the US House into Office:
- Which Bill Clinton NEVER Did [.]

Strike Three.
A 'mandate' is when you carry new members of the US Senate into Office:
- Which Bill Clinton NEVER Did [.]

That's Three Strikes for a "MANDATE"
- "GG" You're Out [!]

"GG" - I 'guess' in your mind the "Majority" of the American Voting
Public are ALL 'part' of the Vast Right-Wing Conspiracy.
{ Hello "GG" It's Time for a Reality Check ! }

WE'RE HERE ! (We're not Queer.)
Just 'the common' American Citizens - Who Love Their Country.
Per John 'ff' Kerry:
"God Bless America" amen, Amen. and AMEN !

"It's Official -- Bush Wins Iowa"
- Last Republican To Carry Iowa Was Reagan In 1984
http://www.theiowachannel.com/politics/3895022/detail.html
- Posted: 11:21 AM CST November 5, 2004

DES MOINES, Iowa
- Iowa has a WINNER
- President George W. Bush.

The Bottom Line:
* President George "W" Bush "Wins" with 286 Electoral Votes.
* Senator John 'ff' Kerry got 'only' 252 Electoral Votes and lost.

Per John (The Mouth Piece) Edwards:
Every Vote Should Count !
Every Vote Should Be Counted [.]

WE "The {American Citizens} People" Have Spoken:
* President George "W" Bush received the Majority of the Popular Votes.
* President George "W" Bush received the Highest Number of the
Popular Votes in the History of US Presidential Elections.

and nowï¿½ you know the rest of the story ~ RHF

Radio Guy,

The "Re-Ability" Factor of any recurring eMail goes up when it
is Kept 'short' by providing 'Links' to bits of Text and Formated
Data that may not change with each eMail Message.

The second Advantage to this Structure, Formating and Presentation
of "Information" causes the Reader-Recipient to Click-On the Link.
This can be Tracked by the 'originator' of the eMail back to their
WebSite and allow them to better 'identify' the needs of the
"Customer" of their Informationa and the Service they provide.

Adding things like the protective window would add to the cost of the radio, and it's probably not the sort of feature people think about when shopping.

Another radio without protection for the LCD's is the Racal 6790 - and this may be one reason why there's a regular market for replacements.

CW,

Actually a little more is needed.

Power Recharging End - Battery Charger

Middle - Battery and Double Knife Edge Switch*

Radio Reception End - Radio/Receiver

* Note: The Knife Edge Switch is wired with the Battery as the
Center Switch-Arm Position; the Recharger on one side; and the
Radio Receiver on the other side. This provides an 'effective'
Safety Lock-Out to prevent any chance of directly connecting the
Battery Charger to the Radio.

Is the Superheterodyne set over rated? It seems to me there were certain advantages to the OLD ways. Ease of control perhaps not being one of them.

What was the WORST feature of the Regenerative sets? The BEST feature?

Would it be worthwhile to build a kit?

mike

In this hobby there are gadgets for everything, but that isolator is not one that has any usefulness whatsoever. In all mobile (cars, boats, aircraft) operations the alternator is not isolated from the radio, nor does any harm come from a battery charger being in parallel with the radio. Well o.k., I can see it might protect an IDIOT from setting a commercial battery charger to "boost" while the radio was operating. Short of that, a waste of money imo.

Jack

2659. John Peel - final BBC World Service will be broadcast next week

Newsgroup: rec.radio.shortwave
Date: 2004-11-13 07:48:18 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cn4e82$n2h$1@sparta.btinternet.com>
Source record: 2659

November 13, 2004

By Adam Sherwin, Media Reporter
The Times

It is a typically eclectic mixture of 1970s German rock, hardcore "grime" and Liverpool indie. The final programme recorded by John Peel will be broadcast by the BBC World Service next week.

Peel's weekly show allowed millions of listeners to share his musical passions and fans in China and India were among the thousands sending tributes to the Service. He recorded a series of programmes before his trip to Peru where he suffered a fatal heart attack. The last will be transmitted this Friday.

"Unwrapping the final John Peel programmes was a bittersweet experience," said Bobby Seiler, his producer. He added: "What this programme does do is represent the breadth of music that John always promoted. Among the records on this show, there are examples of music from Sweden, Germany, the United States, Czech Republic and his own beloved Liverpool."

There is a track by Neu, a 1970s German band whose driving "motorik" sound influenced electronic pop music. A classical cellist-turned hip-hop producer from Brooklyn calling himself Mad provides a track called I am 6 on the Ad Noiseam label.

Ella Guru, a new Liverpool band, are given a spin along with a Czech techno act called Matoa. The final record is Dr Venom an artist from the underground "grime" hip-hop scene with a track called Mumra.
Mr Seiler said: "You're always looking out for that monumental moment where John hints at some unforeseen event or some double meaning in the records he chose. As it happens, there is none of this, as unsurprisingly John never expected this to be his last programme.

"He was truly one of the planet's favourite voices. His weekly e-mails ranged from Malaysia to Manchester, Israel to Ipswich, and his patronage of new artists extended well beyond the English Channel."

The prerecorded programmes also included The Fall, Peel's all-time favourite, and one track from an album of Lebanese/Egyptian Arabic hip-hop.

The final programme will be introduced by World Service presenter Mark Coles and broadcast on Friday at 10:30am, then repeated at 1:30pm, 7:30pm and Saturday at 01:45am.

HMV's 200 stores across Britain and Ireland observed a minute's silence at noon yesterday in honour of the DJ. Music fans said Peel would have

preferred one minute of noise. Each store then played Peel's favourite song, The Undertones' Teenage Kicks as a tribute.

Leonard, It has many more good points vs. bad points. My favorite feature, is the Slot Frequency control, which really comes in handy when you encounter the need to eliminate adjacent or co-channel interference. The receiver has a low noise floor, and a great noise limiter circuit, to knock out man-made hash. The smooth bandspread tuning capacitor, is a pleasure to use, and it also helps when you're trying to pull a weak signal out of the muck. Some may consider it's size and weight a bad point, but if you have the room and a sturdy bench in the shack, it's not a problem. Main tuning dial calibration can be a problem, but the crystal oscillator helps to establish reference points on each band, so you know what frequency you're tuned into. Some may grow weary of the need to peak the antenna trimmer for each band, but I've allways liked this feature in a receiver. My HQ-180 often outperforms my JRC NRD-535D, which sits next to it, and that says a lot in itself. If you have any questions about the HQ-180, send me an e-mail, and I'll try to answer them. Good DXing to you, Gary

Actually, superheterodyne is a pretty "OLD" way. It's just that it has
not been surpassed - till now, with the SDR - Software-Defined Radio
(of which superheterodyne is the front end anyway).

>What was the WORST feature of the Regenerative sets?

Selectivity, dynamic range, tricky adjustment.

>The BEST feature?

Simplicity, cost.

>Would it be worthwhile to build a kit?

It is *always* worthwhile to tinker with radios... ;-)

93,000 EXTRA VOTES In only Cuyahoga County -- Outrage In Ohio
By Teed Rockwell
Philosophy Department, Sonoma State University
11-12-2004

Smoking Gun

You may have seen the associated press story about the precinct in Cuyahoga county that had less than 1,000 voters, and gave Bush almost 4,000 extra votes.

But that turns out to be only the tip of a very ugly iceberg. The evidence discovered by some remarkably careful sleuthing would convince any reasonable court to invalidate the entire Ohio election.

In last Tuesday's election, 29 precincts in Cuyahoga County, Ohio, reported votes cast IN EXCESS of the number of registered voters - at least 93,136 extra votes total. And the numbers are right there on the official Cuyahoga County Board of Elections website:

Bay Village - 13,710 registered voters / 18,663 ballots cast
Beachwood - 9,943 registered voters / 13,939 ballots cast
Bedford - 9,942 registered voters / 14,465 ballots cast
Bedford Heights - 8,142 registered voters / 13,512 ballots cast
Brooklyn - 8,016 registered voters / 12,303 ballots cast
Brooklyn Heights - 1,144 registered voters / 1,869 ballots cast
Chagrin Falls Village - 3,557 registered voters / 4,860 ballots cast
Cuyahoga Heights - 570 registered voters / 1,382 ballots cast
Fairview Park - 13,342 registered voters / 18,472 ballots cast
Highland Hills Village - 760 registered voters / 8,822 ballots cast
Independence - 5,735 registered voters / 6,226 ballots cast
Mayfield Village - 2,764 registered voters / 3,145 ballots cast
Middleburg Heights - 12,173 registered voters / 14,854 ballots cast
Moreland Hills Village - 2,990 registered voters / 4,616 ballots cast
North Olmstead - 25,794 registered voters / 25,887 ballots cast
Olmstead Falls - 6,538 registered voters / 7,328 ballots cast
Pepper Pike - 5,131 registered voters / 6,479 ballots cast
Rocky River - 16,600 registered voters / 20,070 ballots cast
Solon (WD6) - 2,292 registered voters / 4,300 ballots cast
South Euclid - 16,902 registered voters / 16,917 ballots cast
Strongsville (WD3) - 7,806 registered voters / 12,108 ballots cast
University Heights - 10,072 registered voters / 11,982 ballots cast
Valley View Village - 1,787 registered voters / 3,409 ballots cast
Warrensville Heights - 10,562 registered voters / 15,039 ballots cast

Woodmere Village - 558 registered voters / 8,854 ballots cast
Bedford (CSD) - 22,777 registered voters / 27,856 ballots cast
Independence (LSD) - 5,735 registered voters / 6,226 ballots cast
Orange (CSD) - 11,640 registered voters / 22,931 ballots cast
Warrensville (CSD) - 12,218 registered voters / 15,822 ballots cast

<snip>

According to the link you provided, that county gave 66.41% of it's votes to the candidate who lost the election. That's more than a 2-1 ratio between the two top candidates.

Do you really think the actual ratio was more than 3-1?

Mark,
do you use the sideband feature using the 9Mhz 2.4 filter? I've been
testing it and it works pretty well. I'm surprised Icom doesn't advertise
this as a feature.

No one, except for conspiracy theorists and googoo purists (googoo = good government) is going to pursue this, whether the evidence for it is good or bad.

Why would the Republicans, who won all the electors for Ohio, want to start recounting the votes - including votes in Republican areas??? They might take extra precautions next time, but...asking for a recount when you've won is bad karma.

Did the Cuyahoga (Cleveland area) vote come in late? That's the trick Richard Dailey allegedly pulled in 1960. Downstate Illinois voted for Nixon and, allegedly, Mayor Dailey fudged the count in Cooke County to put Kennedy over.

If Nixon had won Illinois and Texas, he would have been sworn in in 1961 instead of JFK. One of my high school social studies teachers who hated Nixon's guts (and this was before Watergate) said Nixon had done a great thing by refusing to ask for a recount in 1960 because it would be bad for the country.

JP,

As I stated the use of the Double Knife Edge Switch is an an
'effective' Safety Lock-Out to prevent any chance of directly
connecting the Battery Charger to the Radio.

And as you have correctly stated its use does "IDIOT" Proof the
Radio, Battery Power and Recharger Set-Up.

DG - Gee Wow ! You Are Right :o)

I just 'touched' the LCD and you are right the Numbers do seem to
change ever so slightly; when a finger is place on them :-{

Note: The LCD is rather 'deeply' Recessed from the other Front
Panel Surface Areas of the Radio.

But maybe its me, my stubby old fingers have a tendancy to move
about the Radio 'touching' the Knobs and Buttons ;-}

It is my Eyes that are 'focused' on the LCD Screen :<]

I scanned the Icom IC-R75 Manual and could not find any reference
to the 'fact' that it had a "Touch-Screen" Feature 8-)

Really? Did you get to go into a gun store and not have to be strip
seached and fill out a dozen forms just to buy a magazine? Did you

get to buy a hunting rifle mail order yto save money? Are you free of
the Patriot Acts and the illegal use of your social security number by
big business?

Good question.

Notice how the bushkultie is forced to evade it, so predictably.

The bushkultie isn't permitted to think.

GG,

"And you seem to be a trapped fascist."

Then 'you' Know Me NOT !

For most people who do know me, call 'me' "Brother" out of a
sense of Friendship and Love.

"I like my position better."

I would NOT like 'being' "You": Since you seem to 'enjoy'
"Denigrating" many people with terms like FASCIST.

The way You use the term "Fascist" is clearly a Form of Hate Speech
designed to stifle Free Speech and to cause FEAR in those who you
would attempt to Victimize by its use.

In-the-End: When All Is Said and Done - The Facts Remain:

* You Are You.

* I Am Me.

* President George "W" Bush Won the Election and IS 'POTUS' [.]

re: advisable to leave the radio
in the car. What do the owners think/do? Thanks,John/WD9IWC

John, about 15 years ago I blew up a 2 meter radio after leaving it sit out in the car all night on a below 0 nite. Took the finals and drivers out. Resistance values of components change when introduced to extreme temperatures. With newer radios, it is possible that swr fall back circuitry may prevent the situation that I experienced, but I am not going to chance it. I always either bring my radio inside or else make sure not to power it, or especially transmit on it till temperatures inside the box are more stable. I might be being too carefull, but repairs are expensive so I am not taking any chances.

Good Luck

MM,

Or just may be... The majority of American Citizens (Voters) were
simply motovated by "Love-of-Country" and decided to 'choose'
President George "W" Bush over Senator John 'ff' Kerry; because
they believed that President George "W" Bush reflected their
'values' better.

no that's to simple ~ RHF

Well since your not an ordained minister I guess you still have some
reservations about spreading the word of god then?
What qualifies you to spread anything other than peanut butter?
If you dont like the hate on the net...flip the switch to OFF....Now tell me
WHO is the ignorant one that cant figure that one out?

>
> I was telling you earlier about the beauty that lies in the

First , let me say I don't know the seller.
But I have a DA5 and for MW BCB DX it is great.
I bought mine used about 20 years ago and paid
$100. And it was a steal. The only thing I dislike,
too strong word realy, is that the internal 120V AC
to +12V supply is a little too noisy. I bypassed
the diodes and used some additional RFI tricks, but
in the end decided to just use my RF quiet +12 main
supply.
I removed the AC cord and mounted a Radio Shack
coaxial female power connector in it's place.
This is a great MW antenna., and even works
in strong RF, like when you use it less then a
mile from a 10KW MW station, locations.
Terry

Heh, that's what it is - a touch screen! 'Course it won't actually control anything - that will be included in the R75-A :)

The Swiss Radio International broadcast station has stopped using short waves and its transmitters and antennas are being decommissioned. Members of the HB9MM http://www.hb9mm.com/Index_e.htmclub station in Lausanne have been given permission to use the former broadcast station facilities and antennas, including a 62-metre high curtain array weighing 135 tonnes. The special callsign HE3RSI is on the air now until 3 December on bands from 40 to 10 metres. This is the first time the HE3 prefix has been used.

Source record: 2706

I'm looking for a HF (500Khz to 50MHz or so) multicoupler/ antenna-splitter that would allow mulipler receivers to use the same antenna with little or no signal loss or interaction.

Ideally, this unit would have SO-239 connectors. Number of outputs would be 4 at a minimum, more is better. Will consider active or passive units.

Thanks

FO&A,

Here is my Question: Is there any sense in putting a Ferrite Rod
at the Far-End of a Random Wire Antenna with the Wire from the
End of the Wire Antenna Element 'wrapped' around it in a
"Tuned Coil" to improve the AM/MW Band Reception ?

* Any 'theory' behind why this Idea might Work ?

* Does this Idea actually Work ?

* Or is this Idea just so much Antenna 'hype' and Sales Marketing

I am Asking these Questions is because of what I have read about
the RF Systems "EMF" Electro-Magnetic-Field Passive Wire Antenna
http://www.universal-radio.com/catalog/sw_ant/0743.html

In "John Wagner's Shortwave Tips & Tricks" he writes:
http://www.dxing.com/tips.htm
"The EMF antenna has two 35mm film canister looking objects
connected to it. The canister on the Far-End is actually an
excellent "Tuned Ferrite Rod" designed for MW (Medium Wave)
and really helps any receiver without a built in MW Antenna
Rod. Canister two (in middle) is a Balun that helps SW
reception very much."

> Would it be worthwhile to build a kit?

You have to remember that Howard Armstrong, who "invented" the regen (he was issued the patent, but it's something you really just trip over rather than invent). then went on to invent the superheterodyne, which does seem to have come from deliberate effort. He was disatisfied with the regen, which led him to experiment and explore until he came up with the superhet.

The regen is simple, and that's a big advantage. It provided good gain for a single stage, and it provides better selectivity than a single tuned circuit without regeneration.

Beyond that, it's limited. It won't provide great selectivity, it is finicky, and can receiver limited types of modulation.

No, it can't be a serious contender for the superhet.

On the other hand, there is certainly an appeal to building something, and a regen does make it easier. One can even argue that if someone is going to build a simple receiver, a regen makes more sense; not only simpler, but suffering from none of the superhet's disadvantages when done simply.

Some of the disadvantages, apart from the lack of good selectivbity, can be overcome at the cost of more complexity. Add an an amplifier stage before the detector, to isolate it from the effects of the antenna (which can cause the regen to go in and out of regen when you don't want it), add some voltage regulation, add an audio filter. Make sure theregen control is smooth.

Charles Kitchin has done a fair amount of work on regens in recent years. Some of the circuits are floating around the web, and he's had quite a few articles in QST. I'm too lazy to dig up the biography once again.

There have been a few other "improve the regen" articles in QST in the past decade, though I can't remember dates or author. The first used an optoisolator to add some isolation, and there was another using a bridge for isolation.

Michael

I took a look at the antenna you're describing...

"RHF" <rhf-newsgroups@pacbell.net> wrote in message
news:ff3145e8.0411130924.6a68d0be@posting.google.com...
> * Any 'theory' behind why this Idea might Work ?

My thought would be that, at MW frequencies, the 'wire' part of the antenna is pretty much 'lumped' (no significant phase change along its length), so you have a standard ferrite rod antenna that you're hooking up via a long piece of hookup wire. That's a reasonable enough antenna.

As you approach HF, the 'wire' part of the antenna starts to become active and the two signals combine.

Still, this is very much a 'hands waving' explanation; hopefully someone else will have a more solid response.

> * Does this Idea actually Work ?
> * Or is this Idea just so much Antenna 'hype' and Sales Marketing

I imagine it works as well as either antenna alone (the ferrite rods or the long wire) would, and the real question is... do the two together produce any significant additional gain? I suspect not (much), but even if so, sometimes a wideband standard gain antenna is more desirable than a higher gain single bander.

AW! You already knew the answers.

>I am Asking these Questions is because of what I have read about
>the RF Systems "EMF" Electro-Magnetic-Field Passive Wire Antenna
>http://www.universal-radio.com/catalog/sw_ant/0743.html

For $95, who would be tempted to clip off that sucker at the end and discover it didn't amount to a hill of beans? Self-fulfilling illusion of value perception.

>In "John Wagner's Shortwave Tips & Tricks" he writes:
>http://www.dxing.com/tips.htm

Are we to believe John cracked his wallet open to then crack open the film canisters? As far as guesses goes, this is as good as any; but given the techno-drivel that populates the rest of the page, the going doesn't go very far at all.

>i want to know ~ RHF

Ah, but that would cost you $95. You would have to first discover what "designed for MW (Medium Wave)" actually means. Given the manufacturer explicitly states nothing in that regard (devoting most of the coverage to a BalUn) and calls it a "magnetic module."

Consider, if it is "designed for MW (Medium Wave)" then it is neither designed for LW nor SW, and yet the ad clearly states "covering 100 kHz to 30 MHz." Such contradictions are a clear warning with red

lights and flags waving. If it is designed for "covering 100 kHz to 30 MHz," then the doo-hicky at the end is probably more useful as a monkey-fist for tossing it up into a tree.

Anything that will increase the current in the wire below top-loading
is a good idea.

> * Does this Idea actually Work ?

I don't know the answer. A ferrite inductor will increase the magnitude
of inductance over an air-core coil and top-loading will increase the
current in the wire part of the antenna. It's an interesting idea
assuming that antennas are reciprocal for transmitting and receiving.

The HQ-180 is a very nice radio and they work quite well if you keep the circuits aligned properly. Depending upon the production number some will have vernier tuning (mine doesn't) and there was an IF noise immunizer acessory (I don't have it). My 4 main receivers are the Drake R-8B, HQ-180C, SP-600 and R-390A and they all see a fair bit of use. The biggest problem with "boatanchors" is that they often need to be recapped due to some of the capacitors getting leaky and sometimes it is just a good preventative measure (especially with the R-390A). If you get a chance to play around with one sit back and enjoy!

I'll pick door number 3, Monty.

If the far end of the antenna were grounded there might be some pickup
at the self resonant frequency of the ferrite coil, and it would be
a good DC ground at the far end that might reduce some noise.

If it's not grounded, it's just a convenient weight to toss it into
the trees, because there's no loop in the circuit for any current to be
coupled into, and a small isolated ferrite coil isn't going to produce
a voltage differential to ground that could couple through capacitance.

you can also have the benefits of both by building a super-regenerative superhetrodyne receiver ;-) the old Boy Scout Radio Merit Badge from the 1960s had such a design, which I built at the time, and the resulting radio receiver outperformed many commercial models costing much more ;-)

2728. Auction ends in 1 day! FM Stereo Broadcast Transmitter 88-108 MHz Digital PLL LCD Display - 2 Watt

Newsgroup: rec.radio.shortwave
Date: 2004-11-13 19:43:47 UTC
From: righteous-jude <nospam@noreply.com>
Message-ID: <BDBBB203.50E5%nospam@noreply.com>
Source record: 2727

FM Stereo Broadcast Transmitter
Digital PLL - LCD - 2 Watt RF Output

Ebay item # 5730774971

Auction ends in 1 day!

Ends Nov-14-04 19:13:56 PST

I have updated my Ebay auction listing to include an MP3 sound file you can download which is an ACTUAL recording of how the FM transmitter sounds on-the-air.

Here is the direct link:
[URL=http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971]http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971[/URL]

Transmitter is an assembled and tested unit -- not a kit.

This transmitter design DOES NOT use the "BA" or "Rohm" analog chip - ANYWHERE IN IT AT ALL. Which is a good thing.

This transmitter can equal the sound of commercial FM stations. It outperforms ANY of the Ramsey transmitters, including the "export" version of the FM-100B which Ramsey sells for $429.99.

You can buy this transmitter for much less than that.

Here are the specifications for this transmitter (from the manufacturer):

Transmission Frequency: Adjustable between 87-108 MHz
Tuning Steps: 10 kHz
RF Power Output: Typ 1Watt @ 13V or 2 Watts @ 24V
Spurious RF Emissions: Better than -45 dB ref. to carrier
Frequency Stability: PLL Typ +/-1KHz
SWR Ruggedness: Withstands 30:1 SWR mismatch
RF Output Connector: BNC type
Audio Input Sensitivity: 0.8V rms for +/- 75 KHz deviation
Signal To Noise Ratio: 60 dBu
Frequency Response: Flat from 20 Hz to 15 KHz
Stereo Separation: >40 dB
Pre-emphasis: 75 uS (standard FCC spec for U.S. FM radio)
Audio Distortion: Better than 0.2 % THD
Audio Input Connectors: RCA Phono Jacks
Power Jack: Coaxial type, 5.5mm O.D. 2.1mm I.D. center positive
DC Power Input: 12 to 24 Vdc Regulated 600mA

The transmitter has a built-in user options menu system with two buttons for adjusting operating parameters such as transmitting frequency, modulation level, MPX pilot level, etc.

This transmitter has a clean RF output. The design includes a seven-element Low Pass RF Filter for harmonic suppression.

This transmitter has built-in audio AGC (Automatic Gain Control). The AGC feature can be adjusted using the user options menu or you can turn it off if you like.

Operating instructions will be included with the unit.

TenTec and MFJ both offer regen radio kits. I built the TenTec
4-bander a few years ago. A very simple kit and well worth the time to
build. A fun radio to play with about once every 2 years or so, mainly
because the gee-whiz factor doesn't last very long. Still is was worth
the time assembling it.

> sometimes a wideband standard gain antenna is more desirable than a higher
> gain single bander.

Work is not a very well defined word. The antenna will work in that it
will pick up some signal and deliver it to the radio. I think you mean
to ask how well compared to another antenna.

I pretty much agree with what Joel wrote but add the following
explanation. Any time you add some type of coil to a wire you are
electrically increasing the electrical length over the physical length
of the wire. The coil on the end will cause the wire part of the antenna
to resonate at a lower frequency. This is generally not a good or
effective way to make a sensitive antenna but it will "work."

Generally a wire antenna will pick up a significant amount of signal
energy at frequencies above its electrical length and perform much worse
below its resonate frequency so basically this looks like a attempt to
get a rather short piece of wire (16 feet) to "work" down to a frequency

far below its resonant physical length.

The BALAN coil depending on design could be a good thing in that it will cause the high impedance of the wire to be closer on average to the impedance of the coax cable part of the antenna and the radios input.

You might want to check this out:

http://www.stridsberg.com/

Though I don't think any have SO-239's, they work very well.

I use the MCA104 here, which is quite similar to the MCA104M.

Beware of the sticker shock though, as prices have gone up.

Avoid anything by Stridsberg - overpriced!

Try: http://www.arraysolutions.com/Products/ice/

Not only will it meet or exceed specs of anything Stridsberg builds for a
LOT less money, ICE will custom install the connectors of your choice at no
extra charge. I use ICE active multicouplers for my guard receivers, and am
very happy with all of the many products I have purchased there.

Really? It seems to me choosing one candidate over another
is like choosing the least of evils. It's neither a "flat
out" rejection of one candidate or a "flat out" acceptance
of the other. Further, there's no evidence that the
"majority of voters" even share the same point of view other
than they apparently believe Bush is the "least of evils".

I gave you several verses that spoke directly to how someone looked, or the country from where their spouse originated. What more do you need?

Solomon's mother Bathsheba was married to "Uriah the Hittite" before King David killed him and took her to be his wife. Biblical authorities have long known and accepted the fact that the Hittites were a dark race of people. Do a google search on the word "Hittites" and you will find articles that tell you that. So that means that King Solomon was at least half black. His father David was also black, but I would have to go into a lengthier explanation to prove that and I'm not sure that anyone is reading this anyway so I don't have the time to waste. Join my list if you really want to know the truth of these things, :-)

Also Jesus received all of his genetic makeup from his mother. The bible says that it was a "Virgin birth" meaning he was born, but his mom didn't have sex with his step dad. It is easy to trace Mary's ancestry line back and it is full of black people.

There are probably people on this list from Italy and other European countries where they still bow down to and worship a black Jesus and a black virgin Mary. I saw them portrayed that one in a small church in Acquilea, Italy near Trieste once upon a time.
>>
>>
>>Then try and find anywhere in the Bible where it says anything
>>negative about black people
>>
>>

>
>It doesn't say anything positive about blacks either. In fact, it hardly
>mentions them at all.

The bible doesn't mention blacks specifically because their was little
to no race hatred back in those days. So people were used to blacks
being in power and running the show. Since nearly everyone in the
bible was black it would be silly to keep saying "so and so was a
black person"

You can also look at the region of the world where the bible took
place, All of that area was called Africa back 2004 years ago. There
was no middle east. That is a term that came about during the early
1900's. There also was no SUEZ canal which divides Africa today from
Saudi Arabia. Europe is connected to Africa. There are only about 25
miles separating Europe from the continent of Africa. That is why ALL
humans, including you, have lots of African genetic makeup. Your
denying that, doesn't change the reality at all.

>RACIST, you don't want black muslims to be portrayed negatively. You just be
>hatin dem blue-eyed devils.

The entire Muslim world didn't attack us. Only Saudi Arabians and
Egyptians did. You don' burn down the barn to get rid of the rat. We
killed nearly a million innocent people over there from 1991 to 2004
with our sanctions. So America was aggressor! Osama was angry at our
destroying people in the Middle East, and it took him several years
before he figured out how to try and defend his countries in the
Middle East. He struck a second time on 91101, but even then we have
stilled slaughtered a 100 times more of their people than they have
ours. AND... don't forget this. We started it. Just like we went to
Panama and jumped on Noriega. We started the fight. We went to Somalia
and jumped on them halfway around the world. We started it. If you
can't accept those simple truths, then your brain is already fried,
and good for nothing except twirling the shortwave dial and piddling
with yourself.

>Where does it state that she was black? Why didn't you quote any scripture that
>says she was black? The answer is obvious, there is no such scripture and
>you're a liar, a con-man, and a black racist.
>
>You're full of crap.

Go read 2nd Samuel where it talks about Bathsheba and her husband.
Again, remember the world hasn't always been so full of race hate like
it is now. So the people in the bible didn't feel it was necessary to
identify each person by race.

If you have the ability to reason in a sane manner, then when you see
in Numbers chapter 12 verse where it says that Moses was married to an
"Ethiopian woman" then if you know anything about geography, you would
know that Ethiopia is in sub-Saharan African where the people are
brown to black.

When you see in Genesis that Abraham went in to his wife's handmaiden
"Hagar the EGYPTIAN" if you were a properly educated human you would
know that EGYPT is in North Africa. Some of the people there are light
and some are dark. However 2,000 years ago when there was much less
migration of people from one place to the other, the Egyptians were
mostly brown, or black people as well.

Don't fight the truth. Revel in it. Don't worry. Be happy. You and
everyone on this list are ni..ers! It's good to be a ni..er! :-) All
of GODS chosen people are ni..ers.
White people are not GODS chosen people. They are albinos that were
cast out from African by their parents because they were so weird
looking not having any melanin in their skin. They hooked up with each
other over the centuries and slowly moved north in to what is now
called Europe. They created a group of people who are the most
ignorant, violent, inhumane people that the world has ever seen.
Everywhere they go, they kill, loot and rape, then take over the
country from the people who were there first.

So rejoice in your African heritage. Africa had advanced civilization
thousands of years ago. Africans built the pyramids. Scientists today
still don't know how they did it. Africans embalmed people and they

remained mummified for thousands of years in good condition.There were libraries and universities on the gold coast in African when "white people" were living in caves and eating each other in Europe.

No I'm full of KNOWLEDGE. You're full of hatred, rabies, and other mental illnesses.

Yes, Stridsberg is indeed expensive. I may order up one of the ICE units and
test it out.

I was fortunate enough to get my MCA104 on eBay a number of years ago for $60.

The one I have that I purchased on eBay did not come with a power supply. I currently use a wall-wart.

But there's a scary answer to it. The far right Christians [Reconstructionists, Dominion, Moonies, etc.] have used a comment by Paul in one of his letters "I am all things to all men..." as an excuse to lie in order to accomplish their aims.

Another best feature is that there is no bandwidth filter. If you get
a strong signal in the clear with good audio and run the rig thru an
amplifier you will be very surprised how good it can sound.
I recall doing that on a Radio Espania signal and being blown away
by the full frequency audio.

Yeah, those were interesting posts. That's what triggered my thoughts on using a computer as a DRM detector with the 62 and feeding the signal back to radio's hi-fi audio section. The experiment would be cheap enough for me, and it's probably doable, but I'm just not interested enough in DRM to start playing with it.

Hello John
i looked at the DX-1 PRO RF System as they are advertised
hear in the uk in short wave magazine sold by Haydon communications at a
cost of £359.95....
i tried looking this antenna up on the net for the spec but could not find
any information on the antenna...
would have a website address for the company who makes the DX-1.
i would need to research the antenna before i buy due to the high cost.
as i am living right next to Heathrow air port....
and as you can imagine there are lots of strong signals from the air port.
some days i can not even use some of the HF bands do to interference ...so i
would need to know what would be best for me to use i don't mind spending
good money on an antenna but only if it improves my reception would not want
to spend all that money and not see a big difference.....could you post
the spec of the antenna hear what is the size of the antenna when fully
assembled....
i don't have any problems putting an antenna up out doors.

thanks: John

Find a definition for "fascist" that doesn't apply to Bush.

<crickets>

"THE PEOPLE HAVE SPOKEN..

THEY say that in life you get what you deserve. Well, today America has deservedly got a lawless cowboy to lead them further into carnage and isolation and the unreserved contempt of most of the rest of the world.

This once-great country has pulled up its drawbridge for another four years and stuck a finger up to the billions of us forced to share the same air.
And in doing so, it has shown itself to be a fearful, backward- looking and very small nation.

This should have been the day when Americans finally answered their critics by raising their eyes from their own sidewalks and looking outward towards the rest of humanity. And for a few hours early yesterday, when the exit polls predicted a John Kerry victory, it seemed they had. But then the horrible, inevitable truth hit home. They had somehow managed to re-elect the most devious, blinkered and reckless leader ever put before them. The
Yellow Rogue of Texas. A self-serving, dim-witted, draft-dodging, gung-ho little rich boy, whose idea of courage is to yell: "I feel good," as he unleashes an awesome fury which slaughters 100,000 innocents for no other reason than greed and vanity.

A dangerous chameleon, his charming exterior provides cover for a
power-crazed clique of Doctor Strangeloves whose goal is to increase America's grip on the world's economies and natural resources. And in foolishly backing him, Americans have given the go-ahead for more unilateral pre-emptive strikes, more world instability and most probably another 9/11. Why else do you think bin Laden was so happy to scare them to the polls, then made no attempt to scupper the outcome? There's only one headline in town today, folks: "It Was Osama Wot Won It." And soon he'll expect pay-back. Well, he can't allow Bush to have his folks whoopin' and a-hollerin' without his own getting a share of the fun, can he? Heck, guys, I hope you're feeling proud today.

To the tens of millions who voted for John Kerry, my commiserations. To the overwhelming majority of you who didn't, I simply ask: Have you learnt nothing? Do you despise your own image that much? Do you care so little about the world beyond your shores? How could you

do this to yourselves?
How appalling must one man's record at home and abroad be for you to reject him?

Kerry wasn't the best presidential candidate the Democrats have ever fielded (and he did deserve a kicking for that "reporting for doo-dee" moment), but at least he understood the complexity of the world outside America, and domestic disgraces like the 45 million of his fellow citizens without health cover. He would have done something to make that country fairer and re-connected it with the wider world. Instead America chose a man without morals or vision. An economic incompetent who inherited a $2 billion surplus from Clinton, gave it in tax cuts to the rich and turned the US into the world's largest debtor nation. A man who sneers at the rights of other nations. Who has withdrawn from international treaties on the environment and chemical weapons. A man who flattens sovereign states then hands the rebuilding contracts to his own billionaire party backers. A man who promotes trade protectionism and backs an Israeli government which continually flouts UN resolutions.

America has chosen a menacingly immature buffoon who likened the pursuit of the 9/11 terrorists to a Wild West, Wanted Dead or Alive man-hunt and, during the Afghanistan war, kept a baseball scorecard in his drawer, notching up hits when news came through of enemy deaths.

A Radical Christian fanatic who decided the world was made up of the forces of good and evil, who invented a war on terror, and thus as author of it, believed he had the right to set the rules of engagement. Which translates to telling his troops to do what the hell they want to the bad guys. As he has at Guantanamo, Abu Ghraib and countless towns across Iraq.

You have to feel sorry for the millions of Yanks in the big cities like New York, Washington, Boston, Chicago, Los Angeles and San Francisco who voted to kick him out. These are the sophisticated side of the electorate who recognise a gibbon when they see one.

As for the ones who put him in, across the Bible Belt and the South, us outsiders can only feel pity.

Were I a Kerry voter, though, I'd feel deep anger, not only at them returning Bush to power, but for allowing the outside world to lump us all into the same category of moronic muppets. The self- righteous, gun-totin', military lovin', sister marryin', abortion-hatin', gay-loathin', foreigner-despisin', non-passport ownin' red-necks, who believe God gave America the biggest dick in the world so it could urinate on the rest of us and make their land "free and strong".

You probably won't be surprised to learn of would-be Oklahoma Republican Senator Tom Coburn who, on Tuesday, promised to ban abortion and execute any doctors who carried them out. He also told voters that lesbianism is so rampant in the state's schools that girls were being sent to toilets on their own. Not that any principal could be found to back him up. These are the people who hijack the word patriot and liken compassion to child-molesting. And they are unknowingly bin Laden's chief recruiting officers.

Al-Qaeda's existence is fuelled by the outpourings of America's Christian right. Bush is its commander-in-chief. And he and bin Laden need each other to survive. Both need to play Lex Luther to each others' Superman with their own fanatical people. Maybe that's why the mightiest military machine ever assembled has failed to catch the world's most wanted man.

Or is the reason simply that America is incompetent? That behind the bluff they are frightened and clueless, which is why they've stayed with the devil they know.

Visitors from another planet watching this election would surely not credit the amateurism. The queues for hours to register a tick; the 17,000 lawyers needed to ensure there was no cheating; the $1.2bn wasted by parties trying to discredit the enemy; the allegations of fraud, intimidation and dirty tricks; the exit polls which were so wildly inaccurate; an Electoral College voting system that makes the Eurovision Song Contest look like a beacon of democracy and efficiency; and the delays and the legal wrangles in announcing the victor.

Yet America would have us believe theirs is the finest democracy in the world. Well, that fine democracy has got the man it deserved. George W Bush.

But is America safer today without Kerry in charge? A man who overnight would have given back to the UN some credibility and authority. Who would have worked out the best way to undo the Iraq mess without fear of losing face.

Instead, the questions facing America today are - how many more thousands of their sons will die as Iraq descends into a new Vietnam? And how many more Vietnams are on the horizon now they have given Bush the mandate to go after Iran, Syria, North Korea or Cuba...?

Today is a sad day for the world, but it's even sadder for the millions of intelligent Americans embarrassed by a gung-ho leader and backed by a banal electorate, half of whom still believe Saddam Hussein was behind 9/11.

Yanks had the chance to show the world a better way this week, instead they made a thuggish cowboy ride off into the sunset bathed in glory. And in doing so it brought Armageddon that little bit closer and re-christened their beloved nation The Home Of The Knave and the Land Of The reak.

God Help America.

You get what you pay for. For wet cells (marine, car batteries) you
want a 3 stage charger: bulk/float/equalize. For gel cells and AGM,
you never use equalize (or you do so once, then you throw the battery
away :-))

My small charger (for when I'm not using solar) is a Deltran Battery
Tender. Commercial grade ones cost much more, of course.

Mini-circuits has them.

4-way passive:

http://www.mini-circuits.com/dg03-134.pdf

8-way passive:

http://www.mini-circuits.com/dg03-138.pdf

On HF, noise is the limiting factor, so if you still have the S-meter
moving above where it is when nothing is connected when you insert the
8-way splitter, you haven't lost much. (Yes, Nf, but is that really
relevent here?)

Don't know how to read the charts? Call Mini-Circuits -- they happily
do quantity 1 orders and have been helpful when I've dealt with them.

(Mini-circuits modules are what you find inside Stridsberg splitters.
I don't know about ICE, but they are a reputable company, so you
should get good quality whatever they do.)

> happen so fast?

As a guess, modern Americans have come to expect everything to happen
"right now". That is one major reason why our foriegn policy will
never make sense. Any usefull plan will take too long and the
sheeple will loose their attention and move on to the next quick fix.
Overweight, simple eat less and exercise. But that takes too long,
so along come lyposuction, stomach stapple and bowel bypassing.
Kids can't read, simple take the time and energy to have one adult
work with one child and find out how that child learns. But that
takes too long so the school system, at least here in central Kentucky,
jumps from one wild scheme to another and Jophnny still can't read.
Even the government seams to be driven by tracking polls. What is
TODAYs problem? Remember Somolia? The nightmare had been going on
for years before CNN etal started harping on the "starving children"
and the evil warlords, the media looked like a shark feeding frenzy.
And President Bush(1) sent troups to "protect" the food chain.
Instant solution to a long term problem. Only the solution imploded.
Almost every problem facing the US or the world lacks a fast solution.
And will not be solved.
As too the elction result need for speed, I think it is driven in large
part by our major media outlets. They harp on this or that delay.
And the public assumes that there is some valid need for speed.
I suspect that most Presidetnial candidates already have their cabnet
choices made well before election night. If for now other reason then
to cement their help in the election. I am guesing that a candidate
could throw a cabnet togahter in a week or so.
The republic survived for years without instant results.

But the idiots I work with all thin the world will end unless they
can go to bed at 11:00EST without knowing who won.
I have never watchted the results. When I was a child my parents
treated election night as family night. We would play games, or mom
and dad would tell us about their childhood. When I was 10 several of
the families in our neighborhood had what might today be called a "block
party". I got to (was forced to) dance with several of the girls.
As I got older I was kind of shocked to find out the the real world
came to a complete halt on election night. Today my wife and I watch
movies, enjoy pop corn and play Scrable.
In 2004 I heard about the election screwup on the way to work and
turned my radio off in disgust. I was certain that Kentucky had messed up.

I've got next to nothing on wbcq here in Wilmington. I guess still not propagating very well, or I should check and see if my antenna is still up.

Speaking of which, if you get the chance to see the making of DSOTM,
on dvd, do so. quite a bit of insight into making of this classic.
And everyone in Pink Floyd is getting old lol!

Your antenna is probably all right. It died out here before 20:00 EST /
01:00 UTC. It was pretty bad about 15 min before that. I'm in NC
also, about 100 air miles from the coast, northern border. Oh, you
didn't say Wilmington, Del. or NC. I assumed NC. ;-)

9580 (China Broadcast) coming in great right now.

No problem. There is a recent US influence on religion here with more happy-clappy singing and not thinking. The influence has lead to some private schools whose students ARE scientifically illiterate, but this is few and far between. Thank God!

There's something peculiar about religion that celebrates its conflict with the world and the recovery of those who have "fallen" (as if its better to prodigal than always faithful), while ignoring (largely) those who don't see any conflict and never had a need to be "born again", 'cause they had it right the first time. The whole born and apocalyptic again thing is peculiarly American. I don't know the concept at all except from recent American influence via media. And these media types tend to be total ignoramuses (unbelievable that an idiot like Jerry Falwell has a following and a (I'm sure it must be pretend, please tell me it is) a university.)

George W's lurch from drunk driver to bible thumper, goes with the seeing of the world in need of some sort of parallel salvation as he apparently experienced. I heard last night on Ideas (CBC/RCI) that Ronald Reagan had told a US Senate committee that they didn't need to worry about environmental effects b/c the second coming would bail us out. How do such morons get elected? Something's got to be wrong with a system that elects movie actors. Celebrity and ability to manipulate others mistaken for greatness and competence! Didn't anyone challenge Reagan or Schwartzenegger by saying "he's an actor, an uneducated boor", or Bush by saying "he's a dry drunk who ruined every company he's been part of" or Clinton by saying "he's a lecherous, dishonest lout" Any why not?

I think they should publish the marks of all who want to run for office, and also make them sit for uniform exams (do they have "departmentals" in the US? - exams you have to pass in high school in every subject or no diploma - set by national or at least state standard? Makes me shudder to think of what might be on some exams from some states. It'd better be national!)

Sept 11 has nothing to do with the fundamentalism issues. This has been in place for as long as they've been doing surveys. Abt 45% of Americans believe that God created humans in basically their present form about 4-8000 years ago, and that dinosaurs and humans lived together on the earth, and the Noah flood, etc. The numbers hold since the late 1950's.

All of which is false: shown convincingly by science to be. These odd creationism beliefs do not register on European surverys, and only at about 8% in Canada (probably due to proximity to the US). Over 85% of Canadians believe in God and adhere to Christianity, but they don't accept the biblical literalism so peculiar to the USA. Europeans are in the 75-90% range depending on country.

This is a misunderstanding of what a scientific theory is with the everyday use of the term "theory". Electricity is a theory (of electron flow), gravity is a theory, continental drift is a theory, the structure of atoms is a theory, genetic inheiritance is a theory, and so is evolution. We cannot see the processes themselves with a scientific theory, only evidence for or against the theory. The theory of evolution is as well established as any of these other theories.

Please state the scientific theories that might be competitors for evolution. Well, you can't. There are none. And evolution should be and must be taught in every life science and biology course. And it is in my country. With no influence on religiousity, but a strong influence on biblical literalism.

Some Regens are better than others. Some Regens are better than Superhets. Example: the home-brew Regen we use for S.W. is a little more sensitive an about as selective as our straight forward low-end Hallicrafters S-38. The home-brew Regens' selectivity is improved by a judicious r.f. coupling and a.f. extraction design not found in conventional Regen design. On the other hand, you wouldn't want to call on a Regen for serious communication work.

Bottom line: Regens are fun, simple, inexpensive, forgiving, and if designed well, will compete with low end superhets. For serious radio communication, the superhet can be designed to perform giddy acts from beyond.

2776. SW and satellites from out in the bush

Newsgroup: rec.radio.shortwave
Date: 2004-11-14 02:14:46 UTC
From: uncle arnie <uncle.arnie@mexnet.DOT>
Message-ID: <10pdft8kfo7id0c@corp.supernews.com>
Source record: 2775

I was out at 56 degrees north, 103 W at about 7:30 pm local time, which is about 3 hours after sunset. Laid out on a beach at -10C (+5 F) with the waves tinkling the ice along the shore in the dark, with an ocassional groan as the pack shifted into the beach. In the 40 mins of watching, I saw 4 satellites tracking east to west and 2 going north to south. It'd be interesting to have a database of these, so you could tell what you were seeing. Maybe there's too much junk up there to sort out by time and earth observation point.

I also saw 2 meteorites, one of which broke into 3 pieces. Very cool. The milky way was very bright. No artificial light for about 200 miles in any direction. Just us, the elk and the deer.

SW reception was excellent. Took the travelling radio, the Sangean ATS 606A. Getting FM from 450 miles away. BBC 5975 and RN 6165 came through without the whip extended. Tons of Spanish stations. Lots of religious loonies plugging up the air. This was a spectacular reception situation. Listened mostly with the 23 ft roll-up. Had to temper the listening though, this was our anniversary trip after all. Nothing like a good radio, some fine port, a hot tub, some elk bugleing and the woman you love, in cabin in the woods, with no-one else anywhere nearby (better put the last of the list first!)

Yeah, Wilmington, NC. I've checked bcq a few times since conditions started to deteriorate, but they've not been very audible for the most part. What town in NC are you in by the way? I grew up in Murfreesboro, and have lived in Va. Beach, Raleigh, and now Wilmington since. 9.580 fading a bit presently.

Ever since March I've been living in a situation that is not conducive to SW listening, so my Yaesu and Degen have been wrapped up and in storage. This situation was intended to be temporary until my new house was built, but construction has run into delay after delay. But the house is about half finished now, so I have a question: when I move in, should I bother to set up my listening post, or is SW a lost cause? I just got my 2005 Passport, and it has a sidebar in there asking if SW radio is "kaput" and concludes that it isn't. While several European stations have disappeared, and Voice of America is about to do the same thing, China and Thailand have been expanding services. Plus traditional SW radio is hard to censor or jam (although many stations seem to be censoring themselves). What does everybody think?

Finally. Things are getting back to normal. Still got
some muddy audio on Radio Korea International, but
it's better than nothing.

I actually found a Flavoradio in a thrift store and paid the $1.98 and
took it home. Not much of a performer, but it sure looks
interesting-it's bright orange. I guess in a country as small as Haiti,
you wouldn't need much of a radio. But NK is bigger, and technology is
more advanced than in the Flavoradio days, so I would suspect that you
could make an interesting radio to put in a small package that would
suffice to pick up tx beamed from the South.

Shortwave is *years* away from going away, possibly decades. Granted, some
of the bigger stations have reduced or eliminated SW broadcasts but there's
always something to listen to.

I just spent $425 on a new radio, though, so I may be a bit biased ;)

You most definitely don't need a synchronous detector for SSB reception;
indeed there is nothing to synchronize to. One can argue that the "direct
conversion receiver", ie a mixer and oscillator that translates the signal
directly to audio, is just a variant on a regen set to oscillate in order to
likewise beat the signals down to audio. A regen does have its limits
when it comes to SSB, including the lack of selectivity and since they
were built for simplicity, lack of stability.

Synchronous detection is not need for FM, either. What may be fooling you is
that one way to detect FM is to use a phase locked loop that tracks the
incoming signal; the feedback voltage hence follows the modulation of the
signal and recovers the audio. There are plenty of other FM detectors, but
yes the regen isn't usually one of them. Theoretically it can be used
like any AM detector to demodulate FM by mistuning and "slope detection".

>
>>The BEST feature?
> Simpllicity. You could build a fairly useable radio with just 3
> stages, in fact quite a few 27 Mhz walkie talkies were built that way,
> with the Regen detector doubling as the Oscillator/output stage in
> transmit.

Actually, regens were rarely or never used for those applications. It was
the superregen, also patented by Howard Armstrong, that was used. It
was an extension of the regen, the addition being quenching of the detector
at frequency in the hundreds of kiloHertz range. This pulsing of th
regen detector allowed for maximum gain without the instability of the
regen going in and out of oscillation. It also results in a much wider
bandwidth. Note that the superregen is promoted for reception of FM, though
in its case it is slope detection.

Michael

That one's easy. There's all kind of satellite tracking software all over the internet. A quick search under "satellite tracking" should bring in more hits than you know what to do with. I used to use several different programs myself, but that was a few years ago and so I couldn't make any recommendations. (I had to give it up because of the light pollution around where I live.)

I suppose to someone used to Catholic Masses (you're in Mexico is my
guess from the "mexnet" address) American evangelical services must be
quite a shock.

Yes, most of our "televangelists" have "universities" and private
schools where only their view of the world is allowed and is presented
as absolute truth. Most of the "graduates" of these schools are only
qualified to work as preachers, so what they do is hang out a shingle,
attract a few dozen followers who are dumber than they are, and open up
a church. One of the great things about America's guaranteed freedom of
religion is that anybody can set up their own church and teach anything
they like in it. Most of these operations are the blind leading the
blind, but I prefer it to a state sanctioned church that everybody is
compelled to join.

Because most Americans are blind followers. You'd have to be a blind
follower to sail thousands of miles and several months across open ocean
to a barely explored wilderness and then attempt to settle there, with
no contact with home and no idea of the natural rhythms of this strange
new land. That's what the ancestors of today's Americans did. Most of
them were religious zealots seeking a place where they could worship
without getting their noses cut off (as was the practice in England to
deal with heretics) which is why America is so religiously zealous
today. None of this would matter if America was some piss ass little out
of the way country that nobody cared about, but since it has almost
absolute power over the world in a way not seen since the glory days of
Rome the rest of the world has reason to be concerned.
>

> US? - exams you have to pass in high school in every subject or no diploma
> - set by national or at least state standard? Makes me shudder to think of
> what might be on some exams from some states. It'd better be national!)

No, there's no national high school exit exam (as Americans would call
it) and only a few states are just now experimenting with them.
Education isn't controlled at the federal or even the state level but by
zillions of special governmental entities called "school districts" that
cover anywhere from a small town to dozens of square miles, and that are
run by elected "school boards". The boards control everything from
hiring of teachers to setting of curriculum. Since serving on a school
board isn't a high prestige or high pay position, only morons get
elected to them, and politics, ideology and plain old infighting
determines what gets taught. As a result, curriculum varies greatly from
town to town, city to city, mountain to prairie. Some schools teach
"creationism" (basically the belief that the Christian Bible's account
of the creation of the world as told in Genesis is literally true)
alongside regular science and allow students to "choose" between them.
Some schools put a greater emphasis on having high self esteem than
having good grades (or "marks" as you'd say). All sorts of
pseudoscientific educational theories flourish and can be found in at
least one school district. Add in bureaucrats who are more concerned
about their political standing with the school board members than with

education, and the end result is that few Americans get a good
education, which is likely why movie stars get elected to public office.
If you find a well educated American, he/she is likely either self
educated or the child of fabulously wealthy parents.

2795. Re: Putting a Ferrite Rod at the Far-End of a Random Wire Antenna ?

Newsgroup: rec.radio.shortwave
Date: 2004-11-14 04:41:52 UTC
From: rhf-newsgroups@pacbell.net
Message-ID: <ff3145e8.0411132041.6495255@posting.google.com>
Source record: 2794
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.antenna

JK, RC and CM,

I want to Thank Each of You for your replies to this question.

Note: I am only talking about a SWL "Receive Only" Antenna here.

I suspect that may be one reason that this Far-End Loaded AM/MW Coil may work is the fact that the RF Systems EMF Antenna is 'only' Sixteen Feet (16') Long; and the Two Inch to Three Inch (2"-3") Ferrite Rod at the End of the Wire Antenna Element does have some 'measurable effect' on improving the AM/MW Frequency Band performance of such a short Antenna.
- Relative Size may be the Controlling Factor for this 'unique' small Antenna

? ? Would this 'trick' work with a Larger {Longer} SWL Antenna ? ?

My more specific point of interest would be in whether using a Ferrite Rod with the Wire Antenna Element Wrapped as a AM/MW Coil around it would have some meaningful effect on a Horizontal Random Wire Antenna that was 75-100 Feet long.
- For a Horizontal Random Wire Antenna ?WHY? 'place' the Ferrite Rod at the Far-End of the Wire Antenna Element ?
- Why not 'place' the Ferrite Rod near the Feed-Point-End ?
- Why not 'place' the Ferrite Rod near the Middle ?
- Why not 'place' the Ferrite Rod near the slightly Off-Center 38%/62% like a Windom ?

What about a "Low Noise' Inverted "L" Antenna that is 45-100 Feet long. For an Inverted "L" Antenna ?WHY? not 'place' the Ferrite Rod at the "Top" of the Vertical Leg where the Antenna Wire Element transitions from Vertical to Horizontal ?
- 15 Feet Up Ferrite Rod AM/MW Ferrite Coil and 30 Feet Out.
- 20 Feet Up Ferrite Rod AM/MW Ferrite Coil and 40 Feet Out.
- 25 Feet Up Ferrite Rod AM/MW Ferrite Coil and 50 Feet Out.
- 33 Feet Up Ferrite Rod AM/MW Ferrite Coil and 67 Feet Out.
Or again here would having the Ferrite Rod and Coil at the Far-End work some 'magic' trick ? and Why ?

in search of some ideas and answers ~ RHF
.
.

What adapter? Standard car battery and electronic charger. B&B Auto for
both. The electronic charger is better for your battery. It keeps the
battery toped up without going wild like the simple transformer types can.
Don't remember who in this thread mentioned fuses but he's right. Use em.
They are cheap fire insurance. A car battery can deliver an amazing level
of amperage when shorted. Don't expect it to be cheap. My charger cost about
$90.00. If your radios does not run on 12 volts, a regulator is easy to make
for a few bucks.

U.S. set to sneak radios to N. Korea
Smuggled receivers would get non-official broadcasts, but ally S.
Korea has concerns.

By Tim Johnson
Knight Ridder Newspapers
November 13, 2004

SEOUL, South Korea -- The U.S. government is preparing to smuggle tiny
radios into North Korea as part of a newly financed program to break
down the country's isolation.

Washington will spend up to $2 million annually for four years to
boost radio broadcasts toward North Korea and infiltrate mini-radios
across its borders.

North Korea, probably the most isolated country in the world, has only
radios that are rigged to capture broadcasts lionizing the nation's
Stalinist leadership. The broadcasts also blare from outdoor
loudspeakers.

The U.S. plan to smuggle small radios into North Korea is outlined in
the North Korean Human Rights Act, which President Bush signed into
law Oct. 18. The sweeping act provides money to private humanitarian
groups to assist defectors, extends refugee status to fleeing North
Koreans and sets in motion a plan to boost broadcasts to North Korea
and get receivers into the country.

North Korea's Kim Jong Il regime says the radios will air "rotten
imperialist reactionary culture" to undermine the country.

The human rights act, in its broad scope, also has encountered
opposition from President Roh Moo-hyun, South Korea's center-left
leader. Officials under Roh say the act will stiffen Pyongyang's

resistance to the world and hinder already stalled talks to get North Korea to abandon its efforts to build a nuclear arsenal.

They scoff at the U.S. plan to smuggle in radios, saying it's a good-hearted idea but one that will worsen the plight of North Koreans. Anyone captured with a radio, they said, might face prison.

Supporters of the tactic argue that it offers a ray of hope to a populace that's hungry for news amid food shortages and an acute humanitarian crisis.

"There's an incredible desire among North Korean people to know what's going on," said Suzanne Scholte, head of the Defense Forum Foundation, a nonprofit group that focuses on U.S. policy toward North Korea.

A small number of clandestine radios are in the country, sent in by helium-filled balloons deployed by South Korean religious groups or brought in by traders across North Korea's border with China.

"Some people listen to South Korean broadcasts under their blankets," said Lee Gui-ok, a young North Korean mother who fled to China in 1999 and later moved to Seoul.

Hi OM,

As were the answers (with possibly one exception).

>I suspect that may be one reason that this Far-End Loaded AM/MW
>Coil may work is the fact that the RF Systems EMF Antenna is
>'only' Sixteen Feet (16') Long; and the Two Inch to Three Inch
>(2"-3") Ferrite Rod at the End of the Wire Antenna Element does
>have some 'measurable effect' on improving the AM/MW Frequency
>Band performance of such a short Antenna.
>- Relative Size may be the Controlling Factor for this 'unique'
>small Antenna
>
>? ? Would this 'trick' work with a Larger {Longer} SWL Antenna ? ?

Let's approach this from the usual perspective. Many SWLrs posting here already have the ferrite antenna in their receiver and come here for a boost in signals. The fact that it is so easily accomplished by the addition of that same 16 feet of random wire tossed across the living room rug would suggest just how much contribution is found in the ferrite antenna.

Let's put some numbers to it. With the ferrite antenna a DX station comes in S3, replace it with the wire and it climbs to S7. So, if we start with just the wire antenna with the same signal at S7, and adding the ferrite to pump up da volume to S7+ would this be worth $95 to you? What if by simply adding 6" more wire to the 16 feet gave you that same +?

As a product, it is incredibly cheesy to boot. Look at that clunky pl259 at the end of rg174. C'mon now, are we talking about your granddad's RCA Victor this sucker is going to plug into? That and the lead-in is only 16 feet in its own right? How much profit would be lost to give you a decent length of wire and lead-in?

>My more specific point of interest would be in whether using a
>Ferrite Rod with the Wire Antenna Element Wrapped as a AM/MW
>Coil around it would have some meaningful effect on a Horizontal

>Random Wire Antenna that was 75-100 Feet long.
>- For a Horizontal Random Wire Antenna ?WHY? 'place' the
>Ferrite Rod at the Far-End of the Wire Antenna Element ?
>- Why not 'place' the Ferrite Rod near the Feed-Point-End ?
>- Why not 'place' the Ferrite Rod near the Middle ?
>- Why not 'place' the Ferrite Rod near the slightly Off-Center
>38%/62% like a Windom ?

This at least suggests a more practicable study. Loading coils don't do very much without some form of capacitance above them to draw the current. Putting a coil at the top is a fruitless exercise. It may offer to "tune" but it sure won't sing.

Greetings! I built the Ten Tec 1253, 9 band a few years ago. I thouroughly enjoyed using it. Recently I lost the FETs due to leaving the radio hooked up to the antenna during a freak thunderstorm. Arthritis will no longer allow me to repair it so I am looking into crystal sets for shortwave. The 1253 took patience in tuning, but the challenge made the listening more fun. Side band was very difficult,but I did manage to copy even on 20 meters during the day. Build one. It is worth the effort. Jon.

I say set it up; in fact, as long as you are building new - you might
as well plan where you want the antenna & make sure the house is built
with 'cable access' at that point.

Source record: 2805

Hello John,

I have no experience with the Dressler antennas, but I own a Wellbrook ALA 330S Active Loop Antenna. This is the best overall antenna I have ever used. (At one time, when I lived in a ranch-style home, I was able to run a 100-foot wire mounted at the very top of the attic; my Wellbrook, also attic-mounted in my small townhouse, performs better, overall, especially in the summer. It really attenuates atmospheric and local electrical noise, which is present in abundance at my location.)

It probably is not really necessary to mount the antenna on a rotator. I mounted mine on a Radio Shack $100 model, but I have found that I rarely use it. I mostly listen to SW 49 meters and down. (I do find it useful to rotate the antenna when listening to the 60 and 75 meter tropical bands.) You can always manually rotate the antenna if you put it in your attic. Note: PASSPORT says the Wellbrook works best if mounted outdoors, but this is not an option for me. They also say that attic-mounting is a very tempting alternative. They are quite correct in that assessment. My antenna works extremely well. S/N is far better than any other antenna I have tried at my current location (I must use an indoor antenna as our very active homeowners' association forbids outdoor antennas except for small satellite dishes, and even they must be approved on a case-by-case basis).

You do need to supply your own coaxial cable, but this is not a major consideration.

I read on some postings here that some people can't believe the Wellbrook is wide-ranging in frequency coverage as claimed (3 - 30 MHz). Take it from me - it is! Even on MW (on which I do very little DXing), it is quite good.

My receiver is an AOR AR7030 Plus. I also sometimes use a Grundig Satellit 800 with this antenna.

Obviously, I am very pleased with the antenna. I bought mine from THE SHORTWAVE SHOP in the UK. In my opinion, they are a first-class operation. You can telephone (or e-mail) them with any questions or concerns about the Wellbrook antennas.

I hope this is of some help to you.

Best,

Joe

RG,

The comment was not directed at your posting to this NewsGroup.

It was in 'reference' to the eMails from China Radio International
and other eMail type "News Letter" providers.

Things like a Schedule that may not change with every eMail are
best 'communicated' by making them "Links" within the eMail.
This also aides to "GET" the Reader to Click-On the Links and
thereby Count and Track Your Active Readers. {Cookies}

The majority of the 'Text' within the Monthly, Weekly, Daily eMail
should be Fresh "News" [What's Happening Now !] that the Reader will
like to know and be interested in Reading when they OPEN the eMail.

hope this clarifies the prior post ~ RHF

2810. The Gypsis Radio on Andy Griffith.

Newsgroup: rec.radio.shortwave

Greetings! Now that we have retired all the castaways back to Gilligan's Island; how about the shortwave radio on one of the Andy Griffith shows. Remember the one with the Gypsies who were listening to shortwave to make long term forcasts on the weather? I can't remember if it was a Hallicrafters or a Hamerland . I believe it was a Hallicrafters.
It is always fun to look at the radios they had in the office as well. I seem to remember old Colins stuff.
Just some more useless food for fodder. Have a great weekend! Jon.

Sangean and Sony are also part of the DRM consortium. Obviously, they have an interest in selling a new generation of higher priced radios.

I don't think any of the Chinese manufacturers are involved with DRM.

[snip]

The local oscillator operates on the regenerative principle, so Armstrong
was obviously in a good position to develop the superhet. Fessenden had
discovered heterodyning years before, but he was using Poulsen arc
generators as oscillators.

I don't know if this is the same thing, but I was listening to one of the local 1000 watt AMers today, and it sounded really nice. There was a three dimensional sound from the studio that's not normally heard. I think the normal studio reverberations and such are supressed either deliberately or as a byproduct of the usual studio audio processing. Anyway, it sure sounded lifelike.

I'm not so sure lifelike audio is much of a selling point, however. Hi-Fi radio has been around in one form or another since the thirties, and it's never been real popular. I figure people usually listen to the radio casually, and pull out the recordings when they want to listen intently.

The only problem with standard AM as a high fidelity medium is it takes alot of signal to get a good signal to noise ratio. I really doubt DRM can better the fidelity potentially availiable from standard AM with a strong signal. But, even in very strong signal areas, there seems to be no interest in high fidelity AM anymore.

May I ask you guys when you use the ANF?
It says on one page in the manual it's for SSB only, then, it works in AM on another page.

I wish it had manual adjustments as well as the auto feature.

good reply as usual. i am also looking at wellbrook's.
could you tell me why you picked the 330S over the
1530? and, thanks again for helping in my decision on the
7030+. great radio. seems every time i turn it on i learn
something new about it. i have an on going battle here
between the Drake R8B and the AR7030+. i'm still looking
for that extra filter between the 2.2 and 4.0mhz included
standard filters. any info on what brand to look at?
thanks joe...

2821. Icom R-75 question

Newsgroup: rec.radio.shortwave
Date: 2004-11-14 12:53:04 UTC
From: sdaniel13@nyc.rr.com
Message-ID: <b55fd5d5.0411140453.23dda078@posting.google.com>
Source record: 2820

I was recently on Icom's website and noticed that they describe the frequency range of the R-75 this way:

Coverage: 0.03 - 60 MHz (0.1-29.99 and 50-54 MHz guaranteed)

I'm not on the market for a receiver, but if I were considering the purchase of an R-75, their parenthetical disclaimer would make me nervous.

Judging from what I've read elsewhere, the R-75 really does cover 0.03 - 60 mhz; but then, why does Icom only 'guarantee' more limited frequency coverage?

Steve

They do not guarantee the specs -especially on sensitivity- outside the
given ranges.

Try this one.

"This may surprise most educated people. One of the more common
government strategies today, especially in developing regions is
fascism. Fascism is commonly confused with Nazism. Nazism is a
political party platform that embraces a combination of a military
dictatorship, socialism and fascism. It is not a government
structure. Fascism is a government structure. The most notable
characteristic of a fascist country is the separation and persecution
or denial of equality to a specific segment of the population based
upon superficial qualities or belief systems.

Simply stated, a fascist government always has one class of citizens
that is considered superior (good) to another (bad) based upon race,
creed or origin. It is possible to be both a republic and a fascist
state. The preferred class lives in a republic while the oppressed
class lives in a fascist state.

http://www.couplescompany.com/Features/Politics/Structure3.htm

Take your time explaining how Bush fits this one

This a guarantee of reception per all of the abilities of the receiver. You are correct that some models for some markets (I think Europe, New Zealand, Australia and possibly Japan) have some frequencies missing. The situation is apparently similar for people in the USA who cannot buy scanners with some frequencies used for cellular phones, which you can other places.

Wouldn't make me nervous. We're not talking about a $3,000 radio here...it's a five-hundred dollar box. The spec for sensitivity is only guaranteed within the area where the RF input bandpass filtering is peaked, I'm sure. If you need a radio sensitive and birdie-free from 30KHz to 100KHz, you could prbably spend a few more kilobucks and be much less nervous.

Two places. The Nov/2004 National Geographic. Second, this is referenced in several of Stephen Jay Gould's essays which have collected into a series of books. The belief in God does not correlate with church attendance re Europeans, Canadians and others, but is more strongly related in the USA.

I've never heard this before. What does "quarter of 10" mean? Is this before 10 or after 10? I thought it was my hearing until this was repeated. "quarter to" and "quarter after", rarely "quarter past" are all usual ways of saying this around here. Though digital clocks make it "ten fifteen". I think this must be a regionalism or slang for somewhere in the USA (?).

I also hear "zulu" said instead of UTC (or the old GMT).

Quarter of 10 means 15 minutes to 10.

Zulu is used the same as UTC and GMT. Zulu is more of a military term.

My theory is that some broadcasters, somewhere, will always want to
take advantage of the shortwave bands. With all of that bandwidth just
sitting there, there's always going to be someone waiting to fill it.
The nature of shortwave programming might change significantly, but
that's probably true of many other media.

Don't expect shortwave to disappear anytime soon. It probably won't
happen until all the movie theaters close (because of television) and
all the newspapers go out of business (because of the internet).

Thanks for your informative post. Not in Mexico right now, back in Sask. Back and forth. Elderly parents live in rural Mex permanently. Gotta babysit them as their hips get replaced and cataracts removed. I'll change the email reference.

Curious that the "college" educated percentage is quite high for the US. Colleges to me are different than a university. There are typically three kinds of institutions: accreditted universities, who have a government approved charter (takes an act of a legislature to make a university), community and junior colleges, which offer academic upgrading and additional credits that may be recognized by tech schools and universities, but don't grant diplomas, and technical schools which have diploma granting authority and journeyman certificate training for trades (e.g., welding, carpentry, plumbing, computer). I'm guessing that the "college" educated population in the USA is from some additional private and unregulated type of school, and that "university" is a title that anyone can use.

Somewhere around here I have a copy of an old magazine article from
the 1970s talking about how the death of AM radio is "at most" five
years away. I think there's a lesson in this.

The ANF works in either mode for me at least, but the het seems to have to
be at a certain threshold for it to work. Weak hets are not notched out.

Try tuning WWV in AM mode and hitting the ANF - the tones are notched out.

My target receivers are my Kenwood R-5000, Icom IC-R75, and
Grundig Satellit 800 M. Note with the Grundig Satellit 800 M
when the SO-239 is switch on to use the External Antenna the
'internal' AM/MW Ferrite Rod Antenna is disconnected.

Not worried about the cost since this would be a 'home-brewed'
Antenna with parts I already have.

Looking to add a little more signal to the AM/MW Band area for
improved Weak Signal DXing from the Inverted "L" Antennas.

> Richard Clark, KB7QHC

RC,

I have the two Inverted "L" Antennas and about a dozen 10mm X 200mm
Ferrite Rods to play with. So for me it is a matter of De-Rigging
the Antennas; winding the Antennna Wire on the Ferrite Rod; and
Re-Rigging the Antennas.

Doing a dry run with an extra piece of Antenna Wire; I can get
about Nine Turns per Inch; which would be 63 Turns uniformally
wrapped evenly over 90% of the Ferrite Rod.

So my 'focus' is on a "Low Noise' Inverted "L" Antenna that is
100 Feet long. Placing the Ferrite Rod at the "Top" of the
Vertical Leg where the Antenna Wire Element transitions from
Vertical to Horizontal. Rig the Antenna Wire Element with 33
Feet Up to the Ferrite Rod AM/MW Ferrite Coil and then have 67
Feet Out to the Far-End. Would this possibly work any better
then having the Ferrite Rod and Coil at the Far-End ? and Why ?

In my 'imagination' for the AM/MW Broadcast Band; the Vertical Up-Leg would act like an Omni-Directional "Tuned" Vertical Antenna (since the Ferrite Rod would be Vertical); with the Horizontal Out-Arm of the Antenna acting like a Top Hat for the Vertical. Then at the Shortwave Frequencies the 'effects' of the Ferrite Rod would become less and the Antenna would simply act as a normal SWL'ers Inverted "L" Antenna.

Now here is another thought; would having the Ferrite Rod with the Antenna Wire wrapped around it at the Far-End of the Horizontal Antenna Element cause the AM/MW Broadcast Band reception to be Directional 'Off-the-Sides' of the Inverted "L" Antenna ? ? ?

in search of some ideas and answers ~ RHF

> Band performance of such a short Antenna.

Yes, I was assuming you had a short antenna and wanted to load
it. The reason for loading a short antenna is to increase its
electrical length closer to resonance and the benefits are much
more pronounced for transmitted signals. Most modern HF receivers
have enough gain to make up for a less than optimum antenna.

Loading a long wire antenna doesn't make much sense.

I just bought these two off Ebay and was wondering if anybody has any experience with these two radios. I bought em both for obvious collector reasons. The R-530 has the Wadley loop circuit which I'm interested in. And I got the SW1 because it's one of the first micro portables with descent performance and I collect Sony's. I would like to find the Original Barlow Wadley XCR-30 someday.

> an interest in selling a new generation of higher priced radios.
>
> I don't think any of the Chinese manufacturers are involved with DRM.
>

I don't know the numbers but, there are increasingly more products from Sony
that are outsourced to China.
I was dismayed when I purchased a second Sony TV, about 4 years after I
purchased the same model earlier, only to discover it was made in Mexico.
The quality between the two TV sets are obvious. The first one, made in
Japan, is superior in every way to the newer made in Mexico model.

Sony will be exiting the SW WorldBand radio market. Get one while you still
can!

Sangean (=Grundig/Eton) are a Taiwan company. All of their radios are made
on mainland China in the same factories (I believe, correct me if wrong) as
Tecsun which is owned by the Chinese Communist Party - believe it or not!

DRM is a another way to extract $$$ from unsuspecting consumers.
If I want "digital" radio I'll "subscribe" (remember that -
"S.U.B.S.C.R.I.B.E.") to XM or Serius or satellite TV or internet stream...
I don't want Ibiquous(sp?) or DRM!

From: 0ff_Ramp <loo|>
Message-ID: <10petng4rti6a75@corp.supernews.com>
Source record: 2848

Whatever became of Motorola's Symphony Chip for analog radio?
It was supposed to perform wonders from current AM broadcast signals.

"Motorola has developed this system to improve radio reception at the receiver by using the 1,500 MIPs processor to demodulate the received signal. The improvement comes without any transmission changes required of the broadcaster."
http://beradio.com/departments/radio_motorola_symphony_digital/

"Motorola's Symphony digital radio chipset delivers breakthrough AM/FM reception and performance"

"Unlike other digital radio offerings, the new digital radio chipset does not require broadcasters to buy new digital broadcast equipment. Neither does it require consumers to pay a monthly subscription fee like those charged by satellite services because it operates on traditional AM/FM analog broadcasts."

http://mrtmag.com/dealers/automotive/radio_motorolas_symphony_digital/

The DSP56371 is priced at $9.95(USD) (suggested list price) for 100,000-unit quantities.

The Barlow-Wadley XCR-30 was an amazing radio in its day and well worth adding to a collection. You can still find them in good condition in South Africa for about $80, but shipping costs to the USA would kill you. (probably $80/100!)

| So you take the old Frog potable. Cool. Those are good radios Steve.

You know, Brian, I can't "read" the frequency down to 10 Hz, but the lack
of synth noise really helps - that's another advantage of the old toob

radios,
also. I really have GOT to get my R390A recapped, aligned, lubed, and
repainted. THAT is a real radio! I'm also going to start looking for a
'390
(non-"A" type) next year. I have a friend, an old broadcast engineer, who
lives in Kansas, near Manhattan, KS, and I've spent some time listening to
his ex-NASA R-390. The audio is so sweet, and it's an incredibly sensitive
receiver. Of course, I am planning on building an Elecraft K2 this Winter;
I'm just not sure where I'll get the TIME for all of this!

But, as to the Frog, you bet - the "D" cell compartment is in good shape,
and if I leave the dial lights off and wear headphones (instead of using the
speaker), I can get a couple of days' continuous use out of the rig. I am
thinking again about going on a "mini DXpedition" on Lake Pepin (Maybe
in Lake City), if I can find decent lodgings that will allow a wire antenna
of
100 feet or so.

73,

Steve Lawrence

They take skill to use but a good regen is very sensitive. I've got a
homemade regen that's selectivity isn't bad either. I had a military RAL7
that was a good radio.

Yep. I've had a couple R-390s myself. You can wear your arm out tunning them
but a properly working R-390 is the quitest radio ever built. I would have
to argue they were the best tube radio ever built.

> Of course, I am planning on building an Elecraft K2 this Winter;

RHF,
Since you already have the items needed, why not give it a try?
The most you would loose would be the time/effort to 'de-rig' your
other antenna.
'Doc

PS - Without looking at the site mentioned, I tend to agree
with Richard. Sounds a lot like 'snake oil'. Which ain't
'bad', if you're selling 'snake oil'...

Between battery and radio is just wire, fuse and connector. A few bucks
worth of parts.
Most electronic places(even Radio Shack) have plugs to fit.

He has broadcast on WWCR for almost 10 years. Yesterday was the last broadcast.

He is a dynamic speaker, a dedicated man and a very informed individual though some do not like his occasional choice of words.

To those who listened to him and had not learned that his broadcasting is over you'll want to read "The Last Hurrah" by Jeffrey Bennett.

Sadam, the Chinese, the Russians and now the Japanese have decided not to support the U.S. dollar - at least to the extent it has been supported in the past.

The English speaking politicians of America have decided NOT to close off the borders though they claim to be fighting terrorism. Instead they are spreading terrorism. We are supposed to become so terrorized that we willingly give up ALL our rights to those who would gladly destroy us. We even have to put on our coffee cups - in four different languages - "Caution Hot" so that invaders no longer have to learn English - or learn that coffee is SUPPOSED to be HOT.

Perhaps this is just one more step in phasing out the good ol' English language just as there is an attempt to phase out the WASPs (White Anglo-Saxon Protestants) and the God which they at one time served. That was before they succumbed to the doctrines of Balaam.

Why should ANYONE broadcast in any language that they are attempting to phase out? Perhaps we could now do completely away with ABC, NBC, CBS and CNN except that they are needed to continue to lull us to sleep!

Good night! ;-)

Back in 1965, when I was 14, I tried many variations on
"Long Wire" antennas. Given my parents back yard was about 60'
wide and 120'long, it is clear that they weren't really "long" at
any freqeuncy below 30MHz.
My uncle gave me some variable caps, Air-dux and two large,3/4"X16"
ferrite rods. I tried wrapping wire around the ferrite and, except
for short, 10' wire antennas, with the rod between the antenna and the
receiver the rod made no differnce. None. And nothing worked as well
as my "standard" 96' wire antenna. I did make some dipoles cut for WWV
on 10 and 15MHZ and they were slightly better in receiving WWVH then

the 96' wire antenna. They made no difference on WWV.
I was able to build a match box with Air-dux and the caps and that really
helped. The radio was a Zenith SW that died that fall. The LO coil developed a short between the primary and secondary and Dad could not find a replacement part. So, for a late birthday present my mom and dad
bought me a Heathkit GR64. It was a gaint step in that it had a "S-meter".
I even tried a antenna reciever matching transformer suggested by an article in Radio-Electronics. Which did not work. It consisted of two air coupled windings sheilded in a soup can. I wish I had known about transformer deisign that John Doty came up with. Dad also bought me a ARRL handbook and I started to understand that antennas where not complete magic.
Just 99%!
Save your maoney and just put up the longest wire you can, be carefull to
keep it well away from noise sources. John Doty's suggestions for a "low
noise" antenna are a good palce to start. Works very well and it is very cheap.

Was talking with some non-political friends, they think both parties
suck, and one pointed out that on shows like Law and Order a murder
is invistigated, solved, the guilty is arrigned, and a multipart trail
takes place in less then an hour. He is a lawyer and pointed out that
it takes longer then that to write a simple Will. He told me the
hardest
part of his job is to educate his clients that it will not be "fast",
that
any legal action will take a long time, maybe years. And that single
fact
causes most people to drop whatever legal action they are thinking of
taking.
I wonder just how much TV has altered out preception of reality.
A LEO that I know, he is a SWL and a sometimes ham radio operator,
told me
about a training event he had to go through. It seems that most police
expect a single, well placed pistol round to stop a bad guy. To knock
them backwards like on TV/movies. When in fact a riffle round will not
always stop an angry/frightened/druged person. Thay shot their service
weapons into suspended 100Lb bags of sand and the bags barely moved,
1/8"
at most. The trainer warned them that they were "Training to die" by
watching TV cop shows or adventure movies. Kind of spooky that TV is
altering our perceptions of reality to the point that a LEO trainer
calls it "training to die".
We were all having a nice friendly argument over the mess in Iraq.

One guy's wife, a history major, said that she doubted if anyone
in the US government had a clue as to how long "nation building" would
take. She thinks that we, our leaders and people, will get tired and
bail long before the job is done. She said we all think in terms of
day
or maybe months, but not in years or decades. She pointed out that one
of the biggest post WWII era problems was getting our congress to
allow occupation troups to stay in Germany and Japan long enough to
comlete the victory. She feels that if we faced that same problem
today, we would not
stay long enough to achieve any of the reforms that we achieved in
those countries.

In additon to the "me generation" I guess we should be called the "now
generations".
This should be my last post on this OT thread.

Message-ID: <dI6dnek1yqJ2BwrcRVn-3A@comcast.com>
Source record: 2870

My system crashed and I have just started re-installing stuff. Last night I spent getting the Shortwave Log program back with all the latest database updates.

I am having a problem with the system settings Latitude/Longitude. No matter how I enter the values it thinks I am in Russia somewhere? I have tried using +- where required (I think correctly) I am thinking I am not doing something right. BTW I am in Carrollton,TX right outside of Dallas.

From my GPS Latitude --> 32deg 58.18N
Longitude->096deg 54.11W

Any suggestions?

Jim Douglas

>
Look again, the Galaxy does not use a Wadley loop.

It uses a phase locked loop synthesizer to generate the first local oscillator signal every 500KHz (or is it 1MHz in the Galaxy?).

A Wadley loop, while providing the same overall effect, is a result of the right mixing, adding and subtracting, in the signal chain.

What confuses people is that the design of the synthesizer in the Galaxy uses a similar bit to the Wadley, putting the reference frequency through a multiplier that puts out signals at every harmonic of that reference. IN the Wadley, that signal is used to generate the needed beat signals, in the Galaxy that signal is compared to the local oscillator in a phase detector to lock the local oscillator.

Visually change the multiplier to a programmable divider chain, and in the Galaxy you'd have a more recognizeable synthesizer. It just came before programmable dividers were cost effective, just as the case with the National HRO-500, so they went with the muliplier, though there is a tradeoff in use and performance compared to a synthesizer with a programmable divider.

Change the mulitplier in the Wadley to a divider, and the thing won't work at all.

Michael

Hi John. I'll take one if you find it and give you a finders fee. Please
remember me if you find one.

2874. are the GRUNDIG YB550 / TECSUN PL230 dual conversion?

Newsgroup: rec.radio.shortwave
Date: 2004-11-14 18:00:30 UTC
From: ulTRAX@arabia.com
Message-ID: <3513d8b1.0411141000.2731615d@posting.google.com>
Source record: 2873

The review at radiointel says: "The radio comes with one PL-230 PLL
dual conversion receiver. (I emailed the seller, who said he believed
it to be dual conversion, so if it is single I apologize.)"

So I downloaded the YB550 owners manual. It doesn't say whether it is
dual
conversion... and the address they gave to write for additional info
customersvc@etonncorp.com was not active.

So I'm assuming that if the YB550/PL230 were dual conversion, they'd
have mentioned it and there would not be so much confusion. Yet
there's plenty of cleaper radios that are.

Does anyone know for sure? Do you have a link? Is dual conversion so
common that it's not even listed as a feature anymore?

"Quarter Of" and "Quarter After" are more southern terms, though used other places as well. "Quarter To" and "Quarter Past" are more northern terms (Minnesota, Wisconsin, and Chicago). Zulu is also used in aviation.

The block diagram and the description in the review for the receiver in
CQ magazine back in 1968; the receiver was on the cover.

Plus, all the ads at the time never mentioned the Wadley loop.

This is not the first time people have ascribed the Wadley to the Galaxy
(and the HRO-500 for that matter). I've always assumed they didn't didn't
grasp the differences and were making a leap based on some information.
But if such a standard as Osterman's book makes the mistake, maybe everyone4
is getting the misinformation from that.

Micahel

2889. FCC Announces Freqs Protected from BPL Interference

Newsgroup: rec.radio.shortwave
Date: 2004-11-14 18:53:55 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cn89k3$li2$1@hercules.btinternet.com>
Source record: 2889

(This was written by Bonnie KQ6XA and is published after checking with the
UK source on the Short Wave Magazine Group).

A rather depressing email from HFPACK. 73 Trevor M5AKA

HFPACK NEWS
http://www.hfpack.com

FCC Allocates New Power Line Transmitting Bands on HF and VHF
==========

The new FCC Rules (just issued) list the bands of frequencies BPL
systems are not authorized to transmit on, due to potential
interference to Aeronautical radio systems. From this "inverted"
listing, I have put together a list of the new FCC authorized BPL
transmitting bands of operation:

FCC AUTHORIZED BPL (Broadband over Power Lines)
TRANSMITTING BANDS for USA:
1.705 MHz to 2.850 MHz (160m Amateur Radio Service)
3.025 MHz to 3.400 kHz
3.500 MHz to 4.650 MHz (80m Amateur Radio Service)
4.700 MHz to 5.450 MHz (60m Amateur Radio Service)
5.680 MHz to 6.525 MHz
6.685 MHz to 8.815 MHz (40m Amateur Radio Service)
8.965 MHz to 10.005 MHz
10.100 MHz to 11.275 MHz (30m Amateur Radio Service)
11.400 MHz to 13.260 MHz
13.360 MHz to 17.900 MHz (20m Amateur Radio Service)
17.970 MHz to 21.924 MHz (17m,15m Amateur Radio Service)
22.000 MHz to 74.800 MHz (12m,10m,6m Amateur Radio Service)
75.200 to 80.000 MHz

The entire ruling takes a long time to read and understand... but I
found it quite interesting.

In FCC's report and order, it is obvious that the Amateur Radio
Service has been relegated to insignificant status by the FCC
Commissioners. It is well known that the "White House" made the actual
decision that BPL would be implemented, regardless of the technical
merit. FCC followed by recognizing, yet ignoring and overruling the
technical studies and documented radio interference caused by BPL.

73---Bonnie KQ6XA
PS. Here is a link to the FCC order and an excerpt from new rules.

http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-04-245A1.doc

REPORT AND ORDER
Adopted: October 14, 2004
Released: October 28, 2004
By the Commission: Chairman Powell, Commissioner Abernathy issuing a joint statement; Commissioners Martin and Adelstein issuing separate statements; Commissioner Copps approving in part, dissenting in part and issuing a statement.

"By this action, the Commission amends Part 15 of the rules for radio frequency (RF) devices regarding Access Broadband over Power Line (Access BPL), a new type of carrier current system that operates on an unlicensed basis under Part 15. Access BPL systems use existing electrical power lines as a transmission medium to provide high-speed communications capabilities by coupling RF energy onto the power line..."

"APPENDIX B
FINAL RULE
Title 47 of the Code of Federal Regulations, Part 15, is amended as follows:
(...)
Section 15.615 General administrative requirements
(f)(1) Excluded Bands. To protect Aeronautical (land) stations and aircraft receivers, Access BPL operations using overhead medium voltage power lines are prohibited in the frequency bands listed in Table 1. Specifically, such BPL systems shall not place carrier frequencies in these bands.

Table 1. Excluded Frequency Bands
FREQUENCY BAND
2,850 - 3,025 kHz
3,400 - 3,500 kHz
4,650 - 4,700 kHz
5,450 - 5,680 kHz
6,525 - 6,685 kHz
8,815 - 8,965 kHz
10,005 - 10,100 kHz
11,275 - 11,400 kHz
13,260 - 13,360 kHz
17,900 - 17,970 kHz
21,924 - 22,000 kHz
74.8 - 75.2 MHz"

You're right that any school can call itself a "university", basically any school that isn't a publicly run community college can call itself a university, and universities can be either publicly or privately run. There's little state regulation of postsecondary education, most of the accreditation comes from private entities such as Western Association of Schools and Colleges in my area (California). Community colleges in the US grant diplomas called "associate degrees" (such as AA, Associate of Arts) commonly called "two year" degrees. Community colleges are run by local boards similar to the aforementioned "school districts" that control primary and secondary education. State level universities such as California State University and University of California (you will find similar nomenclature in most states) are run by state government. Then there are private universities, which can be run by anybody from a private foundation to a religious group. Education at these varies widely, from the mainstream (Harvard, Yale and Stanford are all private universities) to the ideological and unscientific (such as Jerry Falwell's university). You can't always predict academic standards at a university by who owns it-the Mormon Church runs a university exclusively for their members, but it's widely recognized as a good institution. OTOH, the evangelical universities are academic jokes.

Source record: 2891

And all this should remove any shadow of a doubt from the world mind that the US is totally incapable of minding its own business. I wonder how long it will be before some other countries start their own "ad campaigns" aimed at educating the sheep-like mind of the average American that, regardless of what their government tells them, there is a real world outside its borders with real people and real issues of their own.

The North Korean Stalinist-style government is not a good thing, but then neither is a US government stated policy of "perpetual war". Didn't a wiseman once say something about putting one's own house in order before undertaking the cleaning of someone elses?

Alright, who can answer this one: what was the radio that Herman Munster was using during the episode where he became a Ham? (Don't expect me to answer this because I'm not sure!)

George Craig hath opined:
>
>The thing about the HQ 180 I didn't like was the lack of accurate frequency
>read out and the radio woud drift... but it was the technology of the
>time.....GC

I don't recall any of the '50s-'60s Hammarlunds as drifty, but then there are a lot of things I don't recall from that period. My 145AX, 170A, and 180AX hardly drift after warmup.

As for readout, my first ham receiver was a Zenith Transoceanic. Not only did it not have a BFO, meaning I had to read CW from the presence or lack of a carrier, but the whole of the Novice portion of 40M couldn't have been more than a quarter-inch wide. The dial pointer took up a fair chunk of that. The Hammarlunds of the era felt like they had infinite bandspread by comparison. Interpolating to within a few kHz was plenty for me.

Now, of course, digital has spoiled all of us, including me. But when I get away from my Grundig Satellit 800 and Sony 7600 and back to my boatanchors, I feel like I've gotten home from high school in the afternoon and it's time for some serious knob-twiddling.

Brian:

The Sony SW1 is an excellent performer for its size. I took mine the world over and it served me just fine. There is a problem which plagues the little receiver and that is the decoupling capacitor in the audio amplifer---they need changing. Nearly every SW1 that I know of (including mine) required replacement of those capacitors---and the job is not for the faint of heart. The radio will play just fine with earbuds but with speaker it just makes a loud buzz.

I wrote a detailed service note that I posted to this newsgroup about two or three years ago---do a search under SW1 and RadioGuy and I think you will find it.

Very informative, and more crucial now as some of these "schools" offer internet distance study. There are some people professing to have qualifications that really are a joke and they've showed up locally here, applying for things. I review some credentials re personnel. The weirdest ones have the word "biblical" prepended, e.g., M.A. and PhD in "Biblical Counselling", "Biblical Nursing" and "Biblical Science". (I'm not kidding!). >>

Thanks Joe
good reply you have answered my questions i may well get the
1530 version but i am first waiting for a spec sheet for a DX-1 Pro.
i will look over the two antennas and them make my final decision on what
one to buy..
i am using the AR5000A+3 great all round receiver but i may after the
Christmas is out of the way invest in a dedicated HF receiver how do you
find the AR7030....just what is the difference in the 7030 and the 7030+ is
the + version worth the extra cash.....
with a little bit of luck i may get the welbrook at the end of this week.
as were i am located the conditions are terrible at this time i have just
turned my receiver on and well its turned off again can not hear much. to
much interference on most of the HF band....
lets hope a new antenna will improve my situation...

Thanks: John

>Where did you get your info? The tech manual? Thanks

There was a really good thread on the Wadley Loop in the
rec.radio.amateur.homebrew newsgroup several years back.

The really cool feature was how the first oscillator was used to mix
both the incoming RF (to the frequency range of the 1 MHz wide first
IF), and (with another mixer) to tune one of the harmonics out of the
comb generator into the range of a narrow bandpass filter. This was
amplified and mixed with a crystal oscillator (in such a way that the
offset/drift of the first LO was inverted) and that was used as the
second LO to mix the first IF down to the second IF's frequency range.
So as long as the harmonic of the reference was in the range of the
synth's bandpass filter, the offset and drift of the first LO was
canceled.

How good is a FRG-7 with intermod, though?

Thank you for the question. I live in Colorado, and by in large, my most consistently listenable shortwave programming comes to me via WWCR. Their full spectrum of frequencies do well in my area. Of late, I've been tuning in World Harvest Radio to a greater and greater degree.

Hi OM,

If you want to resonate it at ONE frequency (the supposed reason for having that lump at the end) then you would need an inductive reactance of
1000 Ohms at the feedpoint to render the antenna a resistive 6 Ohms and a poor average gain of -8.7dB;
or
1000 Ohms at 3' up to render the antenna a resistive 7 Ohms and a poor average gain of -8.5dB;
or
1300 Ohms at 16' up - 7.8 Ohm Antenna @ -8.7dB;
or
1400 Ohms at the top - 9 Ohm Antenna @ -9dB;
or
1900 Ohms 16' out the horizontal leg - 11 Ohm Antenna @ -9.6dB;
or
2600 Ohms 32' out - 12.5 Ohm Antenna @ -10 dB;
or
5800 Ohms 48' out - 14.6 Ohm Antenna @ -10.5dB;
or
10200 Ohms 58' out - 15.4 Ohm Antenna @ -10.6dB;
or
56500 Ohms 64' out - 15.2 Ohm Antenna @ -10.6dB.

You should note the progression of increased inductance required to tune this antenna to 1MHz (ymmv). At any other frequency and bingo, all bets are off. You should also note there is only a 2dB spread (AVC would quickly put that to rest). Also, the numbers above presume you performed the chore of laying out 16 X 33' radials.

Let's compare that to the advertised antenna
9200 Ohms at the bottom - 32.5 Ohm Antenna @ -26.8dB;
or
13700 Ohms at 8' up - 35 Ohm Antenna @ -22dB;

or
108750 Ohms at 15' up - 39.6 Ohm Antenna @ -19.9dB.

This presumes the single lead-in laying along the ground (where most of this Antenna Ohmage resides.

This, further, would put your antenna roughly 10dB ahead (sans loading, and using a simple tuner) of the $95 spread. I hope you notice the parenthetic statement of a tuner - it does the same thing as these loads, and you get to tune to more than one frequency.

I will leave it up to you to determine how many wraps around how many rods would give you 110000 Ohms inductive reactance at 1MHz.
>

>Rod would become less and the Antenna would simply act as a
>normal SWL'ers Inverted "L" Antenna.

Well, let's just test that hypothesis with the load at the top.

What you get is fairly well tuned at 10MHz (SWR 1.7) with omni coverage in both horizontal and vertical. For other bands, of course, a tuner would be useful.

>Now here is another thought; would having the Ferrite Rod with the
>Antenna Wire wrapped around it at the Far-End of the Horizontal
>Antenna Element cause the AM/MW Broadcast Band reception to be
>Directional 'Off-the-Sides' of the Inverted "L" Antenna ? ? ?

NO. For short antennas and low horizontals, there is almost no directionality. What you are attempting to do is to capture the quality of small loops (which are what the ferrites are) of being directional. The signal from the parasitic wire (what is not part of the small ferrite) is going to fill in the nulls and deluge its poorer sensitivity as well. You can of course test this answer by finding a way to answer my question inferred above about how many wraps and how many rods to achieve 110000 Ohms inductive reactance.

The real question is "Is there anything to listen to in the 30-60 MHz
range?".

Probably not. Although there are some cool uses of that frequency
range like meteor scatter packet radio, nobody much seems to want to
use it. Last I knew, the US Forest Service and some of the rural power
companies seemed to prefer it (land mobile FM) as it got out into the
boonies better. That, and cordless phones at 49 MHz.

Generally, adding non-radiating reactance to an antenna decreases
broadband efficiency, although it may increase efficiency over narrow bands.

If the rod does anything at all, it increases the effective length of the antenna. You can accomplish the same thing by physically increasing the wire length. And all that will do is to increase the amount of signal -- and noise -- entering your receiver. Once you have enough signal and noise to overcome your receiver's internal noise, there's no advantage of any further increase, since there's no improvement in the signal to noise ratio. Try disconnecting your antenna from your radio. If the noise level drops when you do, you've got adequate signal strength from the antenna, and lengthening it -- either physically or with some kind of loading -- won't help you hear signals.

The explanation of the properties of the antenna at the distributor's web site is wholly hype and sales marketing. It's a mismash of misused technical terms, which means nothing and and is quite apparently intended to mislead a potential customer and present the antenna as having wonderful properties which it doesn't in fact have. I'd avoid buying it for that reason if for none other.

I have not seen anything definitive on this, but the "net wisdom" is that these radios are single-conversion. When it's dual-conversion the manufacturer or distributor usually make a big deal of it. The last small digital dual-conversion radio from Tecsun was the PL-707A, which Grundig sold as one of the e-Traveller models; among other rebranders.

I got this in a mailing and clipped the heading, etc. Here is the body of the email.

Al

=======

WAS THE FEDERAL RESERVE BANK COMPLETELY EMPTIED OF GOLD IMMEDIATELY BEFORE THE WORLD TRADE CENTER ATTACK ON 9-11-01?

On the morning of September 11, 2001, there were $167 billion dollars in gold bars in Federal Reserve vaults in the basement of the World Trade Center.

Since the destruction of the twin towers, there has been much speculation as to what might have become of all of the gold.

A female caller to the Bill Bochiers radio program on WLW, Cincinnati (11-06-04) told of a report from her friend who worked at the WTC. The friend said that on the morning of 9-11 she was on her way to her job at the World Trade Center, along the route she normally took. As she turned a corner at the base of the Center, she saw two large flat bed trucks parked at one of the entrances. One of the trucks had already been loaded and had its contents covered by a large tarp. The second truck was in the process of having its bed loaded with stacks of solid gold bars.

Both sides of the street were lined by black uniformed troops with machine guns who kept an eye on the operation and on the surrounding area.

The bewildered woman kept a distance from the activity and watched as the second truck was loaded, and its contents covered with a tarp. The two trucks were then driven away with the soldiers traveling along as escort.

The woman was so stunned by what she had seen that she turned around and did not report to work that morning, which, as it turned out, most probably saved her life when the towers were attacked and destroyed only about an hour later.

I don't think this is even a smidgen true. Not a kernel. Now, it is true that the Bush administration did have Iraq plans prior to Sept 1. The rumor was that "something" was coming up in the Persian Gulf. You're going to need proof for this thing though. And just saying there's a massive conspiracy and cover-up won;t do it.

Read up on the coups the US created in the Third World in the 50s to
keep nations from "falling to the Communists". Especially where the US
overthrew the democratically elected government of Guatemala in 1954 in
order to install a right wing dictatorship that would be more
accomodating to United Fruit Company.

If such a campaign starts, I'll be there to log it, and I'm sure some of
you will try to QSL it. :) If France airdrops radios on the US, I'll
grab one and see what it has to say. :)

I realize this is "old" for now, but I just got a reply from the Christian Gallery operator. He requested I pay the board a visit and see how God moved him to use the admonition I gave him concerning the "How Las Vegas Fueled the 9/11 Terrorists" montage. (? about 1/3 of the way down the long page.) I did. It is the large read block at the top of the "page" but it is not any kind of apology. It is an exact (I think) copy of his reply to me. Oh, In another post I mentioned Ephesians 5:12 and that some of the acts of men are shameful even to discuss.

I feel (almost) certain that the post I'm replying to is not intended in any way to disapprove of the acts portrayed but to belittle the author of that page / web site. Anyway, I felt there were some (? a few) who would be interested in knowing Neal's "justification" for presenting that bit of porn on his site. It portrays ACTUAL acts that are ACTUALLY "protected" by our so-called justice system and many of our politicians - not to mention those in both places / positions who willingly participate in such wicked acts. It kind of reminds me of the "Protocols of the Learned Elders of Zion", Communist Manifesto, Doctrine of Balaam and a few other things. :-(

Isn't "Biblical Science" an oxymoron? Anyway, there are so many
"universities" in America that keeping track of all of them is
impossible. Education is decentralized in the US, which sounds strange
to somebody from a place where the federal authorities keep close tabs
on education.

I stated it was from a message I received. Therefore, I claimed to be
no witness to any acts and I don't have to "prove" anything. Why don't
you check with the program mentioned and see if such a thing actually
happened? (I started to make this message simple and just agree with
you on the first three words -- but I won't do that!) ;-)

Start the program. Go to tools and then options. A window for the port
setting will pop up. I use com1. If that dosn't work try the other ports.

>
> What will become of the shorwave bands?

The Swiss have stopped broadcasting on SW altogether. There was recently a post on this group that a Swiss amateur radio club is briefly using the old SRI transmitters, but after that the whole operation will be dismantled.

As for DW, they haven't totally stopped transmitting in English on SW, but their current English SW broadcasts-mostly to Africa-are hard to hear in North America. Like the BBC, DW management thinks SW is out of date and is concentrating on the internet and satellite. The BBC has stated that it isn't interested in being heard by ordinary people, only the powerful, and they all have internet and satellite connections. I suspect the same thinking is going on at DW. As for VOA, it's being phased out in favor of music based services like Radio Sawa. Having listened to Sawa's SW tx's, I can say that they sound a lot like an American FM station, except with a little bit of "news" interspersed with the music. Apparently the US govt thinks that the best way to turn Muslim youth away from terrorism is to broadcast rap music to them. I would think that that would create terrorists, not stop them.

US,

YES - "Real Americans want their votes to be counted."

Real Americans being the actual Citizens of the USofA
who in-fact did 'cast' their Votes on Election Day.

If in-fact you are advocating "Verified Voting" then Bring-On
the United Nations (UN) and an 'Official' UN {International}
Observed Election" right here in the USofA that should be
. . . VERY INTERESTING :o)

The "Standard" for a UN {International} 'Observed' Elections is:

1. A Valid Voter ID / Photo Registration Card
presented at the Polls when you Vote.

2. The Thumb Printing of Each Voter for Validation
and to prevent any so called 're-voting'.

Bring-On the UN {International} 'Observers' !

FREE and Un-Afraid to 'show' that
"I Am an American Citizen" and I VOTE [.]

US - I Am Ready An Willing to VOTE - Are You ? ~ RHF

Thanks for the response. Yes it is on COM 1 but I forgot the other port settings. Within the program you click TOOLS, OPTIONS, PORT SETUP.

There are 5 adjustable settings in there. I remember I used to have to change a couple of them for it to work but I forget which ones AND what settings to choose.

Thanks again.

We also use "quarter after" (as well as "quarter past") here
in the Great White North -- however, I've never heard
"quarter of" before.

Since American mediumwave AM call in shows only require callers to give
first names, anybody can call in and claim anything. Tales that callers
to talk radio give are usually heard from unidentified "friends" or
"friends of friends" and are more appropriately classified as urban
legends.

```

| > 100 feet or so.
|
| That would be good. Are you in any clubes around here? I was thinking of
| joining the MDXC? I got the ap.

I'm in a number of the ham clubs here, and have actually considered MDXC - their loop antenna site is particularly interesting, and they have some fun-looking get-togethers in the Twin Cities.

As to the R-390A, it's dead - quiet and hiss - free. I spent about 10 total hours listening to my friend's R390 and decided that either that or the R-390A were radios I'd love to have. But, yes, you're absolutely right: I never thought "Torque" would be considered a DXing skill!

CM,

A 100 Foot long Inverted "L" Antenna is not a Long Wire for the
AM/MW Broadcast Band with coverage for 530 kHz to 1700 kHz

* One Wave Length for 530 kHz is 1896 Feet; and 100 Feet at
530 kHz would only be 0.053 WL.

* One Wave Length for 1700 kHz is 591 Feet; and 100 Feet at
1700 kHz would be 0.169 WL.

Like most people I do not have 600 to 1900 feet of space to
string up a true "Long Wire" {One Wave Length} Antenna for
the AM/MW Broadcast Band. So this is why I am 'questioning'
the use of Ferrite Rod Antenna with a Coil as an integral part
of a 100 Foot long Inverted "L" Antenna.

Geez! Broward's really on a hate trip, isn't he? And here I was just
saying how nice it would be to take up a collection and send him a cap and
some gloves.

The real question is what does he actually mean by the above. Does Broward
long for some McCarthyesque move to put me in one of Mr. Bush's Gulags or is
Broward already posting out of prison and just lonely?

>I want you in prison.

Wow. What to say?

Sorry, Broward. I don't want you regardless of the decor. I just don't
swing that way. I know life has been hell for you since your hero Koresh
took the one way trip to the nasty place, but I think you just need to snap
out of it, get out of your box and begin trying to live again. They say
Bush has caused a big upswing in jobs at Wendy's.

What have you got to lose?

I think it would be fun to build one. It would also be fun to learn
to use one. But like tuning a superhet with bandspread dials and
preselector a regen gets old quickly because tuning around is so slow
and fiddly. They are great basis for comparison because they show how
far radio receivers have come.

No such things as subharmonics. The fundamental cannot produce frequencies
lower than itself. However, who knows what strange QRM the modems themselves

> It is the large read block at the top of
> the "page" but it is not any kind of apology. It is an exact (I think)

I glanced through Neal Horsley's article about the Las Vegas/terrorist connection. He's saying that the hijackers went there to remind themselves of how decadent we Americans were; he also agrees with their assessment. I'm left with the impression that he also agrees with their actions. After all, he advocates the killing of abortion providers and their spouses. What say you, Al Patrick? Do you agree with their actions as well?

This is a guy that approves of Paul Hill, the minister who murdered two people and wounded one in Pensacola, and Clayton Lee Waagner, who sent out hundreds of packets of fake anthrax to abortion clinics during the same time that someone was killing nine people by sending -real- anthrax in the mail. (Thanks for diverting valuable resources, asshole.) And not only that, Waagner, so much admired by Neal Horsley and I'm beginning to suspect you, is a bank robber AND a car-jacker. So much for the lame excuses offered by these people that they're only protecting those who can't protect themselves. Oh, I almost forgot. The FBI says that Waagner is a heavy smoker, a gambler and a drinker. But as long as he isn't screwing other guys in the ass, well...he's okay!

http://www.fbi.gov/pressrel/pressrel01/waagner.htm

If anyone actually bothers to click on that link, you ought to know that he's been caught and he's doing time.

And hopefully getting screwed in the ass after all. Look on the bright side; it's sex that won't result in unwanted pregnancies.

Speaking of support, I see that Horsley's selling self-portraits of Waagner on his site. It's redundant, but the self-styled "anti-abortion warrior" is an idiot. The image reflected in his glasses ought to be reversed. Clearly, this is a guy that doesn't think things all the way through.

http://www.christiangallery.com/truethreat.html

> copy of his reply to me. Oh, In another post I mentioned Ephesians 5:12
> and that some of the acts of men are shameful even to discuss.
> I feel (almost) certain that the post I'm replying to is not intended in

> any way to disapprove of the acts portrayed but to belittle the author
> of that page / web site.

You can leave out the word "almost" now. I (generally) don't disapprove of the acts, and you can bet your ass I'm belittling him and anyone who agrees with him. I don't approve of publishing hit lists for radical Christians to use to waste abortion doctors and "others loosely affiliated with the abortion industry", whatever ones views on the subject may be...this guy does, and has done so in the past. (For the record, Horsley claims that no one that he listed was ever whacked. The people who were killed were added to his page after the fact.)

And as for the story of the burning woman, you're the only one around here who thinks that the picture is real. I'm the only guy around here (or so it would seem) that actually bothered to check the story out. Which, of course, you should have done. The fact that you just swallowed Horsley's line is disturbing. Here's what you missed, what Horsley intentionally left out, and what I've found:

http://www.gazette.net/200445/greenbelt/news/243953-1.html

"The victim's husband, who asked that neither his name or his wife's name be used, said this has been extremely difficult for the family. "She was my best friend, my companion, and now she's gone," he said emotionally. "She struggled with mental illness all of her life, and she lost."

"Kenneth Blaska said he was sorry his neighbor had to die this way. "She had told me once that as long as she took her medicine she was all right, but I assumed she had gone off the medicine when this happened," he said.""

"A Metropolitan Family Planning Center nurse with the office of A.M. Gohari insisted to a Gazette reporter Monday that the incident never occurred on the property. "If it happened here, [there] would have to be police marks on the ground," she said."

"Blaska said he didn't think this was a pro-life act, and he could not imagine his neighbor hurting herself to make an abortion statement. "I felt that she was a very liberal person, and I was quite surprised that she had done that," he said."

And from

http://www.inform.umd.edu/News/Diamondback/archives/2004/11/01/news1.html

"Berwyn Heights Police Cpl. R. T. Hartnett, who was leading the investigation, said this is not the first time the woman had attempted a similar protest and said she had a long history of illness.

Other news outlets reported police found another can of gasoline and an envelope marked "Kerry" inside the woman's car and speculated it could have been addressed to pro-choice Democratic presidential candidate Sen. John Kerry. Hartnett could only confirm, however, the car contained a suicide note that "included views about abortion." "

Well...it seems that you guys have an odd penchant for selecting the mentally ill and morally bankrupt for your spokespersons.

> Anyway, I felt there were some (? a few) who
> would be interested in knowing Neal's "justification" for presenting
> that bit of porn on his site.

You're implying that I didn't give his motiviation; I -clearly- did. It's biblical. It's also extraordinarily fringe. Name a church that has a photo hanging in the foyer of two men butt-humping.

Alright, a church -outside- of California.

As a former Christian, I think he went too far. And as someone who knows LOTS of current Christians, I'm betting that they think he's gone too far as well. His website doesn't have the "positive" effect that he wants it to, and it's because he comes across as an idiot. And judging by his lousy photoshop skills and omissions of fact in his "reporting", he's a dishonest idiot. That's no way to convince anyone of anything. Furthermore, he's preaching to the choir. Christians, at least the ones I know, don't need to be told about abortions or gay sex. IMO This guy fills some other need of his by posting these things. I'll also remind you that he went out of his way to look for some of the stuff that he had on the old Nuremberg Files web page, gay sex and all. I'd love to see the cache on his machine. I'd also like to know why he isn't shooting doctors himself, torching clinics himself and what not.

Or maybe he is? Do you approve?

> It portrays ACTUAL acts that are ACTUALLY
> "protected" by our so-called justice system

Ah, that would be the justice system that protects people that do things that you don't like. Damn those founding fathers for not making this the theocracy that so many want! Of course, the fact that they didn't come right out and do that ought to make some people stop and wonder why not, but I suspect that's asking a bit much.

> and many of our politicians
> - not to mention those in both places / positions who willingly
> participate in such wicked acts.

You should be more careful using words like "positions" and "wicked acts" in the same sentence. Things happen.

They are, of course, legal acts. Sort of like publishing the names and home addresses of people you don't like, and then crossing out their names when someone out there who agrees with you murders them, or graying out the names if they were only wounded. Rights cut both ways. It's legal, I suppose, to advocate the murder of a group of individuals. It's also legal for men to ball each other in the ass, and to have abortions up to a certain time. Live with it, or try to change it in a legal fashion.

> It kind of reminds me of the

Well. And here I thought that I'd managed to distance myself from anyone who actually believed that the Protocols was an authentic document. Why is it that anti-semitism and Christianity go hand in hand? Never mind. I already know the answer to that one.

By the way, top posters are the real evil in the world. ;)

> with 'cable access' at that point.

HOWARD,

Now there is an Idea. While the House is being 'built' have the
Contractor install the Shack's:

1. Ground System two One Inch by Ten Foot Copper Pipes layed
flat-horizontally at the Bottom of the Foundation Footing joined
with a "T" Connector and a Vertical Copper Pipe up to the Shack
with a Wall Access Panel for the Ground Hook-Ups.

2. A 'separate' AC Power Circuit just for your Radio Equipment
with two Four Plug AC Outlet Boxes 5'-8' apart. Install Ferrite

Beads on each of the three wires feeding each of the Outlet Boxes.

3. A Two Inch Metal Conduit in the Walls to route your Antenna
Feed-in-Lines from the Roof or under the Eaves down to your Shack.
Have the Metal Conduit 'bonded' to the Shack's Ground System; and
have a Wall Access Panel for the Feed-in-Lines.

Hey this sounds like a House built around a Shack :o)

another crazy idea - that all folks ~ RHF
.
.

I wouldn't worry about the troll. He'll be whining for the next 40 years until a Democrat is finally in the oval office. Each election will be stolen, too, just ask him. :)

It's not a surprise to see this Harvey dipshit spamming a shortwave newsgroup with political propaganda. It surely shows how credible anything posted by him really is. Imagine if we started posting medical questions/advice/gripes/conspiracies in an mp3 group. We could complain that we heard a reference to medicine in an .mp3 we listened to and then spam the group for years on end. After many years, we can just use our lengthy time of spamming as a testiment to our right to spam.

2 Watt FM Stereo Broadcast 88-108 MHz LCD Digital PLL Transmitter

Auction ends in 1 hour!

Ebay item #: 5730774971

Ends Nov-14-04 19:13:56 PST

My Ebay Feedback rating is 100% positive.

Ebay user ID: righteous-jude

Direct link:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4675&item=5730774971

This transmitter is an assembled and tested unit -- not a kit.

This FM Stereo transmitter is well-known among Ebayer's as being the best transmitter you can get for the money. You'd have to buy a commercial brand FM exciter (such as a Harris) to exceed the specs of this unit. On virtually all FM receivers you would not hear the difference.

You could hook up and transmit any sound source you want, such as:

1. The sound output directly from your computer (to play MP3's) using iTunes or any software you like.

2. Directly connect an iPod, CD Player, tape deck, an XM Satellite Radio etc. right to the transmitter.

3. Use a professional mixer board if you want to "DJ" live. A decent Behringer UB802 Mixer is only $49. Then you could mix and cross fade between two different stereo sources LIVE. Add a decent microphone ($19) so you can talk and people won't know you aren't a commercial station until they realize "Hey, why aren't there any advertisements?"

This FM transmitter is DIGITAL (not analog) and can equal the sound of commercial FM stations. It can transmit anywhere between 88-108 MHz. It outperforms ANY of the Ramsey or other so-called "kit" transmitters, including the "export" version of the FM-100B which Ramsey sells for $429.99 - which is WAY more than the cost of the transmitter I'm selling.

Depending on the quality of the antenna you connect to it* (see "NOTE" section below) and how high up in the air it is, it is possible to get about a 1.5 mile range using a simple homemade outdoor wire antenna, or over 5 miles of range with a $70 pre-made omni directional roof-mounted antenna.

This transmitter has a filtered RF output which means it puts out a clean signal. RF filtering is important to avoid interfering with other FM stations, or if you intend to add an RF Power Amplifier* to increase your range. Most other low cost FM transmitters have bad RF harmonic suppression which means they cause a lot of interference to TV's and radios in your neighborhood, which will attract attention to you from people like Cable TV technicians (something you definitely want to avoid).

For the technical stuff:

This transmitter uses 16-bit Direct Digital Synthesis (D.D.S.) modulation of PLL carrier using 16-Bit digital oversampling, just like the Harris and other Digital-type professional FM Exciters do.

This transmitter is a new design and DOES NOT use the "BA" or "Rohm" analog chip - ANYWHERE IN IT AT ALL. Which is a good thing.

The heart of the transmitting circuit uses a DSC (Digital Signal Controller). This is a 16 bit DSP microcontroller with on-chip Flash, RAM, A/Ds, PWM, and 200k of EEPROM.

D.D.S. modulation technology is used to generate and modulate the carrier signal of higher quality FM Broadcast exciters.

I can't reveal the complete design, but the heart of it uses a Cypress Semiconductor DSC.

A Motorola-designed Class-A linear wide-band amp module (originally designed for use by cable-company operators as line transmission amplifiers) results in virtually no unwanted spurious harmonic output, high reliability and EXTREME SWR ruggedness. The RF output of this transmitter will withstand greater than a 30:1 SWR mismatch without failure. Which means if your antenna shorts-out or dies, this transmitter will not fail.

The transmitter has a LCD digital display, an on-screen menu system with two buttons for adjusting operating parameters such as transmitting frequency, modulation level, MPX pilot level, etc. It can transmit in mono or stereo and runs on 12-24 volts DC input.

Here are the specifications for this transmitter (from the manufacturer):

Transmission Frequency: Adjustable between 87-108 MHz
Tuning Steps: 10 kHz
RF Power Output*: Typ 1Watt @ 13V or 2 Watts @ 24V
Spurious RF Emissions: Better than -45 dB ref. to carrier
Frequency Stability: PLL Typ +/-1KHz
SWR Ruggedness: Withstands 30:1 SWR mismatch
RF Output Connector: BNC type
Audio Input Sensitivity: 0.8V rms for +/- 75 KHz deviation
Signal To Noise Ratio: 60 dBu
Frequency Response: Flat from 20 Hz to 15 KHz
Stereo Separation: >40 dB
Pre-emphasis: 75 uS (standard FCC spec for U.S. FM radio)
Audio Distortion: Better than 0.2 % THD

Audio Input Connectors: RCA Phono Jacks
Power Jack: Coaxial type, 5.5mm O.D. 2.1mm I.D. center positive
DC Power Input: 12 to 24 Vdc Regulated 600mA

I won't list all the details here, you can learn them all by going to http://www.Ebay.com and entering item # 5730774971 using Ebay's "Search" Feature.

This item will be available for only 1 more hour:
auction ends Nov-14-04 19:13:56 PST

"Yeah, OK all that stuff is great, but how can I tell how good this transmitter will sound before I buy it?"

The Ebay auction listing gives instructions for downloading MP3 sound files of recordings made of the FM transmitter signal received live, on-the-air. You can judge for yourself.

** Please read the section of the auction explaining how I got the best sound quality from this transmitter, and how the live off-the-air MP3 recordings were made. **

*NOTE: If you are concerned about gov't compliance regarding the unlicensed use of this transmitter within the United States (or elsewhere), an "RF Attenuator" (also known as a T-pad) may be attached to the output of this transmitter. This is a simple screw-on device which will reduce the transmitter's RF output power to a level within the guidelines mandated by the country in which you intend to operate this transmitter. Guidelines vary from country to country. In the U.S. unlicensed operation of this transmitter is permitted under the mandate of the FCC's guidelines for "Unlicensed Operation of Part 15 Transmitters", provided you do not exceed certain restrictions such as RF output level or type of antenna. Compliance guidelines may be viewed at:

www.fcc.gov/mb/audio/lowpwr.html

Really! Round here, they ask for name and phone number and you talk to the producer or asst producer before you're on the air. They then introduce (first and last name) you like you're a guest. Makes you feel quite famous for an instant. This varies a bit if the talk show is national or local, or whether CBC or commercial station, but generally holds. I'm learning lots about looseness of standards south of one border where I live (Cda) and north of the other (Mx).

Find a definition for "fascist" that doesn't apply to Bush.

<crickets>

"THE PEOPLE HAVE SPOKEN..

THEY say that in life you get what you deserve. Well, today America has deservedly got a lawless cowboy to lead them further into carnage and isolation and the unreserved contempt of most of the rest of the world.

This once-great country has pulled up its drawbridge for another four years and stuck a finger up to the billions of us forced to share the same air.
And in doing so, it has shown itself to be a fearful, backward- looking and very small nation.

This should have been the day when Americans finally answered their critics by raising their eyes from their own sidewalks and looking outward towards the rest of humanity. And for a few hours early yesterday, when the exit polls predicted a John Kerry victory, it seemed they had. But then the horrible, inevitable truth hit home. They had somehow managed to re-elect the most devious, blinkered and reckless leader ever put before them. The

Yellow Rogue of Texas. A self-serving, dim-witted, draft-dodging, gung-ho little rich boy, whose idea of courage is to yell: "I feel good," as he unleashes an awesome fury which slaughters 100,000 innocents for no other reason than greed and vanity.

A dangerous chameleon, his charming exterior provides cover for a power-crazed clique of Doctor Strangeloves whose goal is to increase America's grip on the world's economies and natural resources. And in foolishly backing him, Americans have given the go-ahead for more unilateral pre-emptive strikes, more world instability and most probably another 9/11. Why else do you think bin Laden was so happy to scare them to the polls, then made no attempt to scupper the outcome? There's only one headline in town today, folks: "It Was Osama Wot Won It." And soon he'll expect pay-back. Well, he can't allow Bush to have his folks whoopin' and a-hollerin' without his own getting a share of the fun, can he? Heck, guys, I hope you're feeling proud today.

To the tens of millions who voted for John Kerry, my commiserations. To the overwhelming majority of you who didn't, I simply ask: Have you learnt nothing? Do you despise your own image that much? Do you care so little about the world beyond your shores? How could you do this to yourselves?
How appalling must one man's record at home and abroad be for you to reject him?

Kerry wasn't the best presidential candidate the Democrats have ever fielded (and he did deserve a kicking for that "reporting for doo-dee" moment), but at least he understood the complexity of the world outside America, and domestic disgraces like the 45 million of his fellow citizens without health cover. He would have done something to make that country fairer and re-connected it with the wider world. Instead America chose a man without morals or vision. An economic incompetent who inherited a $2 billion surplus from Clinton, gave it in tax cuts to the rich and turned the US into the world's largest debtor nation. A man who sneers at the rights of other nations. Who has withdrawn from international treaties on the environment and chemical weapons. A man who flattens sovereign states then hands the rebuilding contracts to his own billionaire party backers. A man who promotes trade protectionism and backs an Israeli government which continually flouts UN resolutions.

America has chosen a menacingly immature buffoon who likened the pursuit of the 9/11 terrorists to a Wild West, Wanted Dead or Alive man-hunt and, during the Afghanistan war, kept a baseball scorecard in his drawer, notching up hits when news came through of enemy deaths.

A Radical Christian fanatic who decided the world was made up of the forces of good and evil, who invented a war on terror, and thus as author of it, believed he had the right to set the rules of engagement. Which translates to telling his troops to do what the hell they want to the bad guys. As he has at Guantanamo, Abu Ghraib and countless towns across Iraq.

You have to feel sorry for the millions of Yanks in the big cities like New York, Washington, Boston, Chicago, Los Angeles and San Francisco who voted to kick him out. These are the sophisticated side of the electorate who recognise a gibbon when they see one.

As for the ones who put him in, across the Bible Belt and the South, us outsiders can only feel pity.

Were I a Kerry voter, though, I'd feel deep anger, not only at them returning Bush to power, but for allowing the outside world to lump us all into the same category of moronic muppets. The self- righteous, gun-totin', military lovin', sister marryin', abortion-hatin', gay-loathin', foreigner-despisin', non-passport ownin' red-necks, who believe God gave America the biggest dick in the world so it could urinate on the rest of us and make their land "free and strong".

You probably won't be surprised to learn of would-be Oklahoma Republican Senator Tom Coburn who, on Tuesday, promised to ban abortion and execute any doctors who carried them out. He also told voters that lesbianism is so rampant in the state's schools that girls were being sent to toilets on their own. Not that any principal could be found to back him up. These are the people who hijack the word patriot and liken compassion to child-molesting. And they are unknowingly bin Laden's chief recruiting officers.

Al-Qaeda's existence is fuelled by the outpourings of America's Christian right. Bush is its commander-in-chief. And he and bin Laden need each other to survive. Both need to play Lex Luther to each others' Superman with their own fanatical people. Maybe that's why the mightiest military machine ever assembled has failed to catch the world's most wanted man.

Or is the reason simply that America is incompetent? That behind the bluff they are frightened and clueless, which is why they've stayed with the devil they know.

Visitors from another planet watching this election would surely not credit the amateurism. The queues for hours to register a tick; the 17,000 lawyers needed to ensure there was no cheating; the $1.2bn wasted by parties trying to discredit the enemy; the allegations of fraud, intimidation and dirty tricks; the exit polls which were so wildly inaccurate; an Electoral College voting system that makes the Eurovision Song Contest look like a beacon of democracy and efficiency; and the delays and the legal wrangles in announcing the victor.

Yet America would have us believe theirs is the finest democracy in the world. Well, that fine democracy has got the man it deserved. George W Bush.

But is America safer today without Kerry in charge? A man who overnight would have given back to the UN some credibility and authority. Who would have worked out the best way to undo the Iraq mess without fear of losing face.

Instead, the questions facing America today are - how many more thousands of their sons will die as Iraq descends into a new Vietnam? And how many more Vietnams are on the horizon now they have given Bush the mandate to go after Iran, Syria, North Korea or Cuba...?

Today is a sad day for the world, but it's even sadder for the millions of intelligent Americans embarrassed by a gung-ho leader and backed by a banal electorate, half of whom still believe Saddam Hussein was behind 9/11.

Yanks had the chance to show the world a better way this week, instead they made a thuggish cowboy ride off into the sunset bathed in glory. And in doing so it brought Armageddon that little bit closer and re-christened their beloved nation The Home Of The Knave and the Land Of The reak.

God Help America.

The pressure on the US dollar is a balance of trade issue (spending more on imports than producing in exports). The Iraq war is part of the problem. Dunces for leaders around the world is another part.

Re English, it's number 3 in the world for native speakers after Hindi (2) and Mandarin (3) - so sayeth the National Geographic. Number 1 for the second language of people around the world. Spanish and Arabic round out the top 5, forget the order.

Must be you're posting tongue-in-cheek for part of this. USA culture and products are showing up everywhere. I mean everywhere. Show me somewhere where you can't buy a Coca-cola, or see Microsoft windo$e on a confuser, or watch reruns of frickin' Dallas and the Simpsons (they are really funny in German and Chinese - seen some tapes).

But I do think the big war will be about economics in the 21st century. And the really serious fight over scarce resources (like oil, water). Once the Euro has beaten down the US dollar, then the only way out will be the usual "extension of diplomacy". Once the Islamic threat is gone, we'll all compete to trade with the Chinese and Indians, then borders between Europe and the western hemisphere will solidify, and bing bang boom. Well, it could be a futuristic novel anyway. Maybe a radio play.

You know, with sufficient relay stations, SW can be heard clearly anywhere in the world. The big guys such as DW and BBC had relays that allowed them to cover most of North America with great signals. VOA used to have relays around the world that allowed them to penetrate even the noisiest conditions, including the massive jamming operations of the Soviet Bloc. Sure, it's not FM stereo, but stereo sound is necessary only if you're listening to music. Unfortunately, the moguls and managers who run many radio operations today are focused on music and not the news and features that have been SW staples. VOA is being shut down in favor of FM stations that carry American music, such as Radio Sawa, which is broadcast mostly on local FM stations in the Middle East. I remember reading a quote in an article on Sawa that said it best: liking American music doesn't mean you like America. But the US government seems to think otherwise. When the USSR fell, we learned that the Soviet people wanted the news and information their own government denied them, not rock music. Why should we think that people in the Middle East, where most "news" is of the "non Muslims are evil and must be killed, see this?" variety, are any different?

> Internet and satellite broadcasting are where it's at these days. SW
> broadcasting's days are numbered. We need to enjoy them while we can.

Internet broadcasting has one BIG problem, and that's bandwidth. I've tried listening to streaming web radio for prolonged periods of time on a 56k dialup connection, and the result is always the same-a gradual degradation of signal quality due to "net congestion" that ends up with the signal sounding mostly like BBs rattling around in a soup can. I later learned that the rattling was a placeholder the program put wherever the packets didn't make it, and after a while a LOT of packets get dropped. As for satellite, as far as I know you have to subscribe to it to get it, which leaves the people who can't pay the fees out of

luck. Did you know that half of humanity lives on less than $1 a day?
How do you expect them to pay for satellite radio, even if they want to
listen to every concievable style of American music there is?

You don't need a long wire for listening. One a fairly small fraction of a wavelength is probably adequate. If the noise level drops when you disconnect the antenna, it's long enough, and making it longer or adding gadgets to it won't help a bit.

A number of the people posting on this thread are thinking of the requirements for an efficient antenna. Efficiency is important when transmitting, but of almost no importance for receiving. The antenna just has to be efficient enough to deliver more atmospheric noise than you have internal receiver noise. Any more makes no improvement.

Good point...it does allow weaker stations to be heard, which is a
good thing.

Broadcasters will come and go, whether they broadcast over shortwave
or any other medium. I for one see no grounds for pessimism here.

Sometimes I have the sense that when people talk about the "future of
shortwave", what they really mean is the future of whatever large
broadcast stations they listen to on a regular basis--not the future
of the shortwave bands themselves. I see some reasons to be
pessimistic about (some of) the former (depending on their goals and
program content). I see no reason to be pessimistic about the latter.

>
The US turn over of Vietnam to the French after WW2 played right into the communist hands. The ridiculous pillage post-Spanish domination of Cuba was like exchanging one thug for another. Castro isn't exactly my cup of tea, but neither are the loony "exiles" in Florida. We also had Pinochet in Chile, the Shah regime handed over from the British and supported by the US, and presently the prop-up of the fascist Saudi regime; all in the interest of making a buck. I saw a list somewhere of "intervention" by the US militarily, it was around 150 times during the period the Soviets did it 8 times. 735 military bases around the world must help as jumping off points for this sort of "adventure". I'm sure the 19th century Brits and French in the Great Game would have understood the present adventures well.

"Capitalism and communism are both the bastard children of Christianity", (Jostein Gaarder). None show the way to heaven, on earth, nor anywhere else. if we could get it through our and our leaders' thick stupid head that all people want is to have a decent life, we wouldn't breed nitwits who want to screw everyone economically or by shoving their narrow-minded doctrine down our throats with the barrel of a gun or with the blast of a bomb from 30 thousand feet or in a rusted out car.

You can get DW in English still but not directed to N America. Rebroadcast late at night, only catch it if having insomnia.

Or people who like to get several points of view on world affairs.

Or people who enjoy listening to various kinds of music.

Or people who like listening to military or utility stations

The list goes on and on......

Either an SX-110 or SX-111 Neither was battery operable as the show
portrayed it to be..
The jail transmitter was an Eico 720 (CW only) that had a mic plugged into
the key jack. Sitting atop the 720 was an Eico CB transceiver. Prior to that
there was a Motorola rig in the jail.

Ok, say that the government subsidizes it. What happens to all the TV
sets that are now worthless because channels 2-5 don't work? What
happens to major stations in the biggest markets in the nation who find
that they are now unwatchable because BPL is screwing with their
signals? Does the government buy everybody a brand new $2000 digital TV?
If there's one thing Americans are passionate about, it's TV. Does the
govt simply say "tough shit" to everybody with a now worthless TV?

Keep looking on the web. For most programs you'll need latitude and longitude, sometimes altitude as well or so I've heard. I'm at sea level basically, so that was never an issue for me. You'll also need to download orbit info on occasion, so whatever program you pick probably isn't going to be accurate "right out of the box". Satellite orbits degrade and/or are adjusted, and you'll have to download the new info. (They're called elements, or element sets...elsets for short.) It's easy enough; just something you need to be aware of. There are also elements for shuttle flights (SST), etc. and for obvious reasons you'll need to download elements after each launch. I've seen the shuttle go overhead, which is a pretty rare occurrence considering the part of the world that I live in. (Seattle.) Very cool, and worth the effort. If you really get into this sort of thing, you'll also want to keep an eye out for Iridium flares. Exceptionally cool!

Damn. All of this reminiscing makes me wish I'd moved -out- of the city. <sigh> I've seen some neat things up there!

Oh, hell...I'll look those Iridium flares up right now.......and here we go:

http://satobs.org/iridium.html

The photos are neat, but they can't do justice to the real thing. I was out on the Puget Sound heading back to the harbor with my brother in law at the helm late one dark night when I saw one overhead. Too breathtaking for words. By the time I could point it out it was gone, and I knew I wouldn't have been able to describe how magnificent it was...so I kept it to myself. They're that neat.

And since I'm in a Googling mood, this will help the novice (and expert) satellite observer:

http://satobs.org/seesat/seesatindex.html

Odd, isn't it? Most "Americans" are funding this stuff every time they concede money to the government in the form of the tax dollar. It's bizarre how few ever question where that money goes or why it should be taken in the first place when the Forefathers of this nation went to the extreme of dumping tea into Boston harbour because they were mad about taxation. What happened to that sort of American?

The other guy wants to talk about coups. Hehe; what sort of government does he actually think he's living under? "America" has been dead for quite some time, but most people are too brain-dead, manipulated or transformed by greed to see it. Ironically, the individual most responsible, at least visually, can be seen on a coin that nearly every American carries in pocket at any given time. Let's all go wave our flags now...

I'll tell everybody what I honestly see happening to shortwave. There will be 4-5 Big Boys, major stations that broadcast in every major language and can be heard almost anywhere, like Radio China and Radio Netherlands. Then there will be a zillion Little Guys, small regional stations that broadcast only to a relatively local audience and almost none of which will be in English-but in local languages and dialects. This will mean the death of QSLing, since Big Boys will have paid monitors and Little Guys won't have the money or language skills to answer their reception reports. But if you're not a QSL hog, it will mean wonderful opportunities for DX, since a lot of the blowtorch stations that characterized the Cold War will be gone or on the air under different names and reduced power (think Radio Kiev, which is now Ukraine Radio International and is hard to hear, or Radio Tirana, which

used to be infamous for its bizarre rants but is now almost inaudible) opening up opportunities to hear signals that during the Cold War were blanked by the blowtorches. I've never sent for a QSL in my life, so I'm not concerned about reception reports, but I'll be listening for the small Sam Neua station in Laos that Passport talked about in the 2005 edition as long as their transmitter doesn't burn the station down. Most of the world's population can't afford internet access or satellite radio and will not be able to in the foreseeable future. A lot of those people live outside the range of existing AM and FM stations. So shortwave radio will be around for a while, just not in the form that it was during the Cold War.

Brian,

I'm not aligning myself with Al, but one reason we went into Iraq was he taking Euros for oil instead of the dollar.

The funny thing is down here in FL they have news and weather forecasters with heavy spanish accents that are hard to understand. On some stations you don't even see a white person anymore.

It's sad but true. Our jobs are being outsourced and the competition from immigrants are taking the jobs away from Americans that have been here for generations.
Go into a bank down here in FL, and they all have accents. Most are slow and not too bright. But they'll work for $7/Hr instead of $10. I can hardly understand WTF they're telling me.

It will be too late once this country wakes up.
We'll have the Nazi's son, Arnold Schwarzenegger as our next president. The guy that wanted to save California money by reducing the time stray animals have to live before being put down. It didn't go over, but the nazi's son wanted it to be reduced to a few days from a few weeks. Typical coming from a Nazi's son way of thinking about "saving the state"

One day you guys will wake up but there won't be anything you'll be able to do about it.
Yes, let's change the amendment so foreigners can tell us what to do and how to live.

Lucky

How about people too poor to afford internet access and satellite radio,
or people outside the range of AM, FM and TV, or people who live in
repressive regimes where only one point of view is broadcast locally, or
people who are all three?

3005. Re: Help Active Antenna Adivice-(hay joe)

Newsgroup: rec.radio.shortwave
Date: 2004-11-15 04:38:05 UTC
From: analssandrinij@yahoo.com
Message-ID: <104a39cc.0411142038.4dedb05@posting.google.com>
Source record: 3003

Hello Drifter,

Thanks for the nice comment. After contacting Wellbrook and THE SHORTWAVE SHOP I decided to buy the '330S over the '1530 because the '330S is superior on the shortwave bands to which I listen most. I do not often DX on MW (frankly, due to the generally poor quality, in my opinion, of the programming available). I'm told by those sources mentioned that the '1530 has an extended range (down to the LW band) but is somewhat (slightly) less effective on the SW bands. Of course, if you do listen to MW extensively, and if you can mount an active loop antenna outdoors (or higher than I am able), the better positioning might make the '1530 superior overall to my attic-mounted '330S.

It's somewhat a matter of "luck," though I think that I'd still rather have the better SW performance of the '330S. One could always buy another dedicated MW antenna. (I use a C.Crane Justice AM antenna, sometimes in conjunction with a Select-A-Tenna with my Grundig Satellit 800. I keep meaning to use it on the AOR but, except for one quick trial, I haven't really experimented with it.)

I have a crystal 2.2 kHz filter which I had installed at the factory when I ordered my '7030 Plus. My 4.0 filter actually measures 3.5 kHz. The 6.0 filter measures 5.1 kHz on my receiver and this is the filter I use most for program listening when using the Sync circuit. When reception is "tough," I use ECSS tuning with the crystal filter (which makes the signal sound just about the same as straight AM, though with little interference!). That crystal filter is really terrific. From the above, you can see that, at least with my particular receiver, I have no need for a filter "in between" 2.2 and 4 kHz. (I also had the 7.0 kHz filter installed - it measures 6.5 kHz on my receiver - and I also have the 10.0 -measures 9.5 kHz - for narrow band FM.) However, your requirements may be different. Have you called Richard Hillier at AOR UK? I understand that KIWA also installs filters. I have had no experience personally with them, but I understand that they are a good organization. You might wish to call them, though I would still recommend calling AOR UK first. I have been extremely pleased with the service/advice/help I have received from both Richard Hillier at AOR UK and also the personnel at THE SHORTWAVE SHOP.

Hope that helps. The AR7030 Plus is one fantastic receiver, isn't it? One of my friends, upon seeing it (and being extremely impressed with the quality of construction/components both outside and inside - I opened it up for him) and hearing it called it positively the "Rolls-Royce" of radios. I agree with him.

In conjunction with the Wellbrook ALA 330S it offers the finest SW
listening I have ever experienced.

Best,

Joe

> north of the other (Mx).

In America, calls to talk shows are usually "screened" by college students majoring in speech communications who are doing internships at the stations. If you sound coherent, you get asked your first name and city of residence and then get patched through. Sometimes the students guess wrong, and the caller goes crazy on the host, in which case the host switches to a commercial and lets the caller rant until they can get them to hang up. Some hosts hang up on callers as part of their routine, but most are too polite to do that. Hosts are also taught in broadcasting school to make up a false name to use on air so they don't get tracked down and stalked by fans or people they offend, that's how bad the stalking problem is in the US.

And I haven't told you about "social promotion" in education, where students are passed from one grade to the next even if they fail the grade or can't do grade level work just to keep them from backing up the system. When California decided to end social promotion, the mass flunkings that resulted threatened to paralyze the schools, so the

politicians had to back off.

That's right. Bush is hated worldwide, and he wants to force
real Americans to suffer the same fate, even though they do
not support his war crimes. Bush will follow his hero Hitler,
and end up the same way or worse.

Maybe long life lithium batteries sealed inside the radio? I've seen
flashlights built on that principle, and they work and are cheap but
have a limited shelf life. Sounds like the requirements of a radio
you're going to smuggle into a country where there are no batteries.

You really want to know? Track down a copy of the book "Rich Dad's Prophecy" by Robert Kiyosaki. Don't bother reading Part 2 where he tells you how to get rich. Just read Part 1, where he talks mostly about the upcoming collapse of the welfare state in America but has a good section on security vs freedom and what happened to the America that valued freedom.

If FDR hadn't been elected, we would have had a full blown revolution instead of just a coup, and America would be in even worse shape. The Depression put this country in a bad situation: either use the government to feed the starving millions or risk a bloody revolution and civil war.

>Why should ANYONE broadcast in any language that they are attempting to
>phase out?

well, all those foreigners are complaining that us Americans arew only listening to news from American sources and aren't listening to their news sources. (despite the fact that many Americans have and listen to shortwave radios.

If they phase out their English language services, then we Americans will indeed be limited to hearing news only from American sources. Not everyone has a computer. And most people still don't. And a lot can't afford a computer, either.

I first listened to shortwave either in te late 60's or early 70's.

>I once read that Americans are the *least* knowledgable about the rest
>of the world than the other way around.

I think that idea isn't true and that foreigners just think that.

However, it probably will be true for a lot of Americans if the foreigners keep getting rid of their shortwave broadcasts and their English language shortwave broadcasts.

Not everyone has a computer.

And I don't see a lot of people with satellite dishes, either.

And DirectTV had very little foreign originated stuff.

>You most definitely don't need a synchronous detector for SSB reception;
Actually you are taking that out of context. Synchronous detection is
useful only for AM, and a Regen cannot deal with selective fading any
better than a standard envelope detector can.

The fact is however, that synch detection is unavailable on a regen,
because you need to phase lock to the original carrier. In theory a
Regen can handle SSB, in practice it cannot due to lack of a stable
carrier, lack of a product detector, and inadquate sensitivity. YOu
can get SSB without a product detector, as long as the injected
carrier is very large relative to the SSB signal so the envelope
detector is operating in a linear part of the V/I cure. NB fm can be
slope detected, standard FM cannot, it is much too wide for slope
detection work. NB FM is mathematically the same as AM with a low
modulation index.

Synch detection isn't much good for FM.

not only the callers. Years ago, I once heard a talk radio show (either on regular AM or FM. I think AM) that had a guest on that claimed that travelling through time into the past and future was already done by the government.

I think he also claimed that he travelled through time himself, also.

Although I dopn't quite remember if he claimed he did also or not.

around here, the radio stations even introduce people (the callers) by only nicknames (similar to Usenet), but they did that here even back in the 70's and 80's before most people had Usenet, and recently, also.

Some names when te DJ's introduced the callers:

"The Call Girl".

"Howard Belcher"

"The Swami"

There's more, but I can't remember them right now. Time for me to get out my old audiotapes.

I Smell a Rat
BY COLIN SHEA
POLITICS | 11.11.2004

I smell a rat. It has that distinctive and all-too-familiar odor of the species Republicanus floridius. We got a nasty bite from this pest four years ago and never quite recovered. Symptoms of a long-term infection are becoming distressingly apparent.

The first sign of the rat was on election night. The jubilation of early exit polling had given way to rising anxiety as states fell one by one to the Red Tide. It was getting late in the smoky cellar of a Prague sports bar where a crowd of expats had gathered. We had been hoping to go home to bed early, confident of victory. Those hopes had evaporated in a flurry of early precinct reports from Florida and Ohio.

By 3 AM, conversation had died and we were grimly sipping beers and watching as those two key states seemed to be slipping further and further to crimson. Suddenly, a friend who had left two hours earlier rushed in and handed us a printout.

"Zogby's calling it for Kerry." He smacked the sheet decisively. "Definitely. He's got both Florida and Ohio in the Kerry column. Kerry only needs one." Satisfied, we went to bed, confident we would wake with the world a better place. Victory was at hand.

The morning told a different story, of course. No Florida victory for Kerry--Bush had a decisive margin of nearly 400,000 votes. Ohio was not even close enough for Kerry to demand that all the votes be counted. The pollsters had been dead wrong, Bush had four more years and a powerful mandate. Onward Christian soldiers--next stop, Tehran.

Lies, damn lies, and statistics

I work with statistics and polling data every day. Something rubbed me the wrong way. I checked the exit polls for Florida--all wrong. CNN's results indicated a Kerry win: turnout matched voter registration, and independents had broken 59% to 41% for Kerry.

Polling is an imprecise science. Yet its very imprecision is itself quantifiable and follows regular patterns. Differences between actual results and those expected from polling data must be explainable by identifiable factors if the polling sample is robust enough. With almost 3.000 respondents in Florida alone, the CNN poll sample was pretty robust.

The first signs of the rat were identified by Kathy Dopp, who conducted a simple analysis of voter registrations by party in Florida and compared them to presidential vote results. Basically she multiplied the total votes cast in a county by the percentage of voters registered Republican: this gave an expected Republican vote. She then compared this to the actual result.

Her analysis is startling. Certain counties voted for Bush far in excess of what one would expect based on the share of Republican registrations in that county. They key phrase is "certain counties"--there is extraordinary variance between individual counties. Most counties fall more or less in line with what one would expect based on the share of Republican registrations, but some differ wildly.

How to explain this incredible variance? Dopp found one over-riding factor: whether the county used electronic touch-screen voting, or paper ballots which were optically scanned into a computer. All of those with touch-screen voting had results relatively in line with her expected results, while all of those with extreme variance were in counties with optical scanning.

ï¿½The intimation, clearly, is fraud. Ballots are scanned; results are fed into precinct computers; these are sent to a county-wide database, whose results are fed into the statewide electoral totals. At any point after physical ballots become databases, the system is vulnerable to external hackers.

It seemed too easy, and Dopp's method seemed simplistic. I re-ran the results using CNN's exit polling data. In each county, I took the number of registrations and assigned correctional factors based on the CNN poll to predict turnout among Republicans, Democrats, and independents. I then used the vote shares from the polls to predict a likely number of Republican votes per county. I compared this ï¿½expected' Republican vote to the actual Republican vote.

The results are shocking. Overall, Bush received 2% fewer votes in counties with electronic touch-screen voting than expected. In counties with optical scanning, he received 16% more. This 16% would not be strange if it were spread across counties more or less evenly. It is not. In 11 different counties, the ï¿½actual' Bush vote was at least twice higher than the expected vote. 13 counties had Bush vote tallies 50--100% higher than expected. In one county where 88% of voters are registered Democrats, Bush got nearly two thirds of the vote--three times more than predicted by my model.

Again, polling can be wrong. It is difficult to believe it can be that wrong. Fortunately, however, we can test how wrong it would have to be to give the ï¿½actual' result.

I tested two alternative scenarios to see how wrong CNN would have to have been to explain the election result. In the first, I assumed they had been wildly off the mark in the turnout figures--i.e. far more Republicans and independents had come out than Democrats. In the second I assumed the voting shares were completely wrong, and that the Republicans had been able to massively poach voters from the Democrat base.

In the first scenario, I assumed 90% of Republicans and independents voted, and the remaining ballots were cast by Democrats. This explains the result in counties with optical scanning to within 5%. However, in this scenario Democratic turnout would have been only 51% in the optical scanning counties--barely exceeding half of Republican turnout. It also does not solve the enormous problems in individual counties. 7 counties in this scenario still have actual vote tallies for Bush that are at least 100% higher than predicted by the model--an extremely unlikely result.

In the second scenario I assumed that Bush had actually got 100% of the vote from Republicans and 50% from independents (versus CNN polling results which were 93% and 41% respectively). If this gave enough votes for Bush to explain the county's results, I left the amount of Democratic registered voters ballots cast for Bush as they were predicted by CNN (14% voted for Bush). If this did not explain the result, I calculated how many Democrats would have to vote for Bush.

In 41 of 52 counties, this did not explain the result and Bush must have gotten more than CNN's predicted 14% of Democratic ballots--not an unreasonable assumption by itself. However, in 21 counties more than 50% of Democratic votes would have to have defected to Bush to account for the county result--in four counties, at least 70% would have been required. These results are absurdly unlikely.

The second rat

A previously undiscovered species of rat, Republicanus cuyahogus, has been found in Ohio. Before the election, I wrote snide letters to a state legislator for Cuyahoga county who, according to media reports, was preparing an army of enforcers to keep ï¿½suspect' (read: minority) voters away from the polls. One of his assistants wrote me back very pleasant mails to the effect that they had no intention of trying to suppress voter turnout, and in fact only wanted to encourage people to vote.

They did their job too well. According to the official statistics for Cuyahoga county, a number of precincts had voter turnout well above the national average: in fact, turnout was well over 100% of registered voters, and in several cases well above the total number of

people who have lived in the precinct in the last century or so.

In 30 precincts, more ballots were cast than voters were registered in the county. According to county regulations, voters must cast their ballot in the precinct in which they are registered. Yet in these thirty precincts, nearly 100.000 more people voted than are registered to vote -- this out of a total of 251.946 registrations. These are not marginal differences--this is a 39% over-vote. In some precincts the over-vote was well over 100%. One precinct with 558 registered voters cast nearly 9,000 ballots. As one astute observer noted, it's the ballot-box equivalent of Jesus' miracle of the fishes. Bush being such a man of God, perhaps we should not be surprised.

What to do?

This is not an idle statistical exercise. Either the raw data from two critical battleground states is completely erroneous, or something has gone horribly awry in our electoral system--again. Like many Americans, I was dissatisfied with and suspicious of the way the Florida recount was resolved in 2000. But at the same time, I was convinced of one thing: we must let the system work, and accept its result, no matter how unjust it might appear.

With this acceptance, we placed our implicit faith in the Bush Administration that it would not abuse its position: that it would recognize its fragile mandate for what it was, respect the will of the majority of people who voted against them, and move to build consensus wherever possible and effect change cautiously when needed. Above all, we believed that both Democrats and Republicans would recognize the over-riding importance of revitalizing the integrity of the electoral system and healing the bruised faith of both constituencies.

This faith has been shattered. Bush has not led the nation to unity, but ruled through fear and division. Dishonesty and deceit in areas critical to the public interest have been the hallmark of his Administration. I state this not to throw gratuitous insults, but to place the Florida and Ohio electoral results in their proper context. For the GOP to claim now that we must take anything on faith, let alone astonishingly suspicious results in a hard-fought and extraordinarily bitter election, is pure fantasy. It does not even merit discussion.

The facts as I see them now defy all logical explanations save one--massive and systematic vote fraud. We cannot accept the result of the 2004 presidential election as legitimate until these discrepancies are rigorously and completely explained. From the Valerie Plame case to the horrors of Abu Ghraib, George Bush has been reluctant to seek answers and assign accountability when it does not suit his purposes. But this is one time when no American should accept not getting a straight answer. Until then, George Bush is still, and will remain, the ï¿½Accidental President' of 2000. One of his many enduring and shameful legacies will be that of seizing power through two

illegitimate elections conducted on his brother's watch, and engineering a fundamental corruption at the very heart of the greatest democracy the world has known. We must not permit this to happen again.

You get "net congestion" even with *broadband*? I was listening on dialup and the "net congestion" would cause the broadcast to cut out abruptly and unpredictably. SW may fade, but it doesn't stop in midsentence as web radio does. And then there's the signal degradation, which eventually results in so many missed packets that the broadcast becomes nearly impossible to listen to. Add in the fact that most of the world's population doesn't even have a computer much less net access and web radio has a long way to go before it can be viable. Apparently the morons at DW and BBC haven't figured that out yet.

not quite. Later this month, TBS is showing the new weekly reality tv series
"The Real Gilligan's Island"

I never thought I'd use the term "reality" in conjunction with "Gilligan's
Island".

>how about the shortwave radio on one of the Andy Griffith shows.

I recently watched some episodes on my dvd set of "The Munsters".

There's one where Herman gets a ham radio and license.

The thing is their was kids walkie talkies transmitting on the same frequency
as the ham radio in this episode.

Was this a goof in the erpisode, or did some kids walkie talkies actually use
certain ham radio frequencies back in the 60's (although at much lower power,
of course).

The oldest kids walkie talkies that I remember used 49 MHz.

However, I didn't have one of those until the 70's as far as I remember.

The ham radio on "The Munsters" was definitely shortwave as Herman was talking to people in other countries on it, including someone from Australia, halfway around the world.

Sadly, you may be very wrong.

==========
When more than 300 young Americans in the survey were shown a blank
world map and asked to indicate the location of the United States,
only 89 percent could do so.
Other findings from the survey:

* 34 percent of the young Americans knew that the island used on
last season's "Survivor" show was located in the South Pacific, but
only 30 percent could locate the state of New Jersey on a map. The
"Survivor" show's location was the Marquesas Islands in the eastern
South Pacific.
* When asked to find 10 specific states on a map of the United
States, only California and Texas could be located by a large majority
of those surveyed. Both states were correctly located by 89 percent of
the participants. Only 51 percent could find New York, the third most
populous state.
* On a world map, Americans could find on average only seven of
16 countries in the quiz. Swedes could find an average of 13 of the 16
countries.
* Only 71 percent of the surveyed Americans could locate the
Pacific Ocean, the world's largest body of water. Worldwide, three in
10 of those surveyed could not correctly locate the Pacific Ocean.
* Although 81 percent of the surveyed Americans knew that the
Middle East is the Earth's largest oil exporter, only 24 percent could
find Saudi Arabia on the map.

November 1986. I was just turning 12 (November 27) and Boy's Life-a
magazine for Boy Scouts-had an article on SW broadcasting and how you
could hear stations from around the world. The idea gripped me, and soon
I was bugging my parents for a SW radio. Problem is, they were broke,
and the cheapest radio we could find was $150-and of course it was
analog and so on. Finally my mom got in contact with a ham who went to
our church who dug out a Hallicrafters S-40 from his shack and gave it
to me. I'd never seen anything like it-what's a vacuum tube?-and was
utterly fascinated. I would rush home from school every day to listen to
the 31m band. I knew nothing about SW except what the old ham had showed
me, and when I tuned to either side of 31m I heard nothing, so for a
while I just stuck to 9500-10000 khz. But I heard most of the day's
major broadcasters, including the BBC and Radio Moscow.

> >I once read that Americans are the *least* knowledgable about the rest

Heck, even the Americans admit that they're ignorant about world
affairs! Part of the post 9-11 shock and the whole "we're so kind and
helpful, why do they want to kill us?" reaction was due to American
ignorance about what the US govt has done in their name to people around
the world.

> However, it probably will be true for a lot of Americans if the foreigners keep
> getting rid of their shortwave broadcasts and their English language shortwave

I simply can't understand why the suits at DW and BBC are so intent on
cutting their First World directed transmissions. I think they're under
some grand illusions about how people live in reality. VOA I can
understand-it's run by people from FM radioland, and they're focused on
music services like Sawa.

Yes that is true that the fundamental by itself will not produce
harmonics of lower frequency but the fundamental is being modulated by
data so mixed products of variable data transmitted mixing with the
carrier will produce frequency energy above and below the fundamental.
If you have long strings of ones or zeros the mixed frequencies will be
as low as the inverse of the period of low frequency data rates.

I have a 20 foot straight wire in my garage, that works better for MW DXing than the ferrite rods in any radio I have, due to the fact that it is much further from any noise sources in the house. I imagine the 16 foot wire being sold there would pick up some MW, but I doubt that adding the ferrite bar at the end helps one bit.

You would be too, if YOU were on the verge of a great discovery...or,
in this case, UNCOVERY. Nothing to do with sex.

It has to be that, as any sexual drive has been non existent since my
private parts were obliterated in a horrendous Hydrogen Peroxide
explosion at the Peenemunde rocket research centre. I sacrificed
myself and any future progeny in order to shield Von Braun. The rest
is history.

All that notwithstanding, I agree with Bradley B's observation of
'JuLiE-of-the-mystery-chromosome'. Whatever Steve Lare does during his
quiet moments is entirely up to him.

Well with your help I'm back in action. My 5000 has the dreaded keypad bounce so using the computer is great. My new computer doesn't have a serial port, I had to buy a usb serial adapter. Along with your settings I had to uninstall the serial drivers and reinstall them again and all is fine.

I haven't used the radio in quite a while so I was a little rusty.

Thanks again

Comedy television aside, there is an off possibility that Herman's ham equipment could have communicated with kid's walkie talkies. If he had old ham gear, it may have had the 11m ham band (part of which became the 11m Citizens Band) Kid's walkie talkies of that era operated mostly on 27.125 MHz (CB channel 14). There were some fancier ones (and much higher cost) that had up to three channels. These almost always ended up being channels 9, 11, & 14. Some Japanese talkies came stock with channel 9 crystals.. and kids used to catch some hell in the early 70's because channel 9 is an emergency traffic channel.

GG,

Why Thank You :o) Coming from You - "Rat-Fink" is a Badge of Honor !
```

Please feel free to make a copy of every post that I have made to
these NewsGroups and forward it to your local authorities or the FBI.
I can usually expect to get a Letter or a Call 'inviting' Me to come
down to their Office for a 'chat'. But you should realize that they
will also usually do a preliminary background check on you as part
of the 'investigation' process (its what they do).

NOTE: My posting to "Isle Of The Dead" was to dissuade him from
making 'threats' of action here on the NewsGroups; and 'if' he felt
the need for some action to simply "Do The Right Thing" and Act.

As to ME 'being' a Card-Carrying Member of the "Rat-Fink" Society:
Of that I Am guilty, Guilty. GUILTY !

For 32 Years Your Federal Tax Dollars Paid For Me To Be A "RAT-FINK"
[.]

Each and Every US President that was Elected by the American Citizens
{The Voters} was "MY" President. I may not have liked them personally
and may have disagreed with some of their political views or polities.
But to a Man, They Were MY President [.]

Former president Bill Clinton 'fired' Me (I was terminated and choose
retirement during his administration.) which transformer me into "RHF"
{aka: Retired, Healthy and Free !}
- God I 'love' that Man.
- Thank You Bill Clinton for Setting Me FREE !
- Otherwise I would still be "On-the-Job" today.

'Had' John F. Kerry been Elected, he would have been "MY" President.

Can you or any of your "Fellow Travelers" say the same ?

Now that I am "Retired Healthy and Free" (RHF):
- I still LOVE My Country.
- I still HELP a Friend or Neighbor in Need.
- I still CALL 911 when I See Trouble.
- I am still an Old Boy Scout :o)

This Comes to You from the Keyboard of a 'certified' "Rat-Fink".

God Bless America ~ RHF

Gee, that's something to think about, isn't it? I mean ABC, CBS, NBC and FOX aren't in a big panic about BPL, are they? Why the hell should SWLs worry more than the networks?

BPL looks like another Y2K crisis, to me.

>
> I bet it will survive since the FCC is in the pocket of the electricity
and
> power industries.
>

Is that a rhetorical bet or an actual bet? You could drop your entire net worth into the stock of BPL power companies and suppliers. One of the suppliers has dropped from a high flyer to a penny stock. Your confidence in BPL is certainly much higher than the professional investors. Just think, if you're right, you could prove the "experts" wrong AND make yourself rich!! Sweet!!!

US domestic SW radio is an important part of the alternate media. Listeners
can easily get much information which is hard to find elsewhere.

US,

YES - "Real Americans want their votes to be counted."

Real Americans being the actual Citizens of the USofA
who in-fact did 'cast' their Votes on Election Day.

If in-fact you are advocating "Verified Voting" then Bring-On
the United Nations (UN) and an 'Official' UN {International}
Observed Election" right here in the USofA that should be
. . . VERY INTERESTING :o)

The "Standard" for a UN {International} 'Observed' Elections is:

1. A Valid Voter ID / Photo Registration Card
presented at the Polls when you Vote.

2. The Thumb Printing of Each Voter for Validation
and to prevent any so called 're-voting'.

Bring-On the UN {International} 'Observers' !

FREE and Un-Afraid to 'show' that
"I Am an American Citizen" and I VOTE [.]

> Why did Radio Deutsche Welle stop transmitting on SW in English?

The easy answer is they stopped broadcasting in English to save money.

International broadcasting is a form of public diplomacy. Whether international broadcasting from one first world country to another actually works as public diplomacy is an important question. I don't think it makes much difference. Certainly few Americans listen to SW radio. I can't think of any US election in which international broadcasting played any role. I don't remember any significant public pressure put on Congress by SWLs.

I can't blame the Germans, or anyone else, if they want to spend their limited resources somewhere else.

There is still DW English programming in the US. The local college public TV station runs some DW programming, and it may be also available on college/public radio stations.

TV stations aren't concerned (yet) about BPL because the signal levels needed to receive snow free television are on the order of 50 times higher than those to receive a listenable signal on a good HF receiver (20uV for HF, and 1000uV for television). In addition, most homes are now wired for cable, which is much better shielded than your basic HF antenna.

Take note, Steve, of the first three words in my above paragraph. I made the comment that in spite of the fact that it was purely an entertainment show, and not based on fact, that a ham rig made previous to the time the Munsters was running could indeed have communicated with a kid's walkie talkie. I

used to have such a rig.

If you're saying most TVs are getting much higher signal levels than most
radios, I'll agree. But BPL radiation will go up with frequency and will be
much higher at 60 Mhz than it will be at 5 Mhz.

> In addition, most homes are now wired for

That may or may not be true in the proposed BPL areas. BPL is supposed to
be most attactive for outlying areas without DSL and cable acess.

Interference aside, BPL would be a slick solution if it's reliable.
However, there hasn't been much evidence that BPL can deliver wide bandwidth
to a significant number of customers over a long period of time.

Well of course. Why would one want a HF antenna to be shielded?

I live just south of Lexington and at our location it was much
brighter then last year. I tried to capture some pix with a digital
camera and it was a bust. So I dug out the old 35mm and tried some
time lapse.We had some good Last Sudnay and Tuesday(I think). I will
drop the film off today on the way home and hope to have some good
pix. If they are any good I will find a place to post them. A friend
who lives just north of Sadieville
(northen Scott county) had never seen the aurora before and thought
the sun
had "gone nova or somthing". My wife and I took our DX398s (we each
have one)
and there was no major effect on anything from 550KHz(WKRC Cinci, OH),
through
15MHz WWV. There did appear to be a lot of noise in the 10mtr (28MHZ)
ham band,
but I didn't feel like digging out my HTX100 and listening for skip.
The lights were to rare to miss. I would love to go to Alaska just to
see them "up close and personal".

Interesting. I agree with much of this, but I think there will be more
major broadcasters. I wasn't at all surprised when the Swiss pulled
out because of the nature of their programming. My sense was that
their programs were designed to prop up their tourism industry and, if
so, that's something they can do more efficiently via the internet.
However, if a country, group or institution has a real message to get
out, I don't think the internet, all by itself, is enough. In other
words, I don't think they'll be content to put up a website and wait
for people to stumble across it. They'll want to take a more proactive
approach to securing an international audience. Satellite radio is a
possibility, but so is shortwave, depending on the nature of the
audience they hope to reach.

But maybe I'm missing something. I'm not used to being the 'optimist'
in connection with any issue, but I appear to be just that where the
future of shortwave is concerned.

I've used an LA350 very successfully with an SW77, so I suspect it
would work just fine with the 2010. You'll need to go to Radio Shack,
though, to find an appropriate plug. If they don't have it in stock,
you can order it from them.

Well with your help I'm back in action. My 5000 has the dreaded keypad bounce so using the computer is great. My new computer doesn't have a serial port, I had to buy a usb serial adapter. Along with your settings I had to uninstall the serial drivers and reinstall them again and all is fine.

I haven't used the radio in quite a while so I was a little rusty.

Thanks again

Brian Hill wrote:

Thanks for the response. Yes it is on COM 1 but I forgot the other port settings. Within the program you click TOOLS, OPTIONS, PORT SETUP.

There are 5 adjustable settings in there. I remember I used to have to change a couple of them for it to work but I forget which ones AND what settings to choose.

Thanks again.

Ok. Let me give you mine. Maybe you can duplicate it and it will work?

Bit per sec. -4800
Data bits-8
Parity-None
Stop bits-1
Flow control-None

The only consumer HF radio I currently use is the aor 7030+ I run as my "portable". The others are rack mounts.

On the 7030+, my favorite sideband filter is a crystal one marked 3.24khz. The radio reads it as 2.9khz. (the 7030 calibrates itself for filters by sweeping them.) The shape factor of that filter is 1.33 It was made for a Racal 6790/gm or a 6830.

The Icom FL80 filter has a pretty good shape factor - 1.5 - but I'd expect the audio to be somewhat muffled for my taste.

The specs I've seen for wider Icom brand filters for sideband imply the skirts aren't particularly steep. You might be able to compensate for this with the twin pbt.

I don't know how much room you've got in the case, but you don't have to buy your filters from Icom.

Besides milspec filters, you might check into what Kiwa is offering.

FO&A,

Let us remember that Two Quarters make a Half.

As in "Half Past the Hour" (30 Minutes after the Hour)

The 'concept' of Quarters was most likely a Visual Imaging
{A Memory Tool} for many who were used to the old fashion
"Round" ANALOG Clocks and Watches.

Close Your Eyes and 'think' of the Round Clock face as a Pie Chart.

This Imaging of a Round Clock is were we also get the terms:
- Top-of-the-Hour {Exactly "On-the-Hour" - The Hour and Zero Minutes}
- Bottom-of-the-Hour {Exactly 30 Minutes Between Hours}

ABOUT: money, Money. MONEY !
The Quarter US Dollar 25 Cents is easy to understand. But the
expression "Two-Bits" is strange to many since 'One-Bit' would
be 12.5 Cents HUH? Unless one is told that a "Bit" referred
to a Piece-of-Eight (A 1/8th part 'piece' of a Spanish Coin
being a Piece-of-Eight) and at one time in our history the
US Quater Dollar was literaly compared to Two Pieces-of-Eight
- Hence the expression "Two-Bits" !

Pardon the thread drift, but making the receive antenna directional can improve system SNR by reducing the total noise voltage delivered to the receiver input, as a ratio of the desired signal.

The spectrum occupied by a data pulse is dependent on the rise and fall times of the pulse, not on the pulse duration. If the rise and fall times are constant, spectral bandwidth also will be constant. Only the distribution of energy within that spectrum will vary for pulses of different lengths (half-amplitude durations).

A familiar example of this is the "click" created in radios when a nearby electric light is switched on or off. When the switch contacts make and break, they create a current transition across a short time interval -- which generates a wideband RF spectrum. This RF energy is radiated by the AC wiring, and some of it is received and detected by the radio.

The problem with this research is they ignored historical voting patterns for those counties in Florida.

While those counties have a lot of registered Democrats, they traditionally vote Republican on the national level.

As for Ohio, it's been reported they goofed with absentee ballots by lumping the results from several precincts together.

>BEFORE THE WORLD TRADE CENTER ATTACK ON 9-11-01?

Nope. It was quite well documented that it took them several
weeks to dig down to the vaults after 9/11; and once they
got there they spent a whole night taking the gold and silver
out under heavy police guard and moved the trucks out before
daybreak.

A bit of research would have told you that.

This is unfortunately just another of the urban legends that
have grown up around 9/11 and which no one with the sense God
gave a goose would believe for a second.

And God knows, God didn't give a goose much sense...

BL,

"Lies, damn lies, and statistics"

After-the-Election, what you will see within 30 Days is the
"Certified Voter Count" from each County in every State in the
USofA and the Certification by that State's Secretary of State
or other designee.

Most Electronic Voter "Systems" use 'individual' Stand-Alone
Process-and-Tally Devises (Voting Machines).

Besides the 'rapid' Electronic Voter Count most 'systems' allow
for a Paper Print-Out or Manual Recording of the Voter Tallies
of 'each' and 'every' Voter Machine.

These Print-Outs or Tallies is forwarded to the County Register of
Voters and ALL of the Print-Outs or Tallies are then Manually
Added-Up as part of the Verification, Audit and Certification
Process within the County.

Many of these "Questionable Votes" and "Voter Numbers" are
'originating' in Counties that are predominately Democrat
and have Elected Registers of Voters who are Democrats.

ARE WE TO BELIEVE THAT ELECTED DEMOCRATS ARE RIGGING THE
PRESIDENTIAL ELECTION FOR PRESIDENT GEORGE "W" BUSH ? ? ?

hello, can i get a reality check ~ RHF

3071. (OT) ELECTED DEMOCRATS "RIGGED" THE PRESIDENTIAL ELECTION FOR PRESIDENT GEORGE "W" BUSH ? ? ?

Newsgroup: rec.radio.shortwave
Date: 2004-11-15 15:09:33 UTC

BL,

"Lies, damn lies, and statistics"

After-the-Election, what you will see within 30 Days is the
"Certified Voter Count" from each County in every State in the
USofA and the Certification by that State's Secretary of State
or other state designee.

Most Electronic Voter "Systems" use 'individual' Stand-Alone
Process-and-Tally Devises (Voting Machines).

Besides the 'rapid' Electronic Voter Count most 'systems' allow
for a Paper Print-Out or Manual Recording of the Voter Tallies
of 'each' and 'every' Voter Machine.

These Print-Outs or Tallies is forwarded to the County Register of
Voters and ALL of the Print-Outs or Tallies are then Manually
Added-Up as part of the Verification, Audit and Certification
Process within the County.

Many of these "Questionable Votes" and "Voter Numbers" are
'originating' in Counties that are predominately Democrat
and have Elected Registers of Voters who are Democrats.

ARE WE TO BELIEVE THAT ELECTED DEMOCRATS RIGGED THE US
PRESIDENTIAL ELECTION FOR PRESIDENT GEORGE "W" BUSH ? ? ?

hello, can i get a reality check ~ RHF

You might be too idealistic, with Bush Admin, it proves that America
is just like any former colonial empires -- sucks blood from the poor
and weak and bring back the good. Iraq is now just like the Incas, the
country is destroyed beyound belief.

Bush violates US laws and international laws -- history will be
ultimate judge. He won the election because Americans are human, other
losts are our gains.

An ignorant populace is essential for the fascists to be able to stay
in power. That's why we have the hideous fake news on TV.

Hi,
Could you, please point me to any store in Raleigh-Durham, NC area that
sells shortwave radios and Sony ICF-7600G/GR in particular.
Thanks.

UPS works for me. In a few days it shows up on your doorstep.

I generally use J&R _for what they have_, as they're reputable (ie fix problems well, at least for me, on the odd time something goes wrong), didn't lay anybody off recovering from 9/11 down the block, and deserve support; as well as having good prices.

http://www.jr.com/JRProductPage.process?Product=1627439#productTabDetails

it says $129.99, which is the best price I've seen, right off the bat.

I get good service also from http://www.universal-radio.com

'optimist'
> in connection with any issue, but I appear to be just that where the
> future of shortwave is concerned.

There are several problems with relying on the
internet:

-If you are a broadcaster moving to the internet
only, you are abandoning the people who can't afford
to access the internet. If your target audience is
on the internet, then that makes sense. If it's not,
then you've lost that audience; permanently, most
likely. Someone will fill that void, but if that
new broadcaster has a differing point of view
than you...

-Unlike shortwave where a listener can randomly tune
the bands and can find something interesting, you
actually have to search to find Radio Swiss International.
The internet is a true equalizer, but if you are a
broadcaster and are used to people happening upon
your station, you're going to be sadly disapppointed.
People have to actively seek you out on the
internet, as there is simply so much there that
a broadcaster won't fall into an internet user's
lap..

-A corollary to #2 above is that the internet plays
a part in dividing people just as well as uniting

people. If you are on the net, you don't have to be exposed to opposing points of view if you don't want to, and you can choose to stay in your own little world and believe anything you read if you wish. You can do that with shortwave, too, but if you get the shortwave "bug", by nature you'll be exposed to different ideas by trying to listen to various stations.

In it's own way, the print media is finding that trying to get people to subscribe to their websites (Washington Post comes to mind) when other items are free is a big drawback, and that I'd imagine that big shortwave broadcasters will find out the same rather shortly.

Thank You One and All for your Replies.

Well I have the two Inverted "L" Antennas and the proof would
be in the Doing by de-rigging one and wrapping the Antenna Wire
around a Ferrite Core; so that the Coil will be at the Top of
Vertical Up-Leg. Then doing some Side-by-Side Testing of the
two Antennas.

NOTE: Taking a second look at the RF Systems "EMF" Antenna.
The more I get the impression that it is susposed to be Rigged
as a Vertical using the Coax Cable as a Counterpoise or may be
as an Inverted "L" with the Coax Cable as the Vertical Up-Leg
and the Antenna as the Horizontal Out-Arm.

once again thank you very much one and all ~ RHF

Everyone knows that license free walkie talkies were at 27MHz, ie CB,
until the mid-seventies when 49MHz was added as a segment where they could
be operated

The 11metre ham band, never an international band, was taken away from
hams in 1958, and turned into the citizens band. So there would have been
no overlap with the walkie talkies, and even if the band could have been
shared, it would have been illegal to talk between the walkie
talkies and a ham (it was also illegal to communicate between
license free walkie talkies and CB, and it's the same with FRS
on GMRS frequencies).

Interestingly, there was a time, up to 1972, where there was still an
11metre ham band in Canada. When CB was introduced here, the top few channels
were not included, and they remained a ham band.

No, the story on the episode was just the usual garble of people who want a "good" story and don't care about detail.

But I didn't think the question was about whether it was technically possible.
One doesn't really need an explanation of how a ham might have CB equipment.

But it wouldn't have been legal, as you know. If he put his ham rig on CB,
then he's breaking the law (because it's not type approved, because it has
higher power, because it might be VFO controlled).

There is no reason how he could communicate with license free walkie talkies,
except if there was an emergency.

It's Possible Herman's homebrew radio wasn't tuned very accurately and he ended up on the 11 meter CB bands commonly used by walkie talkies at the time.

Personally, I find this much more believable than Grandpa turning into a bat, or them having a fire breathing pet living under the stairs.

I use two Panasonic 12V 20 Amp Hour Gell Cells to power my radio
equipment. I wish I had a R75, but I only have a R2000 and a
DX398. I found a Lambda 5A adjustable power supply at the local
mil surplus outlet for $10.00. I adjusted the output for 13.6V
as suggested on the side of the Gell Cell for use in standby
service. I could have used anything from a 2Amp through 20Amp
power supply. I have seen 13.4 through 13.8 Volts specified,
but I choose to go with what the voltage on the battery.
20 Amp hour means the battery will deliver 1 amp for 20 hours
before the voltage drops to ~10.8V.
One big advantage of using a Gell Cell(or large NiCad or even
a deep cycle lead acid) battery was demonstrated this morning.
At 5:30AM our AC mains went down. My wife aswaken me when her
APAP (sleep apnea assisted resperator) alarm sounded as the
power failed. I got up and went to my radio desk, turned on the
back up desk illumination, some white LEDs to save power,
phoned the the utility, and carried one of the gell cells to the
bed room and connected her APAP to the battery. We picked her
machine because it would also operate on +12V. She went back to
sleep and I went back to the radio desk to try some DXing .
The only nice thing about the power failure was with the local
substation down, the bands where nice and quite.
I listened for 2 hours and headed in to work.
My wife reconnected the battery to the power supply when she
got up at 7:30 and found the power back on.
Having a decent standby battery pack sure beats lighting a candle
or lanturn.
I use 4 pin XLR "microphone style" connectors for all of my
DC power connections. They are farily cheap, $4~5 each, and
will carry 15 amps PER pin. Even with my hame gear fired up and
transmitting, I only draw 8 Amps. I even replaced the cigerette
lighter socket in my Civic with a 4 pin female XLR.
I am going to add a better power fail alarm, one that will wait 5
or 6 minutes then drive a sonalert and turn on a LED flash light.

At 5:30 it is DARK!
Terry

I was shopping around for a small good am fm sw radio to use at work. A repair shop in my city says he is clearing out a Nippon model MBR 789 radio for $99 Canadian. I have looked high and low on the net and in usergroups to find a review and there are none to be found. Anyone here have some info regarding this radio?

I got to doubting the float voltage I mentioned so I did a quick net
search and found this refference from Panasonic on charging gell
cells.
I suspect it applies to deep cycle lead acids as well.
http://www.panasonic.com/industrial/battery/oem/images/pdf/Panasonic_VRLA_ChargingMethods.
pdf

The main point is that for float charge, AKA constant voltage,
0 degrees C 14.1V
25 degrees C 13.7V
40 degrees C 13.4V
I have charged my gell cell at 13.6V for several years with no
problems.

Of course a regen rx can handle SSB. My 3-tube set works fine on the 80m
and 40m ham bands. Naturally, the tuning needs an occasional tweak but
once it has warmed up it will stay on an ssb signal for quite some time.
Selectivity is not an issue - that is done at audio like a direct conversion
set. Tests by ZL2JJ have shown a good regen receiver to be as sensitive as
many modern superhets.

The German military were using regen receivers* right through WW2 for
AM and CW reception and if you can resolve CW you can handle SSB.

* For example the excellent Hagenuk Ha6K39b tranciever.

I've posted explanations (or what I hoped were decent explanations)
in the past to various newsgroups. Oddly, one of them landed on the
Wadley Loop page, http://www.qsl.net/vk3jeg/b_wadley.html
but whoever put it there had changed a word or two, so it looks like
I'm saying the HRO-500 used a Wadley loop, when I was correcting someone
who said it did.

> The really cool feature was how the first oscillator was used to mix

>
That's the question. It adds an extra mixer stage in the signal chain
in order to get the "synthesizer". It is a neat arrangement, but just
a few years later, the same effect came from having a PLL synthesizer
out of the signal chain. Though as I write this, I do wonder if someone
looked at the Wadley loop and wondered how to get rid of that extra
mixer in the signal chain, and realized a bit of change would fix that.
Obviously there is vast similarity between the Wadley loop and the
synthesizer in the Galaxy and HRO-500, with that multiplier of the
reference (and yes, comb would fit better there), and the need to tune
the MHz knob to get a beat note.

The WHAT??!

France established influence in that region in the early 19th century,
and created a unified government for what is now Vietnam in 1887. The
US had precious little to do with Vietnam before the late fifties,
certainly nothing like authority or control to turn over to anyone.
The French were in control of everything but Japanese military bases
there through 1945, then lost Hanoi to Ho Chi Minh but regained it
the following year.

As usual, your liberal bullshit is easily debunked with a few Google
clicks.

>The real question is "Is there anything to listen to in the 30-60 MHz
>range?".
>

Actually, depending on your region and the type of monitoring you enjoy, there are a number of types of signals to be heard in this range if you're patient, or just curious.
You could listen to the windows at just about any fast food place between 30 and 35 MHz... no, it's not exactly riveting stuff to be sure, but it's there. Sometimes it's interesting to see how many people actually order McDonald's, or Taco Bell, after 2 am, and what they eat at that time. Gives me an idea of why many folks in my area are somewhat chubby.
Also, during Spring and Summer, when conditions are right, you can hear cabs in NY, or Mexico, or Cincinnati for all I know... or dispatchers and units from very un-local police and emergency services. This occupies the same space of 30 to about 35 MHz. I can recall many times over the last few years, during early Spring and late Summer, hearing hours worth of police and EMS comm's from the northeast (I'm in SW MO), when they were dealing with flooding rains in PA, CT, OH and IN. It's very interesting DX... but no, it's not regular.
OF course, there is the 6 mtr amateur band, which doesn't get a lot of use in my neck of the woods. Oh yeah, and cordless phones/intercoms/baby monitors in the 48 to 50 MHz range.
I like to use my R75's 30 - 60 MHz range as an addendum to my base scanner, when there is something going on in town, or when conditions are bringing in DX in that range, and I can switch between the two receivers to catch whatever short burst comm's are flying my way.
But again, if you're not into DXing/waiting, or fast food and intercoms, then there isn't much to listen to on any regular basis.
Linus

there used to be. Back in the early to mid 80's, my local police department was somewhere in the 30-40 MHZ range.

There's still some stuff to hear in the 30 to 54 MHZ range.

Although that probably depends on your area.

At least here there is still some stuff transmitting there.

>cable, which is much better shielded than your basic HF antenna.

not true. My radio scanner proves that the cable companies are not shielded.

Even when driving to the next county over, which is a different cable company, I still pick up the cable tv transmissions on my scanner, through the air.

And even driving to the next city over, which is a third cable company, I still pick up the transmissions through the air.

NOne of them are shielded.

It ruins trying to listen to the communications bands on a bunch of frequencies above 30 MHZ.

Reporting it doesn't do any good, as all of the cable companies refuse to fix it.

Yes. My response was intentionally simplified. Making a directional antenna is often not a viable option for an SWL, because they typically operate over a wide frequency range, and want to receive signals from many directions. This pretty much limits them to something like a rotatable log periodic antenna. Wire antennas can be made directional, but typically only in fixed or a small number of directions, and with directional patterns that change with frequency. Within the range of discussion, then, I don't believe it's realistic to attempt a directional antenna. The advertised antenna certainly doesn't produce any advantage in this regard.

>HF, and 1000uV for television). In addition, most homes are now wired for
>cable, which is much better shielded than your basic HF antenna.

In addition to the cable leak interfering with listening to communications above 30 MHZ, it also interferes with listening to AM broadcast and shortwave bands even worse because of all of the buzzing caused by it on AM and shortwave.

Just to make s ure that the problem wasn't in my radio, I also checked my other radios (AM and FM bands).

The buzzing was still present on the AM radio on every radio I have. So the problem was definitely not in my radio.

When I do get far enough out oif the area, the buzzing stops and AM can be picked up mnormally.

However, I normally don't drive out of the area that far.

I usually stay either at home or within the area.

By Jason Walsh
Nov. 15, 2004 PT

Shortwave radio bands, ignored by commercial broadcasters because of their low fidelity, have long been home to government activity -- whether for national broadcasts such as the BBC World Service, Voice of America and Radio France International, or propaganda broadcasts from the likes of Radio Havana or the U.S.-backed Radio Free Iraq.

Meanwhile, for the last 30 years an altogether more curious kind of international station has been noted on the airwaves.

(Details at
http://www.wired.com/news/technology/0,1282,65698,00.html?tw=wn_tophead_2)

Radio Netherlands' Ehard Goddijn drew our attention to a very strong SSB signal on 7360 kHz noted in progress at 1230 UTC, carrying the NRK domestic service in parallel with 1314 kHz mediumwave.

The SSB was replaced by a silent carrier at 1240, then the modulation resumed at 1251 UTC.

(Moe details at http://medianetwork.blogspot.com/)

I just remembered when the cable leak interference started here at my home.

Early last year, I still recieved AM and shortwave as normal,from home, without any of that type of interference, no buzzing.

Then later last year, the cable company came and switced all of their wires around to fiber-optic cable to improve reception.

Well, that's what the cable guys working on the lines said they were doing, switching the cable to fiber-optic cable.

And that was right when I started having the cable leakage problems, from home.

Ever since they switched to fiber-optic cable is when I started having all of the interference problems of buzzing on AM and shortwave radio when listening from home, making the bands almost totally useless.

I'm guessing the other cable companies in the area are also using "fiber-optic cable".

I think the reason why many international broadcasters are phasing out
their shortwave services is because they are catching on to the fact
that very few members of the public, aside from radio hobbyists, are
listening. It simply doesn't make financial sense for the governments
of these countries to continue pumping mega-money into these facilities
just so a radio hobbyist overseas can add another entry into their
logbooks. Most DX'ers could care less about the actual program content.
For them the fun is in capturing an elusive signal.
I realize there are still many places in the world that rely on SW due
to remote locations, local regulations, etc. Those places are the ones
the government SW broadcasters should focus on. In most urban areas in
most countries, local FM dominates the listening habits of the general
public. Here in the USA, in my neck of the woods, hardly anyone
listens to MW/AM any more. I remember a friend of mine being absolutely
astounded that my car radio could pick up WCBS-AM 880 in NYC. She
thought I had some kind of special supercharged radio. I would have
shown her how to get the BBC and really impressed her if I'd had my
shortwave reciever with me. But the BBC World Service is available on
local FM here, in stereo with no atmospheric interference, so why bother?
Like it or not, international shortwave broadcasting is slowly going
the way of the LP vinyl record. It is much more cost-effective to beam
programming overseas via satellite then rebroadcast it on local FM.
As broadband internet becomes more widely deployed, look for it to
become another similar medium.
Before you get out your flamethrowers, I want to state for the record
that I am an SW listener and I much prefer to use radios that glow in
the dark and get warm. But unfortunately we are in the minority there.
Watch for more international megawatt broadcasters to shut down as
this trend continues.

There are no frequency limitations for equipment in New Zealand. It's much more liberal than US, UK etc, that way. Sure, you're not allowed to listen to, for example, cell phones, but it is not illegal to own equipment that is capable of doing so.

Well with your help I'm back in action. My 5000 has the dreaded keypad bounce so using the computer is great. My new computer doesn't have a serial port, I had to buy a usb serial adapter. Along with your settings I had to uninstall the serial drivers and reinstall them again and all is fine.

I haven't used the radio in quite a while so I was a little rusty.

Thanks again

No problem Bob. Glad to help.

Do you always work backwards like this in forming an opinion?

For example, you hear that there are questions about the legitimacy of an election, you look to see who is certifying election results and if that person is from the same political party as the loser then the questions of legitimacy must be dismissed?

Are there any others reading this that do the same thing?

Your post raises an interesting topic. The relation between the sun, a compass and an analogue watch (or clock) is an equation. If you have any two of these three items, the third can be determined.

For example, if you can see the sun, and you are wearing an analogue watch, you can determine true North. Or, if you have a compass, and you can see the sun, you can determine what time it is.

Remember, that it is a watch or clock that is used to determine longitude also. First, you set your watch to midday exactly as the sun reaches the highest point in the sky (Note: your watch is now set to sidereal time and not mean time).

Next, sail (for simplicity) due East. Next day, when the sun is at its highest, see what the time is on your watch. Let's say its 11 o'clock. Then you have travelled 15 degrees East of where you started (remembering that 360 degrees of longitude divided by 24 hours is 15 degrees per hour).

No navigator would be seen without his/her analogue watch!

Finally, a question: There is a time zone in the world which is set to UTC. And there are 12 times zones which are ahead of UTC (+1, +2, etc) (and, yes, some partial hour variations too). And there's 12 timezones which are less than UTC (-1, -2, etc). That adds up to 25 time zones. Yet there's only 24 hours in a day! What's going on? (Hint: the timezone at my location holds the answer)

Mark.
Auckland, New Zealand, which is currently UTC + 13 hours.

Good point. On the other hand, the opposite lesson can also be
drawn from other shows. I remember seeing an interview with an
emergency room nurse who frequently sees young people coming in with
gunshot wounds. She says many are surprised that getting shot just
once hurts and that you can't simply keep advancing on the one
shooting you, taking multiple hits, until you're close enough to take
him out.

Here's the average IQ by state according to the Ravens APM; the most accurate measure of innate intelligence in my opinion:

Rank	State	Avg IQ	Choice
1	Connecticut	113	Kerry
2	Massachusetts	111	Kerry
3	New Jersey	111	Kerry
4	New York	109	Kerry
5	Rhode Island	107	Kerry
6	Hawaii	106	Kerry
7	Maryland	105	Kerry
8	New Hampshire	105	Kerry
9	Illinois	104	Kerry
10	Delaware	103	Kerry
11	Minnesota	102	Kerry
12	Vermont	102	Kerry
13	Washington	102	Kerry
14	California	101	Kerry
15	Pennsylvania	101	Kerry
16	Maine	100	Kerry
17	Virginia	100	Bush
18	Wisconsin	100	Kerry
19	Colorado	99	Bush
20	Iowa	99	Bush
21	Michigan	99	Kerry
22	Nevada	99	Bush
23	Ohio	99	Bush
24	Oregon	99	Kerry
25	Alaska	98	Bush
26	Florida	98	Bush
27	Missouri	98	Bush
28	Kansas	96	Bush
29	Nebraska	95	Bush
30	Arizona	94	Bush
31	Indiana	94	Bush
32	Tennessee	94	Bush
33	North Carolina	93	Bush
34	West Virginia	93	Bush
35	Arkansas	92	Bush
36	Georgia	92	Bush
37	Kentucky	92	Bush
38	New Mexico	92	Bush
39	North Dakota	92	Bush

40 Texas 92 Bush
41 Alabama 90 Bush
42 Louisiana 90 Bush
43 Montana 90 Bush
44 Oklahoma 90 Bush
45 South Dakota 90 Bush
46 South Carolina 89 Bush
47 Wyoming 89 Bush
48 Idaho 87 Bush
49 Utah 87 Bush
50 Mississippi 85 Bush

Im just about ready to give up on radio due to newly introduced "mystery" static in my area.... S-9 worth of noise! But before I give up on my ham and SWL career I would like to give it a last shot and try a noise cancelling unit.

I would like to hear all the input you guys can give me on one of these units, which one works better and do they really work as advertised?

Thanks...Gil

Hitler and the Arabs were allies in WW2 and by the way despite Bush's
promises we are still saddled with gun control. Its not rocket
science to repeal all those laws, just write a bill that says this law
repeals every gun control law passed since 1950.

Jim:
Which version of SWLog do you have??

I upgraded and my operating system (a garage sale derived 'puter with a
XP pro OS of dubious origins which refuses all updates

editions earlier than the latest SWOLOG work fine,cause I successively
upgraded off them.

I'm trying to find the whole SWLog file for a version preceeding the
current issue so I can reload and start from scratch

If those zipfiles are still around you could save my swl'in butt

This reminds me of Summer Y2K when I was in Honolulu trying to talk to a man in WA. I got his wife and left a message which included a request that he call me after 11 a.m. his time since I was 3 hours behind and wanted to be awake and functioning when we talked.

So, he calls me the next morning at 5 a.m. HST/8 a.m. PDT because he figured that his wife surely got the message wrong since nobody's west of WA <g-r-o-a-n>.

WRONG! There is no requirement that that the envelope detector be
linear. BFO and a Diode detector will work just fine for CW. It
doesn't work very well at all on SSB unless the BFO signal level is
much much greater than the SSB signal level.

Phase and waveform distortion have no impact the ability to receive
CW. They have a pretty serious impact on the SSB quality.

That would be an act of war.
Whichever nation tried that would very likely get bombed to bits by the U.S.

Remember when Clinton bombed Iraq because Saddam had tried to
assassinate Bush 41? And this Administration is a lot more hawkish than
Clinton was.

CRI had a Chinese learning program. I heard it not too long ago. Years ago I
learned some Finn on YLE. I'm part Finn and wanted to surprise my Grandpa.
Boy was that a hard language. Yea a web search otta turn up something. I'm
sure its in some schedules. I'll look too.

Thanks - I started looking at the BBC site the other night but only found
learning languages on TV before I quit. Am continuing the search - am
interested in French, German, Spanish, Italian, and Gaelic.

Google is a good friend of mine, but there are so many entries.

GG,

There you go denigrating people who do not agree with you.

You just come across as MEAN SPIRITED and 'filled' with HATE !

You are a perfect example of the NEO-DEM Political Cadre; who are
'preachers' of Class Warfare, Hate Speech and Fear Mongering.

You apparently see anyone who does not feel and believe as you do
as an Enemy-of-the-People.

You use the "F" Word {Fascist} as a Branding Iron to Burn a
Scarlet Letter {To Label and To Condemn} on to People simply
because you feel so Morally Superior to everyone.

Your actions in both the Written Word and Spoken Deed are losing
you the Hearts and Minds of the very People who you claim to champion.

so say i, my opinions stated as facts ~ RHF

Wrong. Personally I like listening to news and programming from other countries. Other viewpoints on world events other than what the U.S. media wants to feed us.

Oh, I'm not married. I'm not that stupid.

<http://www.heavens-above.com> will generate information to
allow identification of viewable satellites pre- or post-observation.
Also google for mission planning software.

You might want to follow the
<news:sci-astro-satellites.visual-observe> group for further info on
identification resources. People often post questions of the form "I
saw something traveling <direction> between <star1> and
<connstellation2> on <date> at <time>. What might it have been?" In
many cases, the object is identified by other posters, with a
reference to the source of the information.

Not US, as far as I know. My parents were from Ireland and
they always used "quarter of" for a quarter to the hour. Also "ten
(minutes) of" for minutes, etc. before the hour. Also quarter past and
half past for after the hour.

Another of their time phrasings was "He's one age to her"
meaning they were of the same age. None of those usages were common
among the people I grew up with in California.

Note: After the coming of digital wristwatches, someone once
said, "No one except a train conductor needs to know that it's eight
thirty-seven."

I am sure that age may have something to do with it, but I have lived in all
of those places, and those are generally how they are used. But like I said,
you will hear any of them anywhere, but some are used more in some places.

One word -- lawyers.

As for multiple languages, I once worked for an outfit that
had rolls of "GARBAGE" stickers to peel off and apply to boxes or bags
to be thrown out. The word for garbage was also written in about eight
other languages, including Spanish, Veitnamese, chinese, etc. Someone
once became offended that the word was in so many languages. I
explained to him, "The word GARBAGE is in English because that's the
only language you speak. The rest are because none of your kids will
apply for the job, Whitey."

It's supposedly related to Hungarian somewhere in the dark misty past.
The beauty of those languages is that it's a phonetic alphabet. Once
you know what the letters are, you can pretty well say any word you
can read. Understanding them is the harder work.

With all those carets (sp?) or umlauts above most vowels, you may get
a total of over thirty letters. It's a small price to pay not to have
to have all those stupid 'laws' in English grammar, most of which
aren't rules at all.

Here's mike's law:

I before E except after C but NOT usually!

The reason that Bush is associated with Hitler is that both were Authoritarians. They believe(d) in absolute rule with no dissent. They are/were both right wing. Stalin was an Authoritarian but leftwing (yes both leftwing and rightwing can be bad - it is the Authoritarian quality that is not good for humans in general). Both use fear to motivate their base. Who the scapegoat is doesn't matter. It is the use of fear/hate/bias. For Hitler it was the Jewish people, gays, Gypsies and then non-Arians. Bush et al use 'liberals' and 'gays'.

Clear enough?

Not the right one. A twenty-sixer is a roughly a fifth of the US (128 ounces) gallon. The proper Gallon has 160 ounces.

26 liquid ounces is roughly 750 cc, or 3/4 liter.

It was just a reminder to CW that he most likely didn't believe the US could set up torture and death camps until the evidence started coming out...heck, he probably STILL denies it.

He may well be right about my idiocy, but I've NEVER gone to the lengths that GW Bush has to show the whole world. The man is a cretin of the first order. A murderous one at that.

Oh. Poor little fascist. You're upset because there are still a few Americans who don't want to lay down while you trash the constitution and turn America into a police state.

So let me make it clear to you. Real liberals and Real Republicans don't feel "mean spirited" toward differing views on how America should exist within the context of our constitution. But when a group of revolutionary theocratic fascists show up and try to destroy the country, we get real "mean spirited."

So take your feigned righteous indignation and shove it.

As far as I'm concerned, you're nothing but a traitor to your country so long as you support Bush.

3184. Mini Radio Recommendations Needed

Newsgroup: rec.radio.shortwave

I realize that this question has nothing to do with shortwave, but could not think of another group to post this question. I read several posts here and this seems like a knowledgable group so here goes...

Our church is planning to purchase a translation system that will transmit on the regular FM band. I am looking for recomendations for mini digital FM radios that cost around $20. I was looking at the Coby CX-9, but am rather leary of buying it without recommendations. Has anyone tried this radio before, or does anyone have a better sugestion? It would not be a big deal to buy one to try it out, but we need 20 matching radios and I would prefer to buy them in one purchase.

regards
Ron Wiebe

thanks for the info Joe. best radio i ever laid my hands on.
i my ask about that 7.0/6.5 filter. have been in email with
Richard. he is trying to locate a XTAL filter in japan for me.
i may do the install myself. i'll have to take a look inside
first. shortwave shop installed the daut. board prior to
shipment. i will look closer at the 330S. i'm also more on
the SW bands. by the way, which size torque fits the screws
in the case? i read it's easy to strip them out...
thanks Joe...

If General George Patton were alive and President of the USA, this would be his Fireside Speech:

My fellow Americans:

As you all know, the defeat of Iraq's regime has been completed.

Since congress does not want to spend any more money on this war, our mission in Iraq is complete. This morning I gave the order for a complete removal of all American forces from Iraq. This action will be complete within 30 days. It is now time to begin the reckoning.

Before me, I have two lists. One list contains the names of countries, which have stood by our side during the Iraq conflict. This list is short: The United Kingdom, Spain, Bulgaria, Australia, Norway and Poland are some of the countries listed there. The other list contains everyone not on the first list. Most of the world's nations are on that list. My press secretary will be distributing copies of both lists later this evening.

Let me start by saying that effective immediately, foreign aid to those nations on List 2 ceases immediately and indefinitely. The money saved during the first year alone will pretty much pay for the costs of the Iraqi war.

The American people are no longer going to pour money into third world hell holes and watch those government leaders grow fat on corruption. Need help with a famine? Wrestling with an epidemic? Call France. In the future, together with Congress, I will work to cut taxes and solve some local problems.

On that note, a word to terrorist organizations: Screw with us and we will hunt you down and eliminate you and all your friends from the face of the earth. Thirsting for a gutsy country to terrorize? Try France, or maybe

China. To Israel and the Palestinian Authority: You boys, work out a peace deal now. Just note that Camp David is closed. Maybe all of you can go to Russia for negotiations. They have some great palaces there. Big tables, too.

I'm ordering the immediate severing of diplomatic relations with France, Germany, and Russia. Thanks for all your help, comrades. We are retiring from NATO as well. Bon chance, mes amis.

I have instructed the Mayor of New York City to begin towing the many UN diplomatic vehicles located in Manhattan with more than two unpaid tickets to sites where those vehicles will be stripped, shredded and crushed. I don't care about whatever treaty pertains to this. Pay your tickets tomorrow or watch your precious Benzes, Beamers, and limos be turned over to some of the finest chop shops in the world. I love New York.

A special note to our neighbors. Canada is on List 2. Since we are going to be seeing a lot more of each other, you folks might want to try not pissing us off for a change. Mexico is also on List 2. President Fox and his entire corrupt government really need an attitude adjustment. I have a couple of extra tank and infantry divisions sitting around. Guess where I'm gonna put 'em? Yep, border security. So start doing something with your oil.

Oh, by the way, the United States is abrogating the NAFTA treaty--starting now. It is time for America to focus on its own welfare and its own citizens. Some will accuse us of isolationism. I answer them by saying darn tootin'. Nearly a century of trying to help folks live a decent life around the world has only earned us the undying enmity of just about everyone on the planet. It is time to cut taxes here because we will not be spending on other people's problems.

To the nations on List 1, a final thought. Thanks guys. We owe you. To the nations on List 2, a final thought. Drop dead. God bless America.

Thank you and good night.

My 7030 uses an allen (hex) wrench for the case screws.

You can also use filters intended for the Racal 6790/gm or 6830 - though they're large, and you'll need to hook them up with something like RG-174. An advantage to using milspec filters is you're likely to be able to get a better shape factor than you can on ones intended for the consumer market.

If you'd like I could shoot a picture of how I installed the larger filters in mine and put it up on my web space, but it'll take a couple days for me to get around to it.

The original poster's problem was not with the word "quarter", but with the word "of". The phrase "a quarter of nine" is completely meaningless... what exactly is one-fourth of nine o'clock, anyway? 9:15? But "a quarter of nine" actually means 8:45.

Well if it was double-conversion one might expect better performance
(though it's no guarantee since it could be a badly designed double-conversion
receiver).

The sad part is that a lot of the low end single conversion receivers aren't
radically different from low end single conversion receivers from thirty
years ago or from 50 years ago, with the big difference being solid stage
and synthesized tuning. If they used a design where the IF was
higher in frequency, they could get rid of much of the image problems
without losing IF selectivity.

But the facts can often make no sense at all without context, and
what context the news organization provides is where most of the
bias comes in.

One thing that's sneaked into the mix is that the US media is so damn
lazy and goes to the Republican affiliated Washington DC think tanks for
commentary to provide this context. Where on an overseas station, like
Radio Aus. or Radio Netherlands, you'll hear a university professor,
on American media you get the background from some guy from some outfit
with "Enterprise" in the name, who is funded by a corporate grant and
directed ideologically by the Republican party apparatus. Even if there
is a more objective commentator, they often get paired in a "Cock Fight"
with one of these mercenary propagandists. (A situation most professors
aren't going to repeat).

You're clueless, a child dabbling in an adult's world. But in case you're a nice kid who's just lacking any knowledge of where your AOL keystrokes wander after they leave your playhouse, here is how it works:

Buying merchandise via eBay has its own set of rules and controls that must be followed before most state attorneys would agree to file a complaint. After remedies specified in the eBay contract (which both buyer and seller are bound to) have been exhausted, then a complaint is actionable with your local authority. A judgement could be issued in your small claims court against the party of your complaint. You then serve that judgement to a court of jurisdiction where the accused resides or does business. An attorney should represent you there if this is in a state other than your own. If your case is compelling to the court in the accused's court of jurisdiction, then that judgment from your court will be upheld and affirmed against the accused. When the accused later ignores this judgment that some out-of-stater (you) obtained against him, then you (your attorney) has to reappear in court, and obtain summary judgment, and file with the local sheriff to seize, hold and auction property to settle your claim. This will cost you much, much more than the portable radio you bought that arrived broke. So unless you can afford to really teach this offender a lesson, or the value of the damages you can claim are really significant, you lose. Nobody is protecting you from yourself in making deals over eBay with a known hatchet-case. You'll be the one that gets really famous if you ever organize a felony mail fraud or wire fraud over a silly eBay dispute. Leave it alone.

I like Stair, that much is true. I wouldn't fit into the setting there, at his farm. The first time I lit up a cigarette, or cranked up some Joe Satriani, they'd be beside themselves. Then, if some brother was hitting on my woman, I'd probably have to send him off to judgement. From a distance, I can appreciate the ministry of the "overcomer". Darren

Wherever you end up putting the slinky antenna, make sure it's in a
quiet place. If you walk around your house with a portable radio,
you'll probably find a few spots with a lot of interference, many
spots with considerable interference, and a few spots with only a
little interference. It's in one of these latter spots that you want
to hang your antenna. You might think I'm exaggerating, but just try
it. When you're operating indoors, you're literally operating in the
middle of a noise 'envelope' and it's important to minimize its
effects.

I find it to be a nice portable shortwave radio, provided you get the
Sony
AN-LP1 active antenna for it instead of using the whip. I've never
tried another antenna, so maybe a random wire would also help.
I am using it almost exclusively for MW, as it is an excellent MW
receiver just by itself (never tried an external antenna; BTW, the
AN-LP1 will not work at all on MW).
SW reception is good but I don't like the ergonomics, you might not
have the same problem. I am used to a tuning knob and larger
controls.
FM is not bad, either. I would recommend it for a good all-around
radio.

Dear Cuhulin,

The Sony ICF-SW7600GR has the LW, MW (AM broadcast), FM (including the Japanese band), and SW (continuous to 30 MHz). In other words, it features complete coverage with no "gaps." It is, in my opinion, the finest small portable radio on the market. (I have three [3] of them as well as two [2] of its predecessor model the Sony ICF-SW7600G; the 'GR is better.)

MW (AM) reception is superb; a Select-A-Tenna can be used though, frankly, I have rarely found it to be necessary (note: I do rather little MW DXing). If you do wish to use a Select-A-Tenna (or the Terk equivalent) you would use that antenna only in close proximity to the receiver as the antenna connection is only for the SW frequencies. But, as I stated, I don't know that it is always necessary; others may comment differently on this subject.

There are many dealers which sell the radio; it is available from Universal Radio, from J&R Music World, from Amazon (their price varies, but is sometimes pretty good), but right now the best price I have seen is that of Bennett Brothers, Inc., a very reputable firm which is evidentally closing them out (Bennett is essentially a jewelry firm which sells many other products but cannot "feature" individual ones enough to make stocking them cost-effective I suppose). I received their close-out catalog a few days ago and noted the presence of this radio therein. When I checked their website, I couldn't find the radio, but you can call them toll-free at 1-800-621-2626 and ask for information. I shouldn't wait too long as I have posted the information on several sites (I have seen some posts stating that the writer had purchased one) and I don't know how many Bennett had. At $109.00 plus $9.00 shipping, that radio qualifies as a fantastic bargain. (Frankly, due to its outstanding performance for a portable, it qualifies as a bargain even at its full price of $170.00!)

[I didn't order the radio (even I can't justify buying another one of them!) though I did order some 2-line telephones which they are offering at a spectacular price. My order arrived in two days.]

You can't go wrong with the Sony ICF-SW7600GR!

All the best,

Joe

I only have like 20 ft to work with for the extra wires. What do you
suggest? 8 ft on one, 10 ft on the other??

BTW, you can have my ex wife. If I could get her deported to Germany for
under $1000 I would do it.

Yes go to HRO or your local Icom dealer

They usually have deals on Saturdays. You have to write them and ask. I paidd $425 for mine after rebate and deal. I think they can be had for $410 now after rebates and deal. If also comes with free DSP. Try finding that on a brand new top notch reciever for $400....

The HF125 doesn't really have a front end as I recal (you had to buy
it as an option) l, the 225 is a very good receiver (and the 225 even
better), and far better than either RS 394 or 2001D/2010.

Well, I doubt he's pleading guilty - unless it's to a MUCH lesser charge. (That could be the case as the courts seem to like to make all cases real cut and dry -- and easy on themselves!)

I also doubt he's going to willingly give up his control over the group. HE may be a bit delusional on the matter or his attorney has assured him that "it's in the bag" as far as a payoff is concerned.

You don't think Darren was attempting to pull the group's leg do you? That's the first thing I thought of. I started to reply a good bit earlier and decided to wait and see who took his bait.

It seems to be way to quick and easy. It takes DAYS - sometimes WEEKS - just to seat a jury in most high profile cases. Unless all the plaintiffs have been bought or frightened off this case has not gotten started good.

Maybe God told him He's going to take him home so he won't have to meet Bubba! ;-)

The ICOM IC-703 Amateur Radio Transceiver.

The receiver is much better that shortwave radios in this price range and it uses about 400ma in receive mode.

Ham Radio Outlet has them on sale for $379.

Good Luck,

Mike N2MS

The only thing I ever bought at the Sharper Image was a little Sony digitally tuned AM/FM radio. This was around 1991 when digital tuning could only be found in stereo systems. The radio cost about $75, but I bought it because I thought I'd never see anything like it again. I was right, sort of-it disappeared from the market after about a year and it was a LONG time before I saw another portable digital tuned radio. It's about the size of a Degen and has five AM and five FM presets. I don't

have it at hand so I don't know exactly what model it is but I think it's an ICF-M200.

As for the radio that's the subject of this thread, it's a Kchibo KK-C300. See Passport 2005 page 107. That review says it's priced at $39.95. For just $10 or so more you can buy a Degen over Ebay that has much better quality. Either the DE1102 or the DE1103 is fine, I prefer the 1102 but you may find that the 1103 works better for your location. The 1103 is kinda quirky but it has just as good performance as the 1102.

If you want to buy yourself the ultimate DX radio and catch up with dxAce
and get over 200 countries QSL'd then you better put one of these rigs in
your Christmas stocking.

IcomAmerica are closing out the Icom IC-756 PRO II this Christmas for only
$2150. Check it out at Universal and HRO.
The radio has an awesome digital receive section with full spectrum display
using a 24 bit processor and a 32 bit DSP.
No new receive only radio's are coming out with specs such as this.
This rig will give you unparalleled opportunities for pulling in that really
weak DX from the remotest weak stations.

NOTE if you listen to high quality AM audio only, then this rig is not for
you - stick with your Drake R8B for the best audio sound .

an early HAPPY CHRISTMAS to you all

Regarding Martyn, I stumbled accross this excuse he made about his expulsion from e-bay this summer.

****
The reason for my suspension is that I listed a Galaxy transceiver , 26 to 28.3 MHz they removed it as it covered CB and Ham, then I re listed it without mentioning the frequency coverage and they removed it again and explained to me why and I said I now understand, they said that although it was enough to suspend me that they would not and hey presto, 2 days later, on a Sunday evening an hour before 101 items were about to finish ($19,000) they removed all of my items and suspended me and have not even had the courtesy to contact me despite many e-mails to them. So shit out of luck here for a while I guess,,, well at least the garden looks nice now.

Wal-Mart is probably the number one pusher of the RFID chip. Gillette
was supposedly putting them in every package of razor blades and
Michelin also was supposedly putting them in every tire many months ago.
If this is true soon they may not need street light cameras. They can
have RFID readers in the pavement and just compare the time of your
entering the intersection with the time the light changed. Also, they
can send out speeding tickets by marking the time your set of tires
entered a freeway ramp and computing the speed by when you exit another
ramp. All these RFID chips will have unique codes and may be traced
back to you via your checking account or the card with which you paid
for it!

pay with cash.

These are links to where you can listen on the web to some DX programs. Might also have some info there about when they broadcast over the air, but I usually download these so I can listen to them as MP3s when stuck in traffic on the daily commute....

The Icom R2 does receive shortwave ..... with a caveat or two: it
is a fixed and wide bandwidth, have never received shortwave with the
stock duck. That being said, if you want a scanner and ability to
listen to the major broadcasters this fits the bill; have used mine
mobile with a 19" whip antenna and have heard BBC, Radio Australia, DW
- when they broadcast to the US, Radio China Intnl & a few others. If
you have about 30' of wire wrap about 10-15 turns on the duck then
string out the rest and you're set. However, don't expect anything

more than the handful of major broadcasters.

I've heard that the Yaesu is much more sensitive on shortwave though; both in this thread and in previous threads on this topic. I'd say if it's a passing interest then go with the R5 (R2 replacement) due to cost/benefit: if you plan on regular use and demand more reasonable shortwave then look at the Yaesu and perhaps the Yupiteru.
Howard

I was surprised by Stair for three reasons: One, I kept running into him all the time on the dial, always getting great reception, even though he sounds like he is off the deep in. Two, I didnt know he was on trial at all. Three, when he gave his station address I was shocked and embarrassed to find him from my home state of South Carolina. I have known a couple guys from Walterboro though, and they were just as mental a Stair. May God have mercy on the place....

Are you confusing a poor operating ham as a pirate shortwave
broadcaster? I've been listening to 3965 kHz for a couple hours, now,
and have only heard some dimwits back east (NA) jabbering about
trivial matters. It's not too hard to find lunatics on the ham bands
transmitting all kinds of illegal stuff. Try to tune into 3840 kHz
sometimes late in your evenings/night and listen for the wacko named
Steve Wingate, KG6TXH. He does everything you've mentioned almost on a
nightly basis running 1500 watts into a fairly good size antenna. He's
the latest edition of idiot-ham to appear on that frequency. I've
received many emails regarding FCC actions that are supposedly in the
works against him by R.Hollingsworth.

Time is a very relative thing Mike :)
Try this sometime, ask 3 people what
time it is and you'll get 2 different answers
and if you as some screwball of a ham or
a short-wave listener he'll rattle off why UTC
or GMT is better. (of course the average
person would think such a person is "off the
rails" already I guess - grin)

Oh well, that's was 02.05 UTC time on 3.210
MHz or 3.210 Mc for you older radio
purists out there. You know how it is Mike.
we 'merkins think the world revolves around us

I have a few receivers and portables to clear out and I have priced them
below auction prices.

Panasonic RF-2600, excellent shape except internally, the base of the
antenna has been fortified. no outside cosmetic damage is present. $99
Sony ICF-6700W, works fine but in fair to good cosmetic condition with dirt
and antenna tip replaced. $125
Rare Galaxy R530 receiver with 3 galaxy filters. early american wadley loop
receiver, complete coverage. $375
Drake PRN-1000/SW-1 in excellent condition $125

email me direct if you really want to buy one of them items.

I used the word 'rarely' for a reason. I have never had an original
waxed paper capacitor explode in any of my boatanchors during the past
30-years. That doesn't mean it never happens. I usually replace them
because most are leaky, especially the infamous 'black beauties'.

Has Yupiteru installed a computer port on their high end scanners yet?
I preferred the Yupiteru to the 8200 for reception, but the 8200 had
the port. I wound up getting neither.

Right, but they also state that all of those things were surface items
recently deposited on the site. They weren't claiming that they were left
there by the inhabitants. Did you catch the bit about the "concentrations of
zinc and copper"? That one really caught me off guard! I'm usre that they
didn't mean for it to be as funny as I found it. <g>

> Also, on the previous page,
> "Two samples were taken of the top 5-7 cm of deposit from within Site

I'm missing your point. They didn't find anything diagnostic...that's all. Absence of evidence isn't evidence of absence, as they say. And they do note that more sampling and collection of baseline data is needed. Seems to be the proper stance to me.

> Whatever it may be, the "habitation site" is not proof of a BSFlood.

That's a possibility. It sounds like the jury is still out; I can wait for the verdict, albeit a bit impatiently.

By the way, thanks again for that link. It was a neat one. I loved those pictures! I didn't expect them, and was quite pleasantly surprised to find them. But am I the only guy around that loathes pdf's?

I keep getting "cannot find server" error messages when I try to navigate from that page. I'll continue with my attempts, though. That looks like interesting reading.

Oh, I was just being a smart-ass with that guilty remark. I wouldn't really
expect it either.

> I also doubt he's going to willingly give up his control over the group.

Hell, no. It's good to be king. Or so I'm told. I'd sure like to know first
hand, though.

> You don't think Darren was attempting to pull the group's leg do you?
> That's the first thing I thought of. I started to reply a good bit
> earlier and decided to wait and see who took his bait.

Not at all. I took it just as he said it, and assumed that Stair was just
displaying a bit of braggadocio. I don't see Darren as the baiting type.

> It seems to be way to quick and easy. It takes DAYS - sometimes WEEKS -
> just to seat a jury in most high profile cases. Unless all the

> started good.

Do you know that it's going to be a jury trial?

> Maybe God told him He's going to take him home so he won't have to meet
> Bubba! ;-)

Naw...guys like Stair are always thinking they'll get protection in the face of their enemas...uh, enemies. I don't believe that their mind-set includes being spirited off to safety out of reach of their foes, even if it -is- to the right hand of God which is where I'll bet Stair thinks he'll end up.

I can guess why. You probably have so many wedgies owed to you that "going
commando" is your only protection. I don't understand you guys that don't
wear undies, or wear boxers instead of tighty-whitie's.

All bragging aside, I need the support. ;) Of course, I only wear the cotton
briefs on weekdays. Saturdays and Sundays, it's chainmail for me, baby!

> Looks like a Mexican standoff!

That's what it looks like when you don't wear underwear?? Two guys pointing
loaded weapons at each other? And -I'm- the sick-o? <g>

> Your move.

And that's exactly what I'd do if I lived in Michigan. ;)

I read the manual on this and it covers all the meter bands from 2.3
to 26.1 MHz. The Canadian RS has this as "Coming Soon " in their
list of SW radios.
My guess is that anything at that price that does SW, AM/FM, Wx and TV
all in one box would be like the jack of all trades and master of
none.
Bob

> were dismissed. Darren

THAT part I CAN believe. I heard somewhere, probably SW, that the feds pay the court system so much for EVERY case they CLOSE. For this reason, in addition to monetary reasons, they love to plea bargain. A person can be charged with three murders and if there's the slightest doubt in their minds they'll let him plea it down to one involuntary manslaughter! There NO JUSTICE in that kind of bargaining! (Check out Isaiah chapter 1. It tells of some rottenness but in verse 26 the judges are to be restored as at the first, thus indicating a period when the judges were NOT judges. Of course that is very well demonstrated a few verses prior.)

Besides that, someone probably got to the young women and "explained" to them how they were going to look like whores AND complete idiots when they got through cross examining them in front of the "whole world"! Either that or Bro. Stair decided to show his generosity by giving them some money. Others probably told them how they were not to go to court against a brother, before infidels, and/or how they were really going to hurt God's work by bringing this man down to shame and possibly to his grave.

I listened to him a short time off and on today to see if I could confirm what you said. Much of what I heard was REALLY OLD tapes he made back in the '80's probably.

I look forward to seeing what the "official" version of the case is. Also, seeing what The Net Team and Remnant's Hope have to post on it - if they do. This will have turned out so differently from what they apparently had wanted that they may just ignore it or provide a lot of reasons why it never should have been decided this way. Personally, as the old saying goes, "I don't have a dog in this fight!"

The Electoral College was installed to prevent just that from
happening. In that way, New York can't push North Dakota around.

The Bill of Rights and the Constitution were written in such a way as
to protect the minority from the abuse of the majority.

Like the man said:

Real Democracy is two wolves and a sheep voting on what to have for lunch.

Added to by Edward R. Murrow:

A nation of sheep will beget a government of wolves.

Let's see how life on the other side is. Republicans were squelched
just that way since about 1962. But to all appearances, the Repubs
aren't doing it as effectively.

> Ever hear the phrase "No Taxation without Representation?".ï¿½ï¿½Ifï¿½myï¿½

Welcome to my life. The only representation I ever had in the Senate
just left, knowing the folly of being a Republican in a Daley-owned
state. Although I finally have a reasonable rep in the House now...

Greetings, This one has been rolling in at a steady S-6 on the JRC NRD-535D, here in the Midwest USA. Anyone had any luck QSL'ing this station? The copy is great, with a well moduated signal. Good DXing to you, Gary

The best one is the Drake SW8. It's out of production but can be found
on the used market for about $450. It has a handle and can be powered by
internal 'D' batteries in addition to an AC adapter. The later version
(starting with 1996) is the best choice because of the improved sync'
detector.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

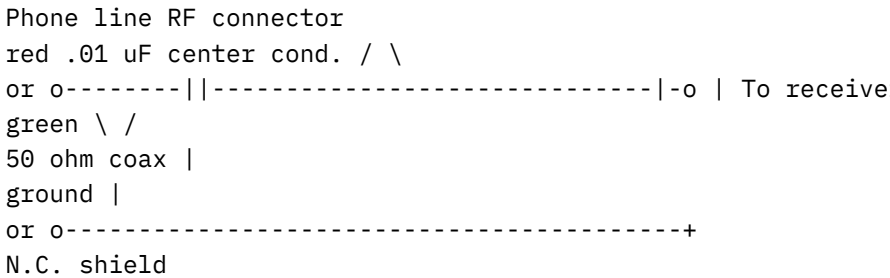
This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines usually don't. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to use it for DX work. Nevertheless, I find that it outperforms the telescopic whip antennas built into most portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including ringing, so that they will not harm the receiver.



N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

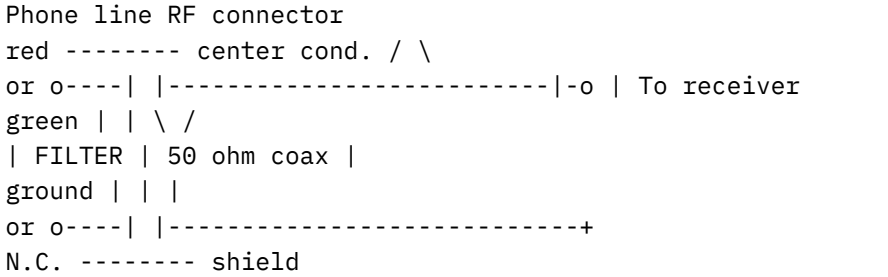
If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be purchased from some shortwave dealers.

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

By the way, these filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:



FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

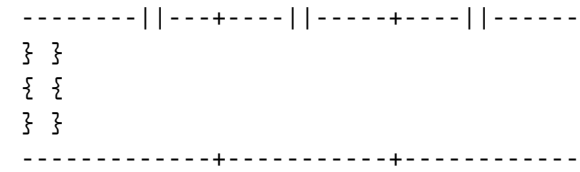
Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)

Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.



The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB
1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

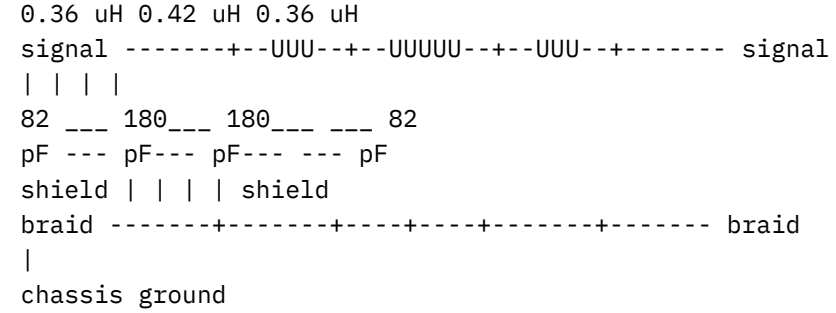
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

All of the parts for the filters can be obtained from the following source:

Digi-Key
http://www.digi-key.com/
701 Brooks Av S
P.O. Box 677
Thief River Falls, MN 56701-0677 USA
Voice: 800-344-4539
FAX: 218-681-3380

PART DIGI-KEY PART NO.
82 pF capacitor P4023
180 pF capacitor P4027
820 pF capacitor P4184
1500 pF capacitor P4187
0.33 uH inductor M8007
0.39 uH inductor M8008
2.7 uH inductor M8018

The cost of these parts is less than $1 each.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast bands used outside the USA. Also includes WARC-92 broadcast band extensions, which may be used before April 1, 2007 on a secondary (non-interference) basis. For multi-use bands, most common usage is shown. Some stations operate outside the official bands. Information is from Sep 2000 NTIA allocations table, see:
http://www.ntia.doc.gov/osmhome/allochrt.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is 5 kHz. Frequencies above 10000 kHz tend to propagate better during the day; frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

overloaded here in the states- even when used with gain antennas such as
Yagis. But this can be a problem in EU with the powerful HF broadcast
transmitters. Seem to recall that the HF-150E corrected this potential
problem.

Interesting question....
The only local Icom dealer has the 756 PRO III @ Rand 22,230
That includes the 14% VAT tax and converts to US$3,700
He hasn't got any 756 PRO II's as he says they are discontinued and not
available in South Africa anymore.

If I take up Universal's offer on a 756 PRO II and import one myself, then
that would land me VAT & customs duty paid @ Rand 17,500 or US$2,920

It's expensive living in the Third World....!! (but I have other benefits)

Dale,

AFAIK, even for the HF225, Lowe recommended no more than
a 10m wire for an antenna. I've never used my 225
with more than about a 50 ft wire and it certainly
never showed any symptoms of overload, and I think
your point about EU vs US SW environment is well taken.

An earlier poster on this thread cited the WRTH handbook
and pointed out that the synchronous detector on the 125/225
was not single sideband, and that's true as far as it goes.
I have both a 2010 and the Lowe and I find the Lowe to be much
easier to use in crowded bands despite the lack of selectable
sideband - its IF filters work very nicely esp. compared with the 2010's
pathetic stock filters, and its stability and audio quality in SSB
mode make the lack of sideband synch less of an issue.

It's about 4 years since I bought my Yupi, so I decided to take a look at what's available now.

If I was in the market, a radio I'd be taking a closer look at is the Yaesu VX-7R.

It's smaller than most of the others folks have mentioned, and it's a ham HT so it may have better selectivity on HF. It's priced about $10-20 higher than the VX-500 wideband receiver. It comes with a Lithium Ion battery.

Unfortunately, it didn't turn up when I did a quick look at the Strong Signals web site.

I wouldn't get one without checking it's reputation fairly carefully, as the Yaesu VR-5000 looked nice on phosphor, but got lackluster reviews for hf performance.

That's wonderful news! I'm sure this matter has been a burden to the Prophet as the trial date neared. I don't think the Prophet has predicted a major doomsday for the entire year of 2004. This is particularly disappointing since the Prophet predicted two major doomsdays in 2003, Planet X and the Nuclear, Biological and Chemical attacks inside the US triggered by the Iraq invasion. And the Prophet worked in a minor doomsday which caught my interest, the Nuclear destruction of Chicago by Al Qaeda. Also, 2003 had the Prophet digging into his bin of Golden Oldies, and he pulled out his Pope of Rome Prophesy.

Let's all hope a reinvigorated Last Day Prophet of God has an outstanding year in 2005. I'm looking forward to the end of the world every month for a whole year!!

If I spoke French, I could try - this station reaches my U.S. West
Coast QTH about as well as any African station (except beaten slightly
by 9,580 Afrique Numero Uno, 4,845 *Ramadan* Mauritanie and - once
upon a time - Nigeria on 49 and 19 meters). Copy is often clear and
easy.

If you try, the best of fortune, and please let us know how you fare.

The Grundig Satellit 800 also allows tuning with a tuning knob.
The reception circuitry on the inside is the same as the SW8.
Also, the older Grundigs, the Sat 700 and 650, would probably
qualify. I've never listened to them, but I imagine that they've
good audio fidelity.

The Lowe 150 also had a tuning knob.

That is generally a tough verification. Tried here numerous times, but never any luck. My last try was in
January.

Good luck

Has anybody tried out any of those amplified antennas for shortwave and AM radios,are they any good? Any reccomendations? (except those cheapo Tiny Tuners that use a 9 volt battery,I own one of those and I know it isn't any good) I see that CCrane company sells a twin ferrite antenna,are they any good?

The Palstar R30 is a very compact tabletop that can run on 10 internal AA batteries. People with fat fingers say the buttons are a bit too small or close together, but it's got a reputation as a simple radio that performs quite well. They run $575-$650 depending on if you get one or two Collins brand filters with it.

When I was looking for a better "portable", I looked for a Lowe HF-150 Europa - never found one. The regular HF-150's turn up used reasonably often. The HF-150 has appreciated in value over the last few years.

You might find a used AOR AR7030+ for about $1,000. AOR sold a lead acid battery that could fit inside - I run mine off NIMH RC car battery packs - it's a very nice radio.

Otherwise, I'd go with the post '96 Drake SW8 over the Grundig Satellite 800 in part because the Drake has nice build quality, and in part because the Sat 800 is about the size of an "Urban Assault" boom box. A few years back there was a guy named Phil who did a funny photo edit of a Sat 800 to show a built in microwave oven. One of the reasons it was funny is the radio is large enough that you could almost believe it.

I once heard the (then required) national program on Sunday nights. At the time it sounded like it was being shortwaved from Moscow, full of echoes and various other artifacts. I suppose the only way they'd be able to get anyone to listen to that was because everybody was required to run it.

Seems sensible to me. The moral values thing struck me as being an invention of the media (like so many things). I know lots of people who voted both ways, and few of them voted on the basis of whether one would better represent the religious/ethical of the voter. In many ways we Yanks are a very tolerant society, not so much in others.

Personally, I voted for who I thought would do the best job overall for me, which I consider (for lack of a better example) to be roughly mainstream. It doesn't really pay to vote a candidate on a single issue, when we are daily affected by so many issues both tangible and ethereal. With candidates so seemingly polarized, it is difficult to choose, since neither represents very well.

Maybe they are doing just that now - or maybe they're going FM.

It doen't take a great capital outlay or a ton of time to set up a new SW station capable of serving so small a nation. A slightly (or not) modified ham rig and a decent set of wires would do it.

Hmmmm..... given what I've seen, NO WHERE does it suggest he has any formal expertise in child rearing/parenting.
I'd suggest this dude has been sniffing the solder fumes a bit too much. Steve ole boy - get yourself an exhaust fan. The lead is starting to get to you.

While he doesn't proclaim expertise on Parenting on that website, he does seem to lay claims to his own brand of experience in sexual acts. Since he said he would allow his teens to have sex in the next room, I have to wonder if he joined in with his in teaching them? If not to teach or join, to watch and/or film? Some sick thoughts indeed, but hey, that is the avenue he led us down. He has created more questions than he answered. Given what we've seen this far, I have to wonder if he can even do the sexual acts right! Actually, I think he's a pud pounder. Too much time on his hands and LOTS of wishful thinking.

I was "expecting" to see a website regarding Child rearing or something to which he has claimed vast knowledge and professionalism of. I didn't see that. Therefore I must come away with the thoughts that he is a phony. Any PROFESSIONAL - worth a grain of salt would have a website up or some link to his works. NOT divulging his works - shows a shadow of a doubt. HE is the one who made all the claims to be a writer of the topics which were being discussed, therefore it is HE who should back his statements. We are

waiting, and we shall keep on waiting - because it can not and will not ever happen. You know, when the state goes to prosecute someone they've accused of a crime, they must present the evidence. THIS man has made accusations of people he doesn't even know - of them being child abusers, etc. THIS man claims to be someone of stature and professionalism. Since HE is the one making all the "accusations" and claims, it is HE who needs to put forth the proof - not us. It is HIS move - to PROVE without a doubt that those he calls child abusers - are child abusers. I say PUT UP OR SHUT UP. With the way he accuses wildly and lays false claims, someday - he'll be in court for slander/libel and/or defamation of character - or perhaps even a nut house. Stating kids should have bombs, the last choice seems to fit the best. The sooner the better.

Bush got a lot of people to the polls by threatening them with gay marriage. He got them to vote against their best interests by exploiting their fear of the unknown. In the light of day, that's not too terribly moral.

The Bush corporate cronies don't make any money selling any ANTI box
cutter systems to the Feds. They make money by selling them expensive
stuff like anti missile systems. The corporate/government corruption
matrix is SO intertwined now that it's almost impossible to get out of it.

Check out the recent Boeing corruption scandal, with government reps
standing to gain immensely from all the contracts being awarded to the
contractor. If terrorism didn't exist, Business would have to invent
it. It's just plain Good For Business.

'Rogue States'...good grief!

With a GPS, you don't need to know much about navigation - you can go to your target, tell it to remember that spot, and then the GPS will give you an arrow pointing back to that spot from wherever you are so you can get back there. (handy for finding a favorite fishing hole, or for not getting lost in the woods)

I'm not an expert on aircraft navigation, but I imagine fifteen or twenty minutes of life without a functional GPS would cause less chaos than having a jet smack into a crowded building.

Ask M II, he's an expert on most anything. He is, after all, Canadian.

He's worse than a 'rogue state', he's a rogue 'tard boy, much like that David fellow.

Both of them need to spend less time with the 'puter, and more time out in the great outdoors toting their portables.

A licensed pilot will not have a major problem if the GPS is turned
off... they are required to be able to navigate without it. A half
trained terrorist on the other hand may have to rely on the GPS
technology instead of the other, more difficult to master navigation
methods.

From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cpsmf4fua1@titan.btinternet.com>
Source record: 3371

World Music Radio (WMR) is now running full 10 kW on 5815 kHz (till 21 UTC tonight) and again tomorrow Friday when we'll be on the air 07-21 UTC with 10 kW. Then back to 5 kW for the rest of the weekend until Monday morning at 07 UTC.

Finally the connection from the studio to the transmitter site has been fixed and we're now hoping to be on the air without any breaks in the audio.

Well, it's been a long time coming, but the mystery is solved, and can you
believe in the end it was just a TV. I think someone even suggested it may
be a television, and I nearly disregarded the idea for it's simplicity.
Well, it looks like I can finally get back to enjoying my radio as I haven't
in a good while. Thank you to everybody for your help and suggestions. 73,
and now for some good dx.

-Brian

A good question, and I would add specifically, could it be solved simply turning off the TV, did you have to unplug it, or did you use RFI filters or chokes?

Most newer TVs use switching power supplies and some generate bad RFI when just plugged in, they don't need to be switched on. Another source is PC CRT monitors. Same kind of power supply and same kind of RFI. I have a 17 inch Cybervision on PC #2 in the basement and it generates enough RFI hash to render much of the AM broadcast band useless when it's plugged in.

Well, as to eliminating the problem, I just unplugged the thing. I suppose I'll just plug it in whenever we want to use it We generally don't watch much tv and rarely use this particular one anyway. For some reason, it was causing some buzzing about every 130 or so kHz. I'm not really sure why, but the tv was kind of an old one, and not a very decent one to start with. This morning I set the radio on a frequency where the noise was present and turned the gain up so I could hear the radio as I walked around the house. I unplugged just about everything in the house, unfortunately I didn't start with this particular room, and when I pulled the plug on that set the noise vanished. That's pretty much it.

So was it off when it was plugged in?? My problem
only kicks in when the crt gets energized, and chokes
don't help it. (I just wait until the wife goes to bed
to do some serious listening.)

I'll try this one more time with a reduced price before it's off to
eBay...........

ICOM R-5 receiver / scanner, like new condition in box with manual, etc.
This item was purchased from JAVIATION in the UK and again, is a NO GAP,
Euro version. Also includes optional soft leather case.

$180.00 shipped via USPS Priority Mail, insured.

I accept PAYPAL, US Postal money order. I will take a personal check,
but shipping will be delayed until I am 150% convinced it has cleared
without a problem.

eBay feedback under OFFDAN.

E-Mail only, if interested.

Dan

Our large (ish) screen TV wipes out everything from longwave to about
25.200 MHz. I devised a brilliant workaround by installing a powerstrip
behind the TV, to enjoy blessed silence. Other appliances I've known
and hated (for the RFI they generate): Microwaves (even when not
cooking), VCRs (Horrible hash-generators), thermostats, battery chargers,
and almost every PC printer I've ever owned. I think Part 15 should
be better - enforced.

Congratulations, though, on your new - found freedom from the noise beast!

Yeah, the tv was off, but just being plugged in was causing the noise. I'm just glad it turned out to be something that I can unplug and not some huge issue. I do notice now that when my central heat comes on, it makes a bit of noise around six mhz, probably because my antenna is just in the vicinity of the unit. Aside from that all is quiet as it should be.

Virtually every plane still has VOR, and will for some time. GPS is still
not 100% dependable, and there are restrictions as to when it can be used.

Certain gov't agencies have jammed gps frequencies for years for one reason or another. There is also a protocol for falsifying the time transmission. Using this method, you can take a North Korean missle and turn it around to make it hit its home country by making it think it is somewhere that it really is not.

Thanks Steve. This has really made my day. I even had to message my girlfriend at work to tell her about it, which is kind of dumb because she doesn't really care, but she's happy if I am. I can't believe that I overlooked such a simple thing this whole time. Maybe now I can catch some of that dx Steve L. is hearing. He may suggest otherwise, unless of course I'm planning on picking up an R8 sometime soon. :) 73

>Kids go with the wrong crowd to aggravate abusive parents,
>and for no other reason.

I kept my keyboard shut until now.
I can think of at least a dozen examples in my own life, as a parent and friend/family of other parents, where the above claim is simply unsupportable.
In fact, laughably naive and ignorant, more accurately.
It beggars the imagination that there exists someone who pretends to know what's best in parenting yet ascribes to the sorts of stupidity exhibited here.
Steve, you're an angry, abusive, foul-mouthed screamer. You have NO leg to stand on where anything required of being a decent person (let alone raising a child)) is concerned. You have no credibility, no self-control, no sense of decency. All you do is blather and yelp, drool and gnash, curse and exclaim, and dig a deeper hole for your type of mentality.
You're one of the single most immature, ill-equipped, emotionally underdeveloped people it has ever been my misfortune to have paraded in front of me.
Your anger, your vitriol, are breathtaking.
"Cumwad", "shithead" (multiple times), "sorry piece of shit", really impressive from a 54-year-old parent.
How incredibly ironic... this foul-mouthed raver crying 'foul!' at 'abuse, evil', etc., and then filling every single post with abusive evil.
Someone hurt you a long time ago, in some deep way, and you're still hurting over it. Big time. Deny it, don't deny it, I'm not concerned. You are acting VERY MUCH like an adult victim of childhood abuse or abduction, or something related to the issue about which you are so ravenously irrational.
Either that or you're simply a jerk.
Yep, there are a lot of bad parents in the world.
I've just finished bothering with one of them.
G.P.

I'm certainly rethinking my vacation destination!!

CANCUN, Mexico - Police in Playa de Carmen, just south of the Caribbean resort of Cancun, reported finding a suspect passed out next to the sliced-up remains of his companion, a man whose heart he had allegedly carved out and set to cook on a stove.

The corpse was discovered Tuesday in a hut where the victim had been hung up to allow the blood to drain out of his body, according to Luis Herrera May, head of police investigations in Playa de Carmen, about 36 miles south of Cancun.

Classic.
Count on your kind of fool to exaggerate and miscomprehend completely
anything of value ever told to you.

One: Kids who are loved WANT to go to school.
Two: Rescue is permitted IF you apologize for it.
Three: Actual freedom is never misinformed. The nature of freedom
is that of informing.

You're trying to extract neurotic delinquents raised by idiots like
you and insert them into my recommendations.

That would be about as stupid as expecting you to grasp anything you
haven't thought of yet.

Still, as A.S. Neill showed by his life's work, such neurotic children
as you produce can be reversed simply by the method of honoring what
are their, at first, warped and non-productive motivations. It simply
takes a while for them to realize they are no longer being abused.

-- Use this CD-ROM to find shortwave broadcast stations worldwide, plus utility stations from 0 to 30 MHz!

Broadcast database: 9,336 entries with the latest schedules of clandestine, domestic and international broadcasting services on shortwave. Compiled by top experts in this field with the assistance of more than 100 experienced collaborators and monitors worldwide.

Utility database (Red Cross, United Nations and more): 10,092 special frequencies from the international bestseller "2005/2006 Guide to Utility Radio Stations." Plus 930 abbreviations and 20,224 formerly active frequencies, all on one CD-ROM. Browse through all that data in milliseconds, and search in next to no time -- even combined! -- for specific frequencies, countries, stations, languages, call signs, and times as well. It can't get faster than this! Includes the superb digital data decoding shareware program RadioRaft by French radio amateur F6FLT, and 321 new WAVECOM digital data decoder screenshots in original format with full colors. This product is based on 36 years of experience in the radio monitoring and publishing field!

Easily connects to leading receiver control programs: controlling your equipment by means of this frequency database is now only a mouse-click away! A powerful concurrent full text word search is included, too.

Great for the international radio listener, a businessperson or a tourist traveling worldwide, a professional monitoring service, or a circumnavigator sailing around the globe: This is the way -- just a few keystrokes and you have it all!

CD-ROM for PCs. Runs under Windows 3.1/95/98/2000/ME/NT/XP. © 2004 by Klingenfuss Publications, Germany. #9528 -- $29.95

> happen.

You can be sure of that, and you can persist in your pop-delusions
about what actual professional writers do.

> You know, when the state goes to prosecute someone they've accused
> of a crime, they must present the evidence.

That's the State, in court.

> THIS man has made accusations of
> people he doesn't even know - of them being child abusers, etc.

Yes, but of abusing children according to what *I* define as abuse.

> THIS man
> claims to be someone of stature and professionalism.

Nonsense, just knowledge and experience. You continue to re-delude
yourself as to what I've said.

> Since HE is the one
> making all the "accusations" and claims, it is HE who needs to put forth the
> proof - not us.

I tell you what I believe abuse is, and then I note who says they do
that and call them an abuser. No proof is needed, THEY ADMIT IT!

> It is HIS move - to PROVE without a doubt that those he
> calls child abusers - are child abusers. I say PUT UP OR SHUT UP. With the

I am not sure why Lowbander DX-394's sell like hotcakes for $250 plus shipping when for a few $$$ more they can get some real outstanding receivers from other manufacturers. a used satellit 800 is $320 from universal when they have them in stock and it is a much better receiver with a warranty !

he includes some wire and a clip for an antenna and also a junk box speaker but still ????????

what do people see ? are they that taken in by his BS writeup of how his mods walk on water...he makes a big deal out some BB's in the tuning knob !!!!!!

clue me in people,,,,,do I want one of these ????? is it better than an R-8B ?????

What a devastating judgement for the Government. This passage by Lord Hoffman sums up the essence:

"I said that the power of detention is at present confined to foreigners and I would not like to give the impression that all that was necessary was to extend the power to United Kingdom citizens as well. In my opinion, such a power in any form is not compatible with our constitution. The real threat to the life of the nation, in the sense of a people living in accordance with its traditional laws and political values, comes not from terrorism but from laws such as these. That is the true measure of what terrorism may achieve. It is for Parliament to decide whether to give the terrorists such a victory."

And quoting Lord Devlin many years earlier:

"The first object of any tyrant in Whitehall would be to make Parliament utterly subservient to his will; and the next to overthrow or diminish trial by jury... [It] is more than an instrument of justice and more than one wheel of the constitution: it is the lamp that shows that freedom lives."

We now have a Parliament that does whatever the ruling political party wants, and a Government planning to limit trial by jury...

More info

MEXICO CITY, Dec 15 (Reuters) - A Mexican man killed his lover in a drunken, drugged fight then cooked the man's body in tomato and onion sauce and ate it over three days.

Police found Gumaro de Dios Arias grilling rotting human flesh for his breakfast, including part of a heart, when they raided a shack he lived in near the Caribbean beach resort of Playa del Carmen, a police chief said on Wednesday.

"He was preparing stews. There was a grill where he was cooking part of the heart and bits he had cut off the body. It was terrible, terrible," said local police chief Martin Estrada, who was among a dozen police who raided the shack.

No, courts can't do that. If a court finds that something is illegal, then
it is finding that someone broke a law, it is not making a law.

I feel like apologizing right off the bat since I know this question must be asked regularly in this group. I've searched the older posts but still had questions.

I work in CT, about two hours from both NY and Boston. I'm on the lower floor and get mediocre AM/FM reception in my office from my run of the mill boom box on my desk. I was looking for a replacement radio and in the course of doing a search online found listings for WB radios. The idea of being able to receive not only the CBC news (being an refugee Canadian) but also getting the BBC and other news sources intrigued me. That of course left me with more questions than answers.

What I'm looking for is a decent radio I can keep in my office. I don't travel much so it probably won't move from its spot on my desk. I'd like to keep the price below $200 if possible. I'm not sure what I can expect to hear. Might I be able to pull in stations from Europe with a radio in that price range or will I be limited to those that are getting some form of enhanced reception on the eastern US seaboard? Since I'll be at work I won't be spending much time fiddling with dials to pull in too many really esoteric stations, but getting news directly from the Middle East or Japan on my desktop would be amazing.

From the research I've done I looked at the Sony 2010 (a used one, although most of the ones on Ebay appear to be pretty old models, very low serial numbers). I also saw good reviews for the Grundig YB 400PE, which I can pick up new for less than the used 2010. Any other suggestions? Also, if reception turned out to be poor, would I most likely have to run some sort of wire attenna along my wall to my window for better reception?

Thanks in advance for any information. If I get responses fast enough maybe I can sneak this in as a late Christmas request. heh heh...

Not true at all. Take a basic college political science class. You are
talking about statutory law. Our constitution and many laws are very loosely
written in order to stay relavent. It is the job of the courts to take that
framework and interperet what is legal and illegal. This is called common
law. Once a ruling is made, stare decisis requires other courts to apply
this ruling to any similar cases.

I have a Sony Wega 20" in the room adjacent to the computer/radio room. The interference generated by this tv being turned on (my wife watches it all the time, unfortunately) is mind boggling, especially on the 41 and 31meter bands (7 & 9 mhz on my Icom R71A receiver and longwire antenna. What exactly did you mean when you said you installed a "powerstrip" behind the tv? The Sony 20" tv is plugged into a hefty surge protector. Plugging into the wall outlet directly vs into the surge protector outlet strip does not affect the massive amount of rfi it generates on the aforementioned bands (wipes them out completely). Any suggestions? Please define what you mean by "powerstrip behind the tv." Any help would be much appreciated. Thanks.

You sure that it is the switching power supply and not the high voltage
circuits? I have a Philips 107T5 (17") that gives interference around 1500
khz and not around 700 khz. I am running in 1024x768 at 85 hz, and if I
change to 75 hz, for example, the interference (a high pitched whine)
moves. The radio is about 4 feet from the monitor. Over 10 feet there is
no interference at all.

The mediocre AM/FM respetion is almost certainly due to the fact
that you are in a steel frame building - no? That murders radio
reception sometimes (most of the time, in fact).

> I was looking for a replacement

The BBC would be no problem, if the type of radio you were looking
for was in your own home. CBC news is tougher - none of the few
Canadian SW outlets are terribly strong. Fine sometimes, weak or almost
nonexistent others. And I'm in a wood frame building in Michigan with a
longwire antenna hooked to a very sensitive receiver!

> What I'm looking for is a decent radio I can keep in my office. I

With any of the radios you mention below, when reception conditions
are good, you can occasionally do all of the things you hope for. But
again - in that steel frame building . . .

> Since I'll be at work I won't be spending much time
> fiddling with dials to pull in too many really esoteric stations, but

Both are good radios in your price range, and might well give you the
results you are looking for on a whip antenna *when you are at home*.
But in a steel frame building, I doubt it.

Remember, others here may have more hopeful info for you - keep
checking this thread. And god luck to you, jwilliam.

Tony

RS,

I feel that Canadians should be focusing on Building a Better Canada
and criticizing Canada's shortcomings.

But, MII like a few 'other' posters who claim to be Canadians,
seem to be focused on being a constant critic of the USofA.

As to your statement: "I'm a nosy piece of shit."
This may be a 'personal' assessment of yourself
- but I do not know you well enough to make that statement.

Hi all

I know many listeners will have heard the various numbers stations and similar stations on the short wave bands from time to time.

I have looked around the Internet and noted that the sources of these transmissiosn are generaly attributed to overseas countries.

However Australia, like other countries has its own secret services. Have Australian short wave listeners heard numbers transmissions which have been strong enough to have been attributed to an Australia source? Ie is there a sort of numbers Radio G'day out there?

If so it would be an interesting exercise to get some beam headings and see where the transmissions are coming from. A sort of mega foxhunt.

cheers Peter

I found out a while ago that most people are extremely dumb. Yes, the vast majority of the people are easily taken advantage of. Many people like us feel most other people are just as astute as we are. And yes, many are way smarter then us.

But in my readings and seeing things go down in this world, I'm totally amazed at what I see.
In fact, you read about well known people get taken for millions. Here is another example of people who are just plain, well....morons.

I mean how hard is it to go to the company's website and at least try to compare prices on the net? How about free shipping? How do I get it? I see CPU's selling for much more then on most of the well known vendors on the net.

I know one thing. People were sure a lot smarter even 10 years ago. As our public schools keep sending out illiterates in this world, who can't get a 40 grade on a test {yes 40 is passing for it where 65 was passing for us way back} and they get to take it 5 times too. These are our future medical technicans, FBI etc.

These kids are our future morons. And this is what the gov't wants. An elite class that goes to the best schools and get the best education, while the rest of our society are the servant class.

The Gilded Age has returned. In fact, this PR for fat cats even uses the world ''gild''. This country was started by rabble-rousers who hated the idle rich and old money. Georhe Bush wants to reverse the American Revolution and return this country to the British East India Company's heirs.

''D.C. hotels gild inauguration with deals up to $1 million

By BOB DART
The Atlanta Journal-Constitution
Published on: 12/09/04

WASHINGTON ï¿½ Polish that Rolls. Chill the champagne. Deck out in diamonds and furs.

High-rolling political revelers are coming to celebrate President Bush's second inauguration next month, and hotels are ready.

Consider the Mandarin Oriental's Presidential Privilege package Jan. 17-21. A private jet will ferry a couple from anywhere in the continental United States to the 3,500-square-foot Presidential Suite, which has 14 rooms, including a gym, a kitchen, a game room with leather walls and a parlor with 25-foot ceilings, and of course its own butler.

Mandarin Oriental Hotel
The Mandarin Oriental Hotel's Presidential Suite has a view of the Jefferson Memorial.

Mandarin Oriental Hotel
The Mandarin Oriental Hotel is offering a $200,500 Presidential Privilege package in which a private jet will ferry a couple from anywhere in the continental United States to the capital.

To get around, the couple will have a choice of a Hummer, Maybach or Rolls Royce, with a chauffeur on call 24 hours a day.

There are tickets to "an inaugural event," but don't bother packing. The package includes a wardrobe from Neiman Marcus ï¿½ Oscar de la Renta evening gown and matching Manolo Blahnik shoes, Judith Leiber handbag, emerald ring and full-length mink coat for the lady, and a Kiton tuxedo, Burberry reversible coat, 18- carat gold Cartier watch and jeweled cuff links for the gentleman.

The couple will host a private, five-course dinner party for eight guests prepared by the hotel chef and sommelier. Every evening, they

will be served Krug champagne and Beluga caviar in the suite while they enjoy a panoramic city view.

The cost is $200,500 ï¿½ not including tax and tips.

If you'd rather go upscale, though, there's the $1 million inauguration package at the Jefferson Hotel, four blocks from the White House.

What inspires such excesses of luxury? Inaugurations traditionally provide the biggest boost to the capital's hospitality industry.

"There will be some times during the year when we have more people in the city ï¿½ the Fourth of July, for instance ï¿½ but for sheer impact in hotels, retailing, restaurants and transportation, this is our No. 1 event," said Bill Hanbury, president of the district's Convention and Tourism Corp. "It brings in $50 million plus."

That generates luxury hotel packages costing tens of thousands of dollars, many with presidential themes.

The $1 million Jefferson Hotel package, in addition to most of the Mandarin Oriental's features, includes his and hers gold Presidential Rolex watches with diamond dials (hers comes on a diamond bracelet) with a private fitting in the hotel's Presidential Suite. The couple will pick out their ballroom garb from Saks, and the lady gets a matching diamond necklace, earrings and bracelet set from Tiffany's.

The guests get a private tour of the exhibit "Jacqueline Kennedy: The White House Years." This entails a second jaunt by private jet, because the exhibition is in Chicago.

There the guests will spend one night in a suite at the House of Blues, eat a dinner for two inspired by JFK's inaugural dinner and splurge at a private shopping spree at Marshall Field's.

Or consider these deals, at $150,000 or less:

ï¿½ The Fairmont Hotel wants its guests to experience being "president for a day" and "first lady for a day," so its package includes two actors portraying Secret Service agents. In their Presidential Suite, the couple will host a "state reception" for 10 people, who will sip Dom Perignon champagne and eat Beluga caviar. The cost is $10,000 per night, with a four-night minimum.

ï¿½ The Sofitel Hotel on Lafayette Square across from the White House will fill its Presidential Suite with fresh yellow roses for four days for its $75,000 Don't Mess With Texas package. Upon check-in, the guest couple will have vodka martinis flavored with habanero peppers and Texas beef carpaccio served in their suite. There's a keepsake honoring the Lone Star State's favorite son every day ï¿½ sterling silver spurs engraved with the inaugural logo, eight four-piece place settings of official White House china, and his and hers Tony Lama snakeskin cowboy boots and gold Cartier watches with an inauguration

inscription.

ï¿½ For $100,000, the Four Seasons is offering a Whistle Stop Tour aboard Amtrak's high- speed Acela, which runs from Boston to Washington, with stops in New York and Philadelphia. Guests get limo tours and luxurious treatment in stays at Four Seasons hotels in all four cities.

ï¿½ With the Ritz-Carlton's $150,000 Presidential Package 2005, you'll get personal service a president might envy. In a nice touch, a butler will fly to the guests' home to pack for the trip ï¿½ in an included $20,000 set of Louis Vuitton luggage. The butler will remain on call around the clock in Washington, along with a chauffeur and personal massage therapist. Parts of the package serve a full four-year term: two weekend stays at the Ritz-Carlton every year until the 2009 inauguration, and a Hermes scarf for the lady and Hermes tie for the gentleman every month until the next president is sworn into office.

Information

ï¿½ Washington Convention and Tourism Corp., www.washington.org. ''

I'll do better than that -- how 'bout law school and 16 years of practicing law? Your original statement was, "If the courts rule it is illegal, then by definition it is illegal." That's wrong. Courts don't have freedom to make law, they interpret areas that specific laws don't explicitly cover, and those interpretations become binding precedent if they are decided by the highest court in that jurisdiction. In the case that started this whole thread, the court did not find any activity to be illegal, it simply applied the Fourth Amendment and the exclusionary rule that developed in case law to enforce the Fourth Amendment. It did not determine for the first time that anything was illegal.

All this shrieking about eavesdropping on your kids being illegal seems to be based on the comments of the kid's lawyer, and not upon what the court actually ruled. Washington law requires the consent of all parties to a telephone conversation to consent to its recording, apparently (many states only require the consent of one party). It's not illegal to eavesdrop, but any evidence that obtained in violation of the Fourth Amendment cannot be used to prosecute you criminally.

Interesting that Tivoli has done a radio with digital tuning though.

I like the vernier dial on my Tivoli PAL, but unfortunately, the IF filters are wide enough that if you have a strong signal on each side of the one you want, the radio skips from one strong signal to the next. Its' vernier is more of a look and feel
thing than a useful feature.

The audio is beautiful, but it's not a radio I'd use for challenging signals.

I've got experience with radios in office buildings, so I'll be sending a reply about suitable radios and antennas in a couple hours.

3418. New Sony 7600GR $130 Shipped From J&R

Newsgroup: rec.radio.shortwave

Sony 7600GR $129.99 shipped from J&R. You get free shipping if you'll accept delivery after the holidays. Otherwise shipping is an extra $4.95 UPS ground. Great deal IMO!

3419. Sony SW7600GR Good For Beacons/CW?

Newsgroup: rec.radio.shortwave
Date: 2004-12-17 15:09:49 UTC
From: Charlie Chan <detective@china.net>
Message-ID: <Xns95C26766BFFFcharchandet@127.0.0.1>
Source record: 3417

I'm thinking about buying an SW7600GR to replace both my DX440 and DX398.

I originally bought the 398 as a replacement for the 440, but when it came to beacons, it's performance was disappointing.

So, to avoid that same experience again, I defer to you, the readers of this group:

Is this a good rig for beacons/CW?

Everything else about this radio looks good to me.

Many thanks and much respect,

Charlie Chan

3420. 4.830 BBC?

I've been listening to this frequency since about 1450 and was curious as to it's origin. They id'd as BBC radio 4, but I can't find any information verifying it as a bbc frequency. Could it be another station broadcasting bbc material? Just curious, thanks.

Thanks for your reply. Actually, I may have overstated the poor quality of AM/FM reception in my office. I can get WFAN pretty clearly, ESPN comes in faint and with static, which probably speaks more to the relative strength of their signal than to any issues with reception. I've also added the Sony 7600GR to my list of possibilities after reading some more reviews.

If you're getting mediocre performance in your office from a boom box
at this time, you'll probably be getting the same type reception even

from an upscale receiver. The problem is you need to get the antenna outside of the building in order for either radio to receive better. Having said that -- it's still fun (and necessary) to try. I've tried several radios in my office/building enviroment and settled on the Sony 7600GR. I especially like the 7600GR because it has sync detect capabilities and I've found just this alone will bypass 80% of any whines from office equipments, at least in my enviroment. Understand though: there is an endless debate as to performance of three radios....YB400, Sangean 909/DX398, and the 7600GR. All three are great "portables" -- and it depends on your personal preferences and needs as to which is the best. Regardless, you WON'T go wrong with any of these 3, including the 7600GR. If you check around (and from other posters on this board), a 7600GR can be had for about 130 dollars. A GREAT price! (Normally sells for about 170 dollars or so). It does NOT come with an AC adaptor. The Sony 2010 is a great radio of course, but in my case, I've found it a bit large for work use -- just my opinion.

As for receiving the CBC and shortwave in general in an office enviroment during day hours; well maybe not much luck, but there are many foreign relays via Canadian transmitters that you should have no problem receiving in an office. I'm in northern Ohio and they come in like local at work with the whip simply extended. (I work nights by the way). Right now, while typing this at home, I'm listening to Radio Austria on 13675 which is relayed through Canada. You "should" be able to pick this station up during the day hours while at work. As for Canadian broadcasts, you still have Radio Canada Internationl, and there's also a neat little frequency during the day hours, 6.070 that is a simulcast of CFRB and you have a good opportunity of picking that up during day hours in an office.

Well, too much said already. My recommendation would be to try the Sony 7600GR, especially if you shop around a little and get that 130 dollar price. A very good deal and you won't be disappointed. Let us know if you get any SW radio. Good luck!!

| I think Part 15 should be better - enforced.
|
|
| Yea and the sad part is. Most of these fixes to appliances are cheap to do
| when they're being built. A simple cap, bulun, sheilding etc.

Precisely. A handful of ferrite beads, plus conductive silver spray,
has allowed me to eliminate 95% of the RFI from my immediate
listening environment. I think the electronics manufacturers are
engaged in a race to the bottom, in terms of engineering quality of
their collective product.

One of the bright spots on the RFI horizon was the gift of an LCD
monitor from my brother in law (wedding present) a couple of years
ago. Glass CRTs are fast becoming unavailable, and that is one
"solid-state" trend I heartily support.

| Dick
| Bremerton, WA

Well, Dick, it's basically an extension - cord - box thingy with an "on/off"
switch.
Sadly, I don't want to climb into the back of the TV because it's still
under warranty.

I can definitely commiserate with you, though, because my experience is very
similar
to yours. I found that building and installing a rotatable coax loop did
wonders to
eliminate the noise, due to the fact that the loop allows me to "null" the
noise. I
was considering getting an MFJ antenna "noise canceller," but after building
the loop,
I decided that would be a waste of time.

According to Primtetimeshortwave.com, Voice of Africa should have been broadcasting in English this morning from 1600-1700 on 15220 and 17840 khz. However, while Voice of Africa (or what I believe to be Voice of Africa) was using these frequencies, the broadcast was not in English.

I heard an English language broadcast from Voice of Africa not long ago, but the schedules I consult never seem to be correct. Very frustrating.

It's a step in the right direction, but I'm going to wait. A few years ago I bought a small laptop with a ten inch screen. Within a few months, it had five or six dead pixels.

The computer was still completely usable, but seeing those dead spots started to really bother me. A CRT will either work or not work, plus the colour rendition in Corel Draw and Photoshop is still superior to the LCD. That's important to a lot of people

I like the smaller depth of the LCD screen and the much lower power consumption, but I'll be waiting for a year or two yet before committing.

mike

|
|
| It's a step in the right direction, but I'm going to wait. A few years
| ago I bought a small laptop with a ten inch screen. Within a few
| months, it had five or six dead pixels.
|
| The computer was still completely usable, but seeing those dead spots
| started to really bother me. A CRT will either work or not work, plus
| the colour rendition in Corel Draw and Photoshop is still superior to
| the LCD. That's important to a lot of people
|
| I like the smaller depth of the LCD screen and the much lower power
| consumption, but I'll be waiting for a year or two yet before committing.
|
|
|
|
|
| mike

Well, if you're handy, conductive spray paint and ferrite beads can be
enormously
helpful - are you experiencing RFI from the CRT?

73,

An R75. After the bbc programming it switched to a Republic Broadcasting
Network program. The only thing I came up with for that time and frequency
was AIR, but I'm not sure about the programming.

No idea... I'd say you have some kind of image problem with the receiver. The Republic Broadcasting Network is on shortwave, however, not on that frequency to the best of my knowledge.

You are fighting at least two problems: Noise and trying to get a signal through a steel framed building. If you have a window office, then try what I did with a 2010. Place the radio as close to the window as possible to get away from pc and flourescent light noise. Run a thin wire around the perimeter of the window, held in place with suctioncup cupholders. Magnet wire works great and is virtually invisible.

You should have similar results with a YB400PE or one of the Degen or Kaito 1103 radios.

Chairman of the RSGB Spectrum Forum, Colin Thomas, G3PSM, reports that Denmark has published a plan to allow amateur radio in the band 7100 - 7200kHz from 1 January 2005.

The Polish regulatory authority has agreed that the band 7100-7200 kHz is to become available to Polish amateurs on a secondary basis, effective with the date of bringing into force the new National Frequency Allocation Table, the publication of which is expected in January.

Other countries where IARU member societies have approached their authorities for early access to the extended band include Belgium, the Czech Republic and the Netherlands.

On 19 December, it is exactly 100 years since the Dutch Coastal Station PCH, Scheveningen Radio, was founded. The station closed on 31 December 1998, but on 18 and 19 December the 100th anniversary is being commemorated with special event station PC100H. Look for the station on all HF bands from 160 to 10 metres CW and SSB, except 10MHz, which will use CW and RTTY or PSK31. An operating schedule will be published on the Internet. Further information can be obtained from Hans, PA1HR, by e-mail: hans@remeeus.nl

Congratulations to the American CQ Amateur Radio magazine http://www.cq-amateur-radio.com/ , which celebrates its 60th anniversary in January. Amateurs who have had an association with CQ, as a staff member, contributing editor or author may sign "/60" after his or her callsign in those countries where it is permitted, during the first 60 days of 2005. Certificates will be available for certain numbers of contacts made with these stations. The CQ club station WW2CQ will also be activated from various parts of the United States during the special event period. Complete rules for the 'CQ Gang' 60th anniversary activity are in the December issue of CQ magazine and on the magazine's website.

I think the suggestion about the Superradio is due to many not having
experience with anything better, and there's then an almost knee-jerk reaction
everytime someone asks "what's a good AM/FM broadcast radio".

The Superradio is a fairly traditional single conversion receiver with
a 455KHz IF for AM. I gather they don't even use a ceramic filter in
the AM IF. It can't be all that great. The big thing is that it has
a decent speaker for a portable, and a longer loopstick which may or
may not help reception. It's analog tuned.

The YB400 is double conversion, has digital tuning, and the circuitry intended
for good shortwave reception is used in the AM broadcast band. It has
two IF bandwidths, and it's pretty likely that the ceramic filters used
will provide better skirt selectivity for AM broadcast band reception.

In other words, if you have the better receiver the Superradio likely
won't add anything. And if you have nothing, the reason the Superradio
gets mentioned is because it's not as expensive as something better, and
many stop at the SUperradio.

I am tempted by the YB400 this week, immediately for the AM broadcast
band coverage. I could make use of the better selectivity. I use a
Delco digitally tuned car radio as my bedside radio, and it is a pretty
decent radio. If it used a 455KHz IF instead of a 450KHz IF, I'd pull
a ceramic filter from a CB set to get better selectivity, so I could
once again receive WBZ (I lost being able to receive it some years back
when a local 1040KHz station started up; the selectivity on the Delco
is good, but not good enough for this case).

There were 3 analog versions and one digital. The SRIII is an
excellent receiver for the money and the sound is quite full. Most
discussions about what makes a good receiver focus on selectivity and
sensitivity. The ability to clearly hear what is being said is at
least as important when id'ing a station and the SRIII shines in this
area. But because they only cost $40.00 expect that the dial will be
inaccurate, controls to not feel like a Sony 7600RG, etc. Here is a
link to a lot of information on the series, modifications, etc. Best
of luck. I'm going to get one to use around the home, while gardening,
etc.
Here is a link with some detailed reviews, lists of mods., etc.

3453. Santa on air!

Dear All,

we kindly would like to inform you about the schedule of Pan American Broadcasting using shortwave transmitters of T-Systems in Germany:

Target Middle East:
Saturdays, 1400 to 1430 UTC, 13820 kHz, program name "Sedayeh Mohebat - World Radio"
Saturdays, 1445 to 1500 UTC, 13820 kHz, program name "David's Mighty Men Evangelism Team"

Sundays, 1500 to 1515 UTC, 13820 kHz, program name "Waymarks"
Sundays, 1530 to 1545 UTC, 13820 kHz, program name "Victory thru Truth" starting 02. January 2005
Sundays, 1545 to 1600 UTC, 13820 kHz, program name "God Speaks Today"
Sundays, 1600 to 1630 UTC, 13820 kHz, program name "Bible Says"

Target India:
Sundays, 0030 to 0045 UTC, 5945 kHz, program name "Bold Bible Living"
Sundays, 1430 to 1445 UTC, 13820 kHz, program name "Banner of Truth" starting 02. January 2005

Target Moskau, Russia:
Wednesdays, 1630 to 1645 UTC, 6015 kHz, program name "A Brighter Day Ministries" starting 05. January 2005

Please feel free to forward this schedule to anyone and DX Clubs whom you like.

Any reception report would be highly appreciated. Feel free to send it directly to PAB under:
cjung@panambc.com
and under CC to ralf.weyl@t-systems.com

Warm wishes for Christmas and a Happy New Year,

Best regards from Juelich

Hmmm. I don't know. I did hear them on 15660 khz about a month ago. They IDed (in English) as Voice of Africa, had some news and news analysis, all of which was harshly anti-American and anti-Israeli (much harsher than what you might hear on IRIB, for example). I made a mental note to find them again, but haven't been to find another English broadcast. Maybe English was dropped.

Steve

Hi

I'm also in Connecticut, and I've got some experience with setting up
radios in offices.

The inside of a typical commercial building isn't a good place to find
the signals you're looking for. Masonry walls have rebar, wood frame
office buildings often have foil lined insulation. Apparently, when
they design these buildings, suitability for radio listening isn't high

on the list.

If you can't get decent MW reception with a good portable, don't expect much shortwave reception either, unless you do something about an antenna.

The antenna is at least 90% of the answer.

For lower frequencies, something like a Quantum Loop is probably your best bet for a desk top antenna. Other companies have made similar products over the years. Unless you get very lucky, they are likely to put you over budget.

For an in the window antenna you can get very thin coax if you want to hide the wire, or you could choose coax that looks like a network cable if you'd rather try to have it "blend in". Hook it up to a big loop of wire that goes around the perimeter of the window. The wire for the loop can be anything from thin magnet wire to the foil tape they use for burglar alarms.

If you can put up an antenna outside, you can couple your radio to it with a capacitive link so you don't need to drill a hole in the wall. It's as simple as a square of foil hooked up to your coax on one side of the window, and another hooked up to your antenna lined up on the other side of the glass.

For the radio, I use an old Standard STR-428. You're not likely to find one for sale, but it's a 1970's vintage commercial marine radio. Not a lot of dials or controls, but it's quite sensitive and it's the sort of thing clients will ask about.

The difference between a good inexpensive portable and a high end tabletop radio isn't likely to be nearly as significant for your office as the difference between a whip antenna on your desk and an antenna that's away from the metal shielding that seems to be hidden in the walls of just about every commercial building.

Popular portables worth looking at include the Degen 1103, the Grundig YB400 and the Sony 7600gr.

Good luck.

We are saying the same thing here in two different ways. Since a court is
charged with determining the legality of an activity in question, then in
essence, if there is no prescedent, they are determining whether or not that
activity is legal or illegal. That activity is then, essentially, deemed
"illegal". I am not trying to imply that a court can write statutory law.

I'd bet that SRII could fetch more than the price of a new SRIII if it's in decent shape. I guess prices like $300.00 for an RF-2900 shows there still is a real interest in shortwave radios...especially if they are retro styled and in very good condition. I enjoyed a Panasonic RF-5000b I found at an estate sale a while back. The hunt is much fun as the "kill" so I'll keep trolling the estate sales for bargains.

I remember playing with an RF-2900 and RF-4900 at EEB in Vienna, Virginia when the radios were new! Sheesh!!!!

Source record: 3463

Hi everybody,

I just got a Degan 1102 today. What a great radio, I've been listening to it for a couple of hours so far. Anyway, the 220v converter that came with it got busted up during shipping. I didn't really want to deal with returning it just for the converter so I figure I'd go pick up one of those universal ac adapters. If I stick with the 6v 300mA will it be ok? I don't know if going with a 110v adapter would make any difference but I just wanted to make sure before something blew up. What about the size of the plug that goes into the radio? Will it fit?

Thanks,

Xavier

If the Degen is looking for 6v dc then whether it comes from a 110 or 220 volt power supply is irrelevant. The important point is whether the center pin in the connector is negative or positive and whether you can find one to fit. At one time RS sold power supplies with changeable tips, so you might check with them. Also make sure the power supply is rated to just a little over the needs of the radio. Let me know what you find. I have a 1103 on the way.

HJS,

Since it was described as "OOP" {Opened Otherwise Perfect}
Like New [Mint] with the Original Box, Documents and Accessories.

This eBay Auction for this "Classic" Radio had to be viewed as a
"Collectors" Sale. Many 'collectors' will buy several radios with
'extras' over the years to acquire a Complete Radio "Like New"
In-the-Box; with Complete Documentation; and Full Accessories;
and the 'collector' will spend a lot more.

Here some Lucky Collector, got a Deal an found EVERYTHING in
One-Package for a Good Price.
[Remember that the Mind Set and Motivation of a "Collector"
is different the 'average' Radio Enthusiast.]
- The One - Wants To "Possess" THE RADIO !
- The other - wants to 'use' the Radio.

Enjoy Listening to 'your' Radios and . . .
Dream of the 'possibilities' that a New Radio
will Bring to Your Listening Enjoyment :o)

.

the "analog" jog dial lets you tune thru the memories in sequence, #00...FF, including the hex memories (e.g., #0B, #0C, ..). You can use the numeric keyboard to jump to a particular numeric memory (0 to 99) but not the hex memories using A thru F letters as there are no keypads for these hex values ;-) Besides the 256 memories, the degen also remembers where you were last time in each band, hence the 268 or whatever memories being claimed.

I have mainly BBC (local FM) and FM stereo stations on the first bank, making it easy to jump between the stored in memory stations (e.g., with jog dial). A nice feature is that mixing SSB/CW stations with FM is easy as the memory records not only the frequency but also the modes used etc.

You can directly program in a frequency and jump to it. So I haven't tried to use the full 256 memories, it is too easy to just punch in a frequency or dial it up, or use the band scanning features to scan up or down each band for activity.

lots of radio for modest $$, lots of fun too ;-) bobm

I'm surprised it took this long. The real risk comes from using the cell phone more like a tiny laptop. A virus could be set to dial and download any stored information, including lots of personal data. We don't think of cell phones as requiring the same security as computers, and yet they do.

YFBE,

The Tivoli "Song Book" sounds (reads) like a nice Travel Radio.
SONG-BOOK => http://www.tivoliaudio.com/pdf/SBook-manual-web.pdf

However, it has good 'quality' FM Radio Reception Listening Features
with "Un-Mentioned" AM Radio reception features.

Most of these so called 'quality' Music Listener's Radios:
- Bose Wave
- Cambridge Sound Works
- Tivoli
all have 'fair' to 'good' FM Tuners;
but have 'very poor' to 'poor' AM Tuners.

Most do NOT have 'separate' External Antenna Inputs for
an AM {External} Antenna and an FM {External} Antenna.

IMHO - For a 'good' Office Radio in a Building that has
low signal levels and High RFI/EMF Noise Levels:
The Radio needs 'very good' AM & FM Tuners and separate
External AM & FM Antenna Inputs and two Antennas;
- one designed for FM (Very High Frequency) Radio Reception
- the other designed for AM {Medium Wave} Radio Reception
+ READ - Three Different Bands AM/FM/SW and Three Different Antennas

Body handling: HTML body converted to readable text

Very nice find. Follow the link to see full description and photos. Awesome Receiver!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5737960093

SONY ICF-2010 AIR/FM/LW/MW/SW PLL SYNTHESIZED RECEIVER. Excellent working condition. Near MINT cosmetics. Serial # 60968. Extremely well cared for. Include original SONY 2010 Manual as well as the extra inserts on Aviation Guide, Sticky Tip sheets and the SONY WAVE HANDBOOK that lists hundreds of station frequencys and calls all over the globe. 125 pages worth of the 1985 edition.

AWESOME receiver. Just awesome, and this one is so clean, so well cared for. Like New! Has some incredible features. Runs on 3 D batteries and 2 AA batteries. It may also be powered by a DC 4.5 volt adapter which is not included in this auction.

Here is some technical data:

The Sony ICF-2010 receives AM, FM, shortwave and the VHF aeronautical band, seldom found in other portable receivers. Direct access tuning is provided along with a multifunction LCD digital readout for unsurpassed convenience and accuracy. 32 Memories can be accessed via just one keystroke. A conventional tuning knob is provided for manual tuning. Convenient scan and memory scan tuning modes are also available. Continuous coverage from 150 - 29999.9 kHz in AM/SSB/CW and 76-108 MHz in FM is provided plus VHF air (116-136 MHz). Dual PLL quartz frequency synthesis insures exceptional accuracy and stability. The LCD readout on shortwave reads out to 100 Hz (e.g.: 13973.4)! A switchable 12/24 hour clock is featured as well as an advanced program timer that can be set to turn the receiver on and off up to four times per day tuning in up to four different stations! Switchable wide or narrow IF bandwidth can be selected to minimize adjacent channel interference. Synchronous tuning locks in on weak stations. Record and earphone outputs are furnished. With built-in ferrite bar antenna for longwave and medium wave (AM) and a telescopic antenna for FM, shortwave and VHF-AIR reception plus external antenna jack.

US buyer pays only $18.00 s/h, International bidders may be more. Thanks for looking and do enjoy your bidding

Sony ICF-2010 World Band Receiver short wave radio

MSH,

Three 'different' Radio Bands and two to three 'different' Antennas

1. SW - For 'improved' Shortwave {SW} High Frequency Radio
Reception try a simple Random Wire Antenna .
OR - Try an On-the-Window Shortwave Antenna that is 'taped' to an
outside looking Window. Keep the Antenna Wire element about
3"-6" away from the Frame of the Window.

READ - Three Different Bands AM/FM/SW and Three Different Antennas
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1038

* On-the-Window Random Wire / Loop Antenna
for 'portable' Shortwave Radios
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/964

The Sony AN-LP1 Shortwave Antenna
and the Crane {Justice} AM/MW Antenna ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/849

* Try a Compact 'portable' Shortwave Reel {Roll-Up} Antenna
for 'improved' Reception and Mobility
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1687

* Consider the Shielded & Magnetic Loop Antennas
for Shortwave Reception
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1539

* Two Vertical "Drop" Antennas for Tall Building Dwellers
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1535

* Thru the Window Antennas for Shortwave and Medium Wave
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/653

2. FM - For 'improved' FM Radio Reception try a simple FM Folded
Dipole
Antenna that is 'taped' to an outside looking Window. Keep the
Dipole about 3"-6" away from the Frame of the Window. Or try
placing the Dipole on the Window at a Diagonal Corner-to-Corner.

+ READ - FM Antenna Ideas

Is it one of a kind????

Lovely early home audio center, but not at that price. There are too many other good looking receivers that are comparably styled and have the same deep sound for a fraction of that price.

Replace the TV with an LCD display. The Horizontal oscillator
operates a literally watts, and that nice saw tooth wave form
generates a very generous supply of harmonics. The problem with most
TV's isn't conductive as much as radiated..

True, that works but isolating the RF is elementary. Bad building practices
are no excuse for ditching CRTs. I myself like the the resolution and
clarity CRTs can display. Were talking about junk not bad technology.

>mods that have been done to this radio and a description of the radio:

Ever notice that the longer the description the higher the price? I had one of the 394s myself, and although I liked the looks and some of the features; in other words I can't afford a really good radio; I found that my DX-390 was a superior radio without as many goodies. As others on other groups have said ; if you have to do that many mods to the radio it couldn't have been that hot to begin with. No offense to the poster; just an observation.

In 1978 I tried out one of those over priced over rated ccrane radios
that Art Bell and George Noory tout so much.That radio didn't pick up
any better than any of my many,many other old radios (and they also tout
it as having better sound quality too,that is 100 percent pure BS!) I
own so I sent it back to ccrane and then I tried out one of those
Sangean top of the line shortwave radios.That radio didn't show me
anything either so I sent that over priced over rated radio back to
ccrane too.

Please make the location Gangtok, rather than Srinigar...
SNIP----

And also note, that the region is part of India since 1967 or 1968, so you heard a station in India, rather than a separate country. Unless this is your first log from India, you can not count it as NASWA country 235 confirmed in your logbook.
It still might be quite a DX catch, though, so, congratulations! and Enjoy!

No interference problems at all. I've been lucky in the computer components. A TenTec 320 sits about four feet from the right side of the monitor with NO problems. There is a coax going to the attic and from there to the end of the house, where a longwire goes to the garage peak.

Some others haven't been so lucky. I've read of a gentleman who had to use a much longer serial cable to distance the radio.

I have the coax shield grounded at the connection to the longwire

I hate to be the bearer of bad news to you, but it is indeed a separate NASWA country. It may be a 'part' of India, but under NASWA rules it was and will remain a distinct radio entity.

I suggest you check the NASWA List:

http://www.anarc.org/naswa/list/

Look under India on the list.

SB PROP @ ARL $ARLP052
ARLP052 Propagation de K7RA

ZCZC AP52
QST de W1AW
Propagation Forecast Bulletin 52 ARLP052
>From Tad Cook, K7RA
Seattle, WA December 17, 2004
To all radio amateurs

SB PROP ARL ARLP052
ARLP052 Propagation de K7RA

The 7-day averages for solar flux and sunspot numbers declined this week, and the averages for geomagnetic A index rose. The average daily sunspot number declined over 19 points to 26.9, and average solar flux was down over 8 points to 88.7. Sunspot counts have been quite low, and will continue their retreat for about 2 more years.

If you look on page 12 of the latest edition of NOAA SEC's weekly Preliminary Report and Forecast of Solar Geophysical Data (for this week see, http://www.sec.noaa.gov/weekly/pdf/prf1528.pdf , and the index at, http://www.sec.noaa.gov/weekly/index.html) you'll observe the predicted smoothed sunspot number for this month is 30, December 2005 is 10, and the lowest value is 5, projected for December 2006 and January 2007.

Following the December three years from now, in 2008, the monthly sunspot count for cycle 24 should increase rapidly. But in between will be some long spells with no sunspots at all. It is interesting to note that the longest period of 0 sunspots in recent memory was a little over 7 weeks during September and October of 1996, and the next low period we are talking about predicted for the end of 2006 is about 10 years after that.

Average sunspot cycles are about 11.1 years long, but have been as short as 7 and as long as 17 years. The average rise from minimum to maximum takes 4.8 years, and the average decline is around 6.2 years, so cycles rise faster than they decline.

The most active day in terms of geomagnetic indices over the past week was Monday, December 12, when a robust solar wind stream drove the mid-latitude A index to 24, the planetary A index to 36, and Alaska's college A index to 48. The quiet period this week was 2-3 days later on December 14-15 when the mid-latitude A index was 4 and 3.

Over last weekend during the ARRL 10-Meter Contest, Sunday had worse conditions than Saturday. There were periods when I couldn't hear anything from Seattle on 10-meters except stations in South America. This was the north-south trans-equatorial propagation commonly observed during periods of high geomagnetic activity. It isn't a case of propagation being enhanced over the north-south path, but this might be the only propagation mode available.

Our earth is now passing through a solar wind stream from a coronal hole. For Friday, December 17 the predicted planetary A index is 20, followed by 15, 8 and 5 for Saturday through Monday. We may expect slightly higher solar flux (which is somewhat related to sunspot counts) with this weekend's flux value around 90. This is expected to rise to around 105 by December 23.

A note from the Geomagnetic Dept of the Geophysical Institute of Prague says December 19 and 20 should be quiet, December 21 quiet to unsettled, and December 18 and 23 unsettled.

If you would like to comment or have a tip, email the author at, k7ra@arrl.net.

For more information concerning propagation and an explanation of the numbers used in this bulletin see the ARRL Technical Information Service propagation page at, http://www.arrl.org/tis/info/propagation.html.

Sunspot numbers for December 9 through 15 were 39, 39, 16, 26, 22, 18 and 28 with a mean of 26.9. 10.7 cm flux was 87.4, 84.8, 89.8, 90.5, 89.7, 89.3 and 89.3, with a mean of 88.7. Estimated planetary A indices were 8, 10, 15, 36, 11, 7 and 6 with a mean of 13.3. Estimated mid-latitude A indices were 7, 8, 11, 24, 8, 4 and 3, with a mean of 9.3.

Hi
I don't know if it's one of kind, but it's in great condition judging from
the looks and what the seller describes. Remember it's 65 years old.
A collectors item. Now these bidders are the real hard core radio McCoys.
Scroll all the way down and look at all the great pictures. It's a pleasure
to look at.

Lucky

65 years old? More like late 1970's early 80's. Still, for a collector of such things it may be worth the price.

No doubt...it is a nice looking radio and a nice piece of furniture too. I understand how collectors focus on and appreciate details that are not apparent to most of us. I was at an auction not too long ago where an attractive but otherwise unremarkable pembroke table went for $350,000 because it had a makers label. Without that label it might not have reached 1/10 that price. The buyer and seller are certainly happy with the radio deal, and that is what counts for them.

3509. OT Social Security: It Ain't Broke So Don't "Fix" It

Newsgroup: rec.radio.shortwave

Carlson, Wash. Post misinformation on Social Security's "solvency" furthered Bush administration's crisis rhetoric

CNN co-host Tucker Carlson and The Washington Post bolstered the Bush administration's crisis rhetoric on Social Security by providing misleading accounts of the federal program's "solvency."

On the December 16 edition of CNN's Crossfire, Carlson purported to "correct" former Clinton national economic adviser Gene Sperling's statement that "Social Security does not become insolvent until 2042." Carlson responded: "In 2018, just to correct you ... that's, again, only 14 years. Benefits will overtake revenues."

In a December 17 article in The Washington Post, after noting that President Bush "said Social Security will be paying out more than it collects" by 2018, staff writer Peter Baker reported that congressional Democrats are "[c]iting different accounting than the president's" to "argue" that under the current system Social Security will "still be solvent for nearly 50 years."

In fact, Sperling is correct in noting that Social Security is projected to remain solvent until 2042, according to the same authoritative U.S. government report upon which Carlson relied: the 2004 annual report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds (OASDI). 2042 is the year that the Social Security trust fund is projected to run out; the year Carlson cited, 2018, represents the time when the program's payouts to retirees are projected to exceed tax revenue. At that time, the government will have to supplement revenues with the Social Security trust fund to meet payment obligations to retirees, but the system will not be insolvent.

The Post's Baker, on the other hand, misleadingly suggested that one's view of when Social Security becomes insolvent is a matter of partisan opinion. It is not. Bush is talking about one thing -- what is projected to happen in 2018 -- and the Democrats are talking about another -- when the system is projected to become insolvent. By conflating the two issues, Baker suggested that the Democrats are being partisan in their assertions about projected insolvency. In fact, Sperling's and the Congressional Democrats' assertions reflect, respectively, the presumably nonpartisan (though the Bush administration is well-represented) Social Security Board of Trustees and the at- least-equally nonpartisan Congressional Budget Office, which projects insolvency by 2052, rather than 2042.

From the December 16 edition of CNN's Crossfire:

SPERLING: I do believe that, even though Social Security does not become insolvent until 2042, we as a country would be better to take on the problem now.

[...]

CARLSON: In 2018, just to correct you, in 2018, which is only 14 years from now, according to the board of trustees of overseers of Social Security, that's, again, only 14 years. Benefits will overtake revenues. So that's actually pretty soon.

From Baker's December 17 Washington Post article, "Bush Lays Out a Plan to Revise the Social Security System":

Bush made clear [in the White House economic conference] that he intends to expend considerable political energy in pushing for a partial privatization of Social Security to help secure the program, which faces sizable shortfalls over the next few decades. By 2018, he said, Social Security will be paying out more than it collects, and over the long term the system faces a $10.4 trillion unfunded liability. ... Congressional Democrats dismissed the conference as a public relations exercise distorting fiscal reality. Citing different accounting than the president's, Senate Minority Leader Harry M. Reid (Nev.) and House Minority Leader Nancy Pelosi (Calif.) argued that Social Security would still be solvent for nearly 50 years.

In this modern day of technology,why not have a shortwave radio at home with a good antenna and control and listen to the radio at home while at work miles away in an office building? www.smarthome.com and some other stores sell devices which can be used to do similar things with computers.Or does that make any sense? OK,I am a dummy and I doubt if I could figure out how to do such things.

My computer monitor is a refurbished 22 inch screen NEC Multisync FP 1350 I bought from tigerdirect.com earlier this year but tigerdirect's quality control SUCKS! When my monitor got here there was a piece of broken off thumbscrew broken off in the right side of the port where my fifteen foot computer to computer monitor cable attatches to that port.I cut a little piece of plywood and cut a little notch in it and I fiberglassed it by the side of the port and I used a plastic tie to secure that side of my cable to the 15 pin port.
I didn't feel like packing my monitor up and sending it back to tigerdirect so I fixed it myself.

Fascinating!

'Gadget printer' promises industrial revolution

The 3D gadget printer

The idea of printing a light bulb may seem bizarre, but US engineers are now developing an ink-jet printing technology to do just that. The research at the University of California in Berkeley will allow fully assembled electric and electronic gadgets to be printed in one go. ....

Don't look for any investigations into corruption in the government until at least 2009 - when George Bush is out of office. BTW, with accusations flying about news media being either "left" or "right" oriented, I've bookmarked some news organizations in Australia and England. Interesting stuff. Of course, we may well find our ISPs start blocking these sites for some "unknown" reason too LOL

Did you get a load of the prizes he gave out to some folks who screwed up royally with this Iraqi mess?

Best regards from Rochester, NY
Jim

>
The Superadio has two bandwidths and pretty good adj channel selectivity
using the narrow setting. Also, I can't say for sure, but the YB400
probably doesn't use dual conversion for BCB.

It looked like the OP actually uses his portables as portables, so
that's the main problem he'd have with the Superadio (other than the
dial calibration, of course), since it is a big sucker.

I have never used a YB400, but I do have experience with a number of
"real" MW radios. The only Chinese portable I have is a RS DX399, and
the Superadio is much better at MW, both in terms of weak signal
readability and adj channel selectivity. Also a single set of batteries
lasts eons in the Superadio.

This Is,

Three USofA sources for the Sony AN-LP1
'portable' Active Shortwave Antenna are:

Universal Radio
http://www.universal-radio.com/catalog/sw_ant/3676.html

Lentini
http://www.lentinicomm.com/specials/specials.asp?item=41

Amateur Equipment Supply (AES) HAM
http://www.aesham.com/index10.html

Also - Ham Radio Outlet (HRO)
http://www.hamradio.com/

In Europe try "Thie"
http://www.thiecom.de/anlp1.htm

KEN [KC2JDY],

READ - AM/MW DXing = Your Radio + Lazy Susan + Select-A-Tenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1787

As a stand-a-lone Radio for AM Broadcast Program Listening
the GE Superadios are the low cost performance favorate by
many casual AM/MW DXers.
+ Use a Select-A-Tenna and a Lazy Susan with the GE
Superadios and you can do some reasonable AM/MW
DXing for about $100-$150.
+ Plug a Long Wire (Random Wire)Antenna into the 1/8" Jack
on the Select-A-Tenna Model 541-M and you can generally
'improve' the listenable range of your AM/MW DXing both day
and night.

The GE Superadio III with the Dual 6" and 2" speakers provides
'quality' Mono-Aural Sound for FM Music Program Listeners.
= Nice Sound with Long Term Listenability :o)
GE-SUPERADIO-III => http://groups.yahoo.com/group/SuperadioIII/
GE-SUPERADIOS => http://groups.yahoo.com/group/longrange/

READ - GE Superadios for Dummies
http://tinyurl.com/4fxdu

READ - Identifying the GE Superadio Models
http://tinyurl.com/4pvgz

The GE Superadios do not cover the Shortwave Bands and
for that the Grundig Yacht Boy 400 PE does a good job as a
'portable' AM/FM/Shortwave Radio.
- The Grundig Yacht Boy 400 PE as a stand-a-lone radio; does
not perform as well as the GE Superadios for AM/MW DXing.
- The Grundig Yacht Boy 400 PE does not have the long term
Listenability of the GE Superadios.

FWIW - Besides the Grundig Yacht Boy 400 PE
http://groups.yahoo.com/group/Grundig-Yacht-Boy-Radios/
consider these 'portable' AM/FM/Shortwave Radios as
Travel Radios for Shortwave Listening:
- Sony ICF-SW7600GR {AM-SYNC}
http://groups.yahoo.com/group/7600GR/
- Sangean ATS-909 / RadioShack DX398 {SSB}
http://groups.yahoo.com/group/DX398/

If you are looking for a One-Radio 'compromise' then consider
the Grundig S350 "Super Radio" Tecsun BCL-2000 for both

AM/MW casual DXing and Shortwave Program Listening.
GRUNDIG-S350 => http://groups.yahoo.com/group/Grundig-S350/
.

David, so far it looks like the satellite radio business model is still rather shaky.

XM has over 1,000,000 subscribers -- they're still not profitable.

Sirius is bleeding even more cash and has just over 600,000 subscribers. They're betting people will subscribe to hear Howard Stern or the NFL, both of which they have signed for big dollars. Stern may be able to bring some people in, but the size of his salary will continue to make it tough to climb out of the red.

The NFL choice doesn't make sense to me -- most people will want to listen to the slant from their local stations for free. Here in the New Orleans area, we like to listen to WWL radio while we watch the games on TV, just for the local flavor. It can be hilarious -- after all, it is the Saints.

The "digital" part is misleading as well. The quality (kbs) is not up to CD standards at all -- it's more like medium-quality MP3's. Most home-audio people won't be happy with that, either. This will have to improve, but 250+ kbs streaming audio is already available on the net for free.

ROTFLMAO! :) Yes, that's probably what it means. Maybe some hungry
people in your community would like a mint flavored $700 radio to eat...

My friend worked all summer around 1967 to save enough money for the
Star Roamer. I built the kit for him. Unfortunately it didn't work and
we had to send it back to Knight-Kit. They replaced a bad I.F.
transformer and we got the radio back in working condition. It was a fun
project but he probably should have got one of the Heath-Kit radios
instead. They were generally better quality.

Here's a link with some product information, but no price or release date:

<http://www.etoncorp.com/US/products/product_specs.aspx?specs=true&prodID=9&catID=2&subCatID=4>

It looks like they're now offering an outboard speaker so you can use it
as a portable stereo.

The 2010 is certainly one of the finest general coverage portables ever
made but probably not worth more than about $300 used. That said, people
sometimes buy radios for reasons other than performance.

They'd be foolish not to incorporate AM Stereo. If it will sound good as people say it will, then music AM's will make a comeback.

If they have to be analog at night, they can broadcast in C-Quam AM Stereo.

> -Brian

The 2010 has more than enough sensitivity and AM selectivity with the
sync' detector for MW Dx'ing. All it needs is a good antenna and
possibly a passive preselector to control intermod's from strong local
MW stations.

The first generation of transistor radios cost several hundred dollars
in today's money, which is similar to the first pocket calculators in
the 70's.

Source record: 3568

Something To Think About - PRICE WISE !
.
I would guess that you would have to compare this to a
Palomar Ferrite Rod Loop Antenna System.
.
Palomar LA-1 Loop Amp Base @ $135
=> http://www.universal-radio.com/catalog/sw_ant/0445.html
+ Very Long Wave Loop Ferrite Rod Element
Coverage 50 kHz to 150 kHz @ $ 150
+ Long Wave Loop Ferrite Rod Element
Coverage 150 kHz to 550 kHz @ $ 135
+ Medium Wave (AM/MW) Ferrite Rod Loop Element
Coverage 530-1700 kHz @ $ 135
$ Total Cost: $455 +S&H

Also, the Quantum "QX" Pro 15" Ferrite Rod Loop Antenna System
=> http://www.dxtools.com/QXPro.htm
Covers both Long Wave and Medium Wave Bands 150 kHz to 2000 kHz
$ Cost: $299 +S&H
.
Or a 'used' Kiwa MW Air-Core Loop Antenna on eBay
SEARCH = Consumer Electronics : Radios : CB/HAM/Shortwave for 'kiwa'
KIWA=> http://tinyurl.com/2fcqq
.
For more information on the Kiwa MW Air-Core Loop Antenna goto:
KIWA-MW-LOOP=> http://www.kiwa.com/kiwaloop.html
.
RUMOR has it that Kiwa Electronics is currently working on a
'new' AM/MW {Loop?Ferrite} Antenna for AM/MW DXers.
? ? ? Now Is That True ? ? ?

Mark, $19.95 is what I paid for it in 1966, and it worked the first time I fired it up after I built it. I was 15 at the time, and this had been my first attempt at soldering, so I was surprised when it actually worked I. still have the assembly manual for it, as well as the short-wave listeners guide included with it. Needless to say, many of the stations listed in the guide, have been shut-down for decades. It's still in good shape, but the 60 cycle hum I hear, indicates it's due for a filter capacitor change. Good DXing to you, Gary

YS is still comming in on 3.700 mHz at
07:10 UTC (02:10 AM) in Western MD
about s3 to s5. and also on 6.500 slightly
weaker. Band seems open to the west.
Also noted foreign speaking stations on
3.700 probably Mexico or Western USA.

Question: What is the URL of the WUN ListServer ?
Is this some kind of an SWL Message board..?
Not familiar with this one pse post a link - tnx!

Yosemite Sam has now been traced to four frequencies:

3700
4300
6500
10500

There may be more.

Wouldn't people with backpacks use something a little higher frequency to
communicate? I just can't see anyone with a backpack being able to tote
around an antenna suitable for portable operation in the 30 m band.

There are some 'tards on here who think every damn thing they hear is Arabic...

Boggling, to say the least, considering that the Chechens don't speak Arabic.

Tokyo Hi-Power makesa handheld 40 meter (7 MHz) handheld SSB unit, that is just a little bigger than an older Radio Shack 5 watt CB set (about 4x2x12 inches, give or take). In fact some pictures of Osama Bin Laden show him with such a unit in his hand. It uses a "loaded whip" antenna, and is probably the only thing that would work from valley to valley comms...by beaming sigs upward to be bounced downward off the F2 or other layer.

Yep, them 'loaded whip' antennas are extremely effective at 'beaming' signals upward.

I can't wait until 2005 to hear more whacky ideas here on rec.radio.shortwave.

Happy Holidays!

Cool Dude,
Take pictures. That sounds like a cool place to be.

It's very cold here, maybe 45 but the wind's blowing 60 with light sand.
I'll keep my shorts and tee shirt on but I may have to put a light wind
breaker on.

Well, tomorrow is my birthday, I'm not getting older, I'm getting
better. What I use to do all night it takes all night to do but it's a lot
more fun!!!!

Merry Christmas to All.

No problem, fuckstain. Your support for Saddam is duly noted - I'm quite sure you thought he was the greatest leader on earth. Unfortunately, 300,000 Iraqis dug up from mass graves don't share your enthusiasm for him. Neither to the Kurds and Iranians he gassed to death, or the Kuwaitis. But all that stuff is here nor there - you are obviously enthralled with tyranny, so trying to convince you otherwise probably is pointless.

Source record: 3598

While I would not pay that much for one of his modified DX-394's because I can do the mods myself, hundreds of others have. His price is not unreasonable when you consider that the typical selling price for unmodified ones is around $150. The replacement filter from Kiwa would cost you $30 delivered (I'm sure he bought up stock in quantity at a fraction of that price) and the other parts maybe $10 or so delivered. Then factor in a couple of hours time at, say, $30-$50 an hour and you're into the 250-300 range total. That's still well below the original selling price.

Sure, if you can afford it, spend more on a better radio. Last I looked, a new R8B was well over $1k. The used DX-394 at $150-$250 still occupies a sweet spot for tabletop general communication receivers, in significant quantity and with little competition.

3 WAYS OF MAKING $ WITH MINIMAL OR NO $!
1: http://www.co-opworld.com/member/41150/?5 This is for everyone - it's free! =)
2: http://PrePaidLegal.com/go/ASahagian This is for those who are SERIOUS about having fun & getting paid by Helping others. Making a difference while making a living.
3: HOW TO TURN $6 INTO $6,000!!!!!! This is for those with $6 and a little faith in your fellow man....
READING THIS COULD CHANGE YOUR LIFE!
I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, Yeah right, this must be a scam, but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: what have I got to lose except 6 stamps and $6.00, right? Then I invested the measly $6.00. Well GUESS WHAT!!... Within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works.... Also, make sure you print a copy of this article NOW, so you can get the information off of it, as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!
Suggestion: Read this entire message carefully! (Print it out or download it.) Follow the simple directions and watch the money comes in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage)
IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends.
PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful

because of the honesty and integrity of the participants.

STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper; PLEASE PUT ME ON YOUR MAILING LIST. Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

Andrew Jacob Sahagian
98 Front St.
North Arlington, NJ 07031-5848STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc.) and add YOUR Name as number 6 on the list. Also if applicable, change the 2 links above to link to your new sites!!
STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make! ALSO keep a copy in your SHARED Folder for peer-2-peer networks like Kazaa & WinMX. This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws.

Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again.
PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way.
NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy, and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.)
So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business!
---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS----------
Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory.
Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.
Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions)
Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!
REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200
That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.
**JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT. **
Now the WHY part: Out of 200 postings, say I receive only 5 replies (a

very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the Internet and reading these articles everyday? JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so...
People have said, "What if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the Internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual Internet.
Remember: play FAIRLY and HONESTLY and this will really work.
PS: Run a Google search for some of the names & addresses in this document & realize how well this works! -A.J.S.

3607. Re: Lowbander DX-394's on ebay

I never mentioned the R8B, I said an R8, which I have seen sold for $350 and is a far superior receiver. I am also sure that he does not get his filters from kiwa but has another source and gets them for $2-$3 each, it is just a low cost murata filter.

and I have seen MANY 394's for $110 on ebay so I think he is ripping people off at $260.

Thanks for putting that up Chris. I'm thinking here that at some point in time that there was another transmission or transmissions from the south-west that were also mysterious? I can't seem to recall exactly what they involved, but my memory recalls that they too seemed to be from the south-west, and, that the mystery was never explained.

Yes, but if you look again at the post you replied to it was all obviously due to the fact that we didn't vote for shit for brains Kerry.

Weird. I tried those just now at 1830 UTC or so, and 3700 is just as loud as ever, 4300 just a little less loud, 6500 about half the strength of 3700, and 10500 very weak. I shouldn't be hearing ANYTHING in the lower frequencies at this time of day (about 10:30 am local time), I can't even hear WWV on 5 Mhz, but I can hear Yosemite Sam loud and clear. It makes me wonder if Sam is actually coming in via GROUNDWAVE at my location (Sacramento, California) which means it MIGHT be coming from one of the 2 or 3 "secret" military transmitters within 20 miles of me. I don't have any DF equipment at my disposal, so I can't confirm this. I can't shake the idea that this is some sort of military or spy signal, perhaps as one poster said a "go signal" for some sort of operation.

8 months ago? I don't have a clue about that, but what I think you may be referring to is the now infamous sign on the USS Lincoln above Bush while he gave a speech last year that said "Mission Accomplished". The left has gleefully trotted out the fact that, according to them, the mission was NOT accomplished and how dare the president suggest that it was. Problem is, as usual when dealing with lefties, they play fast and loose with the facts. That sign was meant as a pat on the back for all the soldiers, sailors, airmen and marines who marched on Baghdad and toppeled Saddam's regime in 3 weeks. It wasn't meant to suggest the war was over. It was simply a thank you to the troops for a job well done - nothing more.

How could it have been MORE successful? The Taliban was toppled in a month with a handful of special forces and seals and the Northern Alliance. Afghanistan recently had their first real, free elections EVER...HOW could Afghanistan have been any more successful???

I guess I just don't share your propensity towards hoplessness and
pessimism with every casualty or incident of bad news in a war - that's
what led to the loss of Vietnam to the communists. We didn't lose that
war military. We lost that war when the nattering naybobs of
negativity on the left changed the definition of "success" from being
mission-based to one of casualty counts. The left and their
co-conspirators in the media gleefully trotted out body counts on a
daily basis with judgemental clucking about whether or not the war was
"worth the price". Eventually, public opinion tilted against the war,
thanks to this unending onslaught of negativity from the left, and we
pulled out. And thanks to the anti-war types and their friends in the
media, Vietnam is a dirt poor communist state with no hope or chance at
freedom. Sorry, but having seen the results of pessimism and
hand-wringing in that war, I believe (and I also know from experience,
being ex-military) that our troops and commanders are the finest in the
world. I trust their judgement. I know beyond a shadow of a doubt that,
so long as the troops know we support them back home, Iraq will be a
safe, stable democracy.

I think the fact that we've been in Iraq for only 18 months does bear
repeating - It is unfortunate that so many in our country, particularly

those of the liberal and left persuasion, were and remain willing to pull out of Iraq immediately after the first casualties. As if casualty counts in a war determine whether or not the original mission was right or wrong. If you believe that ousting Saddam to prevent him from continuing to lend support and safe harbor to terrorists and enemies of the United States was correct, as I do, then casualties, while tragic, do not sway me from the goal of completing the mission. The mission MUST be completed successfully - nothing else matters. If, on the otherhand, you believe that ousting Saddam was wrong, then I suppose I can understand why the casualty numbers are harangued over and used to discredit the president, the military, rumsfeld, et al. But hey - this is America...anyone has a right to voice their ignorance.

> > >>WMD's WERE there, everyone knew they were and stated as such, to > include even those opposed to our efforts to remove Saddam like France > and Germany. I'd be surprised if they don't show up in Syria. Some reports I've read indicated witnesses saw many trucks crossing the Iraq border with Syria shortly before the start of the war. Then again, they could be buried. Saddam's chief nuke scientist, a guy named Obeidi, showed coalition troops where he buried centrifuge and nuke parts and plans at the direction of Saddam - in his garden behind his house. We may never know where they all are, but again - to me, this was about more than WMD. Saddam harbored and supported terrorists. He needed to go.

> > >>Yet, had Bush caved to the whining liberals and leftwingers who > argued > that Saddam really wasn't such a bad guy and we should just leave him > alone (after all, he made the trains run on time), the fact is we'd > never know. President Bush believes, as I do, in the transformational

>
> Yeah, but in Germany, they were also fairly well-to-do Christians and
> beaten to a pulp. We used Nukes against Japan - what are they going
to
> do, threaten us with bamboo spears?

Fact of the matter is, Germany and Japan both caused problems for the US occupation after World War II - less so in Japan, because, as you correctly noted, they were bombed back to the stone age. But Allies in post World War II Germany were attacked on a regular basis by members of the Nazi regime, Hitler sympathizers, and the like. We were in Germany for a good five years before German soverignty was restored.

> In the Arab nations, most people there (1) are poor and live with few

> something that Christians say but do not act upon for the most part.
> They either are not afraid of our own WMDs or they do not apparently
> fear we will use them.

The same argument was made about Afghanistan. Liberals fretted incessently, saying that Afghans really didn't want to be free, they supported the taliban, and yadda yadda yawn. I was skeptical about those arguments then about Afghanistan, and I was right to be as history has proven - and I am skeptical of the same arguments about Iraq now. Iraqis have been polled repeatedly about this - most say they want to try democracy. And I don't blame them.

> In summation, I don't think the situations are analogous. Both
Germany
> and Japan had a lot to lose.

That doesn't make sense. Both countries were bombed into oblivion - especially Japan. They had nothing to lose. I think eventually, the more rational, cooler heads in those two countries realized that representative governments, democratic elections, and the U.S. as an

ally made more sense than to try to mount some sort of guerilla campaign in opposition to the occupation.

> The Islamic states do not. The lure of
> freedom is strong, but so is the lure of religion and tradition. My
> opinion.

I think both can co-exist. Religion and freedom are not antithetical. Turkey is an example. Afghanistan appears to be successfully implementing democracy while maintaining respect for islam and islamic traditions.

I don't think ousting Saddam was an act of "policing the world", although I do beleive the world is a better place without him. The mission in Iraq was first and foremost an act of self-preservation for

the US. Saddam supported terrorists and gave them safe harbor. Saddam himself admitted to possessing WMD, so that was a concern too - if it turns out that Saddam was lying about WMD in a typical blustery display of ego, or if he was lied to by his own commanders, either way, we'd never have known for sure without going in the way we did and ousting him. Saddam wasn't cooperating much with the UN, and even when he was, the UN was (and remains) an ineffective, corrupt institution.

> This all assumes that Bush was truthful about all that he said. If

>
> For argument's sake, Why should a sovereign nation open its borders
to
> reveal state secrets?

A reminder - we didn't just pick Iraq out on a map to bully. Saddam started and lost the Gulf War. Saddam lost his right to maintain state secrets about weapons and the like when he signed the agreement to end hostilities with the US and our coalition back in 1991. Saddam spent the next 12 years lying, cheating and deceiving the UN weapons inspectors at every turn. He kicked them out altogether at one point, and there were NO inspectors in Iraq at all between 1998 and 2002 until one George W. Bush reminded the UN that Saddam had thumbed his nose at them about the inspections.

> If Russia and China asked us to open up our
> borders to show that we are not harboring bombs and terrorists,
should
> we do it?

Apples and oranges. See above. The demands made of Saddam were the direct result of his defeat in the Gulf War. No one was demanding Saddam do anything before he decided to invade Kuwait.

> You are right about Saddam's ego, it was big, and it
> seriously "misunderestimated" ;-) the ability fo the US to come in
and
> get him.
>
> South Africa and Libya were scared, and Libya in particular had the
> benefit of hindsight.

I'll agree with you about Libya and disagree about South Africa. South Africa wasn't under pressure from anyone to do anything. They decided as a country to disarm themselves of nukes. They opened up all of their weapons sites, their records, etc. They had nothing to hide, and welcomed scrutiny from the outside world to prove they were serious about disarming. And they were indeed serious. South Africa demonstrated what disarmament looks like. The fiasco in Iraq with Saddam was entirely different.

> This criticism is justified in my view.

I have problems with the Patriot Act too. I want it reviewed by the Supreme Court for constitutionality. There are parts of the act that seem on their face to be unconstitutional. There are other parts of it that seem perfectly fine. I'm not a lawyer - I'll let the Supreme Court hash it out.

> know what the left says about all of this now.

I think maybe some historical context is necessary here. Recall that John F. Kennedy, the last democrat I admired, was a typical democrat for his time. He was hawkish on defense, supported the military, pro-business, and he cut taxes...since Kennedy died, the democratic party has been co-opted by the radical left in the country, and democrats have moved from a centrist position to the far left.

Democrats now openly despise the military, as Clinton did - they look first to defense to cut in order to pay for the latest cradle-to-grave government welfare program, and they don't believe in or support entrepreneurs and business - they believe business is inherently evil and must be punished in the form of choking taxation and over-reaching regulation. If high taxes and regulation don't drive businesses out of business, then the government will step in and sue for some dubious reason, as they are now with Microsoft and other wildly successful companies. If you're not taxed to death, you're regulated to death. If you're not regulated to death, you are sued to death. These are NOT American values. These are socialistic values, and the democratic party of today embraces them whole-heartedly. Republicans, otoh, have moved center. Most republicans support the military and a strong national defense; they support businesses and entrepreneurs. They want lower taxes and less government intrusion in the lives of individuals. They believe in common sense regulation, not over-reaching, intrusive strangulation. They support individuals and the right of an individual to decide whether he wants some of his own money to invest for retirement, rather than piss it away by contributing to the Social Security ponzi scheme. So, in closing, the "far right", as you put it, are not much different today than Kennedy democrats of the early 60's. The fact that you think a position advocating strong national defense and support of the military is a "far-right" position, is indeed very telling.

>

> Saddam.

There were hundreds of thousands of brainwashed japanese who many thought would never permit the US to win a war against Japan. We did what needed to be done. We'll do what needs to be done to win the global war on terror.

> I have a ten-year old son, he is the joy of my life and smart

for
> it by the Saudi royal family. It is difficult to fight a meaningful
> war against a society that holds life in such low esteem. If there
is
> an option besides war with these guys, real or undeclared, I will go
> with that option first.

Ask yourself this, Bruce - a question for you both you and your son -
would your rather live on your knees a slave, or die a free man,
standing? I choose the latter. I would choose the same for my sons.
Old age to me is meaningless if it means the values and freedoms you
cherish are continually and constantly attacked and destroyed by
religious zealots intent on obliterating the US from the face of the
earth. We were attacked, Bruce, by zealots who are repulsed at the
audaciousness of a society that allows women the same rights as men,
democratic elections, individuality, freedom to worship (or not), etc.
You sound like a reasonble man - no different than most Americans, as
we tend to try to be reasonable about things. But the mindset we are
facing with the likes of Bin Laden and his crowd doesn't respond to
reason. Or logic. Or respect. They are brainwashed lemmings who
actually think that killing themselves with a strap-on bomb and taking
out as many innocent men, women and children as they can will get them
72 virgins in paradise. You think there are options here? I refer you
back to the perceived options in dealing with Hilter in the late 30's.
Many made the the mistake of thinking they could reason with a madman.
We have no options here. We must seek out and kill or capture every
last terrorist and those states that harbor them, or we'll be
destroyed. Harsh words, but these are harsh times.

>
> I sincerely hope that the elections turn out to be a great thing in
> January. I hope Iraq turns out to be a great friend of freedom and

Forget about holding your breath for a second - how about just being
positive? How about supporting the troops and the mission? How about
setting a good example for your son so that when he grows up, he knows
that freedom is not free and sometimes it is necessary to fight the
good fight?

>

> disfiguring.

As in any military campaign, yes.

> A hundred times that many Iraqis, the people we are supposedly
helping,
> killed. Heaven only knows how many injured.

Erm, Bruce sorry but let me stop you here - the vast majority of these are Iraqi baathists and foreign fighters who want Saddam back. They don't represent the population as a whole. They don't count. I don't know how many of them are dead, but whatever the number is, its not enough.

>
> In an undeclared war that continues after the evil leader is removed.

The "undeclared" part is a non-sequitur. Wars do not have to be declared - you only need to look at Clinton's actions in Kosovo to understand this.

>
> To me, relatively speaking, that is gobs.

Relative to WHAT, Bruce? I'll ask again - WHAT are you using as a comparison? Certainly not any actual war or battle we've ever fought before, because if you did, you'd have to admit that the war in Iraq thus far has been wildly successful with fewer casualties than any other war the US military has ever engaged in. Admit it Bruce - you are a fan of admitting one's mistakes, as you so often have stated in this thread - admit that you are simply using the term "gobs" to exagerrate and inflate your own dislike of this war and the president. When you say things like "gobs" of soldiers are dying, even when it isn't true, it reinforces your own preconceived ideas and agenda about the war. I would ask that you be honest, Bruce. The war in Iraq has produced fewer casualties than any other military campaign of its size, depth and breadth in the history of modern warfare. You may dislike the reasons for the war. You may dislike the commander in chief. All well and good. Discuss those reasons and provide evidence to support your assertions and I'll be glad to respond in kind. But don't be disingenuous in your descriptions of what's actually happening - it does your credibility a huge disservice.

> I don't consider individual

While i disagree with your opinion about Vietnam - I think we should assist an ally if communists attempt to overrun them, particularly when they beg us for help - but aside from that, you have a right to your

opinion, even if its wrong. :)

> >>Nope. I don't think we won Vietnam. I do know one fact, however -

pick
> and choose?

Do you think perhaps the reason we didn't support Ho Chi Minh had
something to do with the fact that his idea of "liberating" Vietnam
from France was to impose communism upon the country afterward? We had
a choice of who to support in Vietnam and we went with anti-communist
leaders like Diem, Minh, etc...not a hard choice to make, really.

> There are dozens of places where freedom is stomped on and

> countries, too.

You mentioned it yourself - at the time, the US was scared to death of
communism. I think rightfully so, actually - we'd seen the results of
it under Stalin. We were asked for assistance to prevent Ho Chi Minh
from assuming total power of the entire Republic of Vietnam, and we
provided it...until the leftwing radicals in this country succeeded in
convincing a majority of Americans that a communist state really isn't
all that bad. I mean, Stalin killed some 20 million soviets - what's a
few million dead Vietnamese under communist rule?

>

> oilfields, something we would not have done without an excuse.

That whistling sound you hear is my point going straight over your head. Here it is again, more plainly: The Gulf War, despite what your liberal friends tell you, was not about stealing anyone's oil. We didn't steal shit. There were no confiscations of oil fields by the US - not a single one. You might make the argument that the war was in part about ensuring the free FLOW of oil, as it was quite possible Saddam might have next invaded Saudi Arabia had it not been for the US military establishing its presence - but the larger picture was that both Kuwait and Saudi Arabia were allies of the US, and we had an obligation to assist. We did. And we did NOT, repeat NOT steal anyone's oil in the process.

Fast forward to 2003 and Iraq. Once again the leftist handwringers are sniveling that this a war about "oil" and we're only in Iraq to steal their oil. Well, we've been there 18 months, and I don't know about you, but I sure as hell am not paying .20 cents a gallon for gas like Iraqis are. We haven't taken over any oil fields. We haven't stolen any oil. In fact, quite the opposite - President Bush opposed loaning Iraq money for reconstruction efforts - he wanted simply to give them the funds. Many politicians wanted to confiscate some Iraqi oil to pay for the war - Bush would have none of it. So to repeat - first Gulf War - NOT about oil. Iraq - NOT about oil. Got it? Good. Moving on....

>

> to make peace with all of our "former" good friends - he sort of
> screwed that up in term one.

We definitely disagree - you think leadership is a popularity contest. I think leadership is doing the right thing, even if the right thing pisses people off. I guess we were raised differently. I certainly don't lose sleep at night over the fact that the our "allies", and I use the term loosely, the French - are once again whining about

Americans. When something is right, it is right whether it has popular support or not. You might look to see how Kennedy handled the South's resistance to integration for an example.

> > energy self-sufficient,
>
> So you support drilling more at home, then? Like in Anwar?
>
> Not at all. One thing Bush refuses to do is plan for the day when the
> oil is harder to get.

Two thoughts here - first, I don't want the government planning for the day when oil is harder to get. That is not the government's job - that is the job of the private sector to do. Second - if you believe it IS the job of the president to plan for oil shortages, than you can you tell us just what, praytell, was Clinton's "plan"? Somehow I managed to miss it.

> There are lots of promising technologies on the
> near horizon that, had we been investing in them, would already be
> bearing big fruit.

Energy companies and automakers have been researching and investing in alternative sources and forms of energy for decades, and across both democratic and republican presidential administrations. The reason why there's not much fruit being born is that the technology for providing an alternative to internal combustion engines hasn't been invented yet. Yes, we've got some electric cars - they can carry you all of 60 miles on a single charge and if your lucky, you might get up to 40 miles an hour with the wind at your back. Similar with solar - the solar cells you'd need to provide the same energy of a typical fossil-fuel burning car would cover a city block. Hydrogen looks promising, but at the present, it's way too expensive for an average person to afford. Hybrids like the Toyota Prius and the Honda Insight seem to be catching on, but they are 10-20 percent more expensive to buy than a car with a regular engine. I have hope that one day, a clean burning engine will be available at a reasonable price and it will provide the same range and speed as modern combustion engines do. Until this happens, however, I either walk to work (too far) or I have to drive. Most Americans are probably in the same boat as me - if we don't drive to work, we lose our jobs. Ergo, thusly, and therefore, it is in my interest and the interest of most Americans that we continue to seek out oil, preferably our own to reduce dependence on foreign suppliers, and I have absolutely no qualms whatsoever about allowing drilling in Anwar or anywhere else for that matter. The oil drilling technology today leaves little or no environmental impact, we reduce our dependence on foreign oil, and our own costs for gasoline go down. It's a win-win.

> But, fusion and solar and wind and efficient
> transfer of energy get short shrift in Mr. Petroleum's economy.

Good. Solar and wind energy have proven to be wastes of time and money. We need to provide for our own energy and I hope President Bush opens up Anwar to drilling....the estimates are that oil from Anwar could reduce our dependence on oil from the Saudis by up to 40%.

> On this, I am a solid environmentalist and believer in new technology
> that is coming, which wil come, eventually, because it must.

I think new energy technology will come - but not from the government. It will come from entrepreneurs and businesses, just as hyrbid gas/electric cars did.

>

> First, know that I am not afraid of terrorism myself. I think that as
> a nation, we are strong enough to withstand and repel these jerks; and
> on my own soil, I'd be happy to fight anyone who tries anything.

On our own soil - so ONLY if Bin Laden invades the US would you be willing to fight then, eh? Nice little "out" you made for yourself there, Bruce - you know good and well that's not how terrorists operate.

> I support the war on terror 100%. I think the administration is taking

> the wrong tack, and is not being truthful, which I think would gain
him
> a LOT more support (he'd get mine). He's a lousy liar.

What has he lied about? We're not going back to the WMD's again are we? I've already explained to you that the president got information from multiple, credible sources, to include sources that were not exactly friendly to the US, that Saddam had WMD's. The fact that he was wrong about stockpiles of WMD's does not make him a liar - it just makes him wrong. There's a difference.

Even when he
> is honest, he is sometimes not convincing. A month or so ago, he
made
> a blatant public statement to the effect of "we don't care about Bin
> Laden right now" in a larger context about the war on terror which
> really made me wonder exactly what the hell we are doing and what we
do
> care about. What did that statement mean to you? Do you remember
it?

Yes, I remember the statement very well, because Kerry and liberals attempted to make something out of it, when all the president was saying was that the war on terror is larger than one man. I hope the president isn't losing sleep over Bin Laden and his capture...we can't let the war be defined as catching one guy. Frankly, I think if Bin Laden were caught or killed tomorrow, there'd be another terrorist ready to take his place.

> He is a leader, the key one, and it makes sense to banish him.

I agree - after he completes his second term, I say lets never vote for him for president again!

> Start at the top, and keep at it. We've done a pretty good job
picking

speed,
> and then get out and watch. Keep the pressure on in Afghanistan to
> keep the Taliban squelched, and suppress even the tiniest noise from
> them. They must disband.

Most of what you just said sounds very Republican. Maybe I'm rubbing off....

> Screw the Saudis. They suck and have done us few favors other than
> sell us oil. We should put heavy diplomatic pressure on them to cut
> their crappy support and acquiescence on terrorist activities both in

> the Middle East and elsewhere.

The Saudis were late to the party, but the recent attacks by terrorists on their own citizens have opened their eyes, and they are in the game. We need to exert pressure on the Saudis to ban the source of a lot of the animus towards the west - the Madrasa/Wahabist schools that dot the country where young Saudis are brainwashed daily by fundamentalist islam-fascist "teachers".

>
> Lock up our borders tight to all *illegal crossers,* and be wary of

Odds are those are scarce radios, and they're priced for collectors.

The Norelco includes "Blofold's radio in 007 Diamonds are Forever" as part of the description - so Bond fans who just have a license to listen may be willing to pay a premium for it.

It is definitely coming from out west somewhere, and if you can hear it on 3700
at 1800 that is a very positive sign.

Pretty hilliarious. It seems like some people are obsessed with
reviewing the newest/cheapest portables for whatever reason.
Personally, I like my Grundig Mini World 100. It seems to do the job
reasonably enough for using at my work desk.

3631. Re: Lowbander DX-394's on ebay

I think you are being choosy in your stats, citing only the lowest prices recorded to support your argument. I tracked eBay selling prices for DX-394's over a 7-month period from Oct/03 to Apr/04 - graphed at http://groups.yahoo.com/group/RADIOSHACKDX394/files/FAQ/ .The monthly average for unmodified ones ranged from $135-$175; for modified ones, (not solely lowbander's and with varying degrees of mods) from $195-$265. Of course, there were individual ones that sold for less and more than these. That was nearly a year ago and prices may have moved somewhat. My recent eBay watch list shows only one sold in the US for or $110 or less at $108.50. The majority of unmodified ones at around $150. lowbander sold 5 between $235 and $250.

Rather than comparing it against more expensive receivers that rarely show up on ebay and sell at the bottom price you mention (that's too easy!), can you identify a readily available one that is comparable in price with equal or superior features and performance?

Just call it free enterprise -- folks price things the way they want
Price too high -- no buyers
Rich folks who collect -- money is no problemo
Pretty simple

You wouldn't want price fixing -- or would you ?

an
R-8B ?????

So, yes, you can buy a new R8B for 10 times the price of a used DX-394
and it is a better receiver.

READ MY TYPING !!!! THIS IS WHAT I POSTED ON 12/22 AT 8AM

my original point was that mr lowbander sells his 394's for too high a price and makes it sound like he walks on water modding it. for a little more than he charges ($260) one can get a satellit 800 or a sometimes an R-75 or R-8, far superior radios.

I have an R71A, and I feel the two are very similar in design.

The R71A is great receiver; however my little Icom IC-703 (approx $300 used) which is very portable has fantastic
sensitivity, built-in antenna tuner, draws half-amp on receive.

eham.net has more reviews of the 751A.

I really feel the general coverage receiver in a ham band transceiver is more value for price paid than a standalone receiver.

His review is pretty informative, though. He also wrote (again for Radiointel) an excellent review of the Wellbrook 330S magnetic loop antenna not long ago.

3643. KPH On Air New Year's Eve

Newsgroup: rec.radio.shortwave
Date: 2004-12-23 21:22:59 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cqfcvjhsb1@hercules.btinternet.com>
Source record: 3643

Coastal station operation set for Straight Key Night.

Historic coastal station KPH and the Maritime Radio Historical Society's amateur station K6KPH will once again be on the air on New Year's Eve as part of Straight Key Night 2005. KPH will be on the air with transmissions from dusk to dawn (Pacific time) on the calling frequency of 500kHz and its working frequency of 426kHz. Chief operator Richard Dillman says the group is especially interested in reports of the MF transmissions, and have extended the hours from previous commemorative operations to give more listeners a chance to hear the signals.

Operation will commence on MF about 0100 UTC, employing the station's 5KW Henry Radio transmitter and Marconi T antenna. Announcements will be made on 500kHz and a watch will be kept there. Press, weather, and other information will be sent on 426kHz.

The amateur station will operate on 3545, 7050, and 14050 kHz with other possible frequencies to be announced, all using KPH's vintage HF gear. Ham activity will run from 0000-0600 UTC.

Signal reports and QSLs may be sent to: Ms. Denice Stoops, P.O. Box 381, Bolinas CA 94924-0381.

Straight Key Night is an annual amateur activity that encourages CW exchanges between participants using only straight keys, no "bugs" or electronic keyers. It runs from 0000 to 2400 on UTC date 1 January 2005. More information is available in an ARRL article on SKN. Pictures of KPH and information about the Maritime Radio Historical Society are available at the MHRS site http://www.radiomarine.org/

Scarce but not utra-rare. I got one in good shape on e-bay within the
last year or two, with its antennas intact for I think under $100.

It has a very good receiver. I had one some years back and upgraded to the Pro II. I still have my R-71A though - it was my first receiver.

In regard to the 3 volt lithium memory backup battery having a lifespan of 5-7 years in the 751A, 71A etc. (according to Icom web site): I just replaced the backup battery in my R-71A. It was 20 years old and still checked 3.25 volts. The new battery was 3.47 volts. I was worried that the current capacity may diminish with age and cause a sudden failure, but somehow I suspect the battery would have lasted another 20 years.

Jim

I checked just now at 2245, and Sam is gone, replaced by some sort of
steady noise that sounds like QRM from something like flourescent lights
or electronic equipment. But it's the same on all four freqs at the same
signal levels as Sam was. I really think it's coming from a military
transmitter in VERY rural Solano County, about 15 miles as the crow
flies from my location. The transmitter in Yolo County is Coast Guard
point to point, while the one in Solano County is attributed variously

to the AF or the Navy.

Well, I would take a wild guess and say he is in or near "Yosemite" National
Park?
Perhaps it is a remote, solar powered transmitter setup inside a cooler on
one of the high peaks. [shrug]

Running dog,
I once took a road trip from Yosemite to Death Valley driving south through
Mono
and Inyo counties: http://www.dot.ca.gov/hq/roadinfo/do9map.htm
On my left (east) about a mile or so was a huge satellite dish farm.
Do you have any clue as to its purpose?

3668. Re: Lowbander DX-394's on ebay

Newsgroup: rec.radio.shortwave
Date: 2004-12-24 01:29:47 UTC
From: Tom <holden_family@sympatico.ca>
Message-ID: <1103851787.234288.140220@c13g2000cwb.googlegroups.com>
Source record: 3668

No need to shout. You are entitled to your opinion but be careful when you state it that you are not slandering lowbander or anyone else. His ebay feedback is 100% positive on over 700 transactions, the majority of which are sales of his modified DX-394's. While he may be guilty of hyperbole (isn't that typical of our advertising oriented society?), can you find a mistruth in his ads? His hundreds of customers are satisfied so his price cannot be too high. I think he is to be congratulated on creating an after-market in souping up DX-394's. Is there such a market for any other receiver?

If your only point was that you can buy a superior radio by spending more money, then I would not argue with you. But, for some, that extra cash is not an option. And to get any of the radios you cited at such a low price is a rarity while there is almost always at least one DX-394 FA on ebay.

This thread, however, (and not necessarily you, Cap'n) demeaned lowbander, his modified DX-394's, and the basic DX-394.
I thought that was unfair and needed some balance. After all, I'm a DX-394 enthusiast and hot-rodder.

I don't know what you are using, Cap'n, but if you can handle a soldering iron, pick up one of those DX-394's at $110 and have some fun. Your other rig, like my Drake R-4B, may end up gathering dust for a while ;-) .

73 and seasons greetings!

Tom

I don't know of any but you might start with the Deutsche Welle Radio site. If you don't mind listening via the computer you can get lots of info from that site.

http://www.dw-world.de/select

http://www.german-way.com/german/christmas2.html Might be of interest.

http://ingeb.org/catxm.html Has the lyrics to lots of songs. Some in English and some in German.

I'm only 120 miles or so from Yosemite by road, and much shorter as the
crow flies. The local TV stations in Sacramento regularly give
temperature forecasts for the Yosemite area.

I'm not familiar with the high desert. Sorry. I rarely go to LA, and
I've never been through most of the desert, including Highway 395.

3680. BBC report on Iraq

Date: 2004-12-24 03:43:03 UTC
From: running dogg <run@ning.dog>
Message-ID: <41cb8fba_2@127.0.0.1>
Source record: 3680

BBC's The World Today at 0300 December 24 had a segment on Iraqis returning to Fallujah, or rather Iraqis NOT returning to Fallujah because only a small fraction of the Fallujans that were expected to show up for re-entry actually did. Apparently they're not coming back because the city is a total ruin and there is nothing to return to. Plus America is still fighting insurgents there. Also in the same segment was an interview with an Iraqi woman. I didn't catch all of it because of QRM (see below) but she said that everything has gotten worse since America toppled Saddam and that the only way that things will get better is for America (and Britain, and the rest of the "coalition") to leave. If this person represents the majority of Iraqis then Iraq is truly a lost cause. She kept referring to Americans as occupiers and repeatedly said that Iraqis have a right to fight the occupation of their country. She also said that all the breadwinners of Iraqi families are being killed by the Americans. The Iraqis don't want us to be in their country, the infrastructure and quality of life keeps deteriorating for them, and the more it deteriorates the more of them will fight the occupiers. So why are we still there, Mr. President? Hm? Because you can't admit that you made a BIG mistake? Because you don't actually listen to shortwave, or watch TV news or even read the newspapers, thus getting your information about the world only from your handpicked yes men and therefore don't know what's really happening?

By the way, BBC's signal on 9525 khz was repeatedly being interfered with by a Spanish speaking broadcast, which occasionally overwhelmed the Beeb, thus making it hard to follow the news. At one point I heard the words "Cuba independiente y democratica" leading me to think that it was a broadcast of a Cuban rebel group ("Cuba Independiente Y Democratica" is one of the many anti-Castro groups in Miami). Such broadcasts are regularly carried by WRMI, but WRMI doesn't have a signal anywhere near 9525. The BBC broadcasts Spanish from Delano, CA on 9515 at 0300, but it would have to be awful strong to splatter 10 khz. Any ideas?

Yep, I got an idea. The BBC is biased and full of shit! That's why even the
British troops decided to turn it off. Get a frickin clue.

By the way, Kerry LOST!

Get over it.

WASHINGTON (CNN) -- An unauthorized radio station in the nation's capital called for "massive protests" in the week leading up to the January 20 presidential inauguration.

The station broadcast Wednesday at 1680 AM and identified itself as "Guerrilla Radio, WSQT."

During the identification message, an announcer said, "WSQT is a project of urban activists in the D.C. area working on housing issues, homeless issues, issues of war, issues of occupation both at home and abroad, and issues of the environment that we all have to live in."

Will this homosexual innuendo never cease?

I tried to bow out of this gracefully. I'll try it again.

As to your splatter... you need a better filter in your radio.

The quick answer here, buttfuck, is that the easiest way for us to leave is if the Iraqi's behave... pretty simple isn't it, buttfuck?

One would think that the Iraqi's feel the same way, right, buttfuck?

However, the terrorist elements do not feel that way, buttfuck.

Get a fucking clue, buttfuck.

Don't make me tell you again, buttfuck.

Damn, those frickin manufacturers of portables have certainly dealt this hobby a terrible blow.

Have a Happy Holiday!

I'm using a Degen 1102, so it's not the best of the best, and I don't
expect much from it, but this is the first time that I've had this
problem on this freq. And before you start calling me a tard, I DO have
a Yaesu FRG-8800 for serious listening, but I'm in a situation where I

can't put up an outside antenna. Hopefully this situation will change in
the next few months.

Most pirates use FM transmitters. Having been in the pirate community
(but not as a broadcaster) I know that FM tx's are easier to make and
more concealable than AM ones. So the fact that they're broadcasting on
MW is somewhat of a surprise.

Why do you think they're booting him out of the Forces? Getting caught
so many times in flagrante delicto, they HAD to do something. Not only
were the optics bad, but the soldiers were starting to complain of the
weird tasting mashed potatoes and all the short hairs in the pastry dough.

Also, please refrain from using the word 'innuendo'. He misinterprets
it as something second personally anal, causing him unwarranted arousal.

Yeah, that's right, buttfuck... the intelligence gathering capabilities of the United States of America could never compete with those shortwave stations, the TV news or those newspapers...

The President of The United States of America gets a daily briefing of what is going on around the world that puts the news that the fucking BBC puts out to shame.

Get a frickin clue, buttfuck.

And yes, I do now consider you a fucking 'tard... you earned it!

Yet another rousing speech from dxAce. The brain food is working well.

Why the fragmented swastika in the pictures? Don't they remember how
join the four pieces properly?

Actually, there's several "revolutionary socialist" groups out there, each with its own agenda and own following (small no doubt, but a following). It's been a while since I've been involved in "revolutionary" activities, so I can't remember them all, but in addition to the WWP there's the International Socialists (their signs are ALWAYS recognizable at demonstrations once you know what typeface to look for), the Revolutionary Communist Party (they're Maoists), and the Spartacists, a group that's so weird even the other socialists call it a cult. And that's just the beginning. We're talking about people who answer their phones with the last two digits of the phone number, supposedly to distract the secret police (like that wouldn't ATTRACT attention when everybody else on the planet says "hello" when answering the phone). They generally act like they're in pre-1917 Russia. They each have their own newspaper, and reps of each can be found at any demonstration hawking their respective propaganda. Their delusions of grandeur can be quite funny even if you tend to be on the liberal side of things. By the way, the WWP groups like ANSWER and National People's Campaign tend to identify themselves as such; the Guerrilla Radio pirate could be another splinter group of the WWP or another one of the socialist groups or even a totally new, unaffiliated organization.

Perhaps they modify ham gear that covers 160 meters .... it's a move
of 120 KHz and I'd bet there are transceivers out there that can still
put out a clean signal. The antenna would have to be an incredibly
large compromise of size/performance so as to not attract too much

attention 8-}

Violkswagen (Europe) and Mercedes-Benz of Europe and
some South America will fit you with a shortwave radio in their
new cars, however as there is no "market" for the same at
present in the USA, the same is not available except by
special order. (there is a Volkswagen dealer I know of in
the Wash DC area which will special-order a VW OEM
radio with shortwave from Europe and install the same, however
be prepared to pay almost $1300.00) It's special-ordered
from the factory in Germany and normally available in
Europe-market models only, leadtime is 4 weeks.
Seems to be popular with Diplomatic and Legation Cars at
Embassy service in the DC area.

Even the American media admits that things have gotten out of control in Iraq. The last known report from Time magazine's correspondent said that he was pinned down by mortar fire and ringed by "kidnap teams" waiting to kidnap him if he left his compound. He said that the US military has lost control of the entire country.

As for the CIA, it's run by befuddled bureaucrats. We don't know anything about this Ansar Al Sunna group that bombed the Mosul base because we haven't infiltrated them. We still don't have any spies in Al Qaeda three years after 9-11. And lest we forget the CIA's biggest failure-the fact that it knew everything there was to know about the USSR except the fact that it was nearing total collapse of all its institutions. When the whole rotten mess imploded, the CIA was caught flatfooted. They had no clue; they thought that the USSR of 1989 was the same formidable foe it had been in 1957. The CIA had no clue that 9-11 was coming. No clue that there were no WMD in Iraq, or that Saddam hadn't been a threat to the world for quite some time. The CIA has utterly failed us, and will keep doing so unless we junk it and rebuild intelligence gathering from the ground up.

The conservatives can't handle the truth, and it will cost us all in the long run.

I should admit something-Steve's insults have inspired me to dust off the Yaesu and hook a wire to it and see what I can pick up. I'll do that tomorrow.

Playing nice with terrorists is a marvelously bad idea.

Reminds me of Dr. Stark in the movie "Naked Space".

That may be the ONLY good his insults have ever done.

What Yaesu is it? I have an FRG7 and FRG9600

Both are fine, but the CW light doesn't work on the 9600.

My all time favourite movie Doctor was Peter Sellers in Dr. Strangelove. I get a bad feeling about the future every time I think of it, though. I'm starting to see Bush's face going down with the bomb. Yeehaa!

Hi All,
I live in New Zealand and it has not caused any disruption at all.
Although it was a big quake it was very deep and some distance from here. It
has made our National TV news but has not ranked very high in the news.

Source record: 3776

The Klingenfuss database cannot be integrated with any other program. Not only is the database encrypted, it also uses a proprietary Btrieve database, which does not have freely available ODBC or OLE DB connectors. So even if you could decrypt the data, which would possibly be illegal under the DCMA, you'd need to purchase data connectors to get to the data.

The software lets you copy one record at a time into the Windows clipboard. That's it.

Ditto. I have found good performance on SW, MW and FM without using an external antenna. The audio is quite good for its size. I think it's WELL worth the price! Even the tuning knob works well on mine. I've paid $200 or more for Sangean/RS models where the tuning via the knob was PATHETIC. If you haven't tried an 1103 don't knock it :)

3728. WMR World Music Radio on the air now

Newsgroup: rec.radio.shortwave
Date: 2004-12-24 12:52:33 UTC
From: Stig Hartvig Nielsen <hartvig@wmr.dk>
Message-ID: <41cc1120$0$17921$bc7fd3c@news.sonofon.dk>
Source record: 3778

WMR (World Music Radio) is on the air right now (Friday 1230 UTC) and until Monday morning 0700 UTC. The frequency is 5815 kHz - and power is 5 kW.

Reception of WMR is possible in large parts of Europe during daytime. The deep winter seasons means that reception close to the transmitter site in Denmark becomes poor after sunset. However reception in Southern Europe should be all right in the evening hours.

Reception overseas is sporadic but sometimes possible in the Americas after 22 UTC. From Africa, Asia and Pacific we haven't received any reports recently.

Peaking S8 in Michigan.

3730. Merry Christmas Lloyd Davies

Newsgroup: rec.radio.shortwave
Date: 2004-12-24 13:39:43 UTC
From: w4fqf@aol.com
Message-ID: <20041224083943.10404.00001524@mb-m25.aol.com>
Source record: 3780

This was e-mailed to me this morning by Oris Grim an old friend.

I happened to be traveling through Huntsville, Alabama early this morning, I decided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

FT1000 Mk V

Used attenuator to see if the 10100 kHz signal was a spur - it was not.

I sent a message to WWRB about the strong second harmonic, which had not
been heard previously.

Mac

>So what you are saying is that you only got part of the report, but
>that was enough to form you own opinions?

Having heard the report in question - all of it - I can say he got the salient points. The young woman (who was quite articulate and intelligent sounding) said basically that Iraqis were glad Saddam was gone but they didn't want the Americans to rule in his place. And it was time - past time - for them to GO.

And if they wouldn't leave willingly, then Iraqis have the right to kill them until they left. And that's what they're doing.

The BBC seldom has good news to report about events in Iraq. Depending on your ideological bend, that's either because they're liberal sops or because there's little good news to report...

SB PROP @ ARL $ARLP053
ARLP053 Propagation de K7RA

ZCZC AP53
QST de W1AW
Propagation Forecast Bulletin 53 ARLP053
>From Tad Cook, K7RA
Seattle, WA December 23, 2004
To all radio amateurs

SB PROP ARL ARLP053
ARLP053 Propagation de K7RA

After passing the longest night of the year, the northern hemisphere will have gradually increasing sunlight over the next six months. These seasonal variations have a big effect impact on propagation. As an example, using a popular propagation program to calculate a path from Seattle to Cleveland on December 22 with a sunspot number of 35 (average value for December 20-22), I looked at a projection for the 30 meter band. 30 meters should open toward Ohio around 8:00 AM Seattle time, around Seattle's sunrise. Expected signals should be good until sunset, when signals jump higher by 10-20 db. Then the chance of an opening stays low most of the night. From sunrise to sunset is 8 hours and 20 minutes.

Running the same values two months later, there are nearly two more hours of sunlight at the Seattle end. 30 meters looks good to Cleveland most times of the day and night, except for a low probability of an opening from after midnight until sunrise at the Seattle end.

Los Angeles sits in much more sunlight than Seattle in the dead of winter, with almost 10 hours from sunrise to sunset on the solstice. On December 22 the 30 meter path to Cleveland is open most hours of the day and night. The possibility of an opening drops during the hours of 6-9 PM LA time, and again from 2-5 AM. On February 22, LA sees over 11 hours from sunrise to sunset, and 30 meters should be open to Cleveland with strong signals at any time, except for a brief period with lower chance of an opening just before LA sunrise.

Jack Bock, K7ZR (SK) used to write about the ''Sufferin' Sevens'' in the Totem Tabloid, the newsletter for the Western Washington DX Club. He was referring to hams in Washington state and probably KL7, not Arizona. Having more light really does help.

For the past week, sunspot numbers were up and the A index was lower when compared to the previous week. Average daily sunspot numbers and solar flux values rose over 5 points, and the mid-latitude A index was down over two points.

For the next week, daily sunspot numbers should be moderately higher and solar flux should stay above 100 until the last day of the year. At that time, we can look at the average sunspot numbers for 2004, and compare them with previous years. Right now it looks like the average daily sunspot number for 2004 will come in about 40 points lower than 2003 and over 100 points lower than 2002.

If you would like to comment or have a tip, email the author at k7raarrl.net.

For more information concerning propagation and an explanation of the numbers used in this bulletin see the ARRL Technical Information Service propagation page at http://www.arrl.org/tis/info/propagation.html.

Sunspot numbers for December 16 through 22 were 14, 40, 40, 29, 30, 25 and 47 with a mean of 32.1. 10.7 cm flux was 90, 89.9, 90.6, 94, 93.9, 101 and 98.8, with a mean of 94. Estimated planetary A indices were 10, 15, 12, 4, 4, 12 and 19 with a mean of 10.9. Estimated mid-latitude A indices were 8, 9, 8, 1, 2, 6 and 12, with a mean of 6.6.

3736. Star Roamer Under The Tree

Newsgroup: rec.radio.shortwave
Date: 2004-12-24 14:39:48 UTC
From: patgkz <patgkz@new.rr.com>
Message-ID: <USVyd.177005$T02.158296@twister.rdc-kc.rr.com>
Source record: 3786

I just know that Santa will bring me my Knight Star Roamer this year. Been waiting since 1967.

I can just smell the aroma of burning solder flux. I hope that Allied prestripped and tinned all the wires to their exact length. I can hardly wait to mount last component on the chassis and listen to stations through the thick 120 cycle hum of the half-wave power supply. I just know that if I do a real good alignment on the radio, the set will be sensitive up to 30MHz even though it has no RF amplifier. My code key is ready so I can practice Morse when I crank up the Sensitivity control so the IF starts oscillating.

If not a Star Roamer....maybe a Span Master will do.

Thanks Santa! I'll leave a couple of 807's for you on the table.

3737. Did Saddam mimic Saladin?

Newsgroup: rec.radio.shortwave
Date: 2004-12-24 14:41:02 UTC

Predicted many years ago by yours truely
based on the prophecies of the Bible.
I said that Saddam would feign defeat in order
to win wars.
Tony

Did Saddam mimic Saladin?
November 8th, 2004

The weird ease with which the Iraqi army and regime fell last year, combined with the stubbornness of the subsequent insurgency, has occasioned lively debate in national security circles. Here's one hypothesis: The Iraqi dictator, taking his cue from Islamic history, deliberately lured the coalition into Iraq. Realizing that his enfeebled army couldn't stand against the U.S.-led coalition in conventional terms, he feigned defeat, ordering his henchmen to arm themselves and carry on the struggle by unconventional means.

A protracted war, reckoned Saddam, would wear down America's will to fight, allowing him to win politically despite being thrashed on the battlefield. Rather than go down fighting, the regime melted away and, perhaps in concert with foreign terrorists, commenced the insurgency that has bedeviled the pacification effort ever since.

Fanciful? In reality, such a strategy would be fully in keeping with the Muslim way of war. Ever since the Crusades, Islamic commanders have favored using light forces to harry more heavily armed Western armies. Muslim armies would often feign retreat, enticing their enemies into pursuing them. Having wearied their foes, they would envelop them and counterattack at an auspicious moment. Steeped in conventional war, the United States needs to come to terms with this distinctively Eastern brand of warfare.

There's ample reason to believe that Saddam knew about traditional Muslim strategies. Throughout the 1990s, Saddam chafed under the Desert Storm ceasefire terms, especially the UN-imposed sanctions and weapons inspections. In an attempt to slip these bonds, he sought to rally the Arab peoples to the Iraqi banner. He cast about for a symbol that would appeal to Arabs' memories of past glory.

He hit upon Saladin, the gallant 12th-century Kurdish general who had evicted Christian forces from Jerusalem and later fought armies led by Richard the Lion-Hearted to a standstill.

Rhetoric and political imagery linking the 20th Century despot with the 12th Century hero were ubiquitous. In Tikrit, the family seat of both men, a statue of a mounted, mailed Hussein conjured up memories of Saladin. So did similarly garbed statues adorning the dictator's Republican Palaces. A book published by

an official press styled Saddam "Saladin II," while postage stamps showed the two men side-by-side.

Why Saladin? Two reasons stand out. First, the Kurdish champion had been the most powerful potentate of his day, uniting much of the Arab world under his leadership. Second, he had conquered Jerusalem, setting himself apart from other Arab heroes of antiquity. Saladin thus fit nicely into Saddam's diplomacy, which for years had been premised on real and threatened attacks on Israel.

But Saddam Hussein may also have taken his cue from Saladin in military matters. A master tactician, Saladin was skilled at using light cavalrymen to harass, tire out, and ultimately overcome armored Western knights. The feigned retreat was part of his battlefield lexicon. Indeed, as a young man, Saladin had distinguished himself by leading a feigned retreat and a victorious counterattack at the Battle of Ashmunein.

In 1191, during the Third Crusade, Saladin attempted the same feat against an army led by Richard the Lion-Hearted, near the coastal town of Arsuf. Schooled in Muslim tactics, the wily King Richard refused to take the bait. In a rare display of discipline, the Christian horsemen remained on the field of battle, allowing the battered Muslim army to take flight. There was no foolhardy pursuit.

What of Saddam? The Iraqi dictator was famously contemptuous of America's staying power in wartime, largely because--he believed--its leadership was vulnerable to premature war-weariness among the electorate. Not the physical burden of heavy arms and armor but political weakness, in the form of dissension among the American people and their elites, would eventually tire out the United States. It would quit the campaign, as it had in Vietnam, Lebanon, and Somalia.

A prolonged insurgency would sap America's will, allowing Saddam's regime to prevail politically. It would regain power despite battlefield defeat.

If the speculation presented here is true, then, Iraq's Baathist regime replicated Saladin's strategy on a grand scale, ensnaring the U.S.-led coalition in a protracted guerrilla war which, if Saddam calculated correctly, the West lacked the stomach to win. The Iraqi tyrant seems to have erred in this regard, if last week's presidential election is any guide. A majority of Americans declined to turn President George W. Bush out of office over his handling of the Iraq war.

Even so, the United States could encounter similar strategies in the war on terror. If Saddam followed Saladin's lead, and if future antagonists do so, the U.S. military should follow that of King Richard. It should decline to fight on enemy terms. Honing its proficiency in counterinsurgent strategy, police duty, and postwar reconstruction would be a good start.

Who are you trying to convince? Me, or you.

XM=3 million subs

Sirius=1 million subs

(DirecTV has 14 million subs and still loses money, while DiSH has
almost 10 and pays quarterly dividends. Go figure.)

What if you're a Saints fan and not within range of WWL?

The audio quality can be fairly sucky, but not usually.

Where I live, I have a choice between AM hate radio, the Cal State
Northridge too-poor-for-NPR station on FM, weak HF (inless you want to
listen to Japan, Korea or China the shortwave here is very DXer grade
at best), or 220 channels of crystal clear satellite radio.

If you listen to HF Broadcast for the content, Sirius has WRN 24/7.

And who was the ass hole that single handedly gutted the CIA???
It was good ole Bill Clinton. Who was it that "first" said Iraq had WMD's?
It was good ole Bill Clinton, along with John Kerry chiming in right behind
him. You libs need to get to the original source of things before you come
out with these dumb ass statements like the above. You make yourselves
look like fools. Who was in office the First time the WTC was bombed??
and did "nothing" about it??? I'll refresh your memory, it was Bill Clinton.
Who was in office when the USS Cole was nearly sank by the same
group of people, and did NOTHING about it??. It was Bill Clinton.
Who was in the oval office when the military was gutted with many base
closings??? It was Bill Clinton. Who saw to it that the Chinese were
able to steal the technology of our W 31 missile targeting secrets??
It was Bill Clinton,,,, no doubt for a huge campaign contributuions. Shall
I go on and on???? Bill Clinton flushed this country right down the toilet,
for his own personal gain. Oh and who was it again that was getting his
knob polished by a young intern in the Oval Office while foreign dignitaries
were waiting??? Yep good ole BC. He was a great guy wasnt he????
Before you start blaming Bush for "everything" you better take a long
hard look at recent history and see what "Your" guy said about the same
things,,, otherwise you look like a pack of fools. At least Bush had the
balls to do something about the fucking mess he inherited from "your"
"fearless" leader. Why do you think the ragheads had the balls to do
what they did????????? because they thought the U.S. Would
Not do anything about it,,,, as in the past with good ole Bill Clinton.
Oh and then there was Mogadishu,,,,, who was our fearless leader for
that cluster fuck???? why it was good ole boy Bill Clinton again.....
See a pattern here????????.. Is it really any wonder why we were
attacked???

To my delight, I received a Grundig AM/FM/SW radio for Christmas. I have been wanting a radio like this for some time. Now what I need to do is construct an external loop antenna because I will be using the radio in my office and I need to get better reception. The best I can do is locate the antenna inside the building. Can anyone give me information or steer me to a good website for loop antenna plans? I'm really most interested in the medium wave band to 120m band area.

Some may find this to be of interest:

ICOM LAWSUIT

http://www.co.medina.oh.us/judgecollier/jury_verdicts_2004.htm
4-5-04 ICOM of America, Inc. v. Rapid 2 Way Case no. 03 CIV 0078

In this case, the Plaintiff, ICOM America, claimed the Defendant owed $114,000 to Plaintiff on an account for products sold and shipped to Defendant. Plaintiff sold Defendant hundreds of hand-held radios and accessories. Defendant, Rapid 2 Way, purchased these radios for rent and sale in its business. Defendant acknowledged that it owed money to Plaintiff on account, however Defendant claimed the Plaintiff supplied it with substandard and defective radios causing damage to Defendantï¿½s business. Defendant claimed Plaintiff committed fraud in its representations regarding the radios.

The Plaintiff was represented by Kenneth Baker, Esq., and Michael Slodov, Esq., of Cleveland, Ohio. The Defendant was represented by Bruce Hall, Esq., of Medina, Ohio and Gregory Beck, Esq., of North Canton, Ohio.

Verdict: After a thirteen day trial, the jury awarded the Plaintiff $92,915.95 on its claim on the account and attorney fees. The jury awarded the Defendant $579,131.83 on its claim of breach of contract and breach of warranty. The jury awarded the Defendant $774,321.50 on its claim of fraud. The jury further awarded $1,045,837 in punitive damages along with attorney fees (via Robert Frost, Dec 17, DXLD)

DS,
.
Which model of Grundig AM/FM/SW Radio did you get for Christmas ?
.
READ - Three Different Bands AM/FM/SW and Three Different Antennas
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/1038
.
.
FOR AM/MW AND SHORTWAVE LOOP ANTENNA HELP:
.
* "Loop Antenna Information and Design" Forum {eGroup} on YAHOO !
LOOPS => http://groups.yahoo.com/group/gccloopantennadesign/
- Welcome the GCC Loop Antenna Designers and Builders group, this
list is everyone who likes to learn about all bands ELF, VLF, LF,
MF, HF, VHF, and FM broadcast and UHF Loop antennas. Contruction,
tips, help, questions, and websites are welcome to the group.
.
* "SkyWire Loop Antennas" Forum {eGroup} on YAHOO !
SKYWIRE => http://groups.yahoo.com/group/SkyWires/
- This group is for the Radio Experimenter who wants to Learn and
Exchange their Knowledge and 'secrets' about the SkyWire Loop Antenna.
Learn from fellow group members, just how the SkyWire Loop Antenna
works with your radios and receivers. Here you will find Information
and Data on figuring out how to plan and construct a SkyWire Loop
Antennas to cover all your Longwave (LW), Medium Wave (AM/MW/BCB),
and Shortwave (SW) listening needs. Make a SkyWire Loop Antenna a
great addition to your antenna and radio building projects.
.
* "Ferrite Rod Antenna Experimenters" eGroup on YAHOO !
FERRITE => http://groups.yahoo.com/group/FerriteRodAntenna/
This eGroup is for the Experimenter who wants to share or know
some secrets about Ferrite Rod Antennas. Also this is the best
eGroup for Loop Antenna Coupler Design, and also figuring out
how many turns to use to receive LW, MW, or even Shortwave
with a Ferrite Rod Antenna design.
.
* "Shortwave SWL Antenna" eGroup on YAHOO !
SWL => http://groups.yahoo.com/group/Shortwave-SWL-Antenna/
This focus of this eGroup on YAHOO! is the Shortwave (SW) Antenna;
the Medium Wave (MW) Antenna and the FM Radio Antenna: Theory,
Design, Construction, Use and Application for Shortwave (Radio)
Listeners (SWL) and Medium (Radio) Wave Listeners.
- Medium Wave is better know as the AM Radio Broadcast Band

(BCB) 530-1700 kHz where 'smaller' AM/MW Loop Antennas are use.
- The FM Radio Band (87-108 MHz) because it is Very High Frequency
(VHF) has its own unique Antenna considerations.
.
.
iane ~ RHF
.
All are WELCOME at the Shortwave Listener (SWL) "Antenna Ashram"
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/502
Some Say: On A Clear Day You Can See Forever.
I BELIEVE: On A Clear Night . . .
You Can Hear Forever and Beyond, The BEYOND !
[With the an AM/MW - FM - SWL Antenna of your own making.]

Hello,

Having "played" with a friend's heavily modified ICOM IC-R75, I believe this radio is also a "defective" design and is, in fact, a fraud (my opinion).

It appears, at least to me, to be a "bottomless modification pit" costing enough money (and aggravation and disappointment) to make it well worthwhile to just forget about this "Japanese wonder" and buy the Grundig Satellit 800 which costs $449.95 or less. No expensive or inconvenient modifications are necessary for the Grundig! And, it gives at least 95% of the performance of a Drake R8B or AOR AR7030 Plus at only one-third the price.

My friend likes his radio; however, I've commented to him that if he likes it so much, why does he have to keep modifying it? His radio has cost him, thus far, over $1000. (And, he's not a "nut." His concerns with the performance of his radio are well-founded.) For that kind of money, you could buy a Drake or an AOR.

If ICOM were truly a class act, again in my opinion, they would upgrade the 'R75 as its shortcomings are well-known by now, and they should even offer to arrange "fixes" for those radios already in service.
Best,

Joe

http://www.wholewheatradio.org

Whole Wheat Radio is an unpretentious, interactive, independent music world community. The webcast originates from a cramped 12x12 cabin in Talkeetna, Alaska. It's as close to Northern Exposure's funky radio station as you can get. (Yup, there's a moose that hangs around the cabin. And an adorable monkey too.) They broadcast 24 hours/day, 7 days/week, 365 days/year with the help of tireless DJs - human and otherwise. They've been on-the-air since August of 2002 and have served up well over a million individual 'listens' to independent musicians' tunes.

Hi,

I mentioned the Bridgeport, CT station because it was the first station I had to struggle to get. I knew after I heard the WICC call sign that I was hooked! The farthest station I've received is WHAS from Louisville, KY (995 Miles or so). WHAS came in almost as clear as a local signal.

I've noticed that Vermont is absent from my logs so I'm working on that right now. I'm not sure what to shoot for in VT yet. I'm also having some difficulty IDing Canadian stations that broadcast in French.

I checked out the NRC Web page, and I've just joined their AM list which is pretty neat. I've also ordered their "AM Radio Log", so that should help. I won't need the computer on with a good reference book.

I'm looking forward to picking up a signal or two from Europe or N. Africa!

Merry Christmas,
M.

Considering the documented torture at Abu Ghraib prison-which was a notorious torture chamber under Saddam-and all the other things that the Americans have done to them, why WOULDN'T they think that Bush is just a white skinned Saddam in a cowboy hat?

>
> And if they wouldn't leave willingly, then Iraqis have the right
> to kill them until they left. And that's what they're doing.

In fact, she said basically this same point over and over again. There was no mistaking her intent, even with all the interference. Like I said, if her opinion is shared by the majority of Iraqis, then Iraq is a lost cause, and we might as well cut and run. Unfortunately for America, when John Kerry proposed this, he was soundly defeated at the polls because of the cowboy "America never cuts and runs" mentality fostered by his opponent. Even when cutting and running would be the best course of action, Americans are too proud-or too stupid, or both-to do it. Remember what the Bible said: Pride goes before a fall.
>
> The BBC seldom has good news to report about events in Iraq.
> Depending on your ideological bend, that's either because they're
> liberal sops or because there's little good news to report...

I think that it's the conservatives who keep screaming "liberal tard" whenever more bad news comes out on Iraq. They don't want to face reality. The reality is that the Iraqis that we're training to fight for us are using their position to kill us-the bomber was a member of the Iraqi National Guard. We can't trust any Iraqi, and if we can't even be safe on our bases, then what's the point in sticking around?

Unless the damage is bad enough that nothing is working in that region
or country. For example the Maldives highest point is 2 m (6 feet for
the metrically challenged) above sea level. That'd be a bad place to
get hit by a tsunami.

Don't worry about when ILG will be updated. There are many other databases
and lists out there that provide equivalent information:

Prime Time Shortwave - http://www.primetimeshortwave.com/
EiBi - http://www.eibi.de.vu/
FCC HF Seasonal Operating Schedules -
http://www.fcc.gov/ib/sand/neg/hf_web/seasons.html
HFCC - http://www.hfcc.org/

Most of these frequency lists are available in database formats. The EiBi
schedules are fairly hard to parse, but all the others are straightforward.

I highly recommend the Prime Time Shortwave database. The author, Daniel
Sampson, does a great job and keeps putting out updates every week or two.

Icom radios will cost more now, and their still junk.
Look inside an Icom and it looks like the inside of
a Chinese-made $39.95 Radio Shack DVD player.

..and let's not forget the great Icom fiasco of some years ago
(1980's) when Icom deliberately made microprocessor controlled radios
for both ham and swl which had their internal CPU operating system
written into volatile DRAM as a cost cutting measure. (!)

Your radio's lithium cell aged and went bad or
got bumped lose in the mobile and your radio
then promptly D I E D. You could have it "repaired"
of course by sending it off to Icom with a check
for $65.00 to have it "re-programmed".

In ham radio circles this became know as
the "Icom Time Bomb Rig", and their sales of
course promptly dropped thru the floor faster than
a lead-filled baloon falling into a interstellar black hole.

They may have fixed this gaffe long ago, but Icom
still builds radios much like Pakesheesh Patel's family,
what owns the Subway Sandwich shop, builds their
hoagies....slapped together with no condiments (extra
charge, much like Icom accessories) and dry.

Buy a Yaesu instead.
A much more advanced radio all around.

Y'know, when ICOM does well, they usually do VERY well. When they do
poorly, they produce the R1 and the R75.

Unfortunately, one thing they always do is handle criticism *very*
poorly. Especially ICOM America.

I wonder if Mr. Inoue (sp!) knows what is being done in his name over
here?

What am I hearing? According to most R75 owners, it's the best receiver on the planet and with only a few hundred small Kiwa mods, is superior to the R-390. Is this not true?

DaviD,

Heres your Christmas Present :o)
.
FULL TEXT : Eton E1 XM Radio "Up-Date" on Release Date and MSRP Price
.
THE BIG PICTURE : Eton E1 Receiver with XM Satellite Radio
http://www.universal-radio.com/catalog/portable/e1xmlrg.jpg
.
Replt To - RANDY,
.
Thank You for the "TIP"
.
So Eton Corp. is talking and the word is that the
Eton E1 XM Radio will be 'out' Mid January 2005.
.
It is interesting that the Price will be about =Equal=
to the Grundig Satellit 800 Millennium Radio.
.
The 'original' MSRP for the Grundig Satellit 800 M Radio.
was IIRC $699.95 and is now generally priced at $499.95.
Currently Universal Radio has the Grundig Satellit 800 M
Radio "On Sale" at $449.95.
.
Per the Universal-Radio.Com WebSite
http://www.universal-radio.com/catalog/portable/0101.html
"This new model is expected February 2005.
We will post the price as soon as available."
Eton E1 XM AM/FM/SW/XM Radio
Order #0101
List Price: TBA
Your Price: TBA
.
Per the Grundig-Radio.Com WebSite
.
DESCRIPTION => http://tinyurl.com/6numg
http://www.etoncorp.com/US/products/product.aspx?
catID=2&subCatID=4&prodID=9
.
SPECIFICATIONS => http://tinyurl.com/4477b
http://www.etoncorp.com/US/products/product_specs.aspx?
specs=true&prodID=9&catID=2&subCatID=4
.
TECSUN GEM CHINA (PRC) => http://tinyurl.com/58agq

"The Eton E1 XM is the world's first radio that combines
AM, FM, Shortwave, and XM Satellite radio into one ultra
high-performance unit. In development for more than 10 years
in collaboration with RL Drake Company and XM Satellite Radio,
the E1 is simply the finest full-sized portable in the world."
.
CLICK-ON "Ready To Buy" [Add To Cart] Button
http://www.etoncorp.com/US/ecart/view_cart1.aspx
"Shopping Cart" Message for the Eton E1 XM Radio
'Our etón E-commerce site is temporarity under construction
and will be available in the next few weeks.
If you would like to place an order for any of our products
Please Call our at: US Toll-Free Number 1-800-872-2228
and Canada Toll-Free Number 1-800-637-1648.'
.
.
P R I C E - ABOUT THE MSRP AN WHAT YOU CAN EXPECT TO PAY:
I would suspect that the Eton E1 XM Radio will have the
$699.95 MSRP and that for the first few months that they
will be sold at the Full MSRP of $699.95 until the fall
off in 'demand' at that Price-Point warrants a Big
"Price Discount" by the Retailers and OnLine Merchants.
.

And of course, ICOM wasn't taken to court. They took a company to court
for not paying for radios it bought from ICOM.

I still don't see what purpose the original poster had in posting this
here, and anybody who fell into the trap of "someone won against ICOM,
we can bring suit too" didn't pay attention themselves.

Don't be fooled by Gene Scott, Rev. Bob Dobbs is the one messiah!

A bizarre minister isn't he? When I lived in Los Angeles in my early 20's we used to call his 800 number to *uck with him, but then they initiated call screening and when we bypassed that if you didn't give the password identifying yourself as a "Kings House" (the apparent mindless drones who follow him) they hung up immediately

Shortwave is the PERFECT outlet for Dr. Scott, he's rated just below point to point facimile for content.

My only thought is, feed it with balanced line and take the time to
investigate a balanced line tuner, for reception only you can make one
quite easily, you can significantly null noise sources (at times)
and I think for 120m it would enhance the performance.

Thanks for being Exhibit A in my argument. The mindless American mindset of "America always wins, no matter what it takes, no matter what the situation" is a double edged sword. On one hand it shows that we have what it takes to take on a foe like Al Qaeda that has a centuries long view of jihad. But it can prevent Americans from realizing that a certain situation is hopeless, no matter what we do. The situation in Iraq is hopeless. The more we turn the country into a police state, the more the Iraqis see us as having replaced one dictator with another, except the American dictator is a handful of faceless capitalists in New York bent on creating a neoconservative far right wing dictatorship that will allow American oil companies to take all the oil they want and not give Iraqis a dime of the big profits. Osama's chief complaint against America, as ennumerated in a tape released just a few days ago, is that it steals Muslim oil and keeps the oil money to itself and its corrupt cronies. And America proves him right in his view every day it is in Iraq. The original plan to rebuild Iraq had the country totally controlled by Americans. Saudi Arabia is totally controlled by Americans, through their intermediaries the Saudi Royal Family. And we use the country as a filling station and keep the profits while the average Saudi falls deeper into poverty. Iraqis look at Saudi Arabia and say, is this what we want the Americans to make us? And then America acts surprised when the Iraqis say no. Call me a liberal tard all you want, I don't give a flying fuck because I know more about this than the average American conservative/mindless Bush lapdog. The Iraqis are fighting us so fiercely because they know that Bush does not want democracy for Iraq. Bush wants another Saudi Arabia, where the American controlled crony class builds palaces amid decaying concrete hovels, where the people are kept in ignorance so they won't revolt.

Yea its obvious you get all of your wonderful information
from the internet. You obviously dont have any grasp of history,
real history, not the fake shit on the internet. You are also obviously
just another Bush bashing lib,,, please keep up your agenda, its what
got Bush re-elected, because you people are just laughable, and more
and more people are getting wise to the rhetoric. I love the "Im smarter
than you" BS Do you walk on water too???

Heh. Cast "summon phil spell" roll...

I *was* an R75 owner. Great value? Yep. Very good performer? You
bet. Without terrible weaknesses? Nope.

That said, I own several R8500s and think they are terribly underrated
by the radio community. I certainly prefer them to the '75.

Funny... if I look inside my '8500 I see a cast aluminum,
compartmentalized, shielded chassis.

Much as I like my Yaesu gear, their last great receiver was the
FRG-100.

But, whatever. If you want a religious war, find someone else. I
just like gear that works.

I have an FRG-8800, and my only complaint is that power surges or
fluctuations (such as can happen during a power outage) can scramble the
microprocessors. I remedy this by keeping it plugged into a surge
protector that I turn off when the radio is not in use. Other than that,
it is wonderful for 20 year old technology.

I wanted one. They were probably way underrated. I'd like to find a good comparison between it, FRG 7 and FRG 9600 (Digital displays notwithstanding). There was some old stock last year at one of hte Canadian dealers, but I don't know if they still have any. Price was around 8 to 900 dollars.

Someday you will realize that we were right. Unfortunately, by then your
head will be in the process of being severed from your body by some
jihadist after the terrorists have taken over the world. Or you will
think about it in between praying seven times a day and caring for your
three foot long beard. Either way, you will consider what I have to say.
I'm confident of it.

BAGHDAD, December 19, 2004 (IPS/GIN)-The U.S. military has used poison gas and other non-conventional weapons against civilians in Fallujah, eyewitnesses report.

"Poisonous gases have been used in Fallujah," 35-year-old trader from Fallujah, Abu Hammad, told IPS. "They used everything-tanks, artillery, infantry, poison gas. Fallujah has been bombed to the ground."

Mr. Hammad is from the Julan district of Fallujah, where some of the heaviest fighting occurred. Other residents of that area report the use of illegal weapons.

"They used these weird bombs that put up smoke like a mushroom cloud," Abu Sabah, another Fallujah refugee from the Julan area, told IPS. "Then small pieces fall from the air with long tails of smoke behind them."

He said pieces of these bombs exploded into large fires that burnt the skin even when water was thrown on the burns. Phosphorous weapons, as well as napalm, are known to cause such effects. "People suffered so much from
these," he said.

Macabre accounts of killing of civilians are emerging through the cordon U.S. forces are still maintaining around Fallujah.

"Doctors in Fallujah are reporting to me that there are patients in the hospital there who were forced out by the Americans," said Mehdi Abdulla, a 33-year-old ambulance driver at a hospital in Baghdad. "Some doctors there told me they had a major operation going, but the soldiers took the doctors away and left the patient to die."

Kassem Mohammed Ahmed who recently escaped from Fallujah told IPS he witnessed many atrocities committed by U.S. soldiers in the city.

"I watched them roll over wounded people in the street with tanks," he said. "This happened so many times."

Abdul Razaq Ismail, who also escaped from Fallujah, said soldiers had used tanks to pull bodies to the soccer stadium to be buried. "I saw dead bodies on the ground and nobody could bury them because of the American snipers," he said. "The Americans were dropping some of the bodies into the Euphrates near Fallujah."

Mr. Hammad said he saw people attempt to swim across the Euphrates to escape the siege. "The Americans shot them with rifles from the shore," he said. "Even if some of them were holding a white flag or

white clothes over their heads to show they are not fighters, they were all shot."

He said he had seen elderly women carrying white flags shot by U.S. soldiers. "Even the wounded people were killed. The Americans made announcements for people to come to one mosque if they wanted to leave Fallujah, and even the people who went there carrying white flags were killed."

Another Fallujah resident, Khalil (40), told IPS he saw civilians shot as they held up makeshift white flags. "They shot women and old men in the streets," he said. "Then, they shot anyone who tried to get their bodies. Fallujah is suffering too much, it is almost gone now."

Refugees had moved to another kind of misery now, he said. "It's a disaster living here at this camp," Khalil said. "We are living like dogs and the kids do not have enough clothes."

Spokesman for the Iraqi Red Crescent in Baghdad, Abdel Hamid Salim, told IPS that none of their relief teams had been allowed into Fallujah, and that the military had said it would be at least two more weeks before any refugees would be allowed back into the city.

"There is still heavy fighting in Fallujah," said Mr. Salim. "And the Americans won't let us in so we can help people."

In many camps around Fallujah and throughout Baghdad, refugees are living without enough food, clothing and shelter. Relief groups estimate there are at least 15,000 refugee families in temporary shelters outside Fallujah.

Might be a corollary, but I've seen it in print before. I think the first time
I saw it it had to do with the probability of a poster stepping on his crank in
a spelling flame being directly proportional to the snarkiness of the flame.

>November 8th, 2004

Greetings Tony!

An excellent post on what is probably very well going on in Iraq. If one does not learn from history, one is doomed to failure. Prior to the war I saw some of the "music videos" that Saddam produced with him riding a white stallion, sword in hand, leading the charge against Jerusalem. This generation of Americans has no stomach for warand the same for the Vietnam era generation. Technology has it's own inherent flaws; in that it often fails to see and remember the bright sucessful simple ventures of the past.
As I said; this is an excellent post on past and current history, but some will undoubtedly, and probably quite rightly view this as off topic posting. With that said; is there a proper place to post such things? I don't mean ignorant political pot shots missing the real target, but sites that rightly apply history to real time events.
Merry Christmas to you, Tony, and to all the SWL's out there. Thank you for letting us use this forum for this. Tony, I hope you will respond to my question via email so that I can find an appropriate newsgroup with this quality of topics. Sincerely, Jon.

I don't like to step into these political post-But...
don't talk about winning and loosing in VN. there
really was no-win, no-loose in nam. it was a meat
grinder, just like Iraq is now. more money, more
young kids. same-same. lost a lot of good people
then and now. and, don't tell me this ones different,
i see history repeating itself. it's too easy for
someone, who has never been in combat, to send in
more bodies. back then it was the cold war, now it's
just business. still comma's out the same.
out of character for me, but- God bless our men in
Iraq. may they all return alive. i must be getting old...

KDKA is the only radio station East of the Mississippi River that begin's with a K.If I remember,there is only one other radio station West of the Mississippi River (I live about forty miles East of the big muddy) that begin's with a W.But I am old and senile (that married Irish woman wayyyyyy over across the big pond spells senile with a p) and I don't remember exactly.

I can come up with at least two K calls other than KDKA, they are KFNS, Wood River, Illinois and KQV also in Pittsburgh, there may be a couple more, but they are indeed rare these days.

You can listen to stuff on those but I would recommend staying away from sw sets with TV coverage. In my experience, every radio I've ever used with TV reception was terrible. Those little am/sw sets like you stated above should be fine. There's guys in here that know more about those little radios than I do and they can tell you which one's best but stay away from those TV reception types. Just my 2c

go to ebay for a used radio. you can get an older multi-band radio for that price. get an older analog type radio with the linear dial. you can get a higher quality radio with better performance than a new $20 digitally tuned radio will have. then while you are listening and learning about shortwave you can save for a $100 digital radio. by the time you have saved you will know enough to really appreciate the digital difference. great deals are out there for a patient buyer. i have several $100- plus radios that i bought NEW for less than $50. in a years time radioshack will close-out an expensive radio for half price or less. in the end you can have more radio for less money while still enjoying your larger and nicer (even if older) analog set the whole time!

You ought to think about plugging it into a small UPS then, as surge
protection normally clamps at 330v and provide no power conditioning
(voltage regulation) whatsoever.

I tend to agree with the thrift store approach for this one, it may take a few weeks of searching but when out and about stop in to local Goodwill and Salvation Army - you'll get a great radio and help others at the same time. I recently scored a Zenith Trans-Oceanic Royal 3000-1 for $19. Schwweeet! While your at it, rummage for some thrown away TV's, depending on thier construction many have flyback transformers, newer ones have switching power supply transformers that have #24 wire that can be unwound and make a great inexpensive starter antenna. I got 65' of #24 from a TV transformer once.

I had a '-100 and a '-7. Both nice radios. The '100 suffered from chugging and other synthesizer noise, but behaved well, otherwise. It was underrated, and the need for a keypad was overstated -- it had a number of aids to allow you to get to any arbitrary place on the spectrum in a hurry without direct frequency entry.

The '7 was built like a tank. Just a different generation of design and construction standards. A fun radio to operate, but in these days of 1 Hz resolution probably not considered "practical." I would have killed for one back in its day, though.

Hi,

Happy holidays.

The reason I'm after ILG's is that it meshes very nicely
with Mark Fine's (no longer supported) Radio Listeners Database (RLDB).

Have no idea how to format these others and have RLDB read them.

Any ideas on how to ?

Regards,
Bob

Wing it, just like we always did.

You do not need a computer to listen to, or log, radio stations.

I didn't even have a computer, yet I logged and yes, even QSL'd over 200
shortwave countries.

Hi,

Question on ACARS:

Curious about how Acars is actually utilized, and for what purposes.

Is this used only for company communications air to ground, and ground to air communications,
such as in-flight maintenance problems, arrival times, etc., or does the flight also use it to contact
the FAA for clearances, etc. ?

Thanks,
Bob

I'm having a ball listening to BBC's "Pick of the Year" program, featuring some of the top stories and reports from 2004. I listened in the bathroom while I was shaving and I listened in the kitchen, and now I'm listening in the computer room. I'm listening on my new Grundig Mini 300PE my son gave me for Christmas. What a great little portable! It makes SWLing more fun.

Who needs that old NRD-525! No room for it in the bathroom!

Merry Christmas to all,

Greg

Inferior, and inexpensive junk, will do nothing but frustrate you.
Save-up a few bucks, and get something decent. Thrift stores might yield
a buried treasure. Just exercise a little patience, maybe utilize an old
coffee can for a "piggy-bank". Darren

dxAce: that's an excellent point. I too have thousands of logs that I identified without a computer.

All you really need to do is spend 5 or 10 minutes listening to the station to identify it. And if you have a copy of Passport to World Band Radio or the WRTH, you can ID the station much more quickly.

Farmer Christmas struggled down my chimney with a large package and out
popped an Icom IC-756 PRO III which is now working side by side with my
Drake R8B.
The performance of the new Icom is extremely good
= very tight filters, amazing spectrum frequency scope, very good audio.
Generally seems able to clarify that very faint audio of weak DX somewhat
better than the Drake.
But the Drake's not going to the scrap heap just yet, it's still an awesome
radio.

A very HAPPY CHRISTMAS to you too Burr in the great Republic
and to all of you out there = have a great family day.
It's been a sweltering 35C/95F here at the Southern tip of Africa
with the summer thunder storms kicking up a huge static on the radio's.
and I'm struggling to digest all the Brazilian turkey I ate...

Let's not boycott him/her. It's gotten a lot better. Here's some old hatred but good hatred from our LMAO'er at the world and hating every minute Steve L:

Drum roll please......

10. I get the impression that you shit yourself everyday.

9. No, but you're probably whacking off just thinking about me,

8. Yep, typical German, still wanting to kill people.

7. Get back to me sometime when you've got your shit in the properly sized sack.

6. I've got the feeling that he spends a lot of time 'loving himself', if you know what I mean.

5. And no, Canadians are anything but heroic, they're mostly wimps like you who fantasize about guys walking around in womens underwear.

4. Sorry, yo Grandpa was a member of the NAZI Party, and yo Momma was a member of the Hitler Youth.

3. Death to lying academics is what I say! Long live the jihad to purge our educational institutions of lying scum!

2. Really? And just what kind of crystal ball did your NAZI handlers give you that would show that I've never had any relationships with women?

1. You ain't got a clue! Now go look in the mirror, I think your tin foil hat is just a wee bit askew.

Honorable Mention - You got's to be a really messed up piece of shit, boy.

And >>

10. Real Americans don't lie about having a PhD!

9. Do your kids refer to you as Super Dumb Dad behind your back? I'll bet they do.

8. Now, stop your whingeing and take your insulin, Brybaby.

7. And you have chosen the option of being a fat piece of shit liar and fabrictor!

6. Why don't you get 'real' and shut the fuck up. Go outside and watch for the black helicopters.

5. Pot smoking, drug abusing, lying fabricator and all around asshole seems to fit you to a 'T', Fat Boy!

4. When pigs fly! Heck, when Fat Boy's fly!

3. Get your finger out of your fat ass and start typing!

2. Bring me the head of Michael W. Bryant.

1. Just because Cheeto's are relatively cheap doesn't mean you have to make them your #1 food source!

And >>

10. You can barely find your ass to wipe it!

9. I think we do care Fat Boy, that's why we recommend you drop the Cheeto's and get off the drugs.

8. And of course you are to fat to dance!

7. I don't think he has conscious control over much of anything. I'll bet he wears Depends!

6. His problem is he 'ain't be payin' attention' most anytime he is awake. Except when a bag of Cheeto's catches his eye, then he be payin' attention fer sure.

5. All you do is lie and fabricate you fat piece of hillbilly trash!

5. Until then, you'll remain an in-bred, piece of hillbilly shit!

3. And you're just a plain stupid idiot... now take your fat hillbilly ass elsewhere.

2. Michael 'I've discovered that I can hide half a bag of Cheeto's in the crack of my ass' Bryant wrote:

1. You claim to be 'Cherokee'... I think you're just 'Wannabee'...

JD,

Rope through the Pully.

Rope tied onto the Weight.

Figure your Rise-and-Fall movement and
tie-off the extra Rope at the Center Point
of this movement with just enough slack
allow the Weight to Rise-and-Fall with
the Movement of the Antenna Wire.

Having the extra Rope Tied-Off in this
manner acts as a back-up to the Weight.

BH,

There was $35 Million in the International Refief Emergency Fund.

President George "W" Bush Pledged It ALL (100%) !

When Congress returns next week he has sent a 'request'
for more Funding.

PLEASE NOTE: Congress is "On Vacation" {Out-to-Lunch ;-}

Spending Bills Start in Congress and the President did all
he could legally do while Congress is Taking-a-Vacation.

You don't know enough vets. Many of them oppose the war in Iraq,
especially if they've been there.

I'm new to this newsgroup, and have quickly learned how to make use of filters to remove the "political" posts. After all, if I'm going to read an opinion article it's not going to be a cut-n-paste job in this group. I believe that you are excluding a part of the picture, that is, unless you believe the barrage of anti-war posts are meant to edify & persuade. Regarding your proposed boycott, I have no commercial dealings here. I think, perhaps, that you intended to say censure. That said, I have indeed evaluated "his behavior" and I am inclined to leave DxAce out of my filters. I find his posts helpful.

Cordially,
M.

The problem is, the article didn't state that.

now, if it had stated that air traffic controllers had used radar to plot aircraft positions and asked pilots for a direction on the sited beam, that would have made some sense.

as I stated elsewhere, that fact wasn't presented in the article (thus
making it sound as though radar can track a laser directly).

Serial starting with a "4"....is not this one of the "older" SW-8's that
start coverage on 500KHz (not 100KHz).....it may not have Selectable
Sideband Sync, just "Sync" on AM.

The seller is referencing website info pertaining to the "later" model that
is much different from his "early" version.....not the same radio.

Am I correct here?

The New Year is in the Pacific. And it is rapidly approching Australia. Radio Australia is currently being heard here on 9590.

Later I'll switch to 4890 Papua New Guinea for New Year there.

dxAce
Michigan

I doubt seriously that I'll make it till midnight. Just got home from a great Bellamy Brothers concert on post, and am pretty tired out. Sooooo....

HAPPY 2005! May it be a damn sight better than 2004, and may it bring comfort to those in need.

Take care, all, and stay well.

FO&A,
.
Per DXing.Com => http://www.dxing.com/rx/sw8.htm
.
* Units produced after 03/31/95 (S/N >= 5C) feature
a preamp circuit for the telescopic whip antenna.
.
* Units produced after 01/01/96 (S/N >= 6A) include coverage
down to 100 kHz (long wave) and have Selectable Sideband Syncro.
.
This SW8's Serial Number is: 4B12950064
So it would be one of the original early production units
without the three above "Improvements".
.
that is all ~ RHF

Considering the news we get from other countries about how everything we
do is considered wrong somehow...

Exactly why should anyone in the US give a flying fuck what happens
outside the US?

We are going to catch hell for doing it, no matter what.

3954. Radio Heritage Foundation launches web site

Newsgroup: rec.radio.shortwave
Date: 2004-12-31 15:09:42 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <cr3q3m$4va$1@xuxa.iecc.com>
Source record: 3953
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

December 22 2004

A new web site (www.radioheritage.net) has been launched to celebrate the story of radio broadcasting in the Pacific region, and to provide a home for a wide variety of radio heritage activities, exhibitions, archiving, research and advocacy projects covering New Zealand, Australia, the Pacific Islands and reaching as far as countries around the Pacific Rim.

'Radio has a long history in the Pacific' says Radio Heritage Foundation chairman David Ricquish.

'In fact, it's even claimed by some biographers that "Rutherford began what Marconi completed" in which case, New Zealand is the real home of radio broadcasting in the modern age'

Whether New Zealand's Lord Rutherford was indeed the true father of radio instead of Marconi is one of the hundreds of fascinating topics the Radio Heritage Foundation plans to investigate in the near future.

Currently, www.radioheritage.net contains information about various projects which the Foundation has underway, highlights radio heritage issues, and a selection of articles from its on-line archives project.

'We have hundreds of articles and thousands of images already available from our collections' says David Ricquish, and we'll be bringing these on-line as fast as resources allow. Our definition of "heritage" is anything up to a nano-second ago, so contemporary radio issues are as important to us as those of the 1920's or any other era' he adds.

'Radio has touched every aspect of our lives for almost a century now' says David Ricquish. "It has a social history, cultural, artistic, technological, heritage, genealogy and entertainment context' he says, 'and this web site, and indeed, the whole project, helps us understand just what the impact of radio on our lives continues to be in the new digital era.'

The Radio Heritage Foundation is a non-profit charity based in Wellington, New Zealand. Board members include prominent broadcasters from New Zealand, Australia and Europe and a growing number of contributors and volunteers loc ated across the Pacific from the USA, Canada and Japan, to Australia and New Zealand.

The observatory has a 16" classical cassegrain with optics by Perkin Elmer and a 4" Unitron.

I have a bad back so none of my personally owned stuff is large.

I have a C8 on a german eq mount I built with a friend that's used infrequently. I also have a Brandon 80mm apo that's very portable, and a Zoomar Reflectar 1000mm f8 camera lens that was converted to a telescope.

When I'm not at the observatory, the scope I'm most likely to use is a TMB 175 apo refractor on an ap 900gto mount that's owned by a close friend. It's an incredible scope - but I wouldn't want to have to heft it on a regular basis. He's got a TMB 229 on order.

I'll be getting a TMB in the general range of a 115 when I identify a mount that's sturdy enough for astro photography but portable enough to take on a plane. (It doesn't get much better than hanging out by the pool in Naples on a clear night with a nice refractor and my 7030+)

The camera lenses I'm most likely to use for astro photography are a Questar 700, a Nikon 80-200 f2.8 and a Kilfitt 600mm f5.6. I've been fortunate enough to acquire most of the Alpa long focus lenses, but since getting the D70 I'm just not using film very often.

I've also got a 5" F8 apo triplet lens in cell I picked up at Stellafane, but I'm gonna have to get it checked out before I build a proper tube for it.

When I put it in a quick and dirty tube for preliminary testing, I didn't see color, but images were soft when I used anything shorter than

a 40mm eyepiece. It could be my tube was a little too quick and dirty - or it could be the seller is a graduate of the radio-mart ethics institute. A 5" f8 would be great for weekend getaways. I've got a 4" focuser for it, and if it's good, I'll pick up a feathertouch too.

Regards,

Mark

I picked one up a couple years ago when it was on sale. I used it by the bedside for a few weeks and then returned it. It just didn't seem like it was very sensitive.

I should just pick up another R8 and run some coax into the bedroom.

There may be a lesson to be learned here. It *could* happen here (wherever here is to any reader of this NG) and we should do what we can while we can to "be prepared" as the Boy Scouts would say.

I realize it wouldn't do much good to have had a year's supply of stored food and water, along with medical supplies, etc., etc., etc., if they were near the water's edge when a Tsunami / Tidal Wave hit. However, not all of us live on the brink of a 7000 mile pond or at sea level. Even then and there some buried supplies might have survived. Think about it!

There WILL be an emergency of some kind in the lives of most of us; but someone has said, "There is no emergency to him who is prepared!" We can lessen the number of "emergencies" that come our way be preparing for as many eventualities as possible.

Al

The job obviously killed him. Twenty four hours a day for decades..A lesser man would have snapped. I wonder what kind of coffee kept him going.

A monument to his vocal chords and determination should be erected NOW.

He must have done his newscasting *in between* the minute announcements, cleverly disguising his breaks every sixty seconds as 'breathing intervals'.

There are rumours his identical twin has already taken over, without missing a beat.

Wow! Your really into it. I would love to have a TMB 175. Your fortunate to
have such great equipment at your disposal. I'm just getting started and I

love my C8. I'm going to start building my observatory next summer. It'll have an nice warming room attached and I want to put a Sirius dome on the observatory area. I'm lucky to live in a area with very dark skies so it's quite rewarding.

(In case I sent my original reply to your private email; or I replied and I sent the message to who knows where; or I'm starting to have senior moments and only thought I replied: let me try again.....)
Congrats on your new radio! After it arrives, please share with us some of your thoughts and likes/dislikes about the radio. I hope it improves radio reception at your office. By the way, just as a reminder, as I'm sure you're already aware of this, but...you do know that when receiving MW signals (AM BCB), you need to swivel the radio one way or another to align the internal loopstick with the broadcasting station(?) I only mention this because you had said you used a boombox in your office, and I just didn't know if you were able to swivel the boombox (which is normally a large radio in an office enviroment) for improved reception. It's one of the advantages of using a smaller travel radio like a 7600GR or YB400 -- to swivel and/or position as needed. Anyways...let us know how it goes, and have fun!

There is NO EXCUSE for maintaining even a modicum of control during a major Brother Stair Prophesy.

Brother Stair started his prophesy by reading from some other prophet's prophetic dream, presumably dreamed up in the 1930s. In that dream, the dreamer was in the Los Angeles of the future. There were busses and strangely shaped cars on the street. People were walking a weird walk, which the dreamer couldn't master. Men had long hair and ear rings. The Los Angeles of the future was set in 1969! Brother Stair sounded as if he hadn't had time to prepare and was reading his material cold. The prediction, or perhaps postdiction, ended with a severe earthquake.

Amazingly, the LA quake pre or postdiction was just the warm-up for the magnificent Millitsunami Prophesy.

Brother Stair then read some material about a potential Atlantic earthquake. He was stumbling over the size of the wave, and seemingly decided that fifty millimeter waves were far more frightening than fifty meter waves.

Brother Stair got to the part about the damage done to the cities. "Ahhh, the cities!" The Prophet of God started ad-libbing. "New York, Chicago, Boston...."

Between the so-called 1930s 1969 LA quake postdiction and the prediction that Chicago would be wiped out by fifty millimeter waves in the Atlantic -- well, I just lost it. It took about fifteen minutes for normal breathing to resume.

I really doubt such weirdness does any harm to Brother Stair's cause. His donors don't need to know the difference between a meter and a millimeter or even that Chicago is an inland city.

Run? Just where should New Yorkers and Bostonians run to? Brother Stair's millitsunami could wipe out EVERYTHING from Chicago back to the East Coast, a distance of hundreds of miles.

Although, given Brother Stair's prophetic accuracy, any lazy perambulation will be more than sufficient.

Brother Stair's prophesies only get better with each retelling. Who can forget the Reagan Prophesy? Brother Stair's outstanding Planet X Prophesy aged like fine vintage wine, particularly after May, 2003.

The Millitsunami Prophesy was already a re-run. Brother Stair gave last Monday's date.

The rigor mortis point is just a continuance of Al's "hands raised to Jesus"
argument, separated only by time.

However, the idea that anyone would agree with Al, even adding a logical
extension, is even farther up the novelty scale than Al's original thesis.

Well done, sir!

Very nice, but tell me, after the four (4) hurricanes devastated Florida in this past year, how much money did anyone give us?

Hmmmmmm?

How much did we spend on WWII, how many loans, and how much has been repaid?

Hmmmmmm?

I can't go anywhere today! Those old Three Stooges movies are running back to back on tb now.(tb,Dennis the Menance,tb) A million years ago when I went to school,sometimes the school would run a Three Stooges or Little Rascals movie and I would beg my mom for a dime so I could see the movie.I used to sit in the balcony with the other boys and we would throw stuff down on the girls down there.

The nun's are painting the convent, and not wanting to get their
attire stained with paint and figuring it's a convent anyway they
stripped off their garments and painted away in the nude. Upon
hearing a knock on the door one of the nuns asks "Who's there" and
hears the reply "Blind man". So fearing nothing the nuns remain naked
and open the door; the man walks in and says "Nice tits, where do you
want me to hang the blinds?"

What can I say, your comment on the convent sparked a synapse ......

3995. Reduce wireless signals

Source record: 3995

http://informationweek.com/story/showArticle.jhtml?articleID=56200676

By Jim Nash
Dec. 28, 2004

A small startup in Silicon Valley has an anti-intrusion tool that sells for $69 a gallon--you supply the brush.

Force Field Wireless makes three products that it says can dramatically reduce the leakage of wireless signals from a room or building. The company's sales manager, Harold Wray, co-developed DefendAir Radio Shield latex paint, which contains copper filings and an aluminum compound. When spread evenly on a wall, the paint reflects signals in frequencies from 100 MHz to 5 GHz. Paint four walls, a floor, and a ceiling, and you effectively have a Faraday cage, which is a specially constructed metal room that blocks all radio signals in or out, suitable for a CIA director or a determined shut-in.

"It was my concept along with my colleague, Diane Lopez," says Wray, a former network engineer with Networks Associates. "We knew of people inundated with interference on their wireless systems. In fact, Diane, in her apartment, could find eight wireless networks around her. She needed to shield herself."

Pete Lindstrom, research director at Spire Security, says the idea is intriguing. It's for people who have a "mid- to high level of comfort with wireless," Lindstrom says. "The really security conscious are going to ban wireless altogether."

DefendAir is nontoxic, contains no lead, and meets all U.S. Environmental Protection Agency standards, Wray says. Besides the paint, Force Field sells 32 ounces of a copper/aluminum powder that homeowners can add to their own paint for $34. The company also makes a window film that cuts down on signal leakage: A 30-inch-by-25-foot roll is priced at $45.

"This wouldn't be the first thing I'd do to secure a network," says Spire Security's Lindstrom. "But in a crowded environment, in an office complex, it might be a thing to do." It's better to implement a solid authentication/encryption system, he says.

Force Field's Wray says sales are going well. A paint manufacturer delivers 100 gallons once every two months or so, and the paint was sold out last quarter. Businesses make up the bulk of Force Field's customers, but Wray is pushing hard to win over consumers and looking at government sales, too.

"Businesses--particularly commercial real-estate developers--see an immediate need for it," he says.

Indeed, 71% of those responding to InformationWeek Research's Outlook report for the fourth quarter of '04 say they plan to implement network-security-management apps. Sixty percent say they plan to deploy intrusion-detection software, and 42% plan to fire up wireless IP-based apps.

"Consider [radio-frequency identification], where not only are we talking about wireless networking but the whole value of RFID is the message emanating from the tags," says Lindstrom. DefendAir would be an attractive option to protect an RFID-enabled warehouse, he says.

There are drawbacks to the paint. It doesn't just block wireless networks. In the home, it would block the one or two remaining TVs connected to rabbit ears. More important, it blocks mobile-phone signals. Wray suggests that businesses either paint only critical parts of buildings or introduce wireless callers to the smokers huddled around the front door.

Convincing consumers to take wireless security seriously has been harder. "They see it like tinfoil on your head," Wray says. "They think it's kind of paranoid."

Force Field has been trying to interest the Department of Homeland Security, but discussions are ongoing, Wray says. "Ironically, we have had foreign governments contact us--from the Middle East. Kind of scary." Wray says he won't sell to them.

Race: Any of the different varieties or populations of human beings distinguished by a) physical traits such as hair, eyes, skin color, body shape, etc.; traditionally, the three primary divisions are Caucasoid, Negroid, and Mongoloid, although many subdivisions of these are also called races b) blood types c) genetic code patterns d) all their inherited characteristics which are unique to their isolated breeding population. [Webster's New World College Dictionary 4th Ed]

Racist is not in that dictionary, but someone has said that a "racist" is anyone whom the Jews do not like. I suppose others would add more races to that so one can make many variations on that same theme.

St. John 1:1-3 KJV, referring to Jesus Christ, tells us, "1) ☐In the beginning was the Word, and the Word was with God, and the Word was God.☐ 2) ☐The same was in the beginning with God.☐ 3) ☐All things were made by him; and without him was not any thing made that was made."

The Amplified renders it this way, "☐IN THE beginning [before all time] was the Word (☐☐Christ), and the Word was with God, and the Word was God ☐☐Himself. ☐[Isa. 9:6.] 2 ☐He was present originally with God.☐ 3 ☐All things were made and came into existence through Him; and without Him was not even one thing made that has come into being.☐
4 ☐In Him was Life, and the Life was the Light of men.☐"

Now, If everything that was made, or came into being, was by and through the Lord Jesus Christ and if the races exist, as they do, then Jesus Christ made the races! I suppose you'd call Him a racist! ...In addition to all the other things the Talmud accuses him of being? You'll really think He is a racist when you get to know some of His sayings!

2 Samuel 3:18, (NASB95) “Now then, do it! For the Lord has spoken of David, saying, ‘By the hand of My servant David I will save My people Israel from the hand of the Philistines and from the hand of all their enemies.’”

Notice: The LORD [Jesus Christ] promised David that He would save His people ISRAEL from the hand of the Philistines AND FROM THE HAND OF ALL THEIR ENEMIES! Looks like Jesus Christ (The Lord, God) took sides, thus becoming, in the eyes of all but Israel, A RACIST!

Zechariah 8:7 is similar.

Notice Matthew 15:26 where Christ tells the woman wanting a miracle that it is not fit to take the Children's bread and throw it to DOGS. Was He calling her or her people dogs? SHAME!

Now let's take a look to see what Colossians 1 tells us about this RACIST. Colossians 1:12-17 (KJV)

12 Giving thanks unto the Father, which hath made us meet to be partakers of the inheritance of the saints in light: 13 Who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: 14 In whom we have redemption through his blood, even the forgiveness of sins: 15 Who is the image of the invisible God, the firstborn of every creature: 16 For by him were all things created, that are in heaven, and that are in earth, visible and invisible, whether they be thrones, or dominions, or principalities, or powers: all things were created by him, and for him: 17 And he is before all things, and by him all things consist.

Especially look at verse 14. We have redemption IN CHRIST, THROUGH HIS BLOOD [Could this be why the enemies of Israel don't want us to believe in the Bible or Jesus Christ? You know every time the stock market goes up or down someone wins and someone else looses! According to Deuteronomy 28 and 32 this is the case with Israel. IF they keep God's laws He will lift them up and put others beneath them. IF they do not keep His laws He will LIFT OTHERS UP and PUT ISRAEL DOWN! See why so many hate Israel?] . . . But I digress. Let's jump right to verses 16 and 17.

Brackets / comments are mine: 16 For by him were all things created, that are in heaven, and that are in earth, visible and invisible, whether they be thrones, or dominions, or principalities, or powers: all things were created by him, and for him: [You mean this Guy whom the Jews crucified was the CREATOR of ALL THINGS? They were created FOR HIM? Not for our enjoyment, entertainment, or corruption!? ...even the INVISIBLE? ...Kings? ...Kingdoms? ...Presidencies? ...The United Nations? ...Tsunamis? ...Earthquakes? ...The Ring of Fire? ...All of them were created BY HIM AND FOR HIM! WOW! WOW! ... W O W !]

Verse 17, "And he is before all things, and by him all things consist." [...he is BEFORE ALL THINGS, eternal, non-created, self-existent - before ALL things! wow! and BY HIM ALL THINGS CONSIST! Are you serious? He not only MADE all things He MAINTAINS, SUPPORTS, KEEPS UP,

CONTINUES, HOLDS TOGETHER ALL THINGS! wow! Did you ever consider what would happen if He just decided to let go and let man run things for himself? He may be doing just that. Like a parent who allows a child a bit more freedom one item at the time just to see if they are then able to handle that situation. God, Jesus Christ, whom many love to hate, just may have allowed us to learn about magnetism, matter, anti-matter, gravity, anti-gravity, low frequency sound waves, scalar energy, controlling people, controlling things, just to see if we'd do as we should with such information.

I thought about posting concerning the Rainbow and the Ring of Fire, but won't say much for now. God gave the rainbow as a sign in the heavens that He'd never destroy the world by flood again. He will destroy, purge, renovate, renew the earth at some future time BY FIRE. Keep a check on the earthquakes and volcanoes. He just *may* be getting ready to show us a few things. Oh, yes, many will call it "natural" disasters, but I wonder. Did you ever notice if anything good ever happened some man tries to take credit for it, but if anything bad happens they call it an "act of God" ? Maybe God has decided to act! ...as if He only acts when something bad happens!

Yep! God is a racist! He brought all kinds of plagues on Egypt and none of those plagues touched the little area called Goshen where the children of Israel lived! He drowned all the kings horses and all the kings men, but allowed the children of Israel safe passage. He casts some into hell and will give some eternal bliss. He killed the kings men who cast the three Hebrew children into the fiery furnace but allowed them to walk about in a furnace heated seven times hotter than ever before. They came out unbound and without even the SMELL OF SMOKE on their clothing! He allowed Daniel to rest peacefully in the lions den - totally unharmed -- but had the lions break the bones of those conspirators who had Daniel thrown into that same pit with the same lions -- before their bodies could hit the floor!

Yep! God is really a racist God! Those that are his, purchased by the blood of His dear Son, are going to be protected and provided for while others will perish in ways that even the minds of the vilest of men can not imagine, today! This is not to say that Christians will not see trials and tribulations! Some will give their lives for Christ. Many already have. But, in the end, it will far surpass Allah's "promise" of seventy virgins! Our God doesn't lie! His Word will come to pass.
Get ready!

Al

This is one of the things we discuss a lot over on misc.survivalism
(in among the name calling, flame wars, OT posts, and rampant egos.
It reminds me so much of this place...). What is a danger, and
how do you prepare for it? We consider pandemics, earthquakes,
blizzard, forest fire, the Yellowstone supervolcano and the
massive chunks of the Canary Islands (in the Atlantic) and the
Hawaiian Islands (in the Pacific) that are at risk of breaking
loose and sending walls of water even HIGHER than the Sumartarn
quake at their respective shores...

Of course, one of the first steps in being prepared for disaster is being informed. And having a good radio - especially a shortwave one so you can hear news that the American media doesn't report - is at the top of the list for that...

Metro Family Blames Death on War Related Illness
December 29, 2004

The family of a metro soldier fears he died from a war-related illness.
They shared their story exclusively with NBC Action News.
35-year-old Army Sergeant Clay Garton spent 16-months in Iraq. His family says ammunition used by soldiers poisoned him. They claim he was exposed to depleted uranium dust during a rescue mission in Fallujah in May.
The government contends the health risks are low.
Clay&#65533;s dad Duane Garton says, "Thirty-five years I had the boy. He went through 16 months of hell, he come back, and they didn't do nothing for him. That's what I don't understand, why they couldn't do something for him. They just let him lay there and keep going down and down."
A memorial fund has been set up to benefit Clay Garton's three children.
To donate, call the Raytown branch of the Bank of America at (816) 979-6292.

Hmm.. I've thought about that, but I think that the
kids wouldn't go for having a brick hanging off of
a pulley on the end of their wooden playset, and
my wife would freak if I did that at the other end,
where our screened in porch is.

I may just keep it with the poly rope in pretty
much an as-is configuration for a while, and see
how it goes.

--Mike L.
